## Summary

China's actions for asserting and defending its maritime territorial and exclusive economic zone (EEZ) claims in the East China (ECS) and South China Sea (SCS), particularly since late 2013, have heightened concerns among observers that ongoing disputes over these waters and some of the islands within them could lead to a crisis or conflict between China and a neighboring country such as Japan, the Philippines, or Vietnam, and that the United States could be drawn into such a crisis or conflict as a result of obligations the United States has under bilateral security treaties with Japan and the Philippines.

More broadly, China's actions for asserting and defending its maritime territorial and EEZ claims have led to increasing concerns among some observers that China may be seeking to dominate or gain control of its near-seas region, meaning the ECS, the SCS, and the Yellow Sea. Chinese domination over or control of this region, or Chinese actions that are perceived as being aimed at achieving such domination or control, could have major implications for the United States, including implications for U.S.-China relations, for interpreting China's rise as a major world power, for the security structure of the Asia-Pacific region, for the longstanding U.S. strategic goal of preventing the emergence of a regional hegemon in one part of Eurasia or another, and for two key elements of the U.S.-led international order that has operated since World War II—the non-use of force or coercion as a means of settling disputes between countries, and freedom of the seas.

China is a party to multiple territorial disputes in the SCS and ECS, including, in particular, disputes over the Paracel Islands, Spratly Islands, and Scarborough Shoal in the SCS, and the Senkaku Islands in the ECS. China depicts its territorial claims in the SCS using the so-called map of the nine-dash line that appears to enclose an area covering roughly 80% (some observers say as much as 90%) of the SCS. Some observers characterize China's approach for asserting and defending its territorial claims in the ECS and SCS as a "salami-slicing" strategy that employs a series of incremental actions, none of which by itself is a *casus belli*, to gradually change the status quo in China's favor. At least one Chinese official has used the term "cabbage strategy" to refer to a strategy of consolidating control over disputed islands by wrapping those islands, like the leaves of a cabbage, in successive layers of occupation and protection formed by fishing boats, Chinese Coast Guard ships, and then finally Chinese naval ships.

In addition to territorial disputes in the SCS and ECS, China is involved in a dispute, particularly with the United States, over whether China has a right under international law to regulate the activities of foreign military forces operating within China's EEZ. The dispute appears to be at the heart of incidents between Chinese and U.S. ships and aircraft in international waters and airspace in 2001, 2002, 2009, and 2013.

The U.S. position on territorial and EEZ disputes in the Western Pacific (including those involving China) includes the following elements, among others: The United States takes no position on competing claims to sovereignty over disputed land features in the ECS and SCS. Claims of territorial waters and EEZs should be consistent with customary international law of the sea and must therefore, among other things, derive from land features. Claims in the SCS that are not derived from land features are fundamentally flawed. Territorial disputes should be resolved peacefully, without coercion, intimidation, threats, or the use of force. Parties should avoid taking provocative or unilateral actions that disrupt the status quo or jeopardize peace and security; the Senkaku Islands are under the administration of Japan and unilateral attempts to

change the status quo raise tensions and do nothing under international law to strengthen territorial claims. The United States has a national interest in the preservation of freedom of seas as recognized in customary international law of the sea. The United States opposes claims that impinge on the rights, freedoms, and lawful uses of the sea that belong to all nations. The United States, like most other countries, believes that coastal states under UNCLOS have the right to regulate economic activities in their EEZs, but do not have the right to regulate foreign military activities in their EEZs.

The situation concerning maritime territorial and EEZ disputes involving China raises several potential policy and oversight issues for Congress. Legislation in the 113<sup>th</sup> Congress concerning maritime territorial and EEZ disputes involving China in the SCS and ECS includes Section 1257 of H.R. 1960 (the FY2014 National Defense Authorization Act), H.R. 772, and S.Res. 167.

## Introduction

China's actions for asserting and defending its maritime territorial and exclusive economic zone (EEZ)<sup>1</sup> claims in the East China (ECS) and South China Sea (SCS), particularly since late 2013, have heightened concerns among observers that ongoing disputes over these waters and some of the islands within them could lead to a crisis or conflict between China and a neighboring country such as Japan, the Philippines, or Vietnam, and that the United States could be drawn into such a crisis or conflict as a result of obligations the United States has under bilateral security treaties with Japan and the Philippines.

More broadly, China's actions for asserting and defending its maritime territorial and EEZ claims have led to increasing concerns among some observers that China may be seeking to dominate or gain control of its near-seas region, meaning the ECS, the SCS, and the Yellow Sea. Chinese domination over or control of this region, or Chinese actions that are perceived as being aimed at achieving such domination or control, could have major implications for the United States, including implications for U.S.-China relations, for interpreting China's rise as a major world power, for the security structure of the Asia-Pacific region, for the longstanding U.S. strategic goal of preventing the emergence of a regional hegemon in one part of Eurasia or another, and for two key elements of the U.S.-led international order that has operated since World War II—the non-use of force or coercion as a means of settling disputes between countries, and freedom of the seas.

The situation concerning maritime territorial and EEZ disputes involving China raises several potential policy and oversight issues for Congress. Decisions that Congress makes on these issues could substantially affect U.S. political and economic interests in the Asia-Pacific region and U.S. military operations in both the Asia-Pacific region and elsewhere.

The specifics of China's maritime territorial disputes with other countries are discussed in greater detail in other CRS reports.<sup>2</sup> Additional CRS reports cover other aspects of U.S. relations with China and other countries in the region.

---

<sup>1</sup> A country's EEZ includes waters extending up to 200 nautical miles from its land territory. Coastal states have the right under the United Nations Convention on the Law of the Sea (UNCLOS) to regulate foreign economic activities in their own EEZs. EEZs were established as a feature of international law by UNCLOS.

Manyin; CRS Report R42761, *Senkaku (Diaoyu/Diaoyutai) Islands Dispute: U.S. Treaty Obligations*, by Mark E. Manyin; CRS Report RL33436, *Japan-U.S. Relations: Issues for Congress*, coordinated by Emma Chanlett-Avery; and CRS Report RL33233, *The Republic of the Philippines and U.S. Interests*, by Thomas Lum.

# Background

## Overview of Disputes

### Maritime Territorial Disputes

China is a party to multiple maritime territorial disputes in the SCS and ECS, including in particular the following (see **Figure 1** for locations of the island groups listed below):

- a dispute over the **Paracel Islands** in the SCS, which are claimed by China and Vietnam, and occupied by China;
- a dispute over the **Spratly Islands** in the SCS, which are claimed entirely by China, Taiwan, and Vietnam, and in part by the Philippines, Malaysia, and Brunei, and which are occupied in part by all these countries except Brunei;
- a dispute over **Scarborough Shoal** in the SCS, which is claimed by China, Taiwan, and the Philippines; and
- a dispute over the **Senkaku Islands** in the ECS, which are claimed by China, Taiwan, and Japan, and administered by Japan.

The island names used above are the ones commonly used in the United States; in other countries, these islands are known by various other names. China, for example, refers to the Paracel Islands as the Xisha islands, to the Spratly Islands as the Nansha islands, to Scarborough Shoal as Huangyan island, and to the Senkaku Islands as the Diaoyu islands.

These island groups are not the only land features in the SCS and ECS—the two seas feature other islands, rocks, shoals, and reefs, as well as some near-surface submerged features. The territorial status of some of these other features is also in dispute.<sup>3</sup> It should also be noted that there are additional maritime territorial disputes in the Western Pacific that do not involve China.<sup>4</sup>

Maritime territorial disputes in the SCS and ECS date back many years, and have periodically led to incidents and periods of increased tension.<sup>5</sup> The disputes have again intensified in the past few years, leading to numerous confrontations and incidents involving fishing vessels, oil exploration

---

<sup>3</sup> For example, the Reed Bank, a submerged atoll northeast of the Spratly Islands, is the subject of a dispute between China and the Philippines, and the Macclesfield Bank, a group of submerged shoals and reefs between the Paracel Islands and Scarborough Shoal, is claimed by China, Taiwan, and the Philippines. China refers to the Macclesfield Bank as the Zhongsha islands, even though they are submerged features rather than islands.

<sup>4</sup> North Korea and South Korea, for example, have not reached final agreement on their exact maritime border; South Korea and Japan are involved in a dispute over the Liancourt Rocks—a group of islets in the Sea of Japan that Japan refers to as the Takeshima islands and South Korea as the Dokdo islands; and Japan and Russia are involved in a dispute over islands dividing the Sea of Okhotsk from the Pacific Ocean that Japan refers to as the Northern Territories and Russia refers to as the South Kuril Islands.

<sup>5</sup> One observer states that “notable incidents over sovereignty include the Chinese attack on the forces of the Republic of Vietnam [South Vietnam] in the Paracel Islands in 1974, China’s attack on Vietnamese forces near Fiery Cross Reef [in the Spratly Islands] in 1988, and China’s military ouster of Philippines forces from Mischief Reef [also in the Spratly Islands] in 1995.” Peter Dutton, “Three Dispute and Three Objectives,” *Naval War College Review*, Autumn 2011: 43. A similar recounting can be found in Department of Defense, *Annual Report to Congress, Military and Security Developments Involving the People’s Republic of China*, 2011, p. 15.

vessels, coast guard ships, naval ships, and military aircraft. The recent intensification of the disputes has substantially heightened tensions between China and other countries in the region, particularly Japan, the Philippines, and Vietnam.

**Notes:** Disputed islands have been enlarged to make them more visible.

## Dispute Regarding China's Rights Within Its EEZ

In addition to maritime territorial disputes in the SCS and ECS, China is involved in a dispute, particularly with the United States, over whether China has a right under international law to regulate the activities of foreign military forces operating within China's EEZ. The position of the United States and most countries is that while the United Nations Convention on the Law of the Sea (UNCLOS), which established EEZs as a feature of international law, gives coastal states the right to regulate economic activities (such as fishing and oil exploration) within their EEZs, it does not give coastal states the right to regulate foreign military activities in the parts of their EEZs beyond their 12-nautical-mile territorial waters.<sup>6</sup> The position of China and 26 other countries (i.e., a minority group among the world's nations) is that UNCLOS gives coastal states the right to regulate not only economic activities, but also foreign military activities, in their EEZs. In response to a request from CRS to identify the countries taking this latter position, the U.S. Navy states that

countries with restrictions inconsistent with the Law of the Sea Convention [i.e., UNCLOS] that would limit the exercise of high seas freedoms by foreign navies beyond 12 nautical miles from the coast are [the following 27]:

Bangladesh, Brazil, Burma, Cambodia, Cape Verde, China, Egypt, Haiti, India, Iran, Kenya, Malaysia, Maldives, Mauritius, North Korea, Pakistan, Portugal, Saudi Arabia, Somalia, Sri Lanka, Sudan, Syria, Thailand, United Arab Emirates, Uruguay, Venezuela, and Vietnam.<sup>7</sup>

Other observers provide different counts of the number of countries that take the position that UNCLOS gives coastal states the right to regulate not only economic activities but also foreign military activities in their EEZs. For example, one set of observers, in an August 2013 briefing, stated that 18 countries seek to regulate foreign military activities in their EEZs, and that three of these countries—China, North Korea, and Peru—have directly interfered with foreign military activities in their EEZs.<sup>8</sup>

The dispute over whether China has a right under UNCLOS to regulate the activities of foreign military forces operating within its EEZ appears to be at the heart of incidents between Chinese and U.S. ships and aircraft in international waters and airspace, including

- incidents in March 2001, September 2002, March 2009, and May 2009, in which Chinese ships and aircraft confronted and harassed the U.S. naval ships *Bowditch*, *Impeccable*, *Victorious* as they were conducting survey and ocean surveillance operations in China's EEZ;

---

<sup>6</sup> The legal term under UNCLOS for territorial waters is territorial seas. This report uses the more colloquial term territorial waters to avoid confusion with terms like South China Sea and East China Sea.

<sup>7</sup> Source: Navy Office of Legislative Affairs e-mail to CRS, June 15, 2012. The e-mail notes that two additional countries—Ecuador and Peru—also have restrictions inconsistent with UNCLOS that would limit the exercise of high seas freedoms by foreign navies beyond 12 nautical miles from the coast, but do so solely because they claim an extension of their territorial sea beyond 12 nautical miles.

<sup>8</sup> Source: Joe Baggett and Pete Pedrozo, briefing for Center for Naval Analysis Excessive Chinese Maritime Claims Workshop, August 7, 2013, slide entitled "What are other nations' views?" (slide 30 of 47). The slide also notes that there have been "isolated diplomatic protests from Pakistan, India, and Brazil over military surveys" conducted in their EEZs.

- an incident on April 1, 2001, in which a Chinese fighter collided with a U.S. Navy EP-3 electronic surveillance aircraft flying in international airspace about 65 miles southeast of China's Hainan Island in the South China Sea, forcing the EP-3 to make an emergency landing on Hainan Island;<sup>9</sup> and
- an incident on December 5, 2013, in which a Chinese navy ship put itself in the path of the U.S. Navy cruiser *Cowpens* as it was operating 30 or more miles from China's aircraft carrier *Liaoning*, forcing the *Cowpens* to change course to avoid a collision.

**Figure 2** shows the locations of the 2001, 2002, and 2009 incidents listed in the first two bullets above. The incidents shown in **Figure 2** are the ones most commonly cited prior to the December 2013 involving the *Cowpens*, but some observers list additional incidents as well. For example, one set of observers, in an August 2013 briefing, provided the following list of incidents in which China has challenged or interfered with operations by U.S. ships and aircraft and ships from India's navy:

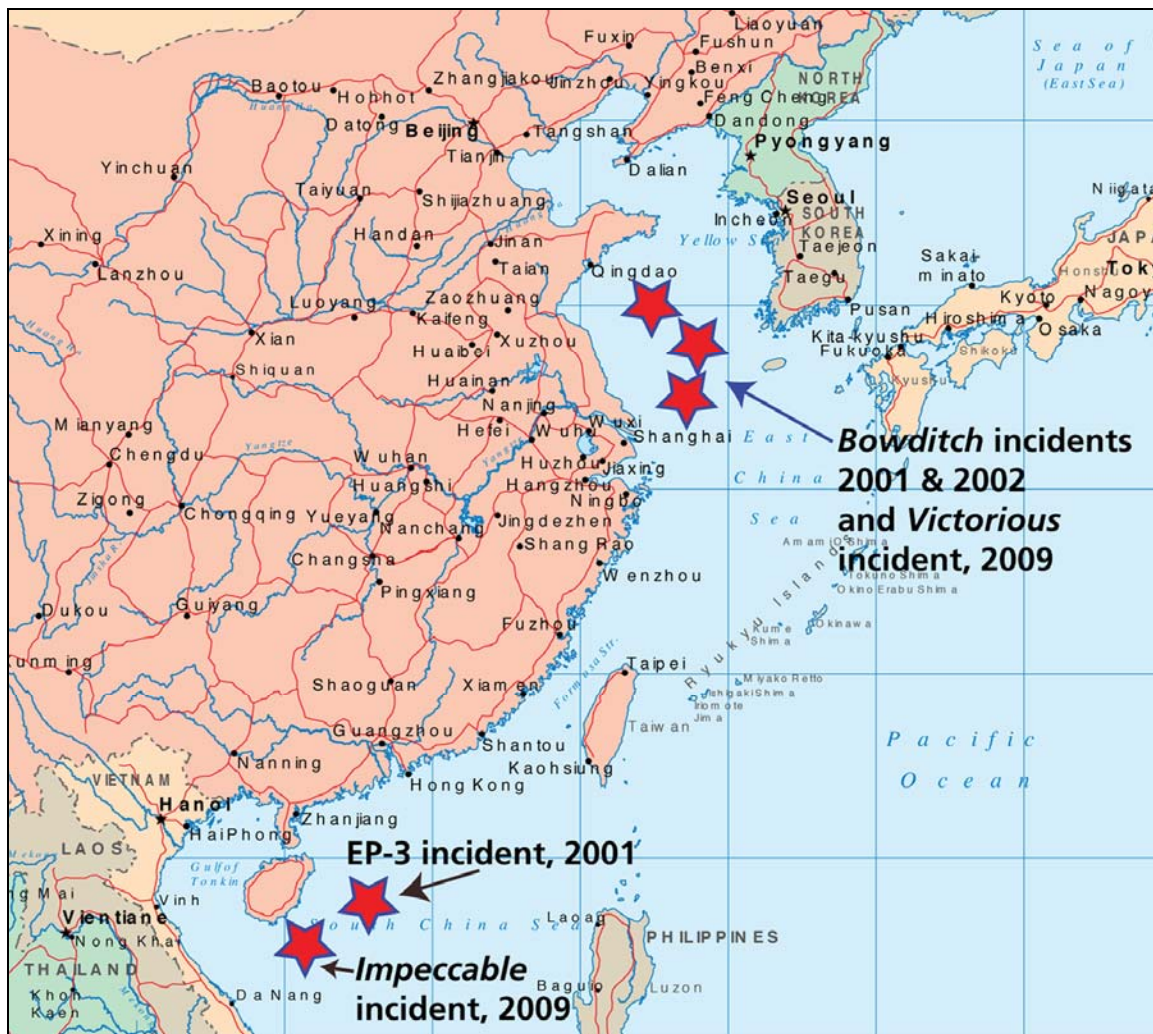

- USNS Bowditch (March 2001);
- EP-3 Incident (April 2001);
- USNS Impeccable (March 2009);
- USNS Victorious (May 2009);
- USS George Washington (July-November 2010);
- U-2 Intercept (June 2011);
- INS [Indian Naval Ship] Airavat (July 2011);
- INS [Indian Naval Ship] Shivalik (June 2012); and
- USNS Impeccable (July 2013).<sup>10</sup>

---

<sup>9</sup> For discussions of some of these incidents and their connection to the issue of military operating rights in EEZs, see Raul Pedrozo, "Close Encounters at Sea, The USNS Impeccable Incident," *Naval War College Review*, Summer 2009: 101-111; Jonathan G. Odom, "The True 'Lies' of the *Impeccable* Incident: What Really Happened, Who Disregarded International Law, and Why Every Nation (Outside of China) Should Be Concerned," *Michigan State Journal of International Law*, vol. 18, no. 3, 2010: 16-22, accessed September 25, 2012, at [http://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=1622943](http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1622943); Oriana Skylar Mastro, "Signaling and Military Provocation in Chinese National Security Strategy: A Closer Look at the Impeccable Incident," *Journal of Strategic Studies*, April 2011: 219-244; and Peter Dutton, ed., *Military Activities in the EEZ, A U.S.-China Dialogue on Security and International Law in the Maritime Commons*, Newport (RI), Naval War College, China Maritime Studies Institute, China Maritime Study Number 7, December 2010, 124 pp. See also CRS Report RL30946, *China-U.S. Aircraft Collision Incident of April 2001: Assessments and Policy Implications*, by Shirley A. Detail of map shown on page 6.

### Relationship of Maritime Territorial Disputes to EEZ Dispute

The issue of whether China has the right under UNCLOS to regulate foreign military activities in its EEZ is related to, but ultimately separate from, the issue of territorial disputes in the SCS and ECS. The two issues are related because China can claim EEZs from inhabitable islands over which it has sovereignty, so accepting China’s claims to sovereignty over inhabitable islands in the SCS or ECS could permit China to expand the EEZ zone within which China claims a right to regulate foreign military activities.

The EEZ issue is ultimately separate from the territorial disputes issue because even if all the territorial disputes in the SCS and ECS were resolved, and none of China’s claims in the SCS and ECS were accepted, China could continue to apply its concept of its EEZ rights to the EEZ that it unequivocally derives from its mainland coast—and it is in this unequivocal Chinese EEZ that most of the past U.S.-Chinese incidents at sea have occurred.

Press reports of maritime disputes in the SCS and ECS often focus on territorial disputes while devoting little or no attention to the related but ultimately separate EEZ dispute. From the U.S. perspective, however, the EEZ dispute is arguably as significant as the maritime territorial disputes because of its potential for leading to a U.S.-Chinese incident at sea and because of its potential for affecting U.S. military operations not only in the SCS and ECS, but around the world (see “Operational Rights in EEZs” below).

### **1972 Multilateral Convention on Preventing Collisions at Sea (COLREGs Convention)**

China and the United States, as well as more than 150 other countries (including all those bordering on the South East and South China Seas other than Taiwan),<sup>11</sup> are parties to an October 1972 multilateral convention on international regulations for preventing collisions at sea, commonly known as the collision regulations (COLREGs) or the “rules of the road.”<sup>12</sup> Although referred to as a set of rules or regulations, the multilateral convention is a binding treaty. The convention applies “to all vessels upon the high seas and in all waters connected therewith navigable by seagoing vessels.”<sup>13</sup> In a February 18, 2014, letter to Senator Marco Rubio concerning the December 5, 2013, incident involving the *Cowpens*, the State Department stated:

In order to minimize the potential for an accident or incident at sea, it is important that the United States and China share a common understanding of the rules for operational air or maritime interactions. From the U.S. perspective, an existing body of international rules and guidelines—including the 1972 International Regulations for Preventing Collisions at Sea (COLREGs)—are sufficient to ensure the safety of navigation between U.S. forces and the force of other countries, including China. We will continue to make clear to the Chinese that these existing rules, including the COLREGs, should form the basis for our common understanding of air and maritime behavior, and we will encourage China to incorporate these rules into its incident-management tools.

Likewise, we will continue to urge China to agree to adopt bilateral crisis management tools with Japan and to rapidly conclude negotiations with ASEAN<sup>14</sup> on a robust and meaningful Code of Conduct in the South China in order to avoid incidents and to manage them when they arise. We will continue to stress the importance of these issues in our regular interactions with Chinese officials.<sup>15</sup>

<sup>11</sup> Source: International Maritime Organization, *Status of Multilateral Conventions and Instruments in Respect of Which the International Maritime Organization or its Secretary-General Performs Depositary or Other Functions, As at 28 February 2014*, pp. 86-89. The Philippines acceded to the convention on June 10, 2013.

<sup>12</sup> 28 UST 3459; TIAS 8587. The treaty was done at London October 20, 1972, and entered into force July 15, 1977. The United States is an original signatory to the convention and acceded the convention entered into force for the United States on July 15, 1977. China acceded to the treaty on January 7, 1980. A summary of the agreement is available at <http://www.imo.org/About/Conventions/ListOfConventions/Pages/COLREG.aspx>. The text of the convention is available at <https://treaties.un.org/doc/Publication/UNTS/Volume%201050/volume-1050-I-15824-English.pdf>.

<sup>13</sup> Rule 1(a) of the convention.

<sup>14</sup> ASEAN is the Association of Southeast Asian Nations. ASEAN’s member states are Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, the Philippines, Singapore, Thailand, and Vietnam.

<sup>15</sup> Letter dated February 18, 2014, from Julia Frifield, Assistant Secretary, Legislative Affairs, Department of State, to The Honorable Marco Rubio, United States Senate. Used here with the permission of the office of Senator Rubio. The letter begins: “Thank you for your letter of January 31 regarding the December 5, 2013, incident involving a Chinese naval vessel and the USS *Cowpens*.” The text of Senator Rubio’s January 31, 2014, letter was accessed March 13, (continued...)

The Code of Conduct mentioned in the quoted passage above is discussed in the next section.

## **Negotiations Between China and ASEAN on SCS Code of Conduct**

In 2002, China and the 10 member states of ASEAN signed a non-binding Declaration on the Conduct (DOC) of Parties in the South China Sea in which the parties, among other things,

... reaffirm their respect for and commitment to the freedom of navigation in and overflight above the South China Sea as provided for by the universally recognized principles of international law, including the 1982 UN Convention on the Law of the Sea....

... undertake to resolve their territorial and jurisdictional disputes by peaceful means, without resorting to the threat or use of force, through friendly consultations and negotiations by sovereign states directly concerned, in accordance with universally recognized principles of international law, including the 1982 UN Convention on the Law of the Sea....

... undertake to exercise self-restraint in the conduct of activities that would complicate or escalate disputes and affect peace and stability including, among others, refraining from action of inhabiting on the presently uninhabited islands, reefs, shoals, cays, and other features and to handle their differences in a constructive manner....

...reaffirm that the adoption of a [follow-on] code of conduct in the South China Sea would further promote peace and stability in the region and agree to work, on the basis of consensus, towards the eventual attainment of this objective....<sup>16</sup>

In July 2011, China and ASEAN adopted a preliminary set of principles for implementing the DOC. U.S. officials since 2010 have encouraged ASEAN and China to develop the follow-on binding Code of Conduct (COC) mentioned in the final paragraph above. China and ASEAN have conducted negotiations on the follow-on COC, but China has not yet agreed with the ASEAN member states on a final text. An August 5, 2013, press report states that “China is in no rush to sign a proposed agreement on maritime rules with Southeast Asia governing behavior in the disputed South China Sea, and countries should not have unrealistic expectations, the Chinese foreign minister said on Monday [August 5].”<sup>17</sup>

## **China’s Approach to Territorial Disputes**

### **Map of the Nine-Dash Line**

China depicts its territorial claims in the SCS using the so-called map of the nine-dash line—a Chinese map of the SCS showing nine line segments that, if connected, would enclose an area covering roughly 80% (some observers say as much as 90%) of the SCS (**Figure 3**).

---

(...continued)

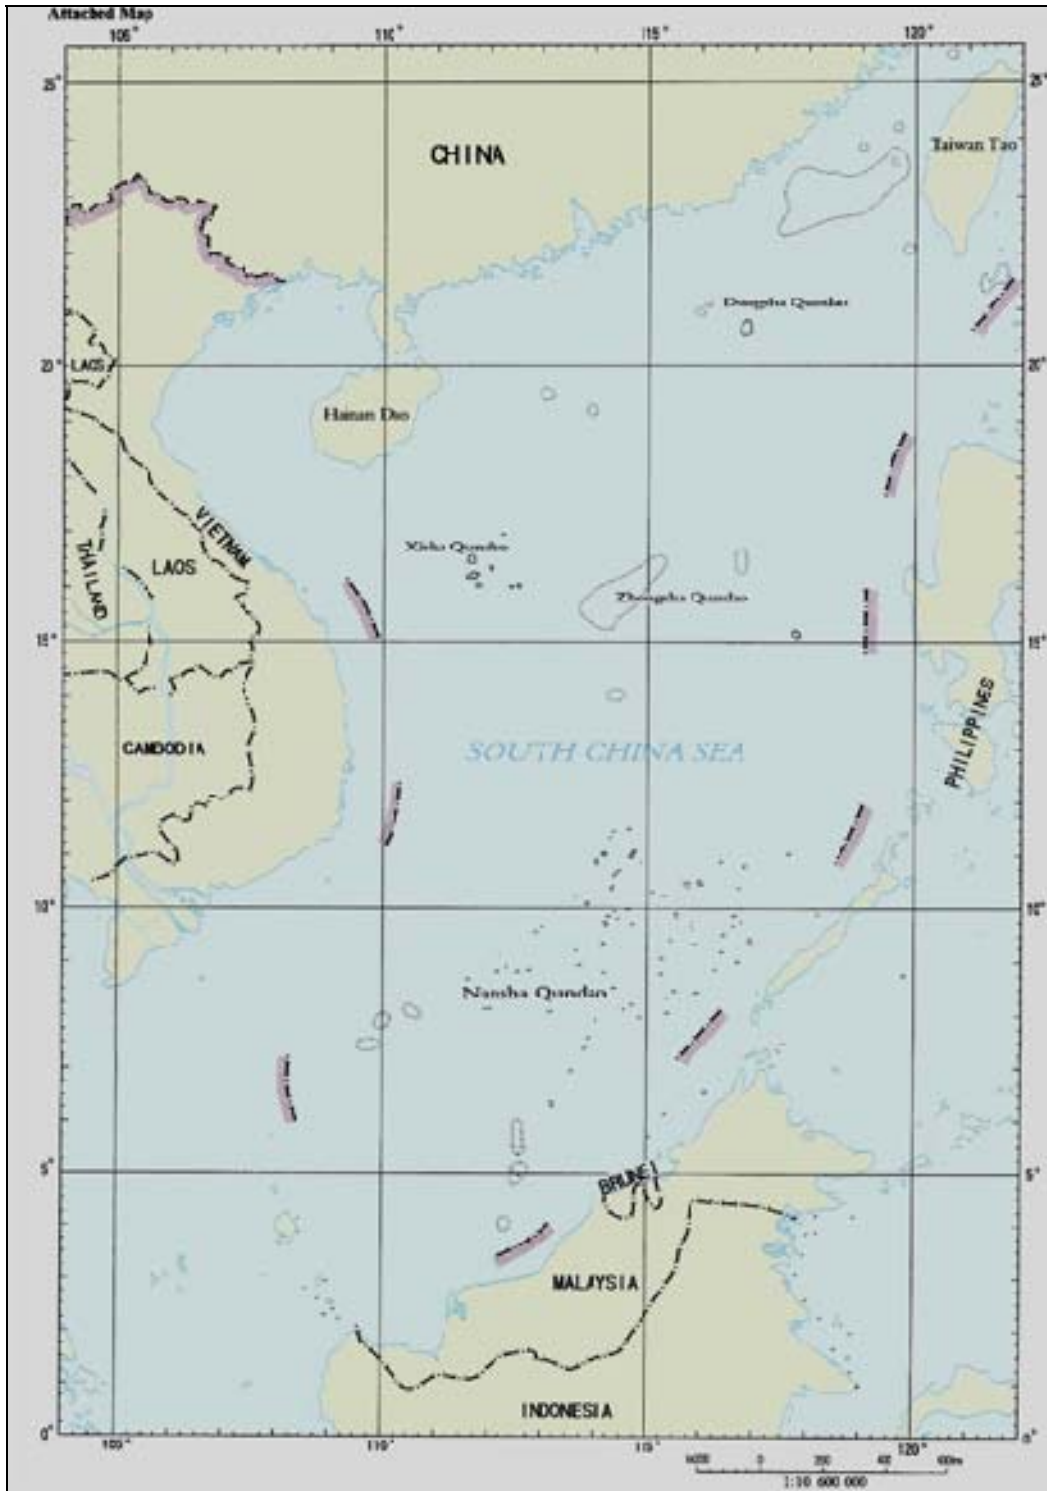

2014, at <http://www.rubio.senate.gov/public/index.cfm/2014/1/rubio-calls-on-administration-to-address-provocative-chinese-behavior>.

<sup>16</sup> For the full text of the declaration, see **Appendix B**.

<sup>17</sup> Ben Blanchard, “China Says In No Hurry to Sign South China Sea Accord,” *Reuters.com*, August 5, 2013. See also Shannon Tiezzi, “Why China Isn’t Interested in a South China Sea Code of Conduct,” *The Diplomat* (<http://thediplomat.com>), February 26, 2014.

### Figure 3. Map of the Nine-Dash Line

Example submitted by China to the United Nations in 2009

**Source:** Communication from China to the United Nations dated May 7, 2009, English version, accessed on August 30, 2012, at [http://www.un.org/Depts/los/clcs\\_new/submissions\\_files/submission\\_vnm\\_37\\_2009.htm](http://www.un.org/Depts/los/clcs_new/submissions_files/submission_vnm_37_2009.htm).

The area inside the nine line segments far exceeds what is claimable as territorial waters under customary international law of the sea as reflected in UNCLOS, and, as shown in **Figure 4**, includes waters that are within the claimable EEZs (and in some places are quite near the coasts) of the Philippines, Malaysia, Brunei, and Vietnam.

**Figure 4. EEZs Overlapping Zone Enclosed by Map of Nine-Dash Line**

**Source:** Source: Eurasia Review, September 10, 2012.

**Notes:** (1) The red line shows the area that would be enclosed by connecting the line segments in the map of the nine-dash line. Although the label on this map states that the waters inside the red line are “China’s claimed territorial waters,” China has maintained ambiguity over whether it is claiming full sovereignty over the entire area enclosed by the nine line segments. (2) The EEZs shown on the map do not represent the totality of maritime territorial claims by countries in the region. Vietnam, to cite one example, claims all of the Spratly Islands, even though most or all of the islands are outside the EEZ that Vietnam derives from its mainland coast.

The map of the nine-dash line, also called the U-shaped line or the cow tongue,<sup>18</sup> predates the establishment of the People’s Republic of China (PRC) in 1949. The map has been maintained by the PRC government, and maps published in Taiwan also show the nine line segments.<sup>19</sup> In a

<sup>18</sup> The map is also sometimes called the map of the nine dashed lines (as opposed to nine-dash line), perhaps because some maps (such as **Figure 3**) show each line segment as being dashed.

<sup>19</sup> See Department of Defense, *Annual Report to Congress, Military and Security Developments Involving the People’s Republic of China*, 2011, pp. 15 and 39; Peter Dutton, “Three Disputes and Three Objectives, China and the South China Sea,” *Naval War College Review*, Autumn 2011: 44-45; Hong Nong, “Interpreting the U-shape Line in the South China, Sea,” accessed on September 28, 2012, at <http://chinausfocus.com/peace-security/interpreting-the-u-shape-line-in-the-south-china-sea/>.

document submitted to the United Nations on May 7, 2009, that included the map as an attachment, China stated:

China has indisputable sovereignty over the islands in the South China Sea and the adjacent waters, and enjoys sovereign rights and jurisdiction over the relevant waters as well as the seabed and subsoil thereof (see attached map [of the nine-dash line]). The above position is consistently held by the Chinese Government, and is widely known by the international community.<sup>20</sup>

China has maintained some ambiguity over whether it is using the map of the nine-dash line to claim full sovereignty over the entire sea area enclosed by the nine-dash line, or something less than that.<sup>21</sup> It does appear clear, however, that China at a minimum claims sovereignty over the island groups inside the nine line segments—China’s domestic Law on the Territorial Sea and Contiguous Zone, enacted in 1992, specifies that China claims sovereignty over all the island groups inside the nine line segments.<sup>22</sup> China’s implementation on January 1, 2014, of a series of fishing regulations covering much of the SCS suggests that China claims at least some degree of administrative control over much of the SCS.

### “Salami-Slicing” Strategy and “Cabbage” Strategy

Some observers characterize China’s approach for asserting and defending its territorial claims in the ECS and SCS as a “salami-slicing” strategy that employs a series of incremental actions, none of which by itself is a *casus belli*, to gradually change the status quo in China’s favor.<sup>23</sup> At least one Chinese official has used the term “cabbage strategy” to refer to a strategy of consolidating control over disputed islands by wrapping those islands, like the leaves of a cabbage, in successive layers of occupation and protection formed by fishing boats, Chinese Coast Guard ships, and then finally Chinese naval ships.<sup>24</sup>

<sup>20</sup> Communication from China to the United Nations dated May 7, 2009, English version, accessed on August 30, 2012, at [http://www.un.org/Depts/los/clcs\\_new/submissions\\_files/submission\\_vnm\\_37\\_2009.htm](http://www.un.org/Depts/los/clcs_new/submissions_files/submission_vnm_37_2009.htm).

## Use of China Coast Guard Ships and Other Ships

China makes regular use of China Coast Guard ships to assert and defend its maritime territorial claims, with Chinese Navy ships sometimes available over the horizon as backup forces. Chinese Coast Guard ships are unarmed or lightly armed, but can be effective in asserting and defending maritime territorial claims, particularly in terms of confronting or harassing foreign vessels that are similarly lightly armed or unarmed.<sup>25</sup> In addition to being available as backups for China Coast Guard ships, Chinese navy ships conduct exercises that in some cases appear intended, at least in part, at reinforcing China's maritime claims.<sup>26</sup> Some observers believe China also uses civilian fishing ships to assert and defend its maritime claims.<sup>27</sup>

## Preference for Treating Disputes on Bilateral Basis

China prefers to discuss maritime territorial disputes with other parties to the disputes on a bilateral rather than multilateral basis. Some observers believe China prefers bilateral talks because China is much larger than any other country in the region, giving China a potential upper hand in any bilateral meeting. China generally has resisted multilateral approaches to resolving maritime territorial disputes, stating that such approaches would internationalize the disputes, although the disputes are by definition international even when addressed on a bilateral basis. (China's participation with the ASEAN states in the 2002 DOC and in negotiations with the ASEAN states on the follow-on binding code of conduct represents a departure from this general preference.) Some observers believe China is pursuing a policy of putting off a negotiated resolution of maritime territorial disputes so as to give itself time to implement the salami-slicing strategy.<sup>28</sup> China has resisted U.S. involvement in the disputes.

## Chinese Actions Since Late 2013 That Have Heightened Concerns

Following a confrontation in 2012 between Chinese and Philippine ships at Scarborough Shoal that resulted in China gaining *de facto* control over access to the shoal, subsequent Chinese

Thayer, "Paracel Island: Chinese Boats Attack Vietnamese Fishing Craft," Thayer Consultancy Background Brief, May 28, 2013, p. 1.

<sup>28</sup> One observer, for example, states that "implementing the DOC, let alone transitioning to a COC, has proven chimerical. China is not the sole cause of delay; ASEAN is divided as to what, if anything, to do. But China's strategy is clear: to use fruitless diplomacy to buy time for factual primacy, thereby ensuring that future negotiations will serve Chinese ends." (Donald K. Emmerson, "China Challenges Philippines in the South China Sea," *East Asia Forum* ([www.eastasiaforum.org](http://www.eastasiaforum.org)), March 18, 2014.)

actions for asserting and defending China's claims in the ECS and SCS that have heightened concerns among observers, particularly since late 2013, include the following:

- ongoing Chinese pressure against the Philippine presence at Second Thomas Shoal, a shoal in the Spratly Islands;<sup>29</sup>
- frequent patrols by Chinese Coast Guard ships—some observers refer to them as harassment operations—at the Senkaku Islands;
- China's announcement on November 23, 2013 of an air defense identification zone (ADIZ) for the ECS that includes airspace over the Senkaku Islands;
- the previously mentioned December 5, 2013, incident in which a Chinese navy ship put itself in the path of the U.S. Navy cruiser *Cowpens*, forcing the *Cowpens* to change course to avoid a collision; and
- the implementation on January 1, 2014, of fishing regulations administered by China's Hainan province applicable to waters constituting more than half of the SCS, and the reported enforcement of those regulations with actions that have included the apprehension of non-Chinese fishing boats.<sup>30</sup>

At a February 5, 2014, hearing before the subcommittee on Asia and the Pacific of the House Foreign Affairs Committee, Assistant Secretary of State Daniel Russel testified that

Deputy Secretary [of State William J.] Burns and I were in Beijing earlier this month to hold regular consultations with the Chinese government on Asia-Pacific issues, and we held extensive discussions regarding our concerns. These include continued restrictions on access to Scarborough Reef; pressure on the long-standing Philippine presence at the Second Thomas Shoal; putting hydrocarbon blocks up for bid in an area close to another country's mainland and far away even from the islands that China is claiming; announcing administrative and even military districts in contested areas in the South China Sea; an unprecedented spike in risky activity by China's maritime agencies near the Senkaku Islands; the sudden, uncoordinated and unilateral imposition of regulations over contested airspace in the case of the East China Sea Air Defense Identification Zone; and the recent updating of fishing regulations covering disputed areas in the South China Sea. These actions have raised tensions in the region and concerns about China's objectives in both the South China and the East China Seas.

There is a growing concern that this pattern of behavior in the South China Sea reflects an incremental effort by China to assert control over the area contained in the so-called "nine-dash line," despite the objections of its neighbors and despite the lack of any explanation or apparent basis under international law regarding the scope of the claim itself.<sup>31</sup>

<sup>31</sup> Testimony of Daniel Russel, Assistant Secretary of State, Bureau of East Asian and Pacific Affairs, U.S. Department of State, Before the House Committee on Foreign Affairs, Subcommittee on Asia and the Pacific, Wednesday, February 5, 2014, [on] *Maritime Disputes in East Asia*, pp. 5-6.

## **U.S. Position on These Issues**

### **Some Key Elements**

The U.S. position on territorial and EEZ disputes in the Western Pacific (including those involving China) includes the following elements, among others:

- The United States takes no position on competing claims to sovereignty over disputed land features in the ECS and SCS.
- Claims of territorial waters and EEZs should be consistent with customary international law of the sea and must therefore, among other things, derive from land features. Claims in the SCS that are not derived from land features are fundamentally flawed.
- Territorial disputes should be resolved peacefully, without coercion, intimidation, threats, or the use of force.
- Parties should avoid taking provocative or unilateral actions that disrupt the status quo or jeopardize peace and security; the Senkaku Islands are under the administration of Japan and unilateral attempts to change the status quo raise tensions and do nothing under international law to strengthen territorial claims.
- The United States has a national interest in the preservation of freedom of seas as recognized in customary international law of the sea. The United States opposes claims that impinge on the rights, freedoms, and lawful uses of the sea that belong to all nations.
- The United States, like most other countries, believes that coastal states under UNCLOS have the right to regulate economic activities in their EEZs, but do not have the right to regulate foreign military activities in their EEZs.

### **February 5, 2014, State Department Testimony**

At a February 5, 2014, hearing before the subcommittee on Asia and the Pacific of the House Foreign Affairs Committee, Assistant Secretary of State Daniel Russel testified that

Since the end of the Second World War, a maritime regime based on international law that promotes freedom of navigation and lawful uses of the sea has facilitated Asia's impressive economic growth. The United States, through our our [sic] alliances, our security partnerships and our overall military presence and posture, has been instrumental in sustaining that maritime regime and providing the security that has enabled the countries in the region to prosper. As a maritime nation with global trading networks, the United States has a national interest in freedom of the seas and in unimpeded lawful commerce. From President Thomas Jefferson's actions against the Barbary pirates to President Reagan's decision that the United States will abide by the Law of the Sea Convention's provisions on navigation and other traditional uses of the ocean, American foreign policy has long defended the freedom of the seas. And as we consistently state, we have a national interest in the maintenance of peace and stability; respect for international law; unimpeded lawful commerce; and freedom of navigation and overflight in the East China and South China Seas....

Mr. Chairman, we have a deep and long-standing stake in the maintenance of prosperity and stability in the Asia-Pacific and an equally deep and abiding long-term interest in the continuance of freedom of the seas based on the rule of law—one that guarantees, among other things, freedom of navigation and overflight and other internationally lawful uses of the sea related to those freedoms. International law makes clear the legal basis on which states can legitimately assert their rights in the maritime domain or exploit marine resources. By promoting order in the seas, international law is instrumental in safeguarding the rights and freedoms of all countries regardless of size or military strength.

I think it is imperative that we be clear about what we mean when the United States says that we take no position on competing claims to sovereignty over disputed land features in the East China and South China Seas. First of all, we do take a strong position with regard to behavior in connection with any claims: we firmly oppose the use of intimidation, coercion or force to assert a territorial claim. Second, we do take a strong position that maritime claims must accord with customary international law. This means that all maritime claims must be derived from land features and otherwise comport with the international law of the sea. So while we are not siding with one claimant against another, we certainly believe that claims in the South China Sea that are not derived from land features are fundamentally flawed. In support of these principles and in keeping with the longstanding U.S. Freedom of Navigation Program, the United States continues to oppose claims that impinge on the rights, freedoms, and lawful uses of the sea that belong to all nations.

As I just noted, we care deeply about the way countries behave in asserting their claims or managing their disputes. We seek to ensure that territorial and maritime disputes are dealt with peacefully, diplomatically and in accordance with international law. Of course this means making sure that shots aren't fired; but more broadly it means ensuring that these disputes are managed without intimidation, coercion, or force. We have repeatedly made clear that freedom of navigation is reflected in international law, not something to be granted by big states to others....

China's lack of clarity with regard to its South China Sea claims has created uncertainty, insecurity and instability in the region. It limits the prospect for achieving a mutually agreeable resolution or equitable joint development arrangements among the claimants. I want to reinforce the point that under international law, maritime claims in the South China Sea must be derived from land features. Any use of the "nine dash line" by China to claim maritime rights not based on claimed land features would be inconsistent with international law. The international community would welcome China to clarify or adjust its nine-dash line claim to bring it in accordance with the international law of the sea.

We support serious and sustained diplomacy between the claimants to address overlapping claims in a peaceful, non-coercive way. This can and should include bilateral as well as multilateral diplomatic dialogue among the claimants. But at the same time we fully support the right of claimants to exercise rights they may have to avail themselves of peaceful dispute settlement mechanisms. The Philippines chose to exercise such a right last year with the filing of an arbitration case under the Law of the Sea Convention.<sup>32</sup>

---

<sup>32</sup> Testimony of Daniel Russel, Assistant Secretary of State, Bureau of East Asian and Pacific Affairs, U.S. Department of State, Before the House Committee on Foreign Affairs, Subcommittee on Asia and the Pacific, Wednesday, February 5, 2014, [on] Maritime Disputes in East Asia, pp. 2, 4-5, 6.

## **Operational Rights in EEZs**

Regarding a coastal state's rights within its EEZ, Scot Marciel, then-Deputy Assistant Secretary, Bureau of East Asian and Pacific Affairs, stated the following as part of his prepared statement for a July 15, 2009, hearing before the East Asian and Pacific Affairs subcommittee of the Senate Foreign Relations Committee:

I would now like to discuss recent incidents involving China and the activities of U.S. vessels in international waters within that country's Exclusive Economic Zone (EEZ). In March 2009, the survey ship USNS Impeccable was conducting routine operations, consistent with international law, in international waters in the South China Sea. Actions taken by Chinese fishing vessels to harass the Impeccable put ships of both sides at risk, interfered with freedom of navigation, and were inconsistent with the obligation for ships at sea to show due regard for the safety of other ships. We immediately protested those actions to the Chinese government, and urged that our differences be resolved through established mechanisms for dialogue—not through ship-to-ship confrontations that put sailors and vessels at risk.

Our concern over that incident centered on China's conception of its legal authority over other countries' vessels operating in its Exclusive Economic Zone (EEZ) and the unsafe way China sought to assert what it considers its maritime rights.

China's view of its rights on this specific point is not supported by international law. We have made that point clearly in discussions with the Chinese and underscored that U.S. vessels will continue to operate lawfully in international waters as they have done in the past.<sup>33</sup>

As part of his prepared statement for the same hearing, Robert Scher, then-Deputy Assistant Secretary of Defense, Asian and Pacific Security Affairs, Office of the Secretary of Defense, stated that

we reject any nation's attempt to place limits on the exercise of high seas freedoms within an exclusive economic zones [sic] (EEZ). Customary international law, as reflected in articles 58 and 87 of the 1982 United Nations Convention on the Law of the Sea, guarantees to all nations the right to exercise within the EEZ, high seas freedoms of navigation and overflight, as well as the traditional uses of the ocean related to those freedoms. It has been the position of the United States since 1982 when the Convention was established, that the navigational rights and freedoms applicable within the EEZ are qualitatively and quantitatively the same as those rights and freedoms applicable on the high seas. We note that almost 40% of the world's oceans lie within the 200 nautical miles EEZs, and it is essential to the global economy and international peace and security that navigational rights and freedoms within the EEZ be vigorously asserted and preserved.

As previously noted, our military activity in this region is routine and in accordance with customary international law as reflected in the 1982 Law of the Sea Convention.<sup>34</sup>

<sup>34</sup> Testimony [prepared statement] of Deputy Assistant Secretary of Defense Robert Scher, Asian and Pacific Security Affairs, Office of the Secretary of Defense, before the Subcommittee on East Asian and Pacific Affairs, Senate Committee on Foreign Relations, United States Senate, July 15, 2009, [hearing on] Maritime Issues and Sovereignty (continued...)

## U.S. Freedom of Navigation (FON) Program

U.S. Navy ships carry out assertions of operational rights as part of the U.S. Freedom of Navigation (FON) program for challenging maritime claims that the United States believes to be inconsistent with international law.<sup>35</sup> The Department of Defense's (DOD's) record of "excessive maritime claims that were challenged by DoD operational assertions and activities during the period of October 1, 2012, to September 30, 2013, in order to preserve the rights, freedoms, and uses of the sea and airspace guaranteed to all nations in international law" includes a listing for multiple challenges that were conducted to challenge Chinese claims relating to "excessive straight baselines; security jurisdiction in contiguous zone; jurisdiction over airspace above the exclusive economic zone (EEZ); domestic law criminalizing survey activity by foreign entities in EEZ; [and] prior permission required for innocent passage of foreign military ships through territorial sea."<sup>36</sup>

## Potential Implications for United States

China's actions for asserting and defending its maritime territorial and EEZ claims in the ECS and SCS, particularly since late 2013, have heightened concerns among observers that ongoing disputes over these waters and some of the islands within them could lead to a crisis or conflict between China and a neighboring country such as Japan, the Philippines, or Vietnam, and that the United States could be drawn into such a crisis or conflict as a result of obligations the United States has under bilateral security treaties with Japan and the Philippines.

More broadly, China's actions for asserting and defending its maritime territorial and EEZ claims have led to increasing concerns among some observers that China may be seeking to dominate or gain control of its near-seas region, meaning the ECS, the SCS, and the Yellow Sea.<sup>37</sup> Chinese

---

(...continued)

Disputes in East Asia, pp. 3-4.

<sup>35</sup> The State Department states that

U.S. Naval forces engage in Freedom of Navigation operations to assert the principles of International Law and free passage in regions with unlawful maritime sovereignty claims. FON operations involve naval units transiting disputed areas to avoid setting the precedent that the international community has accepted these unlawful claims. ISO coordinates DOS clearance for FON operations.

(Source: State Department website on military operational issues, accessed March 22, 2013, at <http://www.state.gov/t/pm/iso/c21539.htm>. See also the web page posted at <http://www.state.gov/e/oes/ocns/opa/maritimsecurity/index.htm>.)

A DOD list of DOD Instructions (available at <http://www.dtic.mil/whs/directives/corres/ins1.html>) includes a listing for DOD Instruction C-2005.01 of October 12, 2005, on the FON program, and states that this instruction replaced an earlier version of the document dated June 21, 1983. The document itself is controlled and not posted at the website. A website maintained by the Federation of American Scientists (FAS) listing Presidential Decision Directives (PDDs) of the Clinton Administration for the years 1993-2000 (<http://www.fas.org/irp/offdocs/pdd/index.html>) states that PDD-32 concerned the FON program. The listing suggests that PDD-32 was issued between September 21, 1994 and February 17, 1995.

<sup>36</sup> U.S. Department of Defense (DOD) Freedom of Navigation (FON) Report for Fiscal Year (FY) 2013, accessed March 10, 2014, at <http://policy.defense.gov/Portals/11/Documents/gsa/cwmd/FY2013%20DOD%20Annual%20FON%20Report.pdf>. Similar reports for prior fiscal years are posted at <http://policy.defense.gov/OSDPOffices/FON.aspx>.

<sup>37</sup> For example, one observer states that "The long and ongoing record of unilateral Chinese assertions or aggressions in the South and East China Sea no longer leaves room for doubt as to Beijing's intention. China wants and is trying to (continued...)"

domination over or control of this region could have major implications for the United States, including implications for U.S.-China relations, for interpreting China's rise as a major world power, for the security structure of the Asia-Pacific region, for the longstanding U.S. strategic goal of preventing the emergence of a regional hegemon in one part of Eurasia or another, and for two key elements of the U.S.-led international order that has operated since World War II—the non-use of force or coercion as a means of settling disputes between countries, and freedom of the seas.

---

(...continued)

achieve dominance over the waters behind what it calls the 'first island chain' and land features that fringe the U-shaped line. The question is not 'what does China intend?' The answer—dominance of some kind and degree—is known. The question is 'what, if anything, is anyone else prepared to do?'" (Donald K. Emmerson, "China Challenges Philippines in the South China Sea," *East Asia Forum* ([www.eastasiaforum.org](http://www.eastasiaforum.org)), March 18, 2014.)

Another observer states that "For more than a decade, the Chinese government has been pursuing a deliberate, yet indirect strategy to establish de facto control over the waters and airspace adjacent to its mainland." (Daniel Goure, "New Chinese Air Defense Zone Is latest Move In Beijing's Strategy To Dominate East Asia," Lexington Institute Early Warnig Blog ([www.lexingtoninstitute.org](http://www.lexingtoninstitute.org)), November 25, 2013.) A December 4, 2013, press report states: "China's escalation in its challenge to Japan's administration of islands near Taiwan reflects an effort to gain greater command of the air and seas in the western Pacific as it builds itself into a maritime power." (Henry Sanderson and Shai Oster, "China Air Zone Seen Step to Expanding Access to West Pacific," *Bloomberg News* ([www.bloomberg.com](http://www.bloomberg.com)), December 4, 2013.)

Another observer states that "Beijing seeks to wield this growing might to pursue outstanding territorial and maritime claims and to carve out in the Yellow, East and South China Seas and airspace above them a 'zone of exceptionalism' within which existing global security, legal, and resource management norms are subordinated to its parochial national interests. This can only weaken the global system on which all nations' security and prosperity depends, and will continue to destabilize a vital but vulnerable region that remains haunted by history." (Andrew S. Erickson, "Deterrence by Denial: How to Prevent China From Using Force," National Interest (<http://nationalinterest.org>), December 16, 2013.)

Another observer states that "The Chinese have long felt vulnerable from the sea and their current maritime strategy seeks to reduce that vulnerability by extending a ring of maritime control around China's periphery.... *First and foremost, it is the failure of previous Chinese leaders to close the maritime gap in China's arc of security and the invasions that resulted that motivates China's current leaders to extend strategic power over the near seas. Extending Chinese control over the near seas therefore is seen as enhancing security for the Chinese state and healing a sort of psychological wound in the collective Chinese mind.*" (Statement of Peter A. Dutton, Professor and Director, China Maritime Studies Institute, U.S. Naval War College, Testimony before the House Foreign Affairs Committee Hearing on China's Maritime Disputes in the East and South China Seas, January 14, 2014, pp. 2, 3. Italics as in original. [The hearing was actually a joint hearing before Seapower and Projection Forces subcommittee of the House Armed Services Committee and the Asia and the Pacific subcommittee of the House Foreign Affairs Committee.]

Another observer states that "The Yalong Bay naval base on [China's] Hainan [island] is one part of the strategy that China is starting to put in place to exert control over the Near Seas, pushing the US Navy ever farther out into the Western Pacific.... By weakening the US naval presence in the western Pacific, China hopes gradually to undermine America's alliances with other Asian countries, notably South Korea, the Philippines and maybe even Japan. If US influence declines, China would be in a position to assume quietly a leadership position in Asia, giving it much greater sway over the rules and practices in the global economy.... China's stepped-up claim over the [Senkaku] islands is one part of its push for greater control of the surrounding seas but it is also a central part of the growing contest for influence with the US." (Geoff Dyer, "US v China: Is This The New Cold War?" *Financial Times* ([www.ft.com](http://www.ft.com)), February 20, 2014.)

Another observer states that China's ECS ADIZ "can be regarded as just one element in a larger strategy of trying to assert sovereignty in the East China Sea and vast parts of the South China Sea, as reflected in Beijing's 'nine-dashed line.'" (Benjamin Schreer, "China's Rise: The Strategic Climate Is Getting Colder," *The Strategist* (*The Australian Strategic Policy Institute Blog*), March 3, 2014.)

## Risk of United States Being Drawn Into a Crisis or Conflict

Many observers are concerned that ongoing maritime territorial disputes in the ECS and SCS could lead to a crisis or conflict between China and a neighboring country such as Japan, the Philippines, and that the United States could be drawn into such a crisis or conflict as a result of obligations the United States has under bilateral security treaties with Japan and the Philippines. U.S. officials, concerned about the risk that a misunderstanding or miscalculation might cause a dispute over island territories to escalate into a conflict, have urged parties involved in the disputes to exercise restraint and avoid taking provocative actions.

### *U.S.-Japan Treaty on Mutual Cooperation and Security*

The 1960 U.S.-Japan treaty on mutual cooperation and security<sup>38</sup> states in Article V that

Each Party recognizes that an armed attack against either Party in the territories under the administration of Japan would be dangerous to its own peace and safety and declares that it would act to meet the common danger in accordance with its constitutional provisions and processes.

The United States has reaffirmed on a number of occasions over the years that since the Senkaku Islands are under the administration of Japan, they are included in the territories referred to in Article V of the treaty, and that the United States “will honor all of our treaty commitments to our treaty partners.”<sup>39</sup> (At the same time, the United States, noting the difference between administration and sovereignty, has noted that such affirmations do not prejudice the U.S. approach of taking no position regarding the outcome of the dispute between China, Taiwan, and Japan regarding who has sovereignty over the islands.) Some observers, while acknowledging the U.S. affirmations, have raised questions regarding the potential scope of actions that the United States might take under Article V.<sup>40</sup>

## ***U.S.-Philippines Mutual Defense Treaty***<sup>41</sup>

The 1951 U.S.-Philippines mutual defense treaty<sup>42</sup> states in Article IV that

Each Party recognizes that an armed attack in the Pacific Area on either of the Parties would be dangerous to its own peace and safety and declares that it would act to meet the common dangers in accordance with its constitutional processes.

Article V states that

For the purpose of Article IV, an armed attack on either of the Parties is deemed to include an armed attack on the metropolitan territory of either of the Parties, or on the island territories under its jurisdiction in the Pacific or on its armed forces, public vessels or aircraft in the Pacific.

The United States has reaffirmed on a number of occasions over the years its obligations under the U.S.-Philippines mutual defense treaty.<sup>43</sup> On May 9, 2012, Filipino Foreign Affairs Secretary Albert F. del Rosario issued a statement providing the Philippine perspective regarding the treaty's application to territorial disputes in the SCS.<sup>44</sup> U.S. officials have made their own statements regarding the treaty's application to territorial disputes in the SCS.<sup>45</sup>

## **U.S.-China Relations**

Developments regarding China's maritime territorial and EEZ disputes in the ECS and SCS could affect U.S.-China relations in general, which could have implications for other issues in U.S.-China relations.<sup>46</sup>

## **Interpreting China's Rise as a Major World Power**

As China rises as a major world power, observers are assessing what kind of international actor China will be. China's actions in asserting and defending its maritime territorial and EEZ disputes in the ECS and SCS could influence assessments that observers might make on issues such as China's approach to settling disputes between states (including whether China views force and

<sup>46</sup> For a survey of issues in U.S.-China relations, see CRS Report R41108, *U.S.-China Relations: An Overview of Policy Issues*, by Susan V. Lawrence.

coercion as acceptable means for settling such disputes, and consequently whether China believes that “might makes right”), China’s views toward the meaning and application of international law, and whether China views itself more as a stakeholder and defender of the current international order, or alternatively, more as a revisionist power that will seek to change elements of that order that it does not like.

## Security Structure of Asia-Pacific Region

Chinese domination over or control of its near-seas region could have significant implications for the security structure of the Asia-Pacific region. In particular, Chinese domination over or control of its near-seas area could greatly complicate the ability of the United States to fulfill its obligations to Taiwan under the Taiwan Relations Act (H.R. 2479/P.L. 96-8 of April 10, 1979).<sup>47</sup> It could also complicate the ability of the United States to fulfill its obligations under security and defense treaties with other countries in the region, particularly Japan, South Korea, the Philippines, and Thailand.<sup>48</sup> More generally, it could complicate the ability of the United States to operate U.S. forces in the Western Pacific for various purposes, including maintaining regional stability, conducting engagement and partnership-building operations, responding to crises, and executing war plans. Developments such as these could in turn encourage countries in the region to reexamine their own defense programs and foreign policies, potentially leading to a further change in the region’s security structure.

## U.S. Strategic Goal of Preventing Emergence of Regional Hegemon in Eurasia

Observers who are concerned that China may be seeking to dominate or gain control of its near-seas region in some cases go further, expressing concern that this may be part of a larger Chinese effort to become the hegemonic power in its region.<sup>49</sup> From a standpoint of U.S. strategic policy,

---

<sup>47</sup> For more on the Taiwan Relations Act, see CRS Report R41952, *U.S.-Taiwan Relationship: Overview of Policy Issues*, by Shirley A. Kan and Wayne M. Morrison.

<sup>48</sup> The United States has bilateral treaties with Japan, South Korea, and the Philippines. The United States and Thailand are parties to a Southeast Asia collective defense treaty that also includes the United Kingdom France, Australia, and New Zealand. The United States also has a separate treaty with Australia and New Zealand. For a summary of U.S. collective defense treaties, see the list posted at <http://www.state.gov/s/l/treaty/collectivedefense/>.

<sup>49</sup> One observer, for example, states that “Our approach has been, and must continue to be, that no one country dominates Asia. That objective, our role, and our strategic interests are being challenged by China. It is apparent in the growth in capability and capacity of the PLA (especially naval and air forces) and in the way China is defining (or redefining) maritime and air boundaries. Strategic space is being re-shaped spatially by military capabilities and behaviorally by dubious maritime and airspace claims. The latter is particularly critical and points to a fundamental difference in our strategic competition with China.” (Gary Roughead, “China, Time and Rebalancing,” Hoover Institution ([www.hoover.org](http://www.hoover.org)), undated (but with copyright of 2014), accessed March 25, 2014 at <http://www.hoover.org/taskforces/military-history/strategika/11/roughead>.) Another observer states that “China has historically been the Middle Kingdom, and it is now reasserting its perceived right to hegemonic status in East Asia.” (Jim Talent, “The Equilibrium of East Asia,” *National Review Online* (<http://www.nationalreview.com>), December 5, 2013.) Another observer states that “it is not clear yet if indeed China seeks regional hegemony. But there is a growing consensus among American and Japanese analysts that this is indeed the case. By Chinese hegemony in Asia we broadly mean something akin to the United States’ position in Latin America. We do not mean actual conquest. Almost no one believes China intends to annex even its weakest neighbors like Cambodia or North Korea. Rather, analysts expect a zone of super-ordinate influence over neighbors.” (Robert E. Kelly, “What Would Chinese Hegemony Look Like?” *The Diplomat* (<http://thediplomat.com>), February 10, 2014.)

such an effort would be highly significant, because it has been a longstanding U.S. strategic goal to prevent the emergence of a regional hegemon in one part of Eurasia or another.<sup>50</sup>

## Non-use of Force or Coercion as a Means of Settling Disputes Between Countries

A key element of the U.S.-led international order that has operated since World War II is that force or coercion should not be used as a means of settling disputes between countries, and certainly not as a routine or first-resort method. Some observers are concerned that some of China's actions in asserting and defending its territorial claims in the ECS and SCS challenge this principal and help re-establish the very different principal of "might makes right" as a routine or defining characteristic of international relations.<sup>51</sup>

---

<sup>50</sup> Most of the world's people, resources, and economic activity are located not in the Western Hemisphere, but in the other hemisphere, particularly Eurasia. In response to this basic feature of world geography, U.S. policymakers for the last several decades have chosen to pursue, as a key element of U.S. national strategy, a goal of preventing the emergence of a regional hegemon in one part of Eurasia or another, on the grounds that such a hegemon could deny the United States access to important resources and economic activity. Although U.S. policymakers do not often state this key national strategic goal explicitly in public, U.S. military operations in recent decades—both wartime operations and day-to-day operations—have been carried out in no small part in support of this key goal. One observer states that

if a distant great power were to dominate Asia or Europe the way America dominates the Western Hemisphere, it would then be free to roam around the globe and form alliances with countries in the Western Hemisphere that have an adversarial relationship with the United States. In that circumstance, the stopping power of the Atlantic and Pacific oceans would be far less effective. Thus, American policy makers have a deep-seated interest in preventing another great power from achieving regional hegemony in Asia or Europe.

The Persian Gulf is strategically important because it produces roughly 30 percent of the world's oil, and it holds about 55 percent of the world's crude-oil reserves. If the flow of oil from that region were stopped or even severely curtailed for a substantial period of time, it would have a devastating effect on the world economy. Therefore, the United States has good reason to ensure that oil flows freely out of the Gulf, which in practice means preventing any single country from controlling all of that critical resource. Most oil-producing states will keep pumping and seeling their oil as long as they are free to do so, because they depend on the revenues. It is in America's interest to keep them that way, which means there can be no regional hegemon in the Gulf, as well as Asia and Europe....

[The United States] should make sure it remains the most powerful country on the planet, which means making sure a rising China does not dominate Asia the way the United States dominates the Western Hemisphere.

(John J. Mearsheimer, "America Unhinged," *National Interest* (<http://nationalinterest.org>), January 2, 2014.)

<sup>51</sup> A "senior State Department official," in a background briefing, stated that "there is violent or strong agreement between the U.S. and ASEAN on the principles at stake, principles of freedom of navigation, principles of peaceful resolution. And those principles are, in fact, enshrined in the six points that ASEAN countries themselves have promulgated as guideposts for handling of the challenges of the South China Sea." (Department of State, Background Briefing En Route Brunei, October 9, 2013, accessed March 14, 2013, at <http://www.state.gov/r/pa/prs/ps/2013/10/215222.htm>.)

In a December 5, 2013, letter to China's Ambassador to the United States, Senators Robert Menendez, Bob Corker, Marco Rubio, and Benjamin L. Cardin stated:

We view this unilateral action [by China to establish an ECS ADIZ] as an ill-conceived attempt to alter the status quo, increasing the possibility of misunderstanding or miscalculation. Moreover, this declaration reinforces the perception that China prefers coercion over rule of law mechanisms to address territorial, sovereignty or jurisdictional issues in the Asia-Pacific. It also follows a disturbing trend of increasingly hostile Chinese maritime activities, including repeated incursions

(continued...)

## Freedom of the Seas

Another key element of the U.S.-led international order that has operated since World War II is the treatment of the world's seas under international law as international waters (i.e., as a global commons), and freedom of operations in international waters. The principal is often referred in shorthand as freedom of the seas. It is also sometimes referred to as freedom of navigation, although this term can be defined—particularly by parties who might not support freedom of the seas—in a narrow fashion, to include merely the freedom to navigate (i.e., pass through) sea areas, as opposed to the freedom for conducting various activities at sea. A more complete way to refer to the principal, as stated in DOD's annual FON report, is “the rights, freedoms, and uses of the sea and airspace guaranteed to all nations in international law.”<sup>52</sup> The principal that most of the world's seas are to be treated under international law as international waters dates back hundreds of years.<sup>53</sup>

Some observers are concerned that China's maritime territorial claims, particularly as shown in the map of the nine-dash line, appear to challenge to the principal that the world's seas are to be treated under international law as international waters. If such a challenge were to gain acceptance in the SCS region, it would have broad implications for the United States and other countries not only in the SCS, but around the world, because international law is universal in application, and a challenge to a principal of international law in one part of the world, if accepted, can serve as a precedent for challenging it in other parts of the world. Overturning the principal of freedom of the seas, so that significant portions of the seas could be appropriated as national territory, would overthrow hundreds of years of international legal tradition relating to the legal status of the world's oceans.<sup>54</sup>

---

(...continued)

by Chinese vessels into the waters and airspace of Japan, the Philippines, Vietnam and other in the East and South China Seas. These actions threaten freedom of air and maritime navigation, which are vital national interests of the United States.”

Another observer states:

Allowing Beijing to use force, or even the threat of force, to alter the regional status quo would have a number of pernicious effects. It would undermine the functioning of the most vibrant portion of the global commons—sea and air mediums that all nations rely on for trade and prosperity, but that none own. It would undermine important international norms and encourage the application of force to more of the world's many persistent disputes. Finally, it would threaten to destabilize a region haunted by history that has prospered during nearly seven decades of U.S. forces helping to preserve peace. No other nation has the capability and lack of territorial claims necessary to play this still-vital role.

(Andrew S. Erickson, “China's Near-Seas Challenges,” *National Review Online* (<http://nationalinterest.org>), January 13, 2014.

See also Jack David, “The Law of the Jungle Returns,” *National Review Online*, March 6, 2014.

<sup>52</sup> U.S. Department of Defense (DOD) Freedom of Navigation (FON) Report for Fiscal Year (FY) 2013, accessed March 10, 2014, at <http://policy.defense.gov/Portals/11/Documents/gsa/cwmd/FY2013%20DOD%20Annual%20FON%20Report.pdf>. Similar reports for prior fiscal years are posted at <http://policy.defense.gov/OUSDPOffices/FON.aspx>.

<sup>53</sup> The idea that most of the world's seas should be treated as international waters rather than as a space that could be appropriated as national territory dates back to Hugo Grotius (1583-1645), a founder of international law, whose 1609 book *Mare Liberum* (“The Free Sea”) helped to establish the primacy of the idea over the competing idea, put forth by the legal jurist and scholar John Seldon (1584-1654) in his 1635 book *Mare Clausum* (“Closed Sea”), that the sea could be appropriated as national territory, like the land.

<sup>54</sup> One observer states:

(continued...)

More specifically, if China's position on whether coastal states have a right under UNCLOS to regulate the activities of foreign military forces in their EEZs were to gain greater international acceptance under international law, it could substantially affect U.S. naval operations not only in the SCS and ECS (see **Figure 5** for EEZs in the SCS and ECS), but around the world, which in turn could substantially affect the ability of the United States to use its military forces to defend various U.S. interests overseas. As shown in **Figure 6**, significant portions of the world's oceans are claimable as EEZs, including high-priority U.S. Navy operating areas in the Western Pacific, the Persian Gulf, and the Mediterranean Sea. The legal right of U.S. naval forces to operate freely in EEZ waters is important to their ability to perform many of their missions around the world, because many of those missions are aimed at influencing events ashore, and having to conduct operations from more than 200 miles offshore would reduce the inland reach and responsiveness of ship-based sensors, aircraft, and missiles, and make it more difficult to transport Marines and their equipment from ship to shore. Restrictions on the ability of U.S. naval forces to operate in EEZ waters could potentially require a change in U.S. military strategy or U.S. foreign policy goals.<sup>55</sup>

---

(...continued)

A very old debate has been renewed in recent years: is the sea a commons open to the free use of all seafaring states, or is it territory subject to the sovereignty of coastal states? Is it to be freedom of the seas, as Dutch jurist Hugo Grotius insisted? Or is it to be closed seas where strong coastal states make the rules, as Grotius' English archnemesis John Selden proposed?

Customary and treaty law of the sea sides with Grotius, whereas China has in effect become a partisan of Selden. Just as England claimed dominion over the approaches to the British Isles, China wants to make the rules governing the China seas. Whose view prevails will determine not just who controls waters, islands, and atolls, but also the nature of the system of maritime trade and commerce. What happens in Asia could set a precedent that ripples out across the globe. The outcome of this debate is a big deal.

(James R. Holmes, "Has China Awoken a Sleeping Giant in Japan?" *The Diplomat* (<http://thediplomat.com>), March 1, 2014.)

<sup>55</sup> See, for example, United States Senate, Committee on Foreign Relations, Committee on Foreign Relations, Hearing on Maritime Disputes and Sovereignty Issues in East Asia, July 15, 2009, Testimony of Peter Dutton, Associate Professor, China Maritime Studies Institute, U.S. Naval War College, pp. 2 and 6-7.

Some observers, in commenting on China’s resistance to U.S. military survey and surveillance operations in China’s EEZ, have argued that the United States would similarly dislike it if China or some other country were to conduct military survey or surveillance operations within the U.S. EEZ. Skeptics of this view might argue that U.S. policy accepts the right of other countries to operate their military forces freely in waters outside the 12-mile U.S. territorial waters limit, and that the United States during the Cold War acted in accordance with this position by not interfering with either Soviet ships (including intelligence-gathering vessels known as AGIs)<sup>56</sup> that operated close to the United States or with Soviet bombers and surveillance aircraft that periodically flew close to U.S. airspace. The U.S. Navy states that

<sup>56</sup> AGI was a U.S. Navy classification for the Soviet vessels in question in which the A meant auxiliary ship, the G meant miscellaneous purpose, and the I meant that the miscellaneous purpose was intelligence gathering. One observer states:

During the Cold War it was hard for an American task force of any consequence to leave port without a Soviet “AGI” in trail. These souped-up fishing trawlers would shadow U.S. task forces, joining up just outside U.S. territorial waters. So ubiquitous were they that naval officers joked about assigning the AGI a station in the formation, letting it follow along—as it would anyway—without obstructing fleet operations.

AGIs were configured not just to cast nets, but to track ship movements, gather electronic intelligence, and observe the tactics, techniques, and procedures by which American fleets transact business in great waters.

(James R. Holmes, “China’s Small Stick Diplomacy,” *The Diplomat* (<http://thediplomat.com>), May 21, 2012, accessed October 3, 2012, at <http://thediplomat.com/2012/05/21/chinas-small-stick-diplomacy/>)

When the commonly recognized outer limit of the territorial sea under international law was three nautical miles, the United States recognized the right of other states, including the Soviet Union, to exercise high seas freedoms, including surveillance and other military operations, beyond that limit. The 1982 Law of the Sea Convention moved the outer limit of the territorial sea to twelve nautical miles. In 1983, President Reagan declared that the United States would accept the balance of the interests relating to the traditional uses of the oceans reflected in the 1982 Convention and would act in accordance with those provisions in exercising its navigational and overflight rights as long as other states did likewise. He further proclaimed that all nations will continue to enjoy the high seas rights and freedoms that are not resource related, including the freedoms of navigation and overflight, in the Exclusive Economic Zone he established for the United States consistent with the 1982 Convention.<sup>57</sup>

DOD states that

the PLA Navy has begun to conduct military activities within the Exclusive Economic Zones (EEZs) of other nations, without the permission of those coastal states. Of note, the United States has observed over the past year several instances of Chinese naval activities in the EEZ around Guam and Hawaii. One of those instances was during the execution of the annual Rim of the Pacific (RIMPAC) exercise in July/August 2012. While the United States considers the PLA Navy activities in its EEZ to be lawful, the activity undercuts China's decades-old position that similar foreign military activities in China's EEZ are unlawful.<sup>58</sup>

## Issues for Congress

Maritime territorial and EEZ disputes in the SCS and ECS involving China raise several potential policy and oversight issues for Congress, including those discussed below.

### U.S. Strategy for Countering “Salami-Slicing” Strategy

Particularly in light of the potential implications for the United States if China were to achieve domination over or control of its near-seas areas (see previous section), one potential oversight issue for Congress concerns the U.S. strategy for countering China's “salami-slicing” strategy. Potential oversight questions for Congress include the following:

---

<sup>57</sup> Navy Office of Legislative Affairs e-mail to CRS dated September 4, 2012. Similarly, some observers have argued that China's position regarding the SCS and ECS is similar to the U.S. Monroe Doctrine for Latin America in the 19<sup>th</sup> and early-20<sup>th</sup> centuries. In response to this argument, one observer states that

... China's policy in the near seas today bears scant resemblance to U.S. policy in the Caribbean and Gulf in the age of the Monroe Doctrine. For one thing, Washington never asserted title to the Caribbean the way Beijing claims the South China Sea. For another, America never sought to restrict naval activities in its near seas, whereas China opposes such things as routine aircraft carrier operations in the Yellow Sea.... In effect, China has vaulted past the most bellicose, most meddlesome interpretations of the Monroe Doctrine and Roosevelt Corollary.

(James Holmes, “China's Monroe Doctrine,” *The Diplomat* (<http://thediplomat.com>), June 22, 2012, accessed November 21, 2012, at <http://thediplomat.com/2012/06/22/chinas-monroe-doctrine/>)

<sup>58</sup> Department of Defense, *Annual Report to Congress [on] Military and Security Developments Involving the People's Republic of China 2013*, p. 39.

- Does the United States have strategy for countering China’s “salami-slicing” strategy?
- If the United States does have such a strategy, what are its key elements, and has it been effective? Should the strategy be changed, and if so, how?
- If the United States does not have such a strategy, does the administration intend to create one, and if so, by when?

One observer states:

Salami-slicing places rivals, especially conflicted rivals, in an uncomfortable position. It is the rivals of salami-slicers who are obligated to eventually draw red lines and engage in brinkmanship over actions others will view, in isolation, as trivial and far from constituting *casus belli*. China’s leaders are apparently counting on such hesitancy, a calculation that thus far is working out for them....

... there is no visible response by the U.S. government to China’s salami-slicing. U.S. officials... have expressed regret over China’s ADIZ declaration, and stated their intention to carry on with usual U.S. military operations inside that zone and elsewhere in the region. Yet China has suffered no penalty for its series of actions. Regarding the disputed claims in the two seas, the official policy from Washington is that China’s neighbors are on their own—the U.S. will not take sides in these territorial disputes. The United States also objects to the use of coercion in resolving the disputes. But each individual act of China’s salami-slicing is carefully calibrated to fall below a threshold most outside observers would view as overt coercion.

With no resistance to its actions, Chinese salami-slicing will certainly continue....

When the salami-slices sum up to a substantial security problem for Japan, India, and the ASEAN countries, someone is likely to draw a red line somewhere. The issue for U.S. officials is whether they will be the ones to do that drawing, and thus retain the initiative, or whether someone else, having lost confidence in Washington, will do it instead. When that happens, the U.S. will find itself reacting to events, rather than shaping a favorable outcome in advance.<sup>59</sup>

A December 16, 2013, State Department fact sheet states:

On December 16, Secretary of State John Kerry announced an initial commitment of \$32.5 million in new regional and bilateral assistance to advance maritime capacity building in Southeast Asia. Including this new funding, our planned region-wide funding support for maritime capacity building exceeds \$156 million for the next two years.

As an example of our commitment to strengthen maritime capacities in Southeast Asia, the United States intends to provide up to \$18 million in new assistance to Vietnam to enhance the capacity of coastal patrol units to deploy rapidly for search and rescue, disaster response, and other activities, including through provision of five fast patrol vessels in 2014 to the Vietnamese Coast Guard. This assistance directly responds to priorities identified in the Joint Minutes on Vietnam and U.S. Coast Guard Maritime Cooperation signed October 1, 2013, by VCG Major General Nguyen Quang Dam and USCG Commandant Admiral Robert J. Papp, Jr.

<sup>59</sup> Robert Haddick, “America Has No Answer to China’s Salami-Slicing,” *War on the Rocks* (<http://warontherocks.com>), February 6, 2014.

The United States will also expand its support for regional cooperation by strengthening information sharing among national agencies in Southeast Asia charged with maritime security and maritime law enforcement. Building on existing programs and initiatives, we will increase training for maritime law enforcement officials from participating Southeast Asian countries in multilateral settings, such as currently occurs in the Gulf of Thailand initiative and Trilateral Interagency Maritime Law Enforcement Workshops. We will take advantage of the International Law Enforcement Academy in Bangkok, Thailand, to deliver new maritime law enforcement training courses for maritime officials across Southeast Asia.

The Secretary's announcement builds upon the United States' longstanding commitment to support the efforts of Southeast Asian nations to enhance security and prosperity in the region, including in the maritime domain. Existing programs include efforts to combat piracy in and around the Malacca Strait, to counter transnational organized crime and terrorist threats in the tri-border region south of the Sulu Sea between the southern Philippines, Indonesia, and Malaysia, and to expand information sharing and professional training through the Gulf of Thailand initiative. In addition, since 1999 the U.S.-supported International Law Enforcement Academy in Bangkok, Thailand has been one of the world's premier multilateral platforms for law enforcement training and cooperation.<sup>60</sup>

A March 30, 2014, press report states:

Japan and the United States plan to create a permanent consultative body to coordinate the operations of the Self-Defense Forces and the U.S. military in the face of China's highhanded actions over the Senkaku Islands in Okinawa Prefecture, Japanese and U.S. government sources said.

The envisaged body is expected to help Japan and the United States deal quickly with situations in and around the islands that cannot be clearly identified as armed attacks, the sources said.

Establishment of the consultative body will be included in revisions to the Guidelines for Japan-U.S. Defense Cooperation scheduled for the end of the year....

During their talks to review the current guidelines, foreign and defense officials from both sides stated that there is a need to create a permanent coordination body when they went over desktop military exercises and exchanged opinions on how quasi-military attacks on Japan should be handled.

Experts predict that an attempt by China to seize the Senkakus would very likely begin with the landing of armed personnel disguised as fishermen. The prediction has prompted the Japanese side to demand enhancement of the Japan-U.S. partnership to deal with such ambiguous situations.<sup>61</sup>

In assessing the question of U.S. strategy for countering China's salami-slicing strategy, one potential matter that Congress may consider concerns the relatively limited ability of the Philippines' to patrol its EEZ, which includes Scarborough Shoal and some of the Spratly Islands (see **Figure 4**), and to otherwise assert and defend its maritime claims. The Philippines has

<sup>60</sup> Department of State Fact Sheet, "Expanded U.S. Assistance for Maritime Capacity Building," December 16, 2013, accessed March 14, 2013, at <http://www.state.gov/r/pa/prs/ps/2013/218735.htm>.

<sup>61</sup> Takashi Imai, "Japan, US To Create New Defense Body For Disputed Islands," *Stars and Stripes* ([www.stripes.com](http://www.stripes.com)), March 30, 2014, accessed April 9, 2014, at <http://www.stripes.com/news/pacific/japan-us-to-create-new-defense-body-for-disputed-islands-1.275417>.

relatively few modern ships larger than patrol craft in its navy or coast guard, and the country's resulting limited capability for patrolling the EEZ and otherwise asserting and defending its maritime claims can be viewed as contributing to a power vacuum in the SCS that China can exploit in asserting and defending its maritime territorial claims in the area.<sup>62</sup>

The United States has taken certain actions to improve the Philippines' ability for patrolling its EEZ and otherwise asserting and defending its maritime claims, including the transfer of two ex-U.S. Coast Guard Hamilton-class cutters to the Philippines' navy. (The United States is also negotiating with the Philippines on an agreement that would provide increased access to Philippine bases for U.S. forces.) The Philippines plans to acquire two frigates from Italy and about 10 patrol boats from Japan. Whether these additions will give the Philippines a sufficient capability for patrolling its EEZ and otherwise asserting and defending its maritime claims is not clear. Potential follow-on questions for Congress include the following:

- Will the Philippines' current plans for acquiring new ships, including two frigates from Italy and about 10 patrol boats from Japan, give the Philippines a sufficient capability for patrolling its EEZ and otherwise asserting and defending its maritime claims?
- If not, what would be the potential advantages or disadvantages of initiating a U.S. or multilateral program for providing the Philippines with additional ships? What might such a program look like?

## **Risk of United States Being Drawn Into a Crisis or Conflict**

Another potential issue for Congress concerns U.S. actions to reduce the risk that the United States might be drawn into a crisis or conflict over a territorial dispute involving China. Potential oversight questions for Congress include the following:

- Have U.S. officials taken appropriate and sufficient steps to help reduce the risk of maritime territorial disputes in the SCS and ECS escalating into conflicts?
- Do the United States and Japan have a common understanding of potential U.S. actions under Article IV of the U.S.-Japan Treaty on Mutual Cooperation and Security in the event of a crisis or conflict over the Senkaku Islands? What steps has the United States taken to ensure that the two countries share a common understanding?
- Do the United States and the Philippines have a common understanding of how the 1951 U.S.-Philippines mutual defense treaty applies to maritime territories in the SCS that are claimed by both China and the Philippines, and of potential U.S. actions under Article IV of the treaty in the event of a crisis or conflict over the territories? What steps has the United States taken to ensure that the two countries share a common understanding?

---

<sup>62</sup> Limitations on Vietnamese and Malaysian capabilities can also be viewed as contributing to such a power vacuum; for a discussion, see Nah Liang Tuang, "China's Maritime Expansion: Exploiting Regional Weakness?" *The Diplomat* (<http://thediplomat.com>), March 5, 2014.

- Aside from public statements, what has the United States communicated to China regarding potential U.S. actions under the two treaties in connection with maritime territorial disputes in the SCS and ECS?
- Has the United States correctly balanced ambiguity and explicitness in its communications to various parties regarding potential U.S. actions under the two defense treaties?
- How do the two treaties affect the behavior of Japan, the Philippines, and China in managing their territorial disputes? To what extent, for example, would they help Japan or the Philippines resist potential Chinese attempts to resolve the disputes through intimidation, or, alternatively, encourage risk-taking or brinksmanship behavior by Japan or the Philippines in their dealings with China on the disputes? To what extent do they deter or limit Chinese assertiveness or aggressiveness in their dealings with Japan the Philippines on the disputes?
- Has the DOD adequately incorporated into its planning crisis and conflict scenarios arising from maritime territorial disputes in the SCS and ECS that fall under the terms of the two treaties?

## **Whether United States Should Enter Into A U.S-Chinese Incidents-at-Sea (INCSEA) Agreement**

Another potential issue for Congress is whether the United States should seek to reduce the risk of future incidents between U.S. and Chinese ships and aircraft in China's EEZ by entering into an agreement with China regulating the behavior of U.S. Chinese ships and aircraft that are operating in proximity with one another. Such an agreement could be broadly similar to the May 1972 U.S.-Soviet agreement on the prevention of incidents on and over the high seas, commonly known as the Incidents-at-Sea (INCSEA) agreement.<sup>63</sup>

Supporters of this option could argue the following:

- The May 1972 U.S.-Soviet INCSEA agreement is regarded by observers as having been successful in helping to reduce the risk of incidents between U.S. and Soviet ships and aircraft during the Cold War.
- A broadly similar agreement with China could reduce the risk of incidents involving U.S. and Chinese ships and aircraft, and could be useful in that regard as a confidence-building measure.
- The terms of such an agreement could be drafted to be consistent with the U.S. position on whether a coastal state has the right to regulate foreign military forces operating in their EEZs.

Opponents of this option could argue the following:

- When the May 1972 U.S.-Soviet INCSEA agreement was signed, the October 1972 multilateral convention on the international regulations for preventing

---

<sup>63</sup> 23 UST 1168; TIAS 7379; UNTS 151. The agreement was signed at Moscow on May 25, 1972, and entered into force the same day.

collisions at sea (commonly known as the COLREGs or the “rules of the road”)<sup>64</sup> (see discussion in “Background”) did not yet exist. In contrast to the situation in May 1972, the COLREGs convention now exists, and both China and the United States are party to it. China and the United States are also party to the multilateral Code for Unalerted Encounters at Sea (CUES),<sup>65</sup> a voluntary code produced by the Western Pacific Naval Symposium (WPNS),<sup>66</sup> and the 1998 bilateral U.S.-Chinese Military Maritime Consultative Agreement (MMCA), which is aimed at reducing the chances of confrontation between the two countries’ militaries at sea and in the air.<sup>67</sup> Managing U.S.-Chinese interactions at sea requires standards to govern conduct and a forum to discuss incidents. A new INCSEA-like agreement is not necessary, because both of these things are already in place: The COLREGs and CUES provide the standards, and the consultative mechanism created by the MMCA creates the forum.

- Chinese vessels arguably violated both the COLREGs and Article 94 of UNCLOS in the 2009 incident with a U.S. ship.<sup>68</sup> The Chinese ship involved in the December 5, 2013, incident involving the Cowpens might have violated the COLREGs. Consequently, signing a new INCSEA-like agreement with China could be viewed as rewarding China for past violations and be of questionable value in preventing future U.S.-Chinese incidents at sea.<sup>69</sup>

<sup>64</sup> 28 UST 3459; TIAS 8587. The treaty was done at London October 20, 1972, and entered into force July 15, 1977. A summary of the agreement is available at <http://www.imo.org/about/conventions/listofconventions/pages/colreg.aspx>.

<sup>65</sup> For more on CUES, see Mark E. Redden and Phillip C. Saunders, *Managing Sino-U.S. Air and Naval Interactions: Cold War Lessons and New Avenues of Approach*, Washington, Center for the Study of Chinese Military Affairs, Institute for National Strategic Studies, National Defense University, September 2012, pp. 8-9. The text of the 2003 CUES Review Supplement was accessed October 1, 2012, at <http://navy.mil.my/wpns2012/images/stories/dokumen/WPNS%202012%20PRESENTATION%20FOLDER/ACTION%20ITEMS%20WPNS%20WORKSHOP%202012/CUES.PDF>.

<sup>66</sup> As described in one press release, the WPNS

The Western Pacific Naval Symposium (WPNS) comprises navies whose countries border the Pacific Ocean region. It was inaugurated in 1988 after navy chiefs attending the International Seapower Symposium in 1987 agreed to establish a forum where leaders of regional navies could meet to discuss cooperative initiatives. Under the WPNS, member countries convene biennially to discuss regional and global maritime issues.

As of October 2010, WPNS membership stands at 20 members and four observers. They are:

Members: Australia, Brunei, Cambodia, Canada, Chile, France, Indonesia, Japan, Malaysia, New Zealand, Papua New Guinea, People’s Republic of China, Philippines, Republic of Korea, Russia, Singapore, Thailand, Tonga, United States of America and Vietnam

Observers: Bangladesh, India, Mexico and Peru

(Singapore Ministry of Defense, “Fact Sheet: Background of the Western Pacific Naval Symposium, MCMEX, DIVEX and NMS,” updated March 25, 2011, accessed October 1, 2012, at [http://www.mindef.gov.sg/imindef/news\\_and\\_events/nr/2011/mar/25mar11\\_nr/25mar11\\_fs.html](http://www.mindef.gov.sg/imindef/news_and_events/nr/2011/mar/25mar11_nr/25mar11_fs.html). See also the website for the 2012 WPNS at <http://www.navy.mil.my/wpns2012/>.)

<sup>67</sup> For more on the MMCA, see CRS Report RL32496, *U.S.-China Military Contacts: Issues for Congress*, by Shirley A. Kan.

<sup>68</sup> For a detailed argument that the behavior of Chinese ships in the March 2009 U.S.-Chinese incident at sea in China’s EEZ violated the COLREGs and Article 94 of UNCLOS, see Jonathan G. Odom, “The True ‘Lies’ of the *Impeccable* Incident: What Really Happened, Who Disregarded International Law, and Why Every Nation (Outside of China) Should Be Concerned,” *Michigan State Journal of International Law*, vol. 18, no. 3, 2010: 16-22. Accessed September 25, 2012, at [http://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=1622943](http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1622943).

<sup>69</sup> For additional discussion, see China’s Active Defense Strategy and its Regional Impact, Prepared statement by Stacy A. Pedrozo, CAPT, JAGC, USN1, U.S. Navy Military Fellow, Council on Foreign Relations, Before the U.S.-China (continued...)

Related potential oversight questions for Congress include the following:

- Is the number of countries that share China’s view on whether coastal states have a right under UNCLOS to regulate the activities of foreign military forces in their EEZs growing, and if so, what steps is the Administration taking to stop or reverse this growth? What activities is the Administration taking, vis-a-vis China or other countries, to reinforce the U.S. position on whether coastal states have a right under UNCLOS to regulate the activities of foreign military forces in their EEZs?
- One of the 27 countries listed earlier (see “Dispute Regarding China’s Rights Within Its EEZ”) as having restrictions inconsistent with UNCLOS that would limit the exercise of high seas freedoms by foreign navies beyond 12 nautical miles from the coast is Portugal. Given Portugal’s status as a NATO ally and a historical maritime power, to what extent do Portugal’s restrictions make it harder for the United States to defend its position on the question of whether coastal states have the right to regulate foreign military activities in their EEZs? What steps has the Administration taken to encourage Portugal, as a NATO ally that derives collective security benefits from U.S. defense efforts, to end its restrictions and affirm the U.S. position on the question of whether coastal states have the right to regulate foreign military activities in their EEZs?
- Another one of the 27 countries listed earlier is Thailand—a country with a coast on the Gulf of Thailand, a body of water that opens onto the South China Sea. Given Thailand’s status as the United States’ oldest ally in Southeast Asia (as described by DOD) and as the host country for the annual Cobra Gold exercise, the United States’ longest-standing military exercise in the Pacific,<sup>70</sup> what steps has the Administration taken to encourage Thailand to end its restrictions that would limit the exercise of high seas freedoms by foreign navies beyond 12 nautical miles from the coast and affirm the U.S. position on the question of whether coastal states have the right to regulate foreign military activities in their EEZs?
- Another one of the 27 listed earlier is Vietnam—a country whose relations with the United States have improved in recent years, in part because of China’s activities in the SCS. What steps has the Administration taken to encourage Vietnam to end its restrictions that would limit the exercise of high seas freedoms by foreign navies beyond 12 nautical miles from the coast and affirm the U.S. position on the question of whether coastal states have the right to regulate foreign military activities in their EEZs?
- China in recent years has begun to operate small numbers of navy ships in the Indian Ocean (for anti-piracy operations), the Persian Gulf, and the Mediterranean Sea. Chinese officials are also concerned about the security of

---

Economic & Security Review Commission, United States House of Representatives, First Session, 112<sup>th</sup> Congress, January 27, 2011, p. 8. (The title page mistakenly shows a date of January 27, 2010.) See also Bonnie S. Glaser, *Armed Clash in the South China Sea*, Council on Foreign Relations, Center for Preventive Action, April 2012, pp. 4-5.)

<sup>70</sup> Source: Donna Miles, “Cobra Gold 2012 to Promote Partnership, Interoperability,” *American Forces Press Service (DOD)*, accessed September 25, 2012, at <http://www.defense.gov/news/newsarticle.aspx?id=66803>.)

their maritime oil supply routes from the Persian Gulf. To what extent have U.S. officials communicated to Chinese officials that, in light of these developments, China arguably has an increasing interest in changing its position on whether coastal states have a right under UNCLOS to regulate the activities of foreign military forces in their EEZs?

## **Whether United States Should Ratify United Nations Convention on the Law of the Sea (UNCLOS)**

Another issue for Congress—particularly the Senate—is the impact of maritime territorial and EEZ disputes involving China on the overall debate on whether the United States should become a party to UNCLOS. UNCLOS was adopted by Third United Nations Conference on the Law of the Sea in December 1982, and entered into force in November 1994. The treaty established EEZs as a feature of international law, and contains multiple provisions relating to territorial waters and EEZs. As of September 21, 2012, 162 nations were party to the treaty, including China and most other countries bordering on the SCS and ECS (the exceptions being North Korea and Taiwan).<sup>71</sup>

The treaty and an associated 1994 agreement relating to implementation of Part XI of the treaty (on deep seabed mining) were transmitted to the Senate on October 6, 1994.<sup>72</sup> In the absence of Senate advice and consent to adherence, the United States is not a party to the convention and the associated 1994 agreement. During the 112<sup>th</sup> Congress, the Senate Foreign Relations Committee held four hearings on the question of whether the United States should become a party to the treaty on May 23, June 14 (two hearings), and June 28, 2012.

Supporters of the United States becoming a party to UNCLOS argue or might argue one or more of the following:

- The treaty’s provisions relating to navigational rights, including those in EEZs, reflect the U.S. position on the issue; becoming a party to the treaty would help lock the U.S. perspective into permanent international law.
- Becoming a party to the treaty would give the United States greater standing for participating in discussions relating to the treaty—a “seat at the table”—and thereby improve the U.S. ability to call on China to act in accordance with the treaty’s provisions, including those relating to navigational rights, and to defend U.S. interpretations of the treaty’s provisions, including those relating to whether coastal states have a right under UNCLOS to regulate foreign military activities in their EEZs.
- At least some of the ASEAN member states want the United States to become a member of UNCLOS, because they view it as the principal framework for resolving maritime territorial disputes.

---

<sup>71</sup> Source: Chronological lists of ratifications of, accessions and successions to the Convention and the related Agreements as at 21 September 2012, accessed September 26, 2012, at [http://www.un.org/Depts/los/reference\\_files/chronological\\_lists\\_of\\_ratifications.htm#The United Nations Convention on the Law of the Sea](http://www.un.org/Depts/los/reference_files/chronological_lists_of_ratifications.htm#The United Nations Convention on the Law of the Sea). A similar list, in alphabetical order by country name, is posted at [http://www.un.org/Depts/los/reference\\_files/status2010.pdf](http://www.un.org/Depts/los/reference_files/status2010.pdf).

<sup>72</sup> Treaty Document 103-39.

- Relying on customary international law to defend U.S. interests in these issues is not sufficient, because it is not universally accepted and is subject to change over time based on state practice.

Opponents of the United States becoming a party to UNCLOS argue or might argue one or more of the following:

- China’s ability to cite international law (including UNCLOS) in defending its position on whether coastal states have a right to regulate foreign military activities in their EEZs<sup>73</sup> shows that UNCLOS does not adequately protect U.S. interests relating to navigational rights in EEZs; the United States should not help lock this inadequate description of navigational rights into permanent international law by becoming a party to the treaty.
- The United States becoming a party to the treaty would do little to help resolve maritime territorial disputes in the SCS and ECS, in part because China’s maritime territorial claims, such as those depicted in the map of the nine-dash line, predate and go well beyond what is allowed under the treaty and appear rooted in arguments that are outside the treaty.
- The United States can adequately support the ASEAN countries and Japan in matters relating to maritime territorial disputes in the SCS and ECS in other ways, without becoming a party to the treaty.
- The United States can continue to defend its positions on navigational rights on the high seas by citing customary international law, by demonstrating those rights with U.S. naval deployments (including those conducted under the FON program), and by having allies and partners defend the U.S. position on the EEZ issue at meetings of UNCLOS parties.

## Legislative Activity in 113<sup>th</sup> Congress

### S.Res. 412

S.Res. 412 was introduced on April 7, 2014. The text of the resolution as introduced is as follows:

#### RESOLUTION

Reaffirming the strong support of the United States Government for freedom of navigation and other internationally lawful uses of sea and airspace in the Asia-Pacific region, and for the peaceful diplomatic resolution of outstanding territorial and maritime claims and disputes.

Whereas Asia-Pacific’s maritime domains, which include both the sea and airspace above the domains, are critical to the region’s prosperity, stability, and security, including global commerce;

---

<sup>73</sup> For a discussion of China’s legal justifications for its position on the EEZ issue, see, for example, Peter Dutton, “Three Dispute and Three Objectives,” *Naval War College Review*, Autumn 2011: 54-55.

Whereas the United States is a longstanding Asia-Pacific power and has a national interest in maintaining freedom of operations in international waters and airspace both in the Asia-Pacific region and around the world;

Whereas, for over 60 years, the United States Government, alongside United States allies and partners, has played an instrumental role in maintaining stability in the Asia-Pacific, including safeguarding the prosperity and economic growth and development of the Asia-Pacific region;

Whereas the United States, from the earliest days of the Republic, has had a deep and abiding national security interest in freedom of navigation, freedom of the seas, respect for international law, and unimpeded lawful commerce, including in the East China and South China Seas;

Whereas the United States alliance relationships in the region, including with Japan, Korea, Australia, the Philippines, and Thailand, are at the heart of United States policy and engagement in the Asia-Pacific region, and share a common approach to supporting the maintenance of peace and stability, freedom of navigation, and other internationally lawful uses of sea and airspace in the Asia-Pacific region;

Whereas territorial and maritime claims must be derived from land features and otherwise comport with international law;

Whereas the United States Government has a clear interest in encouraging and supporting the nations of the region to work collaboratively and diplomatically to resolve disputes and is firmly opposed to coercion, intimidation, threats, or the use of force;

Whereas the South China Sea contains great natural resources, and their stewardship and responsible use offers immense potential benefit for generations to come;

Whereas the United States is not a claimant party in either the East China or South China Seas, but does have an interest in the peaceful diplomatic resolution of disputed claims in accordance with international law, in freedom of operations, and in the free-flow of commerce free of coercion, intimidation, or the use of force;

Whereas the United States supports the obligation of all members of the United Nations to seek to resolve disputes by peaceful means;

Whereas freedom of navigation and other lawful uses of sea and airspace in the Asia-Pacific region are embodied in international law, not granted by certain states to others;

Whereas, on November 23, 2013, the People's Republic of China unilaterally and without prior consultations with the United States, Japan, the Republic of Korea or other nations of the Asia-Pacific region, declared an Air Defense Identification Zone (ADIZ) in the East China Sea, also announcing that all aircraft entering the PRC's self-declared ADIZ, even if they do not intend to enter Chinese territorial airspace, would have to submit flight plans, maintain radio contact, and follow directions from the Chinese Ministry of National Defense or face 'emergency defensive measures';

Whereas the 'rules of engagement' declared by China, including the 'emergency defensive measures', are in violation of the concept of 'due regard for the safety of civil aviation' under the Chicago Convention of the International Civil Aviation Organization's Chicago Convention and thereby are a departure from accepted practice;

Whereas the Chicago Convention of the International Civil Aviation Organization distinguishes between civilian aircraft and state aircraft and provides for the specific obligations of state parties, consistent with customary law, to 'refrain from resorting to the use of weapons against civil aircraft in flight and ... in case of interception, the lives of persons on board and the safety of aircraft must not be endangered';

Whereas international civil aviation is regulated by international agreements, including standards and regulations set by ICAO for aviation safety, security, efficiency and regularity, as well as for aviation environmental protection;

Whereas, in accordance with the norm of airborne innocent passage, the United States does not recognize the right of a coastal nation to apply its ADIZ procedures to foreign state aircraft not intending to enter national airspace nor does the United States apply its ADIZ procedures to foreign state aircraft not intending to enter United States airspace;

Whereas the United States Government expressed profound concerns with China's unilateral, provocative, dangerous, and destabilizing declaration of such a zone, including the potential for misunderstandings and miscalculations by aircraft operating lawfully in international airspace;

Whereas the People's Republic of China's declaration of an ADIZ in the East China Sea will not alter how the United States Government conducts operations in the region or the unwavering United States commitment to peace, security and stability in the Asia-Pacific region;

Whereas the Government of Japan expressed deep concern about the People's Republic of China's declaration of such a zone, regarding it as an effort to unduly infringe upon the freedom of flight in international airspace and to change the status quo that could escalate tensions and potentially cause unintentional consequences in the East China Sea;

Whereas the Government of the Republic of Korea has expressed concern over China's declared ADIZ, and on December 9, 2013, announced an adjustment to its longstanding Air Defense Identification Zone, which does not encompass territory administered by another country, and did so only after undertaking a deliberate process of consultations with the United States, Japan, and China;

Whereas the Government of the Philippines has stressed that China's declared ADIZ seeks to transfer an entire air zone into Chinese domestic airspace, infringes on freedom of flight in international airspace, and compromises the safety of civil aviation and the national security of affected states, and has called on China to ensure that its actions do not jeopardize regional security and stability;

Whereas, on November 26, 2013, the Government of Australia made clear in a statement its opposition to any coercive or unilateral actions to change the status quo in the East China Sea;

Whereas, on March 10, 2014, the United States Government and the Government of Japan jointly submitted a letter to the ICAO Secretariat regarding the issue of freedom of overflight by civil aircraft in international airspace and the effective management of civil air traffic within allocated Flight Information Regions (FIR);

Whereas Indonesia Foreign Minister Marty Natalegawa, in a hearing before the Committee on Defense and Foreign Affairs on February 18, 2014, stated, 'We have firmly told China we will not accept a similar [Air Defense Identification] Zone if it is adopted in the South China

Sea. And the signal we have received thus far is, China does not plan to adopt a similar Zone in the South China Sea.’;

Whereas over half the world’s merchant tonnage flows through the South China Sea, and over 15,000,000 barrels of oil per day transit the Strait of Malacca, fueling economic growth and prosperity throughout the Asia-Pacific region;

Whereas the increasing frequency and assertiveness of patrols and competing regulations over disputed territory and maritime areas and airspace in the South China Sea and the East China Sea are raising tensions and increasing the risk of confrontation;

Whereas the Association of Southeast Asian Nations (ASEAN) has promoted multilateral talks on disputed areas without settling the issue of sovereignty, and in 2002 joined with China in signing a Declaration on the Conduct of Parties in the South China Sea that committed all parties to those territorial disputes to ‘reaffirm their respect for and commitment to the freedom of navigation in and over flight above the South China Sea as provided for by the universally recognized principles of international law’ and to ‘resolve their territorial and jurisdictional disputes by peaceful means, without resorting to the threat or use of force’;

Whereas ASEAN and China committed in 2002 to develop an effective Code of Conduct when they adopted the Declaration on the Conduct of Parties in the South China Sea, yet negotiations are irregular and little progress has been made;

Whereas, in recent years, there have been numerous dangerous and destabilizing incidents in waters near the coasts of the Philippines, China, Malaysia, and Vietnam;

Whereas the United States Government is deeply concerned about unilateral actions by any claimant seeking to change the status quo through the use of coercion, intimidation, or military force, including the continued restrictions on access to Scarborough Reef and pressure on long-standing Philippine presence at the Second Thomas Shoal by the People’s Republic of China; actions by any state to prevent any other state from exercising its sovereign rights to the resources of the exclusive economic zone (EEZ) and continental shelf by making claims to those areas that have no support in international law; declarations of administrative and military districts in contested areas in the South China Sea; and the imposition of new fishing regulations covering disputed areas, which have raised tensions in the region;

Whereas international law is important to safeguard the rights and freedoms of all states in the Asia-Pacific region, and the lack of clarity in accordance with international law by claimants with regard to their South China Sea claims can create uncertainty, insecurity, and instability;

Whereas the United States Government opposes the use of intimidation, coercion, or force to assert a territorial claim in the South China Sea;

Whereas claims in the South China Sea must accord with international law, and those that are not derived from land features are fundamentally flawed;

Whereas ASEAN issued Six-Point Principles on the South China Sea on July 20, 2012, whereby ASEAN’s Foreign Ministers reiterated and reaffirmed ‘the commitment of ASEAN Member States to: ... 1. the full implementation of the Declaration on the Conduct of Parties in the South China Sea (2002); ... 2. the Guidelines for the Implementation of the Declaration on the Conduct of Parties in the South China Sea (2011); ... 3. the early conclusion of a Regional Code of Conduct in the South China Sea; ... 4. the full respect of the universally

recognized principles of International Law, including the 1982 United Nations Convention on the Law of the Sea (UNCLOS); ... 5. the continued exercise of self-restraint and non-use of force by all parties; and ... 6. the peaceful resolution of disputes, in accordance with universally recognized principles of International Law, including the 1982 United Nations Convention on the Law of the Sea (UNCLOS).’;

Whereas, in 2013, the Republic of the Philippines properly exercised its rights to peaceful settlement mechanisms with the filing of arbitration case under Article 287 and Annex VII of the Convention on the Law of the Sea in order to achieve a peaceful and durable solution to the dispute, and the United States hopes that all parties in any dispute ultimately abide by the rulings of internationally recognized dispute-settlement bodies;

Whereas China and Japan are the world’s second and third largest economies, and have a shared interest in preserving stable maritime domains to continue to support economic growth;

Whereas there has been an unprecedented increase in dangerous activities by Chinese maritime agencies in areas near the Senkaku islands, including between 6 and 25 ships of the Government of China intruding into the Japanese territorial sea each month since September 2012, between 26 and 124 ships entering the ‘contiguous zone’ in the same time period, and 9 ships intruding into the territorial sea and 33 ships entering in the contiguous zone in February 2014;

Whereas, although the United States Government does not take a position on the ultimate sovereignty of the Senkaku Islands, the United States Government acknowledges that they are under the administration of Japan and opposes any unilateral actions that would seek to undermine such administration;

Whereas the United States Senate has previously affirmed that the unilateral actions of a third party will not affect the United States acknowledgment of the administration of Japan over the Senkaku Islands;

Whereas the United States remains committed under the Treaty of Mutual Cooperation and Security to respond to any armed attack in the territories under the administration of Japan, has urged all parties to take steps to prevent incidents and manage disagreements through peaceful means, and commends the Government of Japan for its restrained approach in this regard;

Whereas both the United States and the People’s Republic of China are parties to and are obligated to observe the rules of the Convention on the International Regulations for Preventing Collisions at Sea, done at London October 12, 1972 (COLREGs);

Whereas, on December 5, 2013, the USS Cowpens was lawfully operating in international waters in the South China Sea when a People’s Liberation Army Navy vessel reportedly crossed its bow at a distance of less than 500 yards and stopped in the water, forcing the USS Cowpens to take evasive action to avoid a collision;

Whereas the reported actions taken by the People’s Liberation Army Navy vessel in the USS Cowpens’ incident, as publicly reported, appear contrary to the international legal obligations of the People’s Republic of China under COLREGs;

Whereas, on January 19, 1998, the United States and People’s Republic of China signed the Military Maritime Consultative Agreement, creating a mechanism for consultation and coordination on operational safety issues in the maritime domain between the United States and the People’s Republic of China;

Whereas the Western Pacific Naval Symposium, inaugurated in 1988 and comprising the navies of Australia, Brunei, Cambodia, Canada, Chile, France, Indonesia, Japan, Malaysia, New Zealand, Papua New Guinea, the People's Republic of China, the Philippines, the Republic of Korea, the Russian Federation, Singapore, Thailand, Tonga, the United States, and Vietnam, whose countries all border the Pacific Ocean region, provides a forum where leaders of regional navies can meet to discuss cooperative initiatives, discuss regional and global maritime issues, and undertake exercises to strengthen norms and practices that contribute to operational safety, including protocols for unexpected encounters at sea, common ways of communication, common ways of operating, and common ways of engagement;

Whereas, Japan and the People's Republic of China sought to negotiate a Maritime Communications Mechanism between the defense authorities and a Maritime Search and Rescue Agreement and agreed in principle to these agreements to address operational safety on the maritime domains but failed to sign them;

Whereas the Changi Command and Control Center in Singapore provides a platform for all the countries of the Western Pacific to share information on what kind of contact at sea and to provide a common operational picture for the region;

Whereas 2014 commemorates the 35<sup>th</sup> anniversary of normalization of diplomatic relations between the United States and the People's Republic of China, and the United States welcomes the development of a peaceful and prosperous China that becomes a responsible international stakeholder, the government of which respects international norms, international laws, international institutions, and international rules; enhances security and peace; and seeks to advance relations between the United States and China; and

Whereas ASEAN plays an important role, in partnership with others in the regional and international community, in addressing maritime security issues in the Asia-Pacific region and the Indian Ocean, including open access to the maritime domain of Asia; Now, therefore, be it

*Resolved,*

#### SECTION 1. SENSE OF THE SENATE.

The Senate—

(1) condemns coercive and threatening actions or the use of force to impede freedom of operations in international airspace by military or civilian aircraft, to alter the status quo or to destabilize the Asia-Pacific region;

(2) urges the Government of the People's Republic of China to refrain from implementing the declared East China Sea Air Defense Identification Zone (ADIZ), which is contrary to freedom of overflight in international airspace, and to refrain from taking similar provocative actions elsewhere in the Asia-Pacific region; and

(3) commends the Governments of Japan and of the Republic of Korea for their restraint, and commends the Government of the Republic of Korea for engaging in a deliberate process of consultations with the United States, Japan and China prior to announcing its adjustment of its Air Defense Identification Zone on December 9, 2013, and for its commitment to implement this adjusted Air Defense Identification Zone (ADIZ) in a manner consistent with international practice and respect for the freedom of overflight and other internationally lawful uses of international airspace.

SEC. 2. STATEMENT OF POLICY.

It is the policy of the United States to—

- (1) reaffirm its unwavering commitment and support for allies and partners in the Asia-Pacific region, including longstanding United States policy regarding Article V of the United States-Philippines Mutual Defense Treaty and that Article V of the United States-Japan Mutual Defense Treaty applies to the Japanese-administered Senkaku Islands;
- (2) oppose claims that impinge on the rights, freedoms, and lawful use of the sea that belong to all nations;
- (3) urge all parties to refrain from engaging in destabilizing activities, including illegal occupation or efforts to unlawfully assert administration over disputed claims;
- (4) ensure that disputes are managed without intimidation, coercion, or force;
- (5) call on all claimants to clarify or adjust claims in accordance with international law;
- (6) support efforts by ASEAN and the People's Republic of China to develop an effective Code of Conduct, including the 'early harvest' of agreed-upon elements in the Code of Conduct that can be implemented immediately;
- (7) reaffirm that an existing body of international rules and guidelines, including the International Regulations for Preventing Collisions at Sea, done at London October 12, 1972 (COLREGs), is sufficient to ensure the safety of navigation between the United States Armed Forces and the forces of other countries, including the People's Republic of China;
- (8) support the development of regional institutions and bodies, including the ASEAN Regional Forum, the ASEAN Defense Minister's Meeting Plus, the East Asia Summit, and the expanded ASEAN Maritime Forum, to build practical cooperation in the region and reinforce the role of international law;
- (9) encourage the adoption of mechanisms such as hotlines or emergency procedures for preventing incidents in sensitive areas, managing them if they occur, and preventing disputes from escalating;
- (10) fully support the rights of claimants to exercise rights they may have to avail themselves of peaceful dispute settlement mechanisms;
- (11) encourage claimants not to undertake new unilateral attempts to change the status quo since the signing of the 2002 Declaration of Conduct, including not asserting administrative measures or controls in disputed areas in the South China Sea;
- (12) encourage the deepening of partnerships with other countries in the region for maritime domain awareness and capacity building, as well as efforts by the United States Government to explore the development of appropriate multilateral mechanisms for a 'common operating picture' in the South China Sea that would serve to help countries avoid destabilizing behavior and deter risky and dangerous activities; and
- (13) assure the continuity of operations by the United States in the Asia-Pacific region, including, when appropriate, in cooperation with partners and allies, to reaffirm the principle of freedom of operations in international waters and airspace in accordance with established principles and practices of international law.

## **S.Res. 167 (Agreed to by the Senate)**

S.Res. 167 was introduced in the Senate on June 10, 2013, reported without amendment, with a preamble, and without a written report on June 25, 2013, and agreed to by the Senate by unanimous consent without amendment and an amended preamble on July 29, 2013. The text of S.Res. 167 as agreed to by the Senate is as follows:

### RESOLUTION

Reaffirming the strong support of the United States for the peaceful resolution of territorial, sovereignty, and jurisdictional disputes in the Asia-Pacific maritime domains.

Whereas the maritime domain of the Asia-Pacific region includes critical sea lines of communication and commerce between the Pacific and Indian oceans;

Whereas the United States has a national interest in freedom of navigation and overflight in the Asia-Pacific maritime domains, as provided for by universally recognized principles of international law;

Whereas the United States has a national interest in the maintenance of peace and stability, open access by all to maritime domains, respect for universally recognized principles of international law, prosperity and economic growth, and unimpeded lawful commerce;

Whereas although the United States does not take a position on competing territorial claims over land features and maritime boundaries, it does have a strong and long-standing interest in the manner in which disputes in the South China Sea are addressed and in the conduct of the parties;

Whereas the United States has a clear interest in encouraging and supporting the nations of the region to work collaboratively and diplomatically to resolve disputes without coercion, without intimidation, without threats, and without the use of force;

Whereas the South China Sea contains great natural resources, and their stewardship and responsible use offers immense potential benefit for generations to come;

Whereas in recent years, there have been numerous dangerous and destabilizing incidents in this region, including Chinese vessels cutting the seismic survey cables of a Vietnamese oil exploration ship in May 2011; Chinese vessels barricading the entrance to the Scarborough Reef lagoon in April 2012; China issuing an official map that newly defines the contested 'nine-dash line' as China's national border; and, since May 8, 2013, Chinese naval and marine surveillance ships maintaining a regular presence in waters around the Second Thomas Shoal, located approximately 105 nautical miles northwest of the Philippine island of Palawan;

Whereas the Association of Southeast Asian Nations (ASEAN) has promoted multilateral talks on disputed areas without settling the issue of sovereignty, and in 2002 joined with China in signing a Declaration on the Conduct of Parties in the South China Sea that committed all parties to those territorial disputes to 'reaffirm their respect for and commitment to the freedom of navigation in and over flight above the South China Sea as provided for by the universally recognized principles of international law' and to 'resolve their territorial and jurisdictional disputes by peaceful means, without resorting to the threat or use of force';

Whereas Japan and Taiwan reached an agreement on April 10, 2013, to jointly share and administer the fishing resources in their overlapping claimed exclusive economic zones in the East China Sea, an important breakthrough after 17 years of negotiations and a model for other such agreements;

Whereas other incidences of the joint administrations of resources in disputed waters in the South China Sea have de-escalated tensions and promoted economic development, such as Malaysia and Brunei's 2009 agreement to partner on exploring offshore Brunei waters, with drilling in offshore oil and gas fields off Brunei beginning in 2011; and Thailand and Vietnam's agreement to jointly develop areas of the Gulf of Thailand for gas exports, despite ongoing territorial disputes;

Whereas, on June 21, 2013, the Governments of the People's Republic of China and Vietnam announced that they had agreed to set up and use an emergency fishery hotline to inform each other of any detainment involving fishermen or boats within 48 hours, to help quickly resolve disputes and as part of efforts to prevent future incidents from derailing ties, and the Governments of the People's Republic of China and Indonesia on May 2, 2013, agreed to establish a hotline for incidents in their disputed waters;

Whereas the Government of the Republic of the Philippines states that it 'has exhausted almost all political and diplomatic avenues for a peaceful negotiated settlement of its maritime dispute with China' and in his statement of January 23, 2013, Republic of Philippines Secretary of Foreign Affairs Del Rosario stated that therefore 'the Philippines has taken the step of bringing China before the Arbitral Tribunal under Article 287 and Annex VII of the 1982 Convention on the Law of the Sea in order to achieve a peaceful and durable solution to the dispute';

Whereas, in January 2013, a Chinese naval ship allegedly fixed its weapons-targeting radar on Japanese vessels in the vicinity of the Senkaku islands, and, on April 23, 2013, eight Chinese marine surveillance ships entered the 12-nautical-mile territorial zone off the Senkaku Islands, further escalating regional tensions;

Whereas, on May 8, 2013, the Chinese Communist Party's main newspaper, The People's Daily, published an article by several Chinese scholars questioning Japan's sovereignty over Okinawa, where key United States military installations are located which contribute to preserving security and stability in the Asia-Pacific region;

Whereas the Government of the People's Republic of China has recently taken other unilateral steps, including 'improperly drawing' baselines around the Senkaku Islands in September 2102, which the 2013 Annual Report to Congress on Military and Security Developments Involving the People's Republic of China found to be 'inconsistent with international law', and maintaining a continuous military and paramilitary presence around the Senkaku Islands;

Whereas, on April 27, 2013, Chinese Foreign Ministry spokeswoman, Hua Chunying, was quoted as saying, 'The Diaoyu Islands are about sovereignty and territorial integrity. Of course it's China's core interest.';

Whereas although the United States does not take a position on the ultimate sovereignty of the Senkaku Islands, the United States Government acknowledges that they are under the administration of Japan and opposes any unilateral actions that would seek to undermine such administration, affirms that the unilateral actions of a third party will not affect the United States acknowledgment of the administration of Japan over the Senkaku Islands, remains committed under the Treaty of Mutual Cooperation and Security to respond to any

armed attack in the territories under the administration of Japan, and has urged all parties to take steps to prevent incidents and manage disagreements through peaceful means;

Whereas, on August 3, 2012, a Department of State spokesperson expressed concern over 'China's upgrading of the administrative level of Sansha City and the establishment of a new military garrison there,' encouraged ASEAN and China 'to make meaningful progress toward finalizing a comprehensive Code of Conduct,' and called upon claimants to 'explore every diplomatic or other peaceful avenue for resolution, including the use of arbitration or other international legal mechanisms as needed';

Whereas the United States recognizes the importance of strong, cohesive, and integrated regional institutions, including the East Asia Summit (EAS), ASEAN, and the Asia-Pacific Economic Cooperation (APEC) forum, as foundation for effective regional frameworks to promote peace and security and economic growth, including in the maritime domain, and to ensure that the Asia-Pacific community develops rules-based regional norms which discourage coercion and the use of force;

Whereas the United States welcomes the development of a peaceful and prosperous China, the government of which respects international norms, international laws, international institutions, and international rules; enhances security and peace; and seeks to advance a 'new model' of relations between the United States and China;

Whereas ASEAN plays an important role, in partnership with others in the regional and international community, in addressing maritime security issues in the Asia-Pacific region and into the Indian Ocean, including open access to the maritime domain of Asia;

Whereas ASEAN and China announced on June 30, 2013, that official consultations on a Code of Conduct in the South China Sea will commence at the 6<sup>th</sup> Senior Officials' Meeting and the 9<sup>th</sup> Joint Working Group on the Implementation of the Declaration of Conduct of the Parties in the SCS, to be held in China in September 2013; Chinese Foreign Minister Wang Yi reaffirmed that China was willing to advance talks on a code of conduct as part of a 'continual, gradual and deepening process'; and Secretary of State John F. Kerry, participating in the ASEAN Regional Forum Ministerial Meeting on July 2, 2013, expressed the hope that announcement of official consultations between ASEAN and China would be the beginning of sustained and substantive official engagement between the two on developing the new Code of Conduct; and

Whereas, from June 17-20, 2013, the 10 ASEAN members and their dialogue partners Australia, China, India, Japan, New Zealand, Russia, South Korea, and the United States jointly participated in the First ASEAN Defense Ministers' Meeting Plus Humanitarian Assistance and Disaster Relief (HADR) and Military Medicine (MM) exercise, helping to establish a new pattern of cooperation among the militaries of the Asia-Pacific: Now, therefore, be it

*Resolved*, That the Senate—

(1) condemns the use of coercion, threats, or force by naval, maritime security, or fishing vessels and military or civilian aircraft in the South China Sea and the East China Sea to assert disputed maritime or territorial claims or alter the status quo;

(2) strongly urges that all parties to maritime and territorial disputes in the region exercise self-restraint in the conduct of activities that would undermine stability or complicate or escalate disputes, including refraining from inhabiting presently uninhabited islands, reefs, shoals, and other features and handle their differences in a constructive manner;

(3) reaffirms the strong support of the United States for the member states of ASEAN and the Government of the People’s Republic of China as they seek to develop a code of conduct of parties in the South China Sea, and urges all countries to substantively support ASEAN in its efforts in this regard;

(4) supports collaborative diplomatic processes by all claimants in the South China Sea for resolving outstanding maritime or territorial disputes, in a manner that maintains peace and security, adheres to international law, and protects unimpeded lawful commerce as well as freedom of navigation and overflight, and including through international arbitration, allowing parties to peacefully settle claims and disputes using universally recognized principles of international law;

(5) encourages the deepening of efforts by the United States Government to develop partnerships with other countries in the region for maritime domain awareness and capacity building; and

(6) supports the continuation of operations by the United States Armed Forces in the Western Pacific, including in partnership with the armed forces of other countries in the region, in support of freedom of navigation, the maintenance of peace and stability, and respect for universally recognized principles of international law, including the peaceful resolution of issues of sovereignty and unimpeded lawful commerce.

An August 1, 2013, press report stated:

China said on Thursday [August 1] it had lodged a formal complaint with the United States after the U.S. Senate passed a resolution expressing concern about Chinese actions in the disputed East and South China Seas....

“The above resolution proposed by a minority of senators took heed of neither history nor facts, unjustifiably blaming China and sending the wrong message,” China’s Foreign Ministry said in a statement.

“China expresses its strong opposition, and has already made stern representations with the U.S. side. We urge the relevant senators to respect the facts and correct their mistakes in order to avoid further complicating the issue and the regional situation,” it added.<sup>74</sup>

## **H.R. 1960 (FY2014 National Defense Authorization Act)**

Section 1257 of H.R. 1960 as reported by the House Armed Services Committee (H.Rept. 113-102 of June 7, 2013) states:

SEC. 1257. SENSE OF CONGRESS ON MILITARY CAPABILITIES OF THE PEOPLE’S REPUBLIC OF CHINA.

Congress—

(1) notes the People’s Republic of China (PRC) continues to rapidly modernize and expand its military capabilities across the land, sea, air, space, and cyberspace domains;

---

<sup>74</sup> Ben Blanchard, “China Condemns U.S. Senate Over Sea Dispute,” *Reuters.com*, August 1, 2013.

(2) is concerned by the rate and scope of PRC military developments, including its military-focused cyber espionage, which indicate a desire to constrain or prevent the peaceful activities of the United States and its allies in the Western Pacific;

(3) concurs with Admiral Samuel Locklear, commander of U.S. Pacific Command, that 'China's rapid development of advanced military capabilities, combined with its unclear intentions, certainly raises strategic and security concerns for the U.S and the region';

(4) notes the United States remains committed to a robust forward military-presence in the Asia-Pacific and will continue to vigorously support mutual defense arrangements with treaty allies while also building deeper relationships with other strategic partners in the region; and

(5) urges the Government of the PRC to work peacefully to resolve existing territorial disputes and to adopt a maritime code of conduct with relevant parties to guide all forms of maritime interaction and communications in the Asia-Pacific.

This section was not included in the final version of the FY2014 National Defense Authorization Act (H.R. 3304/P.L. 113-66 of December 26, 2013.). The explanatory statement for H.R. 3304 states:

*Sense of Congress on military capabilities of the People's Republic of China*

The House bill contained a provision (sec. 1257) that would express certain findings and the sense of Congress regarding the military developments of the People's Republic of China.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

We reaffirm our interest in the Asia-Pacific region and the implementation of the rebalance to that region, as described in the Defense Strategic Guidance, dated January 2012. We encourage the Secretary of Defense to continue engaging with the congressional defense committees to facilitate the successful implementation of the strategic rebalance and to continue to support the national security interests of the United States and its allies and partners in the Asia-Pacific region. (Page 223)

## **H.R. 772**

H.R. 772 was introduced in the House on February 15, 2013. The text of H.R. 772 as introduced is as follows:

A BILL

To promote peaceful and collaborative resolution of the South China Sea dispute.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. FINDINGS.

Congress finds the following:

(1) The South China Sea contains vital commercial shipping lanes and points of access between the Indian Ocean and Pacific Ocean, providing a maritime lifeline to India, Singapore, Malaysia, Indonesia, the Philippines, Vietnam, Brunei, Taiwan, Japan, and the Korean peninsula.

(2) China, Vietnam, the Philippines, Taiwan, Malaysia, and Brunei have disputed territorial claims over the Spratly Islands, and China, Taiwan, and Vietnam have disputed territorial claims over the Paracel Islands.

(3) In 2009, the Government of the People's Republic of China submitted to the United Nations a map with the 9-dotted line (also known as the Cow Tongue line) which raised questions about whether China officially claims most of the 1,423,000 square miles of the South China Sea, more than any other nation involved in these territorial disputes.

(4) In November 2012, China began to include a map of its territorial claims inside its passports, despite the protests of its neighbors, including Vietnam and the Philippines.

(5) Although not a party to these disputes, the United States has a national economic and security interest in maintaining peace, stability, and prosperity in East Asia and Southeast Asia, and ensuring that no party threatens or uses force or coercion unilaterally to assert maritime territorial claims in East Asia and Southeast Asia, including in the South China Sea, the East China Sea, or the Yellow Sea.

(6) The Association of Southeast Asian Nations (ASEAN) has promoted multilateral talks in disputed areas without settling the issue of sovereignty.

(7) In 2002, ASEAN and China signed a Declaration on the Conduct of Parties in the South China Sea.

(8) That declaration committed all parties to those territorial disputes to 'reaffirm their respect for and commitment to the freedom of navigation in and over flight above the South China Sea as provided for by the universally recognized principles of international law', and to 'resolve their territorial and jurisdictional disputes by peaceful means, without resorting to the threat or use of force'.

(9) In July and November of 2010, the United States and our Republic of Korea allies conducted joint naval exercises in the Yellow Sea in international waters, as well as Republic of Korea territorial waters, in the vicinity of the site of the March 2010 North Korean attack on the South Korean military vessel Cheonan, these exercises drew objections from Beijing over foreign operations in the Yellow Sea.

(10) In September 2010, tensions were raised in the East China Sea near the Senkaku (Diaoyutai) Islands, a territory under the legal administration of Japan, when a Chinese fishing vessel deliberately rammed Japanese Coast Guard patrol boats.

(11) On February 25, 2011, a frigate from China's navy fired shots at 3 fishing boats from the Philippines.

(12) On March 2, 2011, the Government of the Philippines reported that two patrol boats from China attempted to ram one of its surveillance ships.

(13) On May 26, 2011, a maritime security vessel from China cut the cables of an exploration ship from Vietnam, the Binh Minh, in the South China Sea in waters near Cam Ranh Bay in the exclusive economic zone of Vietnam.

(14) On May 31, 2011, three Chinese military vessels used guns to threaten the crews of four Vietnamese fishing boats while they were fishing in the waters of the Truong Sa (Spratly) archipelago.

(15) On June 3, 2011, Vietnam's Foreign Ministry released a statement that 'Vietnam is resolutely opposed to these acts by China that seriously violated the sovereign and jurisdiction rights of Viet Nam to its continental shelf and Exclusive Economic Zone (EEZ)'.

(16) On June 9, 2011, three vessels from China, including one fishing vessel and two maritime security vessels, ran into and disabled the cables of another exploration ship from Vietnam, the Viking 2, in the exclusive economic zone of Vietnam.

(17) The actions of the Government of the People's Republic of China in the South China Sea have also affected United States military and maritime vessels and aircraft transiting through international air space and waters, including the collision of a Chinese fighter plane with a United States surveillance plane in 2001, the harassment of the USNS Victorious and the USNS Impeccable in March 2009, and the collision of a Chinese submarine with the sonar cable of the USS John McCain in June 2009.

(18) On July 23, 2010, former Secretary of State Hillary Rodham Clinton stated at the ASEAN Regional Forum that the United States, like every nation, has a national interest in freedom of navigation, open access to Asia's maritime commons, respect for international law, and unimpeded commerce in the South China Sea.

(19) On June 23, 2011, the United States stated that it was ready to provide hardware to modernize the military of the Philippines.

(20) The United States and the Philippines conducted combined naval exercises in the Sulu Sea, near the South China Sea, from June 28 to July 8, 2011.

(21) On July 22, 2011, an Indian naval vessel, sailing about 45 nautical miles off the coast of Vietnam, was warned by a Chinese naval vessel that it was allegedly violating Chinese territorial waters.

(22) In June 2012, China's cabinet, the State Council, approved the establishment of the city of Sansha to oversee the areas claimed by China in the South China Sea.

(23) In July 2012, Chinese military authorities announced that they had established a corresponding Sansha garrison in the new prefecture.

(24) On June 23, 2012, the China National Offshore Oil Corporation invited bids for oil exploration in areas within 200 nautical miles of the continental shelf and within the exclusive economic zone of Vietnam.

(25) Since July 2012, Chinese patrol ships have been spotted near the disputed Senkaku (Diaoyutai) Islands in the East China Sea.

(26) At the July 2012 ASEAN Regional Forum, former Secretary of State Clinton said, 'We believe the nations of the region should work collaboratively and diplomatically to resolve disputes without coercion, without intimidation, without threats, and without the use of force'.

(27) In November 2012, a regulation was approved by the Hainan People's Congress authorizing Chinese maritime police to 'board, search' and even 'take over' ships determined to be 'illegally entering' South China Sea waters unilaterally claimed by Beijing.

(28) At a meeting with the Japanese Foreign Minister on January 18, 2013, former Secretary of State Clinton stated that ‘although the United States does not take a position on the ultimate sovereignty of the (Senkaku) islands, we acknowledge they are under the administration of Japan’, adding that ‘We oppose any unilateral actions that would seek to undermine Japanese administration, and we urge all parties to take steps to prevent incidents and manage disagreements through peaceful means’.

(29) On August 3, 2012, a Department of State spokesperson expressed concern over ‘China’s upgrading of the administrative level of Sansha City and the establishment of a new military garrison there’, expressed encouragement for ASEAN and China ‘to make meaningful progress toward finalizing a comprehensive Code of Conduct’, and called upon claimants to ‘explore every diplomatic or other peaceful avenue for resolution, including the use of arbitration or other international legal mechanisms as needed’.

## SEC. 2. SENSE OF CONGRESS.

It is the sense of Congress that, in light of the congressional finding described above, the Secretary of State should—

(1) reaffirm the strong support of the United States for the peaceful resolution of maritime territorial disputes in the South China Sea, the Taiwan Strait, the East China Sea, and the Yellow Sea and pledge continued efforts to facilitate a collaborative, peaceful process to resolve these disputes;

(2) condemn the use of threats or force by naval, maritime security, and fishing vessels from China in the South China Sea and the East China Sea as well as the use of force by North Korea in the Yellow Sea that would escalate tensions or result in miscalculations;

(3) note that overt threats and gun boat diplomacy are not constructive means for settling these outstanding maritime disputes;

(4) welcome the diplomatic efforts of Association of Southeast Asian Nations (ASEAN) and the United States allies and partners in Japan, the Republic of Korea, Taiwan, the Philippines, and India to amiably and fairly resolve these outstanding disputes; and

(5) support the continuation of operations by the United States Armed Forces in support of freedom of navigation rights in international waters and air space in the South China Sea, the East China Sea, the Taiwan Strait, and the Yellow Sea.

## SEC. 3. REPORT ON THE CODE OF CONDUCT FOR THE SOUTH CHINA SEA.

(a) Report- Not later than 180 days after the date of the enactment of this Act, the Secretary of State shall submit to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate a report on the Code of Conduct and other peaceful measures for resolution of the territorial disputes in the South China Sea.

(b) Form- The report required under subsection (a) shall be submitted in unclassified form, but may contain a classified annex if necessary.

## Appendix A. Legislative Activity in 112<sup>th</sup> Congress

### H.R. 4310/S. 3254 (FY2013 National Defense Authorization Act)

#### Senate

On November 29, 2012, as part of its consideration of the FY2013 National Defense Authorization Act (S. 3254), the Senate agreed by unanimous consent to **S.Amdt. 3275** to S. 3254, which states:

At the end of subtitle D of title XII, add the following:

SEC. 1246. SENSE OF THE SENATE ON THE SITUATION IN THE SENKAKU ISLANDS.

It is the sense of the Senate that—

- (1) the East China Sea is a vital part of the maritime commons of Asia, including critical sea lanes of communication and commerce that benefit all nations of the Asia-Pacific region;
- (2) the peaceful settlement of territorial and jurisdictional disputes in the East China Sea requires the exercise of self-restraint by all parties in the conduct of activities that would complicate or escalate disputes and destabilize the region, and differences should be handled in a constructive manner consistent with universally recognized principles of customary international law;
- (3) while the United States takes no position on the ultimate sovereignty of the Senkaku islands, the United States acknowledges the administration of Japan over the Senkaku Islands;
- (4) The unilateral actions of a third party will not affect the United States' acknowledgement of the administration of Japan over the Senkaku Islands;
- (5) the United States has national interests in freedom of navigation, the maintenance of peace and stability, respect for international law, and unimpeded lawful commerce;
- (6) the United States supports a collaborative diplomatic process by claimants to resolve territorial disputes without coercion, and opposes efforts at coercion, the threat of use of force, or use of force by any claimant in seeking to resolve sovereignty and territorial issues in the East China Sea;
- (7) the United States reaffirms its commitment to the Government of Japan under Article V of the Treaty of Mutual Cooperation and Security that "[e]ach Party recognizes that an armed attack against either Party in the territories under the administration of Japan would be dangerous to its own peace and safety and declares that it would act to meet the common danger in accordance with its constitutional provisions and processes".

#### Conference

**Section 1286** of the conference report (H.Rept. 112-705 of December 18, 2012) on H.R. 4310/P.L. 112-239 of January 2, 2013, states:

SEC. 1286. SENSE OF CONGRESS ON THE SITUATION IN THE SENKAKU ISLANDS.

It is the sense of Congress that—

(1) the East China Sea is a vital part of the maritime commons of Asia, including critical sea lanes of communication and commerce that benefit all nations of the Asia-Pacific region;

(2) the peaceful settlement of territorial and jurisdictional disputes in the East China Sea requires the exercise of self-restraint by all parties in the conduct of activities that would complicate or escalate disputes and destabilize the region, and differences should be handled in a constructive manner consistent with universally recognized principles of customary international law;

(3) while the United States takes no position on the ultimate sovereignty of the Senkaku Islands, the United States acknowledges the administration of Japan over the Senkaku Islands;

(4) the unilateral action of a third party will not affect the United States' acknowledgment of the administration of Japan over the Senkaku Islands;

(5) the United States has national interests in freedom of navigation, the maintenance of peace and stability, respect for international law, and unimpeded lawful commerce;

(6) the United States supports a collaborative diplomatic process by claimants to resolve territorial disputes without coercion, and opposes efforts at coercion, the threat of use of force, or use of force by any claimant in seeking to resolve sovereignty and territorial issues in the East China Sea; and

(7) the United States reaffirms its commitment to the Government of Japan under Article V of the Treaty of Mutual Cooperation and Security that “[e]ach Party recognizes that an armed attack against either Party in the territories under the administration of Japan would be dangerous to its own peace and safety and declares that it would act to meet the common danger in accordance with its constitutional provisions and processes”.

### **S.Res. 524 (Agreed to by the Senate)**

This resolution, reaffirming the strong support of the United States for the 2002 declaration of conduct of parties in the South China Sea among the member states of ASEAN and the People's Republic of China, and for other purposes, was introduced on July 23, 2012, and agreed to in Senate without amendment and an amended preamble by unanimous consent on August 2, 2012.

### **S.Res. 217 (Agreed to by the Senate)**

This resolution, calling for a peaceful and multilateral resolution to maritime territorial disputes in Southeast Asia, was introduced on June 27, 2011, and considered, and agreed to without amendment and with a preamble by unanimous consent the same day.

### **H.R. 6313**

This bill to promote peaceful and collaborative resolution of maritime territorial disputes in the South China Sea and its environs and other maritime areas adjacent to the East Asian mainland was introduced on August 2, 2012.

### **H.Res. 352**

This resolution, calling for a peaceful and collaborative resolution of maritime territorial disputes in the South China Sea and its environs and other maritime areas adjacent to the East Asian mainland, was introduced on July 15, 2011.

### **H.Res. 616**

This resolution, expressing the sense of the House of Representatives regarding United States relations with the People's Republic of China, was introduced on April 16, 2012. Paragraph 8 of the resolution “encourage[s] the peaceful resolution of maritime territorial disputes in the South China Sea and East China Sea, and support efforts to facilitate a multilateral, peaceful process to resolve these disputes.”

## **Appendix B. 2002 Declaration on Conduct of Parties in South China Sea**

The text of the 2002 Declaration on the Conduct of Parties in the South China Sea is as follows.<sup>75</sup>

### DECLARATION ON THE CONDUCT OF PARTIES IN THE SOUTH CHINA SEA

The Governments of the Member States of ASEAN and the Government of the People's Republic of China,

REAFFIRMING their determination to consolidate and develop the friendship and cooperation existing between their people and governments with the view to promoting a 21<sup>st</sup> century-oriented partnership of good neighbourliness and mutual trust;

COGNIZANT of the need to promote a peaceful, friendly and harmonious environment in the South China Sea between ASEAN and China for the enhancement of peace, stability, economic growth and prosperity in the region;

COMMITTED to enhancing the principles and objectives of the 1997 Joint Statement of the Meeting of the Heads of State/Government of the Member States of ASEAN and President of the People's Republic of China;

DESIRING to enhance favourable conditions for a peaceful and durable solution of differences and disputes among countries concerned;

HEREBY DECLARE the following:

1. The Parties reaffirm their commitment to the purposes and principles of the Charter of the United Nations, the 1982 UN Convention on the Law of the Sea, the Treaty of Amity and Cooperation in Southeast Asia, the Five Principles of Peaceful Coexistence, and other universally recognized principles of international law which shall serve as the basic norms governing state-to-state relations;
2. The Parties are committed to exploring ways for building trust and confidence in accordance with the above-mentioned principles and on the basis of equality and mutual respect;
3. The Parties reaffirm their respect for and commitment to the freedom of navigation in and overflight above the South China Sea as provided for by the universally recognized principles of international law, including the 1982 UN Convention on the Law of the Sea;
4. The Parties concerned undertake to resolve their territorial and jurisdictional disputes by peaceful means, without resorting to the threat or use of force, through friendly consultations and negotiations by sovereign states directly concerned, in accordance with universally recognized principles of international law, including the 1982 UN Convention on the Law of the Sea;
5. The Parties undertake to exercise self-restraint in the conduct of activities that would complicate or escalate disputes and affect peace and stability including, among others,

<sup>75</sup> Text as taken from <http://www.aseansec.org/13163.htm>.

refraining from action of inhabiting on the presently uninhabited islands, reefs, shoals, cays, and other features and to handle their differences in a constructive manner.

Pending the peaceful settlement of territorial and jurisdictional disputes, the Parties concerned undertake to intensify efforts to seek ways, in the spirit of cooperation and understanding, to build trust and confidence between and among them, including:

- a. holding dialogues and exchange of views as appropriate between their defense and military officials;
- b. ensuring just and humane treatment of all persons who are either in danger or in distress;
- c. notifying, on a voluntary basis, other Parties concerned of any impending joint/combined military exercise; and
- d. exchanging, on a voluntary basis, relevant information.

6. Pending a comprehensive and durable settlement of the disputes, the Parties concerned may explore or undertake cooperative activities. These may include the following:

- a. marine environmental protection;
- b. marine scientific research;
- c. safety of navigation and communication at sea;
- d. search and rescue operation; and
- e. combating transnational crime, including but not limited to trafficking in illicit drugs, piracy and armed robbery at sea, and illegal traffic in arms.

The modalities, scope and locations, in respect of bilateral and multilateral cooperation should be agreed upon by the Parties concerned prior to their actual implementation.

7. The Parties concerned stand ready to continue their consultations and dialogues concerning relevant issues, through modalities to be agreed by them, including regular consultations on the observance of this Declaration, for the purpose of promoting good neighbourliness and transparency, establishing harmony, mutual understanding and cooperation, and facilitating peaceful resolution of disputes among them;

8. The Parties undertake to respect the provisions of this Declaration and take actions consistent therewith;

9. The Parties encourage other countries to respect the principles contained in this Declaration;

10. The Parties concerned reaffirm that the adoption of a code of conduct in the South China Sea would further promote peace and stability in the region and agree to work, on the basis of consensus, towards the eventual attainment of this objective.

## **Appendix C. February 5, 2014, Testimony of Assistant Secretary of State Daniel Russel**

The appendix presents the text of the written statement of Assistant Secretary of State Daniel Russel for a February 5, 2014 hearing before the subcommittee on Asia and the Pacific of the House Foreign Affairs Committee on maritime disputes in East Asia. The text of the statement is as follows:

Chairman Chabot, Members of the Subcommittee, thank you for the opportunity to testify today on these important issues.

Before I begin, I would also like to take this opportunity to thank you, Chairman Chabot, for your leadership on this issue and for your work to enhance our engagement with the Asia-Pacific region. This Subcommittee has contributed to the rich bipartisan tradition of engaging the Asia-Pacific and advancing U.S. interests there.

The Members of this Subcommittee know well the importance of the Asia-Pacific region to American interests. The broader region boasts over half the world's population, half of the world's GDP, and nearly half of the world's trade, and is home to some of the fastest growing economies in the world. More and more American citizens are now living, working, and studying in this part of the world and people-to-people and family ties between Americans and the peoples of the Asia-Pacific have witnessed tremendous growth. Growing numbers of American companies are investing in and exporting their products and services to rapidly expanding East Asian markets. Asia-Pacific businesses are increasing their profiles in the United States and creating jobs for American workers. And, as the region's economies continue to grow and their interests expand, it becomes increasingly important that the governments and institutions there contribute to upholding and strengthening international law and standards – ranging from human rights to environmental protection to responsible policies on climate change, maritime security, and trade and investment. The effects of what happens in the Asia-Pacific Region will be felt across the globe and have direct implications for America's interests.

It is precisely with this in mind that this administration has for the past five years made sustained engagement in the Asia-Pacific a strategic priority. This is precisely why Secretary Kerry is about to make his fifth visit to Asia in ten months and why he has devoted so much time and effort to meeting, calling and consulting with his Asian counterparts.

We have a strong stake in the continuing economic growth of this region, and we are working to ensure that Americans can fully participate in that growth and share in that prosperity. We are negotiating high-standard trade and investment agreements that will unlock the dynamism of Pacific Rim economies for mutual benefit. We are bolstering regional cooperation on transnational issues through ASEAN and its related institutions. And we are helping countries manage complex environmental issues resulting from rapid development. The common thread running through our strategic rebalancing is a determination to ensure that the Asia-Pacific remains an open, inclusive, and prosperous region guided by widely accepted rules and standards and a respect for international law.

Since the end of the Second World War, a maritime regime based on international law that promotes freedom of navigation and lawful uses of the sea has facilitated Asia's impressive economic growth. The United States, through our alliances, our security partnerships and our overall military presence and posture, has been instrumental in sustaining that maritime regime and providing the security that has enabled the countries in the region to prosper. As

a maritime nation with global trading networks, the United States has a national interest in freedom of the seas and in unimpeded lawful commerce. From President Thomas Jefferson's actions against the Barbary pirates to President Reagan's decision that the United States will abide by the Law of the Sea Convention's provisions on navigation and other traditional uses of the ocean, American foreign policy has long defended the freedom of the seas. And as we consistently state, we have a national interest in the maintenance of peace and stability; respect for international law; unimpeded lawful commerce; and freedom of navigation and overflight in the East China and South China Seas.

For all these reasons, the tensions arising from maritime and territorial disputes in the Asia-Pacific are of deep concern to us and to our allies. Both the South China and East China Seas are vital thoroughfares for global commerce and energy. Well over half the world's merchant tonnage flows through the South China Sea, and over 15 million barrels of oil per day transited the Strait of Malacca last year, with most of it continuing onward through the East China Sea to three of the world's largest economies—Japan, the Republic of Korea, and China. A simple miscalculation or incident could touch off an escalatory cycle. Confrontations between fishermen and even law enforcement patrols are not unusual in these waters. But the frequency and assertiveness of some countries' patrols are increasing. In addition, the imposition of competing regulations by different countries over disputed territory and associated maritime areas and airspace is raising tensions and increasing the risk of confrontation. We witnessed a tragic incident in May of last year, when a Philippine Coast Guard patrol shot and killed a fisherman from Taiwan. Both sides, to their credit, took steps to prevent an escalation of tensions. But the risk of confrontation could have very serious adverse consequences for all of our economic and security interests.

Accordingly, we have consistently emphasized in our diplomacy in the region as well as in our public messaging the importance of exercising restraint, maintaining open channels of dialogue, lowering rhetoric, behaving safely and responsibly in the sky and at sea, and peacefully resolving territorial and maritime disputes in accordance with international law. We are working to help put in place diplomatic and other structures to lower tensions and manage these disputes peacefully. We have sought to prevent provocative or unilateral actions that disrupt the status quo or jeopardize peace and security. When such actions have occurred, we have spoken out clearly and, where appropriate, taken action. In an effort to build consensus and capabilities in support of these principles, the administration has invested considerably in the development of regional institutions and bodies such as the ASEAN Regional Forum, the ASEAN Defense Ministers Meeting Plus, the East Asia Summit, and the Expanded ASEAN Maritime Forum. These forums, as they continue to develop, play an important role in reinforcing international law and practice and building practical cooperation among member states.

In the South China Sea, we continue to support efforts by ASEAN and China to develop an effective Code of Conduct. Agreement on a Code of Conduct is long overdue and the negotiating process should be accelerated. This is something that China and ASEAN committed to back in 2002 when they adopted their Declaration on the Conduct of Parties in the South China Sea. An effective Code of Conduct would promote a rules-based framework for managing and regulating the behavior of the relevant countries in the South China Sea. A key part of that framework, which we and many others believe should be adopted quickly, is inclusion of mechanisms such as hotlines and emergency procedures for preventing incidents in sensitive areas and managing them when they do occur in ways that prevent disputes from escalating.

And in the East China Sea, we remain concerned about the serious downturn in China-Japan relations. We support Japan's call for diplomacy and crisis management procedures in order to avoid a miscalculation or a dangerous incident. It is important to lower tensions, turn down the rhetoric, and exercise caution and restraint in this sensitive area. China and Japan

are the world's second and third largest economies and have a shared interest in a stable environment to facilitate economic growth. Neither these two important countries nor the global economy can afford an unintended clash that neither side seeks or wants. It is imperative that Japan and China use diplomatic means to manage this issue peacefully and set aside matters that can't be resolved at this time.

China's announcement of an Air Defense Identification Zone (ADIZ) over the East China Sea in November was a provocative act and a serious step in the wrong direction. The Senkakus are under the administration of Japan and unilateral attempts to change the status quo raise tensions and do nothing under international law to strengthen territorial claims. The United States neither recognizes nor accepts China's declared East China Sea ADIZ and has no intention of changing how we conduct operations in the region. China should not attempt to implement the ADIZ and should refrain from taking similar actions elsewhere in the region.

Mr. Chairman, we have a deep and long-standing stake in the maintenance of prosperity and stability in the Asia-Pacific and an equally deep and abiding long-term interest in the continuance of freedom of the seas based on the rule of law—one that guarantees, among other things, freedom of navigation and overflight and other internationally lawful uses of the sea related to those freedoms. International law makes clear the legal basis on which states can legitimately assert their rights in the maritime domain or exploit marine resources. By promoting order in the seas, international law is instrumental in safeguarding the rights and freedoms of all countries regardless of size or military strength.

I think it is imperative that we be clear about what we mean when the United States says that we take no position on competing claims to sovereignty over disputed land features in the East China and South China Seas. First of all, we do take a strong position with regard to behavior in connection with any claims: we firmly oppose the use of intimidation, coercion or force to assert a territorial claim. Second, we do take a strong position that maritime claims must accord with customary international law. This means that all maritime claims must be derived from land features and otherwise comport with the international law of the sea. So while we are not siding with one claimant against another, we certainly believe that claims in the South China Sea that are not derived from land features are fundamentally flawed. In support of these principles and in keeping with the longstanding U.S. Freedom of Navigation Program, the United States continues to oppose claims that impinge on the rights, freedoms, and lawful uses of the sea that belong to all nations.

As I just noted, we care deeply about the way countries behave in asserting their claims or managing their disputes. We seek to ensure that territorial and maritime disputes are dealt with peacefully, diplomatically and in accordance with international law. Of course this means making sure that shots aren't fired; but more broadly it means ensuring that these disputes are managed without intimidation, coercion, or force. We have repeatedly made clear that freedom of navigation is reflected in international law, not something to be granted by big states to others. President Obama and Secretary Kerry have made these points forcefully and clearly in their interactions with regional leaders, and I—along with my colleagues in the State Department, Defense Department, the National Security Council and other agencies—have done likewise.

We are also candid with all the claimants when we have concerns regarding their claims or the ways that they pursue them. Deputy Secretary Burns and I were in Beijing earlier this month to hold regular consultations with the Chinese government on Asia-Pacific issues, and we held extensive discussions regarding our concerns. These include continued restrictions on access to Scarborough Reef; pressure on the long-standing Philippine presence at the Second Thomas Shoal; putting hydrocarbon blocks up for bid in an area close to another country's mainland and far away even from the islands that China is claiming; announcing

administrative and even military districts in contested areas in the South China Sea; an unprecedented spike in risky activity by China's maritime agencies near the Senkaku Islands; the sudden, uncoordinated and unilateral imposition of regulations over contested airspace in the case of the East China Sea Air Defense Identification Zone; and the recent updating of fishing regulations covering disputed areas in the South China Sea. These actions have raised tensions in the region and concerns about China's objectives in both the South China and the East China Seas.

There is a growing concern that this pattern of behavior in the South China Sea reflects an incremental effort by China to assert control over the area contained in the so-called "nine-dash line," despite the objections of its neighbors and despite the lack of any explanation or apparent basis under international law regarding the scope of the claim itself. China's lack of clarity with regard to its South China Sea claims has created uncertainty, insecurity and instability in the region. It limits the prospect for achieving a mutually agreeable resolution or equitable joint development arrangements among the claimants. I want to reinforce the point that under international law, maritime claims in the South China Sea must be derived from land features. Any use of the "nine dash line" by China to claim maritime rights not based on claimed land features would be inconsistent with international law. The international community would welcome China to clarify or adjust its nine-dash line claim to bring it in accordance with the international law of the sea.

We support serious and sustained diplomacy between the claimants to address overlapping claims in a peaceful, non-coercive way. This can and should include bilateral as well as multilateral diplomatic dialogue among the claimants. But at the same time we fully support the right of claimants to exercise rights they may have to avail themselves of peaceful dispute settlement mechanisms. The Philippines chose to exercise such a right last year with the filing of an arbitration case under the Law of the Sea Convention.

Both legal and diplomatic processes will take time to play out. The effort to reach agreement on a China-ASEAN Code of Conduct has been painfully slow. However, there are important steps that the relevant parties can take in the short term to lower tensions and avoid escalation. One line of effort, as I mentioned earlier, is to put in place practical mechanisms to prevent incidents or manage them when they occur. Another common-sense measure would be for the claimants to agree not to undertake new unilateral attempts to change the status quo, defined as of the date of the signing of the 2002 Declaration of Conduct, that would include agreement not to assert administrative measures or controls in disputed areas. And as I have indicated, all claimants—not only China—should clarify their claims in terms of international law, including the law of the sea.

In the meantime, a strong diplomatic and military presence by the United States, including by strengthening and modernizing our alliances and continuing to build robust strategic partnerships, remains essential to maintain regional stability. This includes our efforts to promote best practices and good cooperation on all aspects of maritime security and bolster maritime domain awareness and our capacity building programs in Southeast Asia. The Administration has also consistently made clear our desire to build a strong and cooperative relationship with China to advance peace and prosperity in the Asia-Pacific, just as we consistently have encouraged all countries in the region to pursue positive relations with China. And this includes working with all countries in the region to strengthen regional institutions like ASEAN and the East Asia Summit as venues where countries can engage in clear dialogue with all involved about principles, values and interests at stake, while developing cooperative activities – like the Expanded ASEAN Seafarers Training initiative we recently launched – to build trust and mechanisms to reduce the chances of incidents.

To conclude, this is an issue of immense importance to the United States, the Asia-Pacific, and the world. And I want to reaffirm here today that the United States will continue to play a central role in underwriting security and stability in the Asia-Pacific.

Mr. Chairman, I thank you for this opportunity to appear before you today to discuss this important issue. I look forward to answering any questions you may have.<sup>76</sup>
