# Millennium Challenge Account: Implementation of a New U.S. Foreign Aid Initiative

## Summary

In a speech on March 14, 2002, President Bush outlined a proposal for a major new U.S. foreign aid initiative. The program, referred to as the Millennium Challenge Account (MCA), is managed by a new Millennium Challenge Corporation (MCC) and provides assistance, through a competitive selection process, to developing nations that are pursuing political and economic reforms in three areas: ruling justly, investing in people, and fostering economic freedom. If fully implemented, the initiative would represent one of the largest increases in foreign aid spending in half a century, outpaced only by the Marshall Plan following World War II and the Latin America-focused Alliance for Progress in the early 1960s.

The MCC differs in several respects from past and current U.S. aid practices:

- the size of the \$5 billion commitment;
- the competitive process that will reward countries for past and current actions measured by 16 objective performance indicators;
- the pledge to segregate the funds from U.S. strategic foreign policy objectives that often strongly influence where U.S. aid is spent; and
- the requirement to solicit program proposals developed solely by qualifying countries with broad-based civil society involvement.

The Administration sought \$1.3 billion for the MCA's first year (FY2004), \$2.5 billion for FY2005, and a stated commitment for a \$5 billion program in FY2006. Congress reduced the FY2004 appropriation to \$994 million and bills passed by the House and Senate (H.R. 4818) would cut the FY2005 funding package by more than half: to \$1.25 billion and \$1.12 billion, respectively.

The passage of legislation on January 23, 2004 authorizing the MCC for FY2004 (Division D of P.L. 108-199) launched a period in which the new Corporation formed, issued required reports, consulted with Congress and the public, and selected on May 6 and November 8 eligible countries for FY2004 and FY2005, respectively. Other MCA implementation matters have been unfolding throughout 2004, including a discussion of the relationship of MCA programs with those operated by USAID, how the Corporation and USAID will support near-miss or "threshold" countries, and the funding of programs, or "compacts," for those qualified under the FY2004 selection process.

A growing question raised by some Members of Congress is whether sufficient funds will be available to support MCC programs in every country selected. A March 2004 GAO report estimated that the MCC could adequately fund 8-13 Compacts with an appropriation of \$3.5 billion (the combined FY2004 enacted and FY2005 amounts). This suggests, that even if Congress fully funds the pending proposal, the Corporation will not be able to support programs in all 16 countries approved for FY2004 and those selected for FY2005.

This report will be updated as events unfold.

# Millennium Challenge Account: Implementation of a New U.S. Foreign Aid Initiative

In a speech on March 14, 2002, President Bush outlined a proposal for the United States to increase foreign economic assistance beginning in FY2004 so that by FY2006 American aid would be \$5 billion higher than three years earlier. The funds, referred to as the Millennium Challenge Account (MCA), is managed by a new Millennium Challenge Corporation (MCC) providing assistance, through a competitive selection process, to developing nations that are pursuing political and economic reforms in three areas:

- Ruling justly — promoting good governance, fighting corruption, respecting human rights, and adhering to the rule of law.
- Investing in people — providing adequate health care, education, and other opportunities promoting an educated and healthy population.
- Fostering enterprise and entrepreneurship — promoting open markets and sustainable budgets.

If fully implemented, the initiative would represent one of the largest increases in foreign aid spending in half a century, outpaced only by the Marshall Plan following World War II and the Latin America-focused Alliance for Progress in the early 1960s. It would also represent a fundamental change in the way the United States invests and delivers economic assistance.

## MCC Background<sup>1</sup>

The concept is based on the premise that economic development succeeds best where it is linked to free market economic and democratic principles and policies, and where governments are committed to implementing reform measures in order to achieve such goals. The MCC differs in several fundamental respects from past and current U.S. aid practices:

- the size of the \$5 billion commitment;
- the competitive process that will reward countries for past actions measured by 16 objective performance indicators;

---

<sup>1</sup> For a more in-depth discussion of the original MCA proposal and issues debated by Congress in 2003, see CRS Report RL31687, *The Millennium Challenge Account: Congressional Consideration of a New Foreign Aid Initiative*.

- the pledge to segregate the funds from U.S. strategic foreign policy objectives that often strongly influence where U.S. aid is spent; and
- the requirement to solicit program proposals developed solely by qualifying countries with broad-based civil society involvement.

The new initiative, which Congress authorized in January 2004 (Division D of P.L. 108-199),<sup>2</sup> would phase in over a three-year period, beginning in FY2004. During the first year, MCC participation was limited to the 74 poorest nations with per capita incomes below \$1,415 and that are eligible to borrow from the World Bank's International Development Association. The list expanded in FY2005 to include all countries with a per capita income below \$1,465 (adding another 13 nations). Beginning in FY2006 and beyond, all lower-middle income countries with per capita incomes below roughly \$3,035 may compete for MCC resources.

Country selection is based largely, but not exclusively, on the nation's record measured by 16 performance indicators related to the three categories of good governance, economic freedom, and investing in people. Countries that score above the median on half of the indicators in each of the three areas qualify. Emphasizing the importance of fighting corruption, the indicator for corruption is a "pass/fail" test: should a country fall below the median on the corruption indicator, it will be disqualified from consideration unless other, more recent trends suggest otherwise. (See **Table 1** below for a complete list of the 16 performance indicators.) Administration officials, since announcing the MCC initiative in 2002, said that the selection process would be guided by, but not necessarily bound to the outcomes of the performance indicators. Missing or old data, general trends, and recent steps taken by governments might also be taken into account when annual decisions are made.

Eligibility to receive MCA assistance, however, does not necessarily result in an aid grant. Once selected, countries are required to submit program proposals — referred to as MCA Compacts — that have been developed through a broad-based, national discussion that includes input from civil society. The focus of program submissions may vary among countries in size, purpose, and degree of specificity, and will be evaluated by the Corporation for, among other things, how well the Compact supports a nation's economic growth and poverty reduction goals. Only those Compacts that meet the MCC criteria will be funded. It is expected that successful Compacts will support programs lasting three to five years, providing a level of resources roughly equivalent to the largest providers of assistance in the country. This will most likely result in a significant increase of U.S. economic assistance to MCA participant countries.

To manage the new initiative, the Administration proposed and Congress authorized the creation of a Millennium Challenge Corporation (MCC), an independent government entity separate from the Departments of State and the Treasury and from the U.S. Agency for International Development (USAID). The

---

<sup>2</sup> **Table 2**, found at the end of this report, provides a summary of major MCA issues and compares positions approved by the House, Senate, and Conference Committee during the 2003 debate.

MCC plans for an eventual staff of about 200, drawn from various government agencies, non-governmental organizations, and the private sector, and led by a CEO confirmed by the Senate. A Board of Directors, chaired by the Secretary of State and composed of the Secretary of the Treasury, the USAID Administrator, the U.S. Trade Representative, and the Corporation's CEO, oversees operations of the MCC and makes the country selections. Four additional Board members, yet to be confirmed by the Senate, will be drawn from lists submitted by Congressional leaders.<sup>3</sup>

The decision to house the MCA in a new organization was one of the most debated issues during early congressional deliberations of the President's foreign aid initiative. The Administration argued that because the MCA represents a new concept in aid delivery, it should have a "fresh" organizational structure, unencumbered by bureaucratic authorities and regulations that would interfere in effective management. Critics, however, contended that if the MCA is placed outside the formal U.S. government foreign aid structure, it would lead to further fragmentation of policy development and consistency. Some believed that USAID, the principal U.S. aid agency, should manage the MCA, while others said that the MCA should reside in the State Department where more U.S. foreign policy entities have been integrated in recent years. At least, some argued, the USAID Administrator should be a member of the MCC Board, which had not been proposed in the initial Administration request.

For FY2004, the Administration sought \$1.3 billion for the MCA's first year, a level reduced by Congress to \$994 million. The FY2005 budget proposes \$2.5 billion, with a commitment for a \$5 billion program in FY2006. Pending House- and Senate-passed appropriation bills (H.R. 4818) recommend reducing the FY2005 funding level to \$1.25 billion and \$1.12 billion, respectively.

## **MCC Implementation Steps and Issues**

The passage of legislation on January 23, 2004 authorizing and funding the MCC for FY2004 (Division D of P.L. 108-199) launched a period of at least 90 days during which the new Corporation would form, issue required reports, consult with Congress and the public, and select first year participant countries. Within 10 days of enactment, the Board of Directors held its initial meeting to establish the program, and over the following weeks the Corporation identified "candidate" countries for FY2004, published the criteria and methodology to be used for country selection, solicited public comments, issued guidelines for Compact proposals, and, on May 6, 2004, selected 16 countries to participate in the MCA's first year of operations. This was followed on November 10 with the selection of FY2005 eligible MCA countries, an action that added one new participant to the FY2004 list. An additional 13 countries have also been named as threshold nations — those that just missed qualifying as eligible countries. Continuing implementation matters that will unfold

---

<sup>3</sup> On July 13, 2004, the Senate confirmed two of the four new Board members: Kenneth Hackett, President and CEO of Catholic Relief Services, and Christine Todd Whitman, former Governor of New Jersey and former head of the Environmental Protection Agency, 2001-2003. No further nominees have been submitted by the White House.

in the months ahead will include the relationship of MCC programs with those operated by USAID, how the Corporation and USAID will support threshold countries to better prepare for future performance reviews, congressional budget decisions for FY2005, and the awarding of MCA grants — in the form of Compacts — to MCA eligible countries.

## **Establishing the Millennium Challenge Corporation**

On February 2, 2004, the Board of Directors met, agreed to Corporation by-laws, and approved Under-Secretary of State Larson as the interim CEO. Subsequently, the President nominated Paul Applegarth to be the permanent MCC CEO, an individual confirmed by the Senate on May 5. CEO Applegarth has held various international and development positions over the past 30 years, primarily in the private sector. Most recently, he was the Managing Director of Emerging Markets Partnership, serving as the COO of Emerging Africa Infrastructure Fund in 2002.

## **Naming FY2004 Candidate Countries**

Also on February 2, the MCC Board issued a list of 63 “candidate” countries that would be reviewed for possible selection as MCA participants in FY2004. These countries, according to authorizing legislation, must be eligible for assistance from the World Bank’s International Development Association, have a per capita income of \$1,415 or less, and not be otherwise ineligible to receive U.S. assistance. The latter condition eliminated twelve countries — Burma, Burundi, Cambodia, Central African Republic, Cote d’Ivoire, Guinea-Bissau, Liberia, Serbia, Somalia, Sudan, Uzbekistan, and Zimbabwe — that were statutorily barred from receiving American aid.<sup>4</sup>

## **Publishing the Selection Criteria and Methodology**

Pursuant to reporting requirements set in the MCC legislation, the Corporation on March 5, 2004 sent to Congress an overview of the criteria and methodology that would be used to determine the eligibility of the 63 candidate countries in FY2004. The report suggested that there would be relatively few and only minor changes to the criteria and methodology that had been outlined 15 months earlier. The same 16 performance indicators, as listed in **Table 1** below, would be utilized. In a few cases,

---

<sup>4</sup> Various types of aid restrictions applied to these countries. For several — Burundi, Central African Republic, Cote d’Ivoire, Guinea-Bissau, and Sudan — U.S. aid was blocked because an elected head of government had been deposed by a military coup. For Cambodia and Uzbekistan, legislation banned FY2004 assistance to the central governments of these countries. Aid restrictions imposed on nations not cooperating in counter-narcotics efforts (Burma), that are on the terrorist list (Sudan), or in arrears on debt owed the United States (Liberia, Somalia, and Zimbabwe) also applied. Serbia could not receive aid in FY2004 unless the President issued a determination stating, among other things, that the government was cooperating with the International Criminal Tribunal. Notwithstanding these restrictions, each country remained eligible for humanitarian assistance from the United States.

data sources shifted from international institutions to national governments. This was especially true in cases where existing data for an indicator were old or incomplete.

Although the Corporation did not alter any of the original 16 performance indicators, it attempted to address additional criteria added by Congress in P.L. 108-199 through the use of supplemental data and qualitative information. While the legislative authorities broadly match criteria proposed by the Administration, lawmakers included four additional matters on which to evaluate a country's performance. These relate to the degree to which a country:

- recognizes the rights of people with disabilities;
- supports a sustainable management of natural resources;
- respects worker rights; and
- makes social investments, especially in women and girls.

For an evaluation of the rights of people with disabilities, the MCC reported that it would draw on information in the State Department's annual Human Rights Report, which includes a discussion of discrimination based on disability. Regarding natural resource management, the Corporation would also use the Human Rights Report as supplemental information on such issues as access to sanitation, deforestation, conservation of land and marine resources, land tenure institutions, and protection of threatened and endangered species. The State Department's Human Rights Report would also be used for additional information regarding worker rights, while statistics on girl's primary enrollment rates would supplement the four social investment performance indicators.

The MCC also noted that it would use the most recent release (October 2003) of Transparency International's Corruption Perception Index to update and supplement the World Bank's survey data on which corruption performance indicator is based. This was necessary because the World Bank information was last published in March 2003. Since the corruption indicator is a "pass/fail" measure, the quality and timeliness of the data are especially important.

Given the range and diversity of suggestions offered throughout the public and congressional debate of the MCC, many observers were surprised that the Corporation did not propose more substantive changes to the criteria and methodology. Some questioned how seriously the Administration considered alternative approaches and whether the Corporation would be open to future revisions.<sup>5</sup> During the public comment period and at congressional oversight hearings, some suggested that existing data sources needed to be refined or new surveys created in order to specifically measure a country's commitment on the four criteria added by Congress.

After further study of the criteria and methodology, the Corporation announced on August 26, 2004, a revised set of performance indicators that will be used for the

---

<sup>5</sup> See, for example, Steve Radelet, et al., *A Comment on the Millennium Challenge Account Selection Process*, Center for Global Development, March 9, 2004.

FY2005 selection process. The MCC will lower the inflation rate threshold from 20% to 15%, making it somewhat more difficult to pass this test (only 6 of the 63 candidate countries failed this test for FY2004). An indicator measuring girls' primary education completion rates will replace a broader measure used in FY2004 that did not disaggregate primary education graduation by gender. As noted above, including the means to measure country performance on key women and girls issues is one of the requirements added by Congress during deliberation on MCC authorizing legislation.

The Corporation further indicated that it will explore additional criteria and methodology changes for FY2006. Under consideration are options to:

- lower the inflation level to 10%.
- identify a measurement related to natural resource management; the MCC has created a working group to study possibilities.
- review other possible indicators that would better measure trade barriers that are linked with economic growth.
- develop a more comprehensive indicator than the current Days to Start a Business to gauge a government's commitment to entrepreneurship and private-sector ownership.
- consider additional gender-relation indicators.

## Country Selection — FY2004

On May 6, the MCC Board of Directors determined that 16 countries would be eligible for FY2004 MCA funding and invited each to submit program proposals:

Armenia	Madagascar
Benin	Mali
Bolivia	Mongolia
Cape Verde	Mozambique
Georgia	Nicaragua
Ghana	Senegal
Honduras	Sri Lanka
Lesotho	Vanuatu

As expected, the selection process raised a number of questions and concerns. The Administration had previously said that the Board would be guided by, but not entirely bound to, the outcome of the performance indicator review process; that Board members could apply discretion in their selection. Performance trends, missing or old data, and recent policy actions might come into play during selection deliberations, officials noted.

The final selection reflected decisions that both strictly followed the performance indicator outcomes and applied Board discretion to take into account other factors. Ten of the countries complied with the stated criteria: performing above the median in relation to their peers on at least half of the indicators in each of the three policy clusters and performing above the median on corruption. The

Board also examined whether a country performed substantially below average on any single indicator and whether their selection was supported by supplemental information. Each of the ten countries also passed these additional tests.

For ten other countries, however, some discretion was applied by the Board. In three cases, countries which met the criteria but fell significantly below average on one indicator were still selected by the Board due to recent policy changes or positive trend lines. Cape Verde, for example, scored poorly on the Trade Policy indicator, but the Board took into account the country's progress towards joining the World Trade Organization and implementing a value added tax that will reduce reliance on import tariffs. Lesotho did not score well on the measurement for Days to Start a Business. The MCC Board, however, took note of Lesotho's creation of a central office to facilitate new business formation and saw positive performance on other factors related to business start-ups. Sri Lanka scored far below the median on Fiscal Policy, but the most recent trends suggested that the government was making progress in reducing its budget deficit.

For three other countries — Bolivia, Georgia, and Mozambique — the Board deviated from a strict application of the selection criteria because of evidence that the governments were taking corrective actions in the deficient areas. Bolivia fell at the median (as opposed to above the median) on the corruption indicator, something that would eliminate it from consideration. The Board, however, noted that President Mesa, who took office in October 2003, had created a cabinet position to coordinate anti-corruption activities and an office to investigate police corruption. Georgia, with a newly elected government that had created an anti-corruption bureau and taken other steps to fight corruption, was also selected despite scoring below the median on corruption and three other "ruling justly" indicators. Mozambique, which failed on corruption and each of the four "investing in people" indicators, was chosen based on supplemental data that was more current than information available from the primary data sources. This evidence, the Board felt, demonstrated Mozambique's commitment to fighting corruption and improving its performance on health and education.

On the other hand, the MCC Board chose not to select four countries that technically met the performance criteria but fell substantially below the median on one or more indicator. In each of these cases, the Board did not believe that the government was taking any action to improve its performance. Although Bhutan, Mauritania, and Vietnam passed the corruption hurdle and half of the "ruling justly" indicators, they scored very low on the measurements for Political Rights and Civil Liberties, and in Vietnam's case, on the Voice and Accountability indicator. A fourth country — Guyana — was also not selected despite passing the necessary hurdles. It scored particularly low on the Fiscal Policy measurement.<sup>6</sup>

It has been long assumed by MCC officials and close observers of the MCA initiative that when the country selections were announced, there would be

---

<sup>6</sup> For a complete statement regarding the Board's rationale, see *Report on the Selection of MCA Eligible Countries for FY2004*, found at [<http://www.mcc.gov>], "Congressional Reports."

disagreements and possible surprises in the final list, especially if the Board exercised its discretionary authority as it did for FY2004 participants. Representative Lowey, for example, expressed her view at a May 13 House Appropriations Committee hearing that East Timor, which failed to pass the “economic freedom” hurdle in part due to missing data on two of the indicators, should have been selected. CEO Applegarth responded that East Timor is a new nation and that it was premature to conclude that it was a “high-performing” country. He acknowledged, however, that East Timor should be given close consideration in the future if the current trend lines continue.

Besides East Timor, some suggested that Kenya should have been included because of its new government’s commitment to education and anti-corruption efforts. USAID Administrator Natsios acknowledged at the May 13 hearing that Albania was a “close call,” failing because it scored slightly below the median on corruption. Like Albania, Malawi and Moldova would have qualified on the basis of performance if not for slightly failing scores on corruption. Several small island states, including Kiribati, Sao Tome, and Tonga, were not selected even though the absence of data for several categories may have played a role.<sup>7</sup>

Despite these questions over specific country eligibility, the selection process appeared to have satisfied two major concerns that have been consistently expressed over the past year. Based on earlier analysis, some argued that Africa would be under-represented in the final selection process, with perhaps as few as three regional states participating. In fact, eight, or half of the first year qualifying nations are from Africa.

Selection of countries that would give the appearance of geostrategic considerations was an additional concern of many who view the absence of security-related factors from MCA decision-making as one of the most attractive features of the initiative. For the most part, the Board appears to have avoided this concern. Had the Board used its discretionary powers to select Indonesia, for example, some critics would have likely charged that the decision stemmed more from Jakarta’s role in the war on terrorism than on strict policy performance. Indonesia passed all necessary hurdles except for corruption. Some, nevertheless, have questioned whether Georgia’s selection was driven by broad U.S. foreign policy objectives of assisting a smooth political transition in the country rather than a choice based on performance.<sup>8</sup> Likewise, Bolivia, a country in which the United States maintains strong counter-narcotics goals, had been experiencing a period of instability despite strong performance prior to October 2003. Both Georgia and Bolivia were selected despite not strictly meeting the MCA performance criteria.

---

<sup>7</sup> As noted below, East Timor, Albania, and Sao Tome were subsequently selected as three of the seven “threshold” countries that will receive assistance to help the country meet the MCA requirements.

<sup>8</sup> See Steve Radelet, *A Note on the MCC Selection Process for 2005*, September 23, 2004, found at [<http://www.cgdev.org>].

## Naming Candidate Countries — FY2005

On July 20, 2004, the MCC Board of Directors launched the initial step in the FY2005 selection process by naming 70 candidate countries, 7 more than were reviewed for FY2004. After adjusting the per capita income upward to \$1,465<sup>9</sup> and dropping the requirement that a country must be an IDA-eligible borrower from the World Bank, 11 new countries are added to the list: China, Egypt, Equatorial Guinea, Iraq, Morocco, Paraguay, Philippines, Swaziland, Turkmenistan, Tuvalu, and Ukraine. Four countries fall off the FY2005 list that had qualified in FY2004 — Albania, Bosnia and Herzegovina, Cape Verde, and Tonga — because their per capita income grew beyond the \$1,465 cutoff. Thirteen other nations were excluded because they are ineligible for other U.S. economic assistance.<sup>10</sup>

## Country Selection — FY2005

Meeting on November 8, the MCC Board of Directors made its selection of FY2005 eligible countries:

Armenia	Mali
Benin	Mongolia
Bolivia	Morocco
Georgia	Mozambique
Ghana	Nicaragua
Honduras	Senegal
Lesotho	Sri Lanka
Madagascar	Vanuatu

The Board chose one new country for FY2005 — Morocco — while 15 of the 16 nations included for FY2004 were determined eligible again for FY2005. Cape Verde was not selected due to the fact that its per capita GNI exceeded the \$1,465 ceiling. Cape Verde, however, remains eligible for MCA support using FY2004 funds. Board selections represent both a high degree of continuity between FY2004 decisions as well as a sharp difference in the degree to which it applied its discretionary authority for qualifying or denying countries for FY2005.

**Continuity in the FY2005 Selection Round.** The fact that each country (except Cape Verde) selected for FY2004 MCA participation was also declared

---

<sup>9</sup> The MCC plans to adjust the per capita income threshold each year to correspond to the per capita income cutoff of the “historic ceiling” of IDA lending, a calculation made by the World Bank. In future years when all lower-middle income countries will be eligible to compete, the MCC also will adjust that threshold — which grew from \$2,975 in 2003 to \$3,035 in 2004 — in the consideration of determining candidate countries.

<sup>10</sup> Eleven of these countries were also excluded in FY2004. Serbia, which was barred from consideration for FY2004, exceeds the per capita income limit for FY2005 so is not under consideration. Syria and Cuba, which became potential candidate countries beginning in FY2005, are excluded because of a ban on direct aid to the country. See Footnote 4, above, for a complete list of countries and aid restrictions.

eligible for FY2005 should not be surprising, given the nature of the MCA concept. The Board identified in May 2004 what it determined to be the 16 “best performers” based on the assumption that these countries had, and would continue to express, a strong commitment to the types of economic, governance, and social policy reforms measured by the MCC. Absent a substantial negative development since May, there was a presumed expectation that these same countries would score well in a subsequent performance comparison with their income peers. Moreover, except in some extreme situations, evidence of a slide in policy performance as measured through the various data sources would likely lag behind the actual policy shift and not be reflected in the immediate data updates.

In addition, two other factors that may not apply in future years seem to have affected the outcome for FY2005. First, with the selection dates for FY2004 and FY2005 coming only six months apart — rather than one year, as should be the case in the future — it was likely that the data would indicate less change than might be the case if the comparisons occurred over a longer period. Between May and November, several of the data sources upon which the 16 performance indicators are based did not update or revise their figures.<sup>11</sup> As a result, the review of countries for FY2005 was based on much of the same data and rankings as had been the case for the FY2004 selection.

Moreover, the addition of 13 new countries for consideration in the FY2005 round had the effect for at least six of the indicators of lowering the median against which countries were compared. Because of this, if a country scored well — above the median — in the FY2004 selection decision, it was likely that it would score the same or better in the review for FY2005 where medians declined. For example, in May Bolivia fell exactly at the median on the corruption indicator. But in November, when the median for corruption dropped somewhat after new countries were added, Bolivia scored above the median even though Bolivia’s score on corruption did not change. This phenomena is unlikely to be repeated again to the same extent since countries in the low-income group will be added or subtracted only if their economy grows beyond the per capita income ceiling or U.S. foreign aid sanctions are applied or lifted since the last review. The net effect is that the core set of low-income countries competing for MCA selection is unlikely to change as much as it did in FY2005, thereby reducing the extent to which the median will be altered simply because of the addition of new countries.

**Excluding More Countries that Qualified.** Despite the degree of continuity between FY2004 and FY2005 in the selection of eligible countries, the MCC Board departed somewhat from the previous round by not selecting a large number of countries that technically met the MCA performance criteria. Many

---

<sup>11</sup> This is not true for the performance indicators of Inflation and Primary Girls Graduation Rate, which were modified for the FY2005 selection, or for the indicators measuring Days to Start a Business, Civil Liberties, and Political Freedom which were updated in 2004. For some of the other economic and social investment indicators where data were drawn from national sources, revised figures were used in the FY2005 selection, but only where available. World Bank data for six governance-related indicators and the Trade Policy measurement, however, were not revised between May and November 2004.

observers may raise questions over the FY2005 selections regarding the countries that were *not* selected rather than those that were.

As noted above, in May 2004, the Board chose not to select four countries — Bhutan, Guyana, Mauritania, and Vietnam — although each passed the minimum number of indicators. The Board decided to exclude these four because they scored “substantially below” the median on one or more measurements, although without defining precisely what represented a mark “substantially below” the median.

For FY2005, the Board did not select 10 countries that met the criteria, including three of the four left out of the FY2004 round (Mauritania did not meet the minimum qualifications). In addition, for FY2005 Burkina Faso, China, Djibouti, Egypt, Nepal, the Philippines, and Swaziland met the minimum standards but were not selected. Thus far, the Corporation has offered little explanation as to why these countries were not chosen.<sup>12</sup> It appears, however, that scoring “substantially below” — perhaps in the lowest 25<sup>th</sup> percentile — has become a de-facto criteria for exclusion. For example, the Corporation’s CEO Paul Applegarth commented that the Philippines, a country that passed 13 of the 16 indicators, did not qualify because Manila scored “substantially below” the median on tests for health expenditures and fiscal policy, and that more recent trends indicated the fiscal policy situation was deteriorating further.<sup>13</sup> Each of the other nine nations that met the minimum qualifications but were not selected also had one score in the 25<sup>th</sup> percentile, although the Corporation has not commented on whether this was the reason for not choosing them.

Another possible reason for limiting the number of qualifying countries in the FY2005 round might be due to anticipated funding reductions. The Administration had requested combined FY2004/FY2005 appropriations of \$3.8 billion, but may have available 25%-30% less, depending on the outcome of congressional debate on the FY2005 budget. Corporation officials have said that reduced funding would lead to fewer countries assisted and/or smaller grants per country, a situation that would be complicated further by qualifying additional nations.

Instead, the Board of Directors invited three of these 10 countries to participate in the Threshold Program, intended to help “near-miss” nations take steps to strengthen areas that would help them qualify for full MCA assistance in the future. Burkina Faso, Guyana, and the Philippines may now apply for Threshold Program assistance.

Another Board departure in the FY2005 selection process was to avoid using its discretionary authority to qualify countries that did not meet the minimum

---

<sup>12</sup> The MCC’s authorizing legislation (section 608(d)) requires the Corporation’s CEO to provide justification to Congress regarding only those countries declared as eligible for MCA assistance and for those selected for Compact negotiation. Otherwise, there is no statutory requirement for the MCC to comment on its decision-making process, including the rationale for not selecting specific countries.

<sup>13</sup> Comments by Paul Applegarth at a State Department Foreign Press Center Briefing, November 9, 2004.

performance indicators. In May, the Board chose three nations — Bolivia, Georgia, and Mozambique — that did not pass the so-called “hard-hurdle” of corruption. The latter two again qualified despite falling below the median on corruption, while Bolivia did not require an exemption after the median dropped below its score with the addition of new countries. For FY2005, five nations — Malawi, Moldova, Paraguay, Tanzania, and Ukraine — passed the required number of performance indicators, except corruption. Although Malawi, Paraguay, and Tanzania are Threshold Countries, none of the five were chosen for full MCA status.

## **MCA Compacts and Program Proposals**

The next step for qualified countries is the preparation and negotiation with the MCC of program proposals, referred to as MCA Compacts. Only those Compacts that demonstrate a strong relationship between the program proposal and economic growth and poverty reduction will receive funding. It is anticipated that not all qualified MCA countries will submit successful Compacts.

While acknowledging that Compact contents likely will vary, the Corporation expects each to discuss certain matters:

- a country’s strategy for economic growth and poverty reduction, impediments to the strategy, how MCA aid will overcome the impediments, and the goals expected to be achieved during implementation of the Compact.;
- why the proposed program is a high priority for economic development and poverty reduction and why it will succeed; the process through which a public/private dialogue took place in developing the proposal;
- how the program will be managed, monitored, and sustained after the Compact expires;
- the relationship of other donor activities in the priority area;
- examples of projects, where appropriate;
- a multi-year financial plan; and
- a country’s commitment to future progress on MCA performance indicators.

The Corporation did not set hard deadlines for Compact submissions in order to allow countries adequate time to conduct a national dialogue over the contents of the program proposal. As of November 8, the MCC had received proposals and “concept papers” from 14 of the 16 FY2004 eligible countries, and begun the next phase — negotiating formal Compacts — with four countries: Georgia, Honduras, Madagascar, and Nicaragua. The Corporation anticipates signing one or two Compacts by the end of 2004.<sup>14</sup>

---

<sup>14</sup> Ibid.

## “Threshold” Countries and U.S. Assistance

In order to encourage non-qualifying countries to improve in weak areas, the United States will help governments that are committed to reform to strengthen performance so that they would be more competitive for MCA funding in future years. Congress provided in authorizing legislation that not more than 10% of MCA appropriations (\$99.4 million in FY2004) could be used for such purposes, stating that the funding could be made available through USAID. The MCC set aside up to \$40 million for countries that just missed qualifying for FY2004 funding and will announce an amount for FY2005 following enactment of new appropriations.<sup>15</sup>

The Corporation has made two announcements regarding the selection of Threshold Countries. On September 30, the Corporation named seven participants: Albania, East Timor, Kenya, Sao Tome and Principe, Tanzania, Uganda, and Yemen. Five weeks later, on November 8, the MCC added six more nations for FY2005: Burkina Faso, Guyana, Malawi, Paraguay, the Philippines, and Zambia. According to the Threshold Program Policy guidance issued by the Corporation,<sup>16</sup> the program will assist countries make policy reforms and institutional changes in areas where they failed to meet the MCA performance criteria. In order to qualify for Threshold Program FY2004 assistance, countries must submit by January 31, 2005, concept papers identifying:

- where and why the country failed to pass specific indicators;
- proposals for policy, regulatory, or institutional reforms that would improve the country’s performance on these indicators; and
- types of assistance, over a two-year maximum period, required to implement these reforms.

If the Corporation, in consultation with USAID, determines that the concept paper shows sufficient commitment to reform and a promise of success, the country will prepare a Threshold Country Plan that specifically establishes a program schedule, the means to measure progress, and financing requirements, among other considerations. USAID is charged with overseeing the implementation of Threshold Country Plans, including working with countries to identify appropriate implementing partners such as local, U.S., and international firms; NGOs; U.S. government agencies; and international organizations. Like regular MCA Compacts, funding is not guaranteed for each country selected for the Threshold Program, but will be based on the quality of the Country Plan.

---

<sup>15</sup> Initially, assistance for Threshold countries was authorized only for FY2004. Section 119 of P.L. 108-309, the Continuing Resolution for FY2005 signed on September 28, extends such authority through November 20, 2004, the day on which the resolution expires.

## **Role of USAID and the Future of Agency Programs in MCA Countries**

As noted above, how USAID would participate in the MCA initiative has been a continuing concern of Congress and various policy analysts. Legislation authorizing the MCC requires the Corporation's CEO to coordinate with USAID and directs the Agency to ensure that its programs play a primary role in helping candidate countries prepare for MCA consideration. Corporation and USAID officials have said there will be close collaboration between the two entities, although the precise nature of the relationship has yet to be made public. USAID maintains missions in 14 of the 17 eligible countries and might be expected to support MCC programs, through contracting, procurement, and monitoring tasks.

Another question is how USAID will adjust its own programs in MCA countries, especially where the Agency maintains relatively small activities in relation to other donors. Since the goal is to provide resources that will make MCA programs among the largest aid operations in a country, it is likely that USAID spending will fall well below amounts provided through MCC Compacts. For example, in Mongolia, where U.S. aid programs have totaled \$10-\$12 million annually in recent years, the United States was the fourth largest bilateral donor in 2002, representing less than a quarter of the size of Japan's economic aid disbursements. In Ghana, Senegal, and Sri Lanka, USAID maintains larger programs but spends far less than other countries and multilateral agencies.

Like other issues involving USAID, this question remains under review. USAID Administrator Natsios told the House Appropriations Committee on May 9, 2004 that the Agency would not withdraw from or cut programs in MCA countries, but would not increase spending either. He said, however, that USAID would work to ensure that its programs operate in an integrated way with MCA-funded activities.

## **Funding Issues and the FY2005 MCC Request**

As mentioned above, Congress appropriated \$994 million for FY2004 MCC programs and is considering a \$2.5 billion request for FY2005. This is by far the largest increase sought by the Administration in the Foreign Operations appropriations proposal and viewed by many observers as one of the most vulnerable items in an increasingly difficult budget environment. In earlier congressional action, House and Senate Budget Committees (H.Con.Res. 393 and S.Con.Res. 95) recommended reductions in international affairs spending, suggesting that much of the proposed cuts could be achieved by trimming back the MCC request. Legislation authorizing appropriations for the MCC reported by the Senate Foreign Relations Committee (S. 2144) would reduce the level to \$2 billion.

Foreign Operations appropriation bills passed in both the House and Senate (H.R. 4818) make substantial reductions to the President's MCC request for FY2005. The bill, as approved by the House, reduces by half the President's \$2.5 billion proposal. In cutting the MCC proposal, the House Appropriations Committee noted that its decision resulted solely from the constrained budget environment in FY2005 and the need to address other Administration and Congressional priorities. The

executive branch, in its Statement of Administration Policy on H.R. 4818, expressed its “disappointment” over the level of MCC funding and urged Congress to increase resources. During floor debate on July 15, the House defeated (41-379) an amendment by Representative Paul to eliminate all MCC appropriations.

The House Committee, in its report on H.R. 4818, also expressed concern over Corporation plans to enter into multi-year Compacts without committing total funding for these programs in the year the Compact is signed. This, the Committee believed, would obligate future Congresses to fund prior year contracts. Consequently, the bill requires the MCC to only sign Compacts for which complete funding is available from existing appropriations. The House Committee also recommended that Compacts be limited to a 3-4 year period rather than a 3-5 year duration envisioned by the MCC.

The Senate measure — also H.R. 4818, as amended to incorporate the text of S. 2812, proposes a more significant cut to the President’s MCC request — to \$1.12 billion. Despite the reduction, the Senate Appropriations Committee noted its strong support for the program.

For some time, some Members of Congress have raised questions regarding whether sufficient funds will be available to support MCC programs in every country selected, especially if the Board also makes exceptions in the FY2005 selection process and qualifies more countries than meet the strict criteria. Representative Kolbe, chairman of the House Foreign Operations Subcommittee, speculated at a May 9 hearing that based on recent Board decisions, by 2006, as many as 40 countries might have qualified. This, he believed, could not be fully supported with likely funding levels, and might raise country expectations that could not be met and undermine program incentives.

MCC officials point out that qualification for the program does not mean that a government will receive funding. That decision will be based on the quality of the Compact proposals and it is possible that the Corporation will not finalize agreements with all eligible countries. Nevertheless, the Corporation’s CEO Paul Applegarth acknowledged the funding dilemma for future MCC operations at a Senate Foreign Relations Committee hearing on October 5, noting that the sum of proposals received thus far totaled \$4.2 billion.

A March 2004 GAO report estimated that the MCC could adequately fund 8-13 Compacts with an appropriation of \$3.5 billion (the combined FY2004 enacted and FY2005 amounts). This suggests, that even if Congress fully funds the pending proposal, the Corporation will not be able to support programs in all 17 countries approved for FY2004 and FY2005. If Congress reduces the \$2.5 billion request, the MCC may face increasing difficulties funding Compacts of a sufficient size that will have a meaningful impact on a country’s economic growth and poverty reduction goals. This may lead to further congressional examination of the Board’s selection process and consideration of ways to limit the number of countries selected in the future.

<sup>17</sup> The \$3,035 per capita GNI figure would be the ceiling for FY2005 but will be adjusted in July 2005 when the World Bank releases a new *World Development Report*. It is likely that the per capita GNI ceiling for lower-middle income countries will rise somewhat, but at this time, it is impossible to say what that level might be or precisely identify which countries will fall under the ceiling. This list is an estimate based on the current lower-middle income ceiling and those countries that are currently defined by the World Bank as lower-middle income and are not prohibited from receiving U.S. economic assistance.
