Japan-U.S. Relations: Issues for Congress

Summary

The post-World War II U.S.-Japan alliance has long been an anchor of the U.S. security role in East Asia. The alliance, with its access to bases in Japan, where about 53,000 U.S. troops are stationed, facilitates the forward deployment of U.S. military forces in the Asia-Pacific, thereby undergirding U.S. national security strategy. For Japan, the alliance and the U.S. nuclear umbrella provide maneuvering room in dealing with its neighbors, particularly China and North Korea.

The Bush Administration has made significant strides in its goals of broadening U.S.-Japan strategic cooperation and encouraging Japan to assume a more active international role. Following the September 11, 2001 terrorist attacks, Japan made its first-ever military deployments in noncombat support of U.S. and allied forces in Afghanistan. Koizumi also was a prominent backer of the U.S. invasion of Iraq and in 2004 Tokyo sent noncombat troops to Iraq, despite considerable domestic opposition. Japan generally has supported the “hardline” U.S. position in the Six-Party Talks on North Korea’s nuclear program. Japan is participating in bilateral missile defense research and development. In 2005 the U.S. and Japan announced a sweeping new agreement to strengthen military cooperation. The plan calls for U.S. forces to be realigned and Japan to take on a more active (non-combat) role in maintaining regional and global security. The envisioned changes are intended to complement the broader Pentagon goal of deploying a more streamlined and mobile force in Asia.

Most of these developments have been viewed warily by South Korea and opposed outright by China. Beijing and Seoul also have expressed concern at the assertive foreign policy stance adopted by Koizumi, who has been buoyed by heightened senses of nationalism and vulnerability (to North Korea and China) among many Japanese. Koizumi’s party also has drafted a new constitution that would eliminate most of the clauses prohibiting participation in collective security arrangements. The United States has supported both moves. Sino-Japanese and Korean-Japanese tensions also have risen due to competing territorial claims and accusations that Japan is attempting to whitewash its history of aggression during the first half of the 20th Century. Koizumi’s repeated visits to the controversial Yasukuni Shrine have further fueled China’s and South Korea’s resentment.

Japan is one of the United States’ most important economic partners. Outside of North America, it is the United States’ largest export market and second-largest source of imports. Japanese firms are the U.S.’ second-largest source of foreign direct investment, and Japanese investors are by far the largest foreign holders of U.S. treasuries, helping to finance the U.S. deficit and reduce upward pressure on U.S. interest rates. Bilateral trade friction has decreased in recent years, partly because U.S. concern about the trade deficit with Japan has been replaced by concern about a much larger deficit with China. The exception was U.S. criticism over Japan’s decision in 2003 to ban imports of U.S. beef.

Japan-U.S. Relations: Issues for Congress

Most Recent Developments

Japan's ban on U.S. beef imports remains in place. On June 20, U.S. and Japanese agriculture officials reached an agreement in principle on procedures for Japan to lift its ban on imports of U.S. beef. Those procedures include Japanese inspection of U.S. processing and exporting facilities, and those inspections may not be completed until sometime in July. In the meantime, S. 3435 (Conrad), introduced on June 21, would impose sanctions on U.S. imports from Japan, if Japan does not lift the ban by August 31, 2006. On June 22, the Senate Appropriations Committee approved agricultural appropriations legislation (H.R. 5384). Section 757 of the bill that contains a Sense of the Senate resolution that the United States should impose sanctions against Japan if Japan has not lifted the ban on imports of U.S. beef by the date of the bills enactment. In a May 24, 2006 letter, a bipartisan group of 31 Senators urged Prime Minister Koizumi to resolve the issue before his June 29 White House meeting with President Bush.

Japan's positions and influence on a series of foreign policy issues prioritized by the Bush Administration have recently received considerable attention.

Burma. Japan's ambassador to the United Nations was reported as opposing a U.S.-sponsored U.N. Security Council resolution condemning the military government in Burma (also known as Myanmar). Ambassador Kenzo Oshima called the situation in Myanmar "regrettable," but said he did not see it "posing a threat to international peace and security." Although Japan has issued statements of concern about the continued detention of Burmese opposition leader Aung San Suu Kyi, it maintains official diplomatic relations with Rangoon and provides a modest amount of aid to the country. Analysts say that Japan's distance from the U.S. position on Burma may be motivated by its concern that cutting off all contacts will leave the junta open to increased Chinese influence.

Iran. The Bush Administration has reportedly put pressure on Japan and European allies to freeze Iranian government accounts and assets if the U.N. Security Council does not pass a resolution imposing sanctions on Tehran for refusing to halt its nuclear enrichment program. Although the sanctions would not include oil or trade embargoes, Japan would be taking perhaps the biggest risk of all the countries involved given its significant economic ties to Iran; Japan imports about 12% of its oil from Iran and holds approximately \$2 billion in investments in the energy sector. Japan has reiterated its support for the U.S. proposal to negotiate with Tehran once it suspends its uranium enrichment activities. Some observers think that Tokyo may

demand more leverage, or a more recognized role in the negotiations, if it agrees to cooperate with the reported U.S. proposal.

India. Although less publicized than the Burma and Iran issues, the question of Japan's position on the proposed U.S.-India civilian nuclear deal has also drawn interest. Japan is an influential member of the Nuclear Suppliers' Group, an organization that harmonizes member states' exports of nuclear technology and fuel. The United States is seeking NSG approval for an exception to its current guidelines prohibiting nuclear cooperation with India. Japan was critical of the Indian and Pakistani 1998 tests, and has traditionally maintained a strict opposition to any moves that would weaken the Nuclear Non-proliferation Treaty (NPT), or the nonproliferation regime. To many nonproliferation advocates, the U.S.-India nuclear cooperation initiative would do just that. Japan and India discussed the U.S.-India agreement during their first working-level dialogue on non-proliferation and disarmament in May 2006. Many observers see a concerted effort to enhance bilateral ties between Tokyo and Delhi, but it is unclear how this will affect Japan's support for NSG approval of nuclear cooperation with India.

The Role of Congress in U.S.-Japan Relations

Congressional powers, actions, and oversight form a backdrop against which both the Administration and the Japanese government must formulate their policies. In 2005, Congress showed a renewed interest in U.S.-Japan relations. After holding two Japan-specific public hearings from 2001 through 2004, Congress held three in 2005. In 2004 and 2005, Members of Congress were particularly critical of Japan's two-year ban on imports of U.S. beef and of the Bush Administration's handling of the beef dispute. On security issues, Members have expressed concern that steps taken by the Japanese government are harming U.S. interests in East Asia by worsening Sino-Japanese and South Korean-Japanese relations. Prime Minister Junichiro Koizumi's continued visits to Yasukuni Shrine, which enshrines the names

of several Class A war criminals from World War II, has come under particular criticism. Relatedly, some Members have called attention to signs that revisionist views of World War II and the U.S. Occupation of Japan (1945-52) increasingly are seeping into the mainstream in Japan. The Bush Administration's reaction to and role in fostering these developments also have begun to come under greater congressional scrutiny. Congressional attention also has focused on Japan's increased diplomatic and military assertiveness, as well as dramatic political developments in Japan in 2005 and 2006. (See also the "Legislation" section.)

Major Diplomatic and Security Issues¹

The dominant theme in U.S.-Japan relations for the past five years has been deepened alliance cooperation across a range of issues since the September 11, 2001, terrorist attacks. Prior to traveling to Asia in November 2005, President Bush described Prime Minister Junichiro Koizumi as "one of the best friends that I have in the international arena." During the one-day summit between the two leaders in Kyoto in November 2005, Prime Minister Koizumi said that the closer U.S.-Japan relations are, the "easier for us [Japan] to behave and establish better relations with China, with South Korea and other nations in Asia."

Global Issues

Counterterrorism Cooperation.

Following the terrorist attacks of September 11, 2001, the Koizumi government initiated a series of unprecedented measures to protect American facilities in Japan and provide non-lethal, "rear area" logistical support to U.S. military operations against Al Qaeda and the Taliban in Afghanistan. The latter mainly took the form of at-sea replenishment of fuel oil and water to U.S., British, French, and other allied warships operating in the Indian Ocean. The dispatch of Japan's Maritime Self-Defense Forces (MSDF) was the first such deployment since World War II. From late 2001 through March 2005, a small flotilla of Japanese transport ships, oilers, and destroyers provided about 30% of the fuel used by U.S. and allied warships, and Japan's Air Self-Defense Force (ASDF) conducted hundreds of airlift support missions for U.S. forces. On June 10, 2005, the Japanese government decided to extend its anti-terrorism law for two years but to reduce its Indian Ocean deployment to only one escort ship. This effectively brought to an end the post-9/11 role of the

MSDF operations in the Indian Ocean and Persian Gulf. After the United States, Japan also has been the leading donor country for Afghan relief and reconstruction.

Support for U.S. Policy Toward Iraq. While strongly preferring a clear United Nations role in resolving the U.S./British confrontation with Iraq, Japan nonetheless gave almost unqualified support to the Bush Administration's position. During an open debate in the U.N. Security Council, Japan was one of only two out of 27 participating countries (the other being Australia) to support the U.S. contention that even if the U.N. inspections were strengthened and expanded, they were unlikely to lead to the elimination of Iraq's weapons of mass destruction. Since 2003, Japan has provided \$1.5 billion in grant assistance to Iraq, has pledged to provide \$3.5 billion in yen loans, and has agreed to a phased cancellation of 80% of the approximately \$7.5 billion in debt Iraq owed Japan. In addition, the Koizumi government has deployed about 600 military personnel — mainly ground troops — to carry out humanitarian aid and reconstruction activities in Iraq. In December 2005, the Japanese Cabinet extended Japan's deployment of troops to the southern Iraqi city of Samawah for one year. When discussing the announcement, Prime Minister Koizumi hinted that Japan would likely withdraw its troops if Australian and British troops withdraw in 2006. Australian troops, along with the Dutch, have provided military protection for the Japanese deployment. Although not confirmed by Japanese officials, anonymous U.S. officials have said that Japan has expressed interest in heading up a "provincial reconstruction team," or PRT, a program proposed by the State Department to rebuild the country through locally-directed efforts. If it participates, Japan would be expected to provide its own airlift and other logistical needs.

United Nations Security Council Reform. In 2004, Japan accelerated its longstanding efforts to become a permanent member of the United Nations Security Council by forming a coalition with Germany, India, and Brazil (the so-called "G-4") to achieve non-veto membership for all four countries. Though the Bush Administration has backed Japan's bid,² it did not support the G-4 proposal and opposed taking a vote on expanding the Security Council until a "broader consensus" on reforming the entire organization can be reached. After the G-4 bid failed in the run-up to the U.N.'s Millennium Summit in September 2005, Prime Minister Koizumi reportedly told Secretary General Kofi Annan that in the future Japan would have to coordinate more closely with the United States to achieve its goal. To become a new member, Japan needs to obtain support from two-thirds (128 countries) of all the U.N. member countries. Japan is the second-largest contributor to the U.N. regular budget, paying more than 20% of the total, more than twice the percentage paid by the third-largest contributor. After investigations revealed that mismanagement had allowed millions of dollars to be lost to corruption in the oil-for-food program for Iraq, Japan threatened to withhold part of its funding if drastic reforms were not adopted.

² China and South Korea have criticized the Bush Administration for its support for Japan's bid for permanent U.N. Security Council membership.

Kyoto Protocol and Climate Change. Japan is the fourth-leading producer of so-called greenhouse gases after the United States, the Russian Federation, and China. Under the Kyoto Protocol, which Tokyo ratified in 2002, Japan is obligated to reduce its emissions to 6% below its 1990 levels by 2010. Japanese industry shares many of the concerns of U.S. industry about the cost and feasibility of achieving these reductions, but the Japanese government, which places a high value on its support of the protocol, has expressed dismay over the Bush Administration's decision to back away from the protocol. In 2005, Japan joined with the United States, China, India, South Korea, and Australia in a new, non-binding, agreement. The Asia-Pacific Partnership on Clean Development and Climate calls on the six nations to cooperate on the development and diffusion of technology to combat climate change, reduce pollution, and promote energy security. The group is designed to "complement, but not replace, the Kyoto Protocol." Some environmentalists have criticized the arrangement for its absence of mandates — particularly on greenhouse gas emissions — and for being a part of a suspected U.S. strategy to prevent the Kyoto Protocol from being renewed after it expires in 2012.

Regional and Historical Issues

Converging Korean Peninsula Priorities. Japan's policy toward North Korea has hardened in recent years, drawing it closer to the U.S. position in the ongoing Six-Party Talks on Pyongyang's nuclear weapons program. Japan has insisted on North Korea abandoning its nuclear weapons, promising substantial aid in return; has taken steps to squeeze North Korea economically; and participates in the U.S.-led Proliferation Security Initiative (PSI). Several prominent Japanese have called for Tokyo to impose sanctions against North Korea, a step opposed by Koizumi and the Bush Administration. The issue of Japanese citizens kidnapped in the 1970s and 1980s by North Korean agents has largely driven Tokyo's harder position. The Bush Administration and Congress have supported Japan's insistence on a full accounting of the fate of those abducted, and have included the abductions as part of the justification for keeping North Korea on the state sponsors of terrorism list. The North Korean Human Rights Act (P.L. 108-333), passed by the 108th Congress and signed by President Bush in October 2004, requires that U.S. nonhumanitarian assistance to North Korea depend on "substantial progress" toward fully disclosing information on the abductees.

At the same time, Japan has reportedly encouraged the United States to adopt a more flexible position; after a Koizumi-Bush meeting at the June 2004 G-8 Summit, the Bush Administration submitted its first and only detailed negotiating position at the Six-Party Talks. Additionally, outside the framework of the Talks, Koizumi has pursued an independent channel of diplomacy with North Korea, holding summits with North Korean leader Kim Jong-il in September 2002 and May 2004. Koizumi has not ruled out normalizing relations between the two countries, which have never had official relations, though he has made this contingent upon the settlement of the nuclear and abduction issues.

Japan-China Rivalry. Despite extensive economic ties, relations between China and Japan, always uneasy, have become increasingly strained. Political tensions are high on a variety of sovereignty-related issues, and many observers see a potentially destabilizing spike in nationalist animosity toward Japan among

Chinese. In April 2005, large-scale anti-Japanese demonstrations broke out in at least nine Chinese cities, including a violent protest in Shanghai that damaged the Japanese consulate as well as shops that catered to the large Japanese expatriate community. Many observers noted that the Chinese authorities were unusually passive in allowing the protesters to organize, fueling speculation that Beijing quietly encouraged the demonstrations. Beijing has criticized the strengthening U.S.-Japan alliance and Japan's increasingly public concern for Taiwan's security. In an indication of shifting relations, Japan has halved its assistance to China since 2000.

Beijing and Tokyo have faced a series of confrontations over the territorial rights of areas in the East China Sea, which is potentially rich in oil and gas reserves. Japan considers the area surrounding the Senkaku/Diaoyu islands to be part of its Exclusive Economic Zone (EEZ). The Japanese Self Defense Force has detected periodic Chinese military activities in the area, including a submarine incursion in 2004 close to Okinawa and a fleet of warships near a disputed gas field. Talks to resolve the issue have been held, but no resolution appears to be imminent.

Historical Issues Divide Asian Powers. Historical grievances, particularly those centered around Japan's behavior during and preceding World War II, continue to aggravate Japan's relationships with its neighbors. The most consistently divisive issue involves the visits of Japanese politicians to the Yasukuni Shrine, a Shinto shrine that honors Japanese soldiers who died in war. Those enshrined include several Class A war criminals who were convicted in the International Military Tribunal for the Far East following Japan's defeat in World War II. Chinese leaders have emphasized repeatedly that Prime Minister Koizumi's Yasukuni visits constitute a huge stumbling block in moving political relations forward. Koizumi's fifth annual visit to Yasukuni, in October 2005, again drew angry protests from Asian leaders: both Beijing and Seoul cancelled upcoming bilateral meetings with the Japanese, but no widespread demonstrations occurred in China. In a sign that the debate over Yasukuni is intensifying among the Japanese elite, two of Japan's most influential newspapers, the *Yomiuri Shimbun* and the *Asahi Shimbun*, called for the establishment of a non-political alternative shrine that excludes the Class A war criminals.

In a related vein, Japan has come under fire for some of its history textbooks for school children. China insists that the texts misrepresent Japan's past by downplaying the atrocities committed by Japanese soldiers against civilian populations. South Korea also has complained about Japanese history textbooks, the Yasukuni visits, and a perceived failure by the Japanese government to compensate adequately Korean "comfort women" who were recruited to provide sexual services for Japanese troops during World War II. Although the Japan-South Korean disputes generally are regarded as more manageable than Sino-Japan tensions, the disagreements over history are a major obstacle to improved Japan-South Korean ties, often referred to as the "weak link" in the U.S. triangle of alliances in Northeast Asia.

Furthermore, the question of Japan's historical legacy also has affected Korean and Chinese views of the United States. Both countries have criticized the Bush Administration for its silence regarding the controversy over the Yasukuni shrine and Japan's record in accounting for its past history of aggression. In November

2005, President Bush discussed rising regional tensions during his bilateral summits with Koizumi and the leaders of China and South Korea. During a trip to Japan and China in January 2006, Deputy Secretary of State Robert Zoellick suggested that Chinese, Japan, and U.S. historians engage in “track two” efforts to examine the history of World War II.

In a related move, in July 2005 the U.S. House of Representatives passed H.Con.Res. 191, which commemorated the 60th anniversary of the end of the Pacific War. The resolution stated that Congress reaffirmed the judgments rendered by the international war crimes tribunal in Tokyo after World War II, including the conviction of Japanese leaders for “crimes against humanity.”

Claims of Former World War II POWs and Civilian Internees.

Congress has indicated interest in another issue in which the U.S. and Japanese governments have been in essential agreement. A number of surviving American World War II Prisoners of War (POWs) and civilian internees who were forced to work for Japanese companies — including Mitsui, Nippon Steel, and Mitsubishi — during the war have filed suits in Japan and California seeking compensation of \$20,000 for each POW or internee for forced labor and torture. Former POWs and civilian internees were paid about \$1.00-2.50 for each day of internment from a fund of seized Japanese assets administered by a War Claims Commission (WCC) established by Congress in 1948. Thus far, the Japanese courts and the U.S. Court of Claims have dismissed the suits on grounds that Japan’s obligations to pay compensation were eliminated by Article 14 of the 1951 Multilateral Peace Treaty with Japan. The Departments of State and Justice support the position of the Japanese government, but some Members of Congress have sided with the plaintiffs. The core issue is whether the Peace Treaty with Japan relieved only the Japanese government from future claims or whether it covered private companies as well. A number of bills and amendments introduced in the last several Congresses have sought to block the executive branch from upholding the supremacy of the Peace Treaty in civil suits. None have been enacted, in part due to opposition from the Bush Administration.³ (See “Legislation” section.)

Military Issues⁴

Deepening Cooperation. Japan and the United States are military allies under a security treaty concluded in 1951 and revised in 1960. Under the treaty, Japan grants the United States military base rights on its territory in return for a U.S. pledge to protect Japan’s security. In October 2005, at a Security Consultative Committee meeting (SCC, also known as the 2+2 meeting) of the Japanese and U.S. foreign and defense ministers, the two sides released an interim report, *Transformation and Realignment for the Future*, announcing several significant steps that will expand the alliance beyond its existing framework. A follow-up implementation plan, announced in May 2006, lays out the final agreement, including

³ See CRS Report RL30606, *U.S. Prisoners of War and Civilian American Citizens Captured and Interned by Japan in World War II*, archived but available by request from the coordinator.

⁴ This section written by Emma Chanlett-Avery.

the key provision that Japan will bear over \$6 billion of the estimated \$10.2 billion cost for relocating 8,000 Marines from Okinawa to a facility in Guam by 2014. U.S. officials say Japan will pay an estimated \$26 billion overall for the realignment initiative.

As U.S. personnel and facilities in Japan are realigned as part of the broader Pentagon strategy of deploying a more streamlined and mobile force, Japan is to take a more active role in contributing to global stability, primarily through increased coordination with the U.S. military. Key features of the new arrangement include a reduction in the number of U.S. Marines in Japan, the relocation of a problematic air base in Okinawa, the deployment of an X-Band radar system in Japan as part of a missile defense system, expanded bilateral cooperation in training and intelligence sharing, and Japan's acceptance of a nuclear-powered aircraft carrier in the Yokosuka Naval Base. Many of the agreement's most controversial elements are likely to face continued obstacles, particularly from local Japanese politicians in the areas identified to host new facilities and troops. In March 2006, 89% of voters in Yamaguchi prefecture voted against expanding the Iwakuni base to accommodate more U.S. troops in a non-binding referendum, and scheduled talks on the realignment were postponed.

The most recent overhaul builds upon the 1997 revised defense cooperation guidelines that grant the U.S. military greater use of Japanese installations in time of crisis and refer to a possible, limited Japanese military role in "situations in areas surrounding Japan." At the "2 + 2" meeting in February 2005, Secretaries Rice and Rumsfeld, along with their Japanese counterparts, outlined a more global and integrated vision of the alliance, specifically mentioning issues related to the Korean Peninsula and the Taiwan Straits as "common strategic objectives" for "peaceful resolution." Defense officials continue to stress, however, that the Japanese military will not be involved in combat missions but instead limit its contributions to logistical support for counterterrorism operations or to humanitarian and reconstruction efforts.

In recent years Japan has edged closer to a more independent self-defense posture in both practice and in published security strategies. Japan's National Defense Program Guidelines (NDPG), approved in December 2004, call on Japan to become more engaged militarily in the Indian Ocean region from the Middle East to Southeast Asia, permit military exports to the United States for development of joint missile defense, and increase the size of rapid reaction forces, whose main mission is to prevent infiltration from North Korea. The NDPG also mention China as a security problem, the first such mention in a five-year plan.

Article 9 Restrictions. In general, Japan's U.S.-drafted constitution remains a major obstacle to closer U.S.-Japan defense cooperation because of a prevailing constitutional interpretation of Article 9 that forbids engaging in "collective defense"; that is, combat cooperation with the United States against a third country. Article 9 outlaws war as a "sovereign right" of Japan and prohibits "the right of belligerency." It provides that "land, sea, and air forces, as well as other war potential will never be maintained." Whereas in the past, Japanese public opinion strongly supported the limitations placed on the Self-Defense Force (SDF), this opposition has softened considerably in recent years. (See "Constitutional Revision") Since 1991, Japan has

allowed the SDF to participate in non-combat roles in a number of United Nations peacekeeping missions and in the U.S.-led coalition in Iraq. Japan's agreement in 2005 to house a new, nuclear-powered carrier in Yokosuka beginning in 2008 after the existing carrier is decommissioned has sparked local protests.

Proposed Command Structure Changes. The October 2005 interim report, followed by the May 2006 roadmap for implementation, outlines major command changes agreed to by Japanese and U.S. officials. One would shift 300 soldiers from the 1st Army Corps headquarters from Washington State to Camp Zama to establish a deployable headquarters. The Ground Self Defense Forces would also base a rapid-response headquarters at Camp Zama. A bilateral and joint operations center is to be built at Yokota Air Base (about 23 miles northwest of Tokyo) to enhance coordination between the Japanese and U.S. air and missile defense command elements. The headquarters of the 3rd Marine Expeditionary Force, meanwhile, would be moved from Okinawa to Guam, reducing the number of marines in Okinawa by about 8,000.

U.S. Bases on Okinawa. The reduction of marines on Okinawa seeks to quell the political controversy that has surrounded the presence of U.S. forces on the island for years. Public outcry against the bases has continued since the 1995 rape of a Japanese schoolgirl by American servicemen, which galvanized underlying resentments. Though constituting less than 1% of Japan's land mass, Okinawa currently hosts 65% of the total U.S. forces in Japan. Okinawan politicians have called for a renegotiation of the Japan-U.S. Status of Forces Agreement (SOFA) and a reduction in U.S. troop strength. The U.S. and Japanese governments oppose revising the SOFA, but have acknowledged the political demand to alleviate the burden of military presence in Okinawa.

As part of the realignment of U.S. bases, U.S. officials agreed to move most aircraft and crews constituting the marine air station at Futenma to expanded facilities at Camp Schwab, located in Nago, a less-congested area of Okinawa. Campaigns for Nago's January 2006 mayoral election indicated resistance to the relocation, as all candidates criticized the plan. Okinawan Mayor Keiichi Inamine, however, has agreed to most aspects of the central government's plan, with some conditions. Disagreements over the relocation of the Futenma air station had stalled the implementation of a 1996 U.S.-Japanese Special Action Committee on Okinawa (SACO) agreement under which the U.S. military would relinquish some bases and land on Okinawa (21% of the total land in the bases) over seven years.

Burden-Sharing Issues. The United States has pressed Japan to increase its share of the costs of American troops and bases. According to a Pentagon report, in 2004, Japan provided \$4.4 billion in direct and indirect Host Nation Support (HNS), which is 75% of the total cost of maintaining troops in Japan. In 2004, Japanese officials reportedly suggested that HNS be reduced on grounds that Japan is now making a greater direct contribution to the alliance. In January 2006, Japan renewed its pledge to provide \$1.2 billion in direct support for each of the next two years to U.S. forces amid controversy over how much of the cost of relocating forces will be shouldered by Japan. In May 2006, Japan agreed to shoulder 59% (over \$6 billion) of the estimated cost of relocating forces from Okinawa to Guam. Richard

Lawless, U.S. Deputy Undersecretary of Defense, estimated that Japan would need to pay an additional \$20 billion for the realignment initiative.

Cooperation on Missile Defense. A U.S.-Japan program of cooperative research and development of anti-ballistic missiles began in 1999. Proponents of missile defense justify it on the basis of North Korea's missile program, but China opposes the program. Prime Minister Koizumi announced in December 2003 that Japan would acquire the ground-based U.S. Patriot Advanced Capability-3 (PAC-3) system and the ship-based U.S. Standard Missile-3 system. The Defense Agency reportedly plans to begin deploying the missile defense system around major Japanese cities by March 2007. In December 2005, the Agency announced that Japan will pay over \$1 billion for the project over nine years.

Economic Issues⁵

Despite Japan's long economic slump, trade and other economic ties with Japan remain highly important to U.S. national interests and, therefore, to the U.S. Congress.⁶ By the most conventional method of measurement, the United States and

⁵ This section was written by William Cooper.

⁶ For a more complete treatment of U.S.-Japan economic ties, see CRS Report RL32649, *U.S.-Japan Economic Relations: Significance, Prospects, and Policy Options*, by William H. Cooper.

Japan are the world's two largest economies,⁷ accounting for around 40% of world gross domestic product (GDP), and their mutual relationship not only has an impact on each other but on the world as a whole. Furthermore, their economies are intertwined by merchandise trade, trade in services, and foreign investments.

Although Japan remains important economically to the United States, its importance has slid as it has been edged out by other trade partners. Japan is the United States's third-largest merchandise export market (behind Canada and Mexico) and the fourth-largest source for U.S. merchandise imports (behind Canada, Mexico, and China) as of the first six months of 2005. At one time Japan was the largest source of foreign direct investment in the United States, but, as of the end of 2004, it was the second largest source (behind the United Kingdom). It was the fifth-largest target for U.S. foreign direct investment abroad as of the end of 2004. The United States remains Japan's largest export market and second-largest source of imports as of the end of July 2005.

Japan's domestic economic conditions have influenced the U.S.-Japan economic agenda. Except for some brief periods, Japan had incurred stagnant or negative economic growth in the 1990s and the first few years of this decade. However, Japan recently has shown signs of achieving sustained economic recovery. Some long-standing trade disputes continue to irritate the relationship. The U.S. bilateral trade deficit with Japan reached \$81.3 billion in 2000. However, in 2001, the U.S. trade deficit declined 15%, primarily because of the slowdown in the U.S. economy, but increased moderately to \$70.1 billion in 2002. The trade deficit decreased slightly to \$66.0 billion in 2003 but increased to \$75.2 billion in 2004 and to \$82.7 billion in 2005, breaking the record set in 2000. (See **Table 1**.)

There have been complaints from U.S. industry and certain Members of Congress about the Japanese government's massive intervention in currency markets in 2003 and early 2004 to slow the Japanese yen's appreciation against the U.S. dollar. Some legislation has been introduced regarding the alleged currency manipulation. While many of the bills target China's exchange rate practice, some do refer to Japan. For example, S. 377 (Lieberman), The Fair Currency Enforcement Act of 2005, lists Japan as a country, among others, that has implemented exchange rate policies that give its exports an unfair competitive advantage in the U.S. market, and the bill states that experts have estimated that the yen is undervalued by about at least 20%. The bill would authorize the President to take actions under U.S. trade laws to retaliate, if a country is found to be manipulating its currency values.⁸

In addition, the recent announcement by the Ford Corporation of factory closings and the layoff of some 30,000 auto employees exemplified growing problems of the U.S.-based auto industry. In a November 2005 speech he delivered at the National Press Club, Ford Chairman Bill Ford stated among other things that U.S. auto manufacturers face the financial burdens of pension costs and health care benefits that Japanese auto companies, such as Toyota, do not face because the

⁷ China's economy is now larger than Japan's by another method of measurement: purchasing power parity.

⁸ For more, see CRS Report RL33178, *Japan's Currency Intervention*, by Dick K. Nanto.

Japanese government finances these costs, thereby placing the burden on the whole society and not just on Japanese business. While Ford's argument for his company's problems is subject to debate, his remarks may signify the re-emergence of Japanese industrial policy as a point of contention in the bilateral relationship.

Table 1. U.S. Trade with Japan, Selected Years
(\$ billions)

Year	Exports	Imports	Balances
1995	64.3	123.5	- 59.1
2000	65.3	146.6	- 81.3
2003	52.1	118.0	-66.0
2004	54.4	129.6	-75.2
2005	55.4	138.1	-82.7

Japan's Ban on U.S. Beef.⁹ On June 21, 2006, S. 3435 (Conrad) was introduced and would impose sanctions on U.S. imports from Japan, if Japan does not lift its ban on imports of U.S. beef by August 31, 2006. On June 22, the Senate Appropriations Committee approved agricultural appropriations legislation (H.R. 5384). Section 757 of the bill that contains a Sense of the Senate resolution that the United States should impose sanctions against Japan if Japan has not lifted the ban on imports of U.S. beef by the date of the bills enactment. In January 2006, Japan reimposed a ban on beef imports from the United States after having lifted it in December 2005. Japan re-imposed the ban after government inspectors found bone material in beef shipments from the United States, among the first shipments to have arrived after the ban was lifted. The presence of the bone material violated the procedures U.S. and Japanese officials had agreed upon that allowed the resumption of the U.S. beef shipments. U.S. Secretary of Agriculture Johanns expressed regret that the prohibited material had entered the shipments. It is not clear when U.S. beef shipments to Japan can resume.

On May 2, 2006, in Geneva, U.S. Agriculture Secretary Mike Johanns and USTR Robert Portman met with Japan's Agriculture, Forestry, and Fisheries Minister Shoichi Nakagawa, who told them that the decision on lifting the ban could be made by June, perhaps in time for the anticipated summit meeting between President Bush and Prime Minister Koizumi. In a May 24, 2006 letter, a bipartisan group of 31 Senators urged Koizumi to resolve the issue before his June 29 White House meeting with President Bush. In the letter, the Senators stated, "the Government of Japan's arbitrary trade constriction has perpetuated severe economic consequences for a very important segment of our agricultural sector." Japanese inspectors are to arrive in the United States and begin inspecting U.S. slaughter houses on June 14. On May 25, the Japanese government reportedly told the independent Japanese Food

⁹ For more information, see CRS Report RS21709, *Mad Cow Disease and U.S. Beef Trade*, by Charles Hanrahan and Geoffrey Becker.

Safety Commission that Japan had reached an agreement in principle to resume beef imports from the United States. On June 20, U.S. and Japanese agriculture officials reached an agreement in principle on procedures for Japan to lift its ban on imports of U.S. beef. Those procedures include Japanese inspection of U.S. processing and exporting facilities, and those inspections may not be completed until sometime in July.

In February 2006, the U.S. Department of Agriculture released a report of its investigation of how the prohibited material got shipped. Japanese officials stated that while the report explained the incident in question it also revealed that there had been other violations of the conditions for resumption of U.S. beef shipments, raising the possibility of a further delay in the lifting of the ban.¹⁰ In March 2006, Johanns met with Minister Nakagawa in London and discussed, among other things, the current Japanese ban on imports of U.S. beef. Johanns indicated that the United States was responding to questions regarding the U.S. meat inspection procedures and how prohibited material got into a shipment to Japan that caused Japan to impose the latest ban. The two officials did not indicate a time when the ban could be lifted.

Japan imposed the original ban in December 2003, in response to the discovery of the first U.S. case of bovine spongiform encephalopathy (BSE or “mad cow disease”) in Washington state. In the months before the diagnosis in the United States, nearly a dozen Japanese cows infected with BSE had been discovered, creating a scandal over the Agricultural Ministry’s handling of the issue (several more Japanese BSE cases have since emerged). Japan had retained the ban despite ongoing negotiations and public pressure from Bush Administration officials, a reported framework agreement (issued jointly by both governments) in October 2004 to end it, and periodic assurances afterward by Japanese officials to their U.S. counterparts that it would be lifted soon.

The Byrd Amendment. Japan, together with other major trading partners, has challenged U.S. trade laws and actions in the World Trade Organization (WTO). For example, Japan and others challenged the U.S. 1916 Antidumping Law and the so-called Byrd Amendment (which allows revenues from countervailing duty and antidumping orders to be distributed to those who had been injured). In both cases, the WTO ruled in Japan’s favor. Legislation to repeal the 1916 law was passed by the 108th Congress. In November 2004, the WTO authorized Japan and the other countries to impose sanctions against the United States. In September 2005, Japan imposed 15% tariffs on selected imports of U.S. steel products as retaliation, joining the EU and Canada. It is the first time that Japan has imposed punitive tariffs on U.S. products. In the meantime, a repeal of the Byrd Amendment was included in the conference report for S. 1932, the Deficit Reduction Act of 2005, that received final congressional action on action February 1, 2006, and was signed by the President into law (P.L. 109-171) on February 8, 2006. The measure phases out the program over a period ending October 1, 2007.¹¹ Although Japan has praised the

¹⁰ *Inside U.S. Trade*. February 24, 2006.

¹¹ For more information on the Byrd Amendment, see CRS Report RL33045, *the Continued Dumping and Subsidy Offset Act (“The Byrd Amendment”)*, by Jeanne J. Grimmer and (continued...)

repeal of the Byrd Amendment, it has criticized the delayed termination of the program and has maintained the sanctions on imports from the United States.

The Doha Development Agenda. Japan and the United States are major supporters of the Doha Development Agenda (DDA), the latest round of negotiations in the WTO. Yet, the two have taken divergent positions in some critical areas of the agenda. For example, the United States, Australia, and other major agricultural exporting countries have pressed for the reduction or removal of barriers to agricultural imports and subsidies of agricultural production, a position strongly resisted by Japan and the European Union. At the same time, Japan and others have argued that national antidumping laws and actions that member countries have taken should be examined during the DDA, with the possibility of changing them, a position that the United States has opposed.

Despite some outstanding issues, tensions in the U.S.-Japan bilateral economic relationship have been much lower than was the case in the 1970s, 1980s, and early 1990s. A number of factors may be contributing to this trend: Japan's economic problems in the 1990s and in the first few years of this decade changed the general U.S. perception of Japan as an economic "threat" to one of a country with problems; the rise of China as an economic power has caused U.S. policymakers to shift attention from Japan to China as a source of concern; the increased use by both Japan and the United States of the WTO as a forum for resolving trade disputes has depoliticized disputes and helped to reduce friction; and the emphasis in the bilateral relationship has shifted from economic to security matters.

Japanese Political Developments¹²

In general, Japan's political peculiarities both constrain and enhance U.S. influence over Japanese policy. Compared to most industrialized democracies, the Japanese Diet (parliament) is structurally weak, as is the office of the prime minister and his cabinet. Though Koizumi and his immediate predecessors have increased politicians' influence relative to Japan's bureaucrats, with important exceptions Japan's policymaking process still tends to be compartmentalized and bureaucratized, making it difficult to make trade-offs among competing constituencies on divisive issues. The result is often paralysis or incremental changes at the margins of policy. On some issues this can provide the United States with an opening to use foreign pressure (*gaiatsu*) to break policy logjams.

On the other hand, the nature of Japan's policymaking process often makes it difficult for Japanese leaders to reach controversial agreements with foreign countries. Japan's structural debilities also have tended to retard its ability to act decisively and proactively in the international sphere — often to the frustration of the United States — though this characteristic is less pronounced today than the 1990's.

Because Prime Minister Koizumi has centralized power to a greater extent than his predecessors, and because he has aligned Japanese foreign policy so closely to the United States, his expected resignation in September 2006 could have a larger-than-usual impact on U.S.-Japan relations.

Koizumi's Sweeping Victory in September 2005 Elections. Junichiro Koizumi is Japan's third-longest serving prime minister since 1945, and he has used his popularity to bolster power in the prime minister's office at the expense of the previously powerful factions in his ruling Liberal Democratic Party (LDP). Koizumi's influence was greatly enhanced in September 2005, when he led the LDP to a landslide victory in nationwide elections for the Lower House of the Japanese parliament (the Diet). The LDP won 296 of 480 seats, its largest total in nearly 20 years, and 84 seats higher than its position before the election. The next Lower House elections are not required to be held until September 2009.

Koizumi's victory appears to have further weakened the LDP's conservative "old guard," whose power Koizumi has gradually reduced since he came to power in 2001. Koizumi exercised his right to call a snap Lower House election after many LDP members helped engineer the defeat in the Upper House of his controversial proposal to privatize the Japanese postal system.¹³ The LDP narrowly controls the Upper House only through a coalition with a smaller party. During the campaign, Koizumi successfully made his postal privatization plan the dominant issue, and expelled many of the old-guard politicians from the LDP. Following his victory, Koizumi reintroduced and secured passage of his postal privatization bill.

Koizumi repeatedly has stated that he will step down from his position as LDP President when his term expires in September 2006. (Traditionally, the LDP President assumes the premiership.) A number of prominent LDP members have called for rewriting the party's rules to allow Koizumi to extend his term, but to date Koizumi repeatedly has resisted these entreaties, saying only that he expects his successor to advance his reform agenda. This includes shrinking the size of government, making the LDP more responsive to its president, and devolving budget authority to Japan's prefectures (states).

Koizumi's Successor. After his election victory, Koizumi said that he wants his successor to carry on his reforms and that he would reshuffle his Cabinet in order to give a chance for potential successors to gain more experience. In October 2005, he appointed a new Cabinet, giving prominent positions to three individuals who are widely thought will seek the LDP presidency in 2006. Shinzo Abe (51 years old) — known for his hawkish views on North Korea, China, and history issues — was given the important position of Chief Cabinet Secretary, a post gives him nearly daily exposure on the Japanese media, as well as the power to allocate the LDP's political funds to individual politicians. Abe is generally considered the frontrunner to succeed Koizumi. Another hardliner, Taro Aso (65) — who is known as an advocate of closer relations with Taiwan — was given the Foreign Ministry portfolio.

¹³ In addition to providing mail delivery, Japan Post also functions as the country's (and perhaps the world's) largest bank and life insurer, with about ¥350 trillion (approximately \$3 trillion) in deposits.

Sadakazu Tanigaki (60) was reappointed as Finance Minister. Notably, another would-be prime minister, Koizumi's former Chief Cabinet Secretary Yasuo Fukuda (69), was left out of the Cabinet altogether. Fukuda reportedly has advocated a somewhat more conciliatory position toward China and South Korea and was a chief architect of Koizumi's policy of normalizing relations with North Korea. Fukuda also has criticized Koizumi's controversial visits to the Yasukuni Shrine. In the spring of 2006, Fukuda's popularity rose considerably, driven by growing concern in Japan about deteriorating relations with China and South Korea.

Koizumi's political authority generally is considered to have declined since the September 2005 election, due to several factors, including the emergence of several political and corruption scandals popularly associated with his reforms; the apparent stagnation of many of Koizumi's reformist measures (such as overhauling Japan's road-building process); the increased focus on potential successors; and the passage in March 2006 of his last budget, which is his Cabinet's last major piece of "must-pass" legislation.

The Democratic Party of Japan (DPJ). The election also appeared — at least for the moment — to stall the emergence of a two-party system in Japan. The LDP has ruled almost continuously since its formation in 1955. Over the past three years, Japan's largest opposition party, the Democratic Party of Japan (DPJ), seemed to be emerging as a viable candidate to defeat the LDP. In several elections in the early part of the decade, the DPJ steadily increased its strength in the Diet by winning over reform-minded urban and independent voters, who were attracted to the DPJ's economic reform platform that in many ways is more radical than Koizumi's. In the September 2005 election, however, many of these voters opted for Koizumi's rebranded LDP. As a result, the DPJ lost more than one-third of its strength; the party now has 113 seats in the Lower House, down from 175 before the election, and the party's leader resigned to take responsibility for the defeat.

A week after the vote, the DPJ elected 43-year-old Seiji Maehara — known as a realist on security and defense issues — to be the new party president. However, Maehara and the entire DPJ leadership resigned in March 2006, in response to widespread criticism over their handling of a political scandal. The following month, the party's Diet members selected longtime political leader Ichiro Ozawa (63), once a top LDP leader before he defected to the DPJ in mid-1993 to press for sweeping reform in the Japanese political system. The DPJ will hold a more traditional election for party president in September 2006. Since leaving the LDP, Ozawa has pushed for reforming Japan's political and economic systems, as well as adopting a more assertive and independent foreign policy. Following his selection, Ozawa stated that he would push for "a U.N.-centered national security policy" that has the Japan-U.S. alliance "as a pivot, but emphasizes Asia."¹⁴ He has criticized Prime Minister Koizumi's visits to Yasukuni Shrine. In the past, Ozawa has been hampered by what many see as his top-down management style and his political opportunism.

Constitutional Revision. Japan's constitution was drafted in 1946 by the U.S. Occupation authorities, who then imposed it on a reluctant Japanese legislature.

¹⁴ "Ozawa Elected as New President," DPJ Press Release. April 7, 2006.

Since the early 1990s, previously strong public opposition to revising the constitution has gradually weakened and public opinion polls now show widespread support for some sort of revision. In October 2005, Japan's ruling Liberal Democratic Party (LDP) released its long-awaited draft revision of the Japanese constitution. The most notable changes reduce many — though not all — of the provisions in the war-renouncing clause (Article 9) that set limits on Japan's military activities. After renouncing war and the “threat or use of force as a means of settling international disputes,” the proposed revision explicitly states that Japan “shall maintain armed forces for self-defense” that operate under the prime minister and are subject to the Diet's approval and direction. The explicit mention of a military force is designed to rectify the disconnect between the current constitution — which says that “land, sea, and air forces, as well as other war potential, will never be maintained” — and the reality that Japan possesses a Self Defense Force. More importantly, the LDP's draft appears to allow Japan to participate in collective security arrangements by stating that the armed forces “may act in international cooperation to ensure the international community's peace and security.”

Both the LDP and the DPJ are split — with the DPJ's internal divisions much deeper — between relatively hawkish and pacifist wings that appear to be sparring over the question of whether or not conditions (such as United Nations backing) should be attached to the right to join collective security arrangements. In other words, the issue is not whether, but how, Article 9 should be revised, a development that is due in part to increased concerns about North Korea and China. In March 2005, Japan's House of Representatives Research Commission on the Constitution, composed of representatives from various parties, released a report indicating that over two-thirds of members generally favor constitutional provisions allowing Japan to join U.N. collective security arrangements, stipulating the Self-Defense Forces' existence, and maintaining some portion of the war-renouncing clause of Article 9. A wide majority of the commission also favored allowing women to serve as emperor, establishing stronger privacy and environmental rights, creating a constitutional court, and revising Japan's federalist system. Constitutional amendments must be approved by two-thirds of each chamber, after which they are to be “submitted to the people” for majority approval. In June 2006, the Lower House of Parliament began debating legislation detailing how a national constitutional referendum would be conducted. The LDP-led coalition and the DPJ proposed separate referendum bills, dampening hopes for the two camps to cooperate on constitutional revision.

Conclusion — Japan's Increased Assertiveness¹⁵

Since the late 1990s, Japan has displayed a more assertive foreign policy, a process that Prime Minister Junichiro Koizumi has accelerated since coming to power in 2001. The new assertiveness has manifested itself in at least four notable ways. First, under Prime Minister Koizumi, Japan has intensified its cooperation with the United States, and Koizumi has developed a strong personal relationship with President Bush. Second, Tokyo has hardened its policies toward Beijing,

¹⁵ This section was written by Mark Manyin.

slashing its bilateral aid program, not backing down from territorial and historical disputes, and reorienting the U.S.-Japan alliance to give both countries more flexibility to respond to perceived and actual threats from China. Third, Japan has attempted to exert more influence in Southeast Asia and on the global stage, as evidenced by its pursuit of a permanent seat on the U.N. Security Council and its negotiation of free trade agreements (FTAs) with a number of Southeast Asian countries. Fourth, Japanese leaders have sought to make Japan a more “normal” country by legitimizing the military’s ability to participate in collective security arrangements and take actions — such as firing at hostile foreign ships in Japanese waters — that most other nations take for granted. Currently, Japan’s military role is highly conscribed by the constitution’s war-renouncing clause of Article 9.

The motivations for Japan’s increasing foreign policy assertiveness are both external and internal. Domestically, Koizumi has found that breaking from Japan’s traditionally passive foreign policy posture has played well with politically influential right-of-center — not to mention right-wing — groups. Many elements of his policies also have resonated among the population as a whole, as ordinary Japanese have become much more security conscious since North Korea’s missile launch in 1998. In general, the negative implications of China’s economic and military rise are viewed with deepening concern in Japan, particularly when seen against the backdrop of Japan’s decade-long economic slump. Many Japanese worry that they gradually are ceding leadership in East Asia to China, and that the after-effects of this shift will harm Japanese interests. In the shorter term, anxieties have been raised by the intensifying disputes with China and by North Korea’s nuclear weapons and missile programs.

In general, the Bush Administration has encouraged Tokyo’s rising assertiveness, which thus far has tended to dovetail with U.S. interests in the strategic realm. In the future, however, it is likely that a more active Japan will be more willing to question U.S. policies on a range of strategic issues where U.S. and Japanese interests do not coincide or where domestic factors push Japanese leaders to avoid being perceived as being too close to the United States.

Legislation

P.L. 109-5 (S. 384). Extends the existence of the Nazi War Crimes and Japanese Imperial Government Records Interagency Working Group for two years. Passed by both houses and signed into law by President Bush in March 2005.

P.L. 109-97 (H.R. 2744). The Agriculture Appropriations Act of 2006. Signed into law (P.L. 109-97) November 10, 2005. The Senate-passed version included two amendments, adopted on September 20, 2005, that would have denied funds to implement a rule to lift the U.S. ban on Japanese beef until Japan has lifted its ban on imports of U.S. beef (S.Amdt. 1732 agreed to by a vote of 72-26); and that expressed the sense of the Senate that the U.S. ban on imported Japanese beef should remain in place until Japan has lifted its ban on imports of U.S. beef (S.Amdt. 1738, agreed to by voice vote). House and Senate conferees did not include either amendment in the final bill, though the conference report (H.Rept. 109-255) says

Congress “clearly reserve[s] the right to impose restrictions similar to those suggested by the Senate if there is not a swift resolution to this issue.”

P.L. 109-114 (H.R. 2528). Veterans Affairs Appropriations Act of 2006. Section 118 requires the Defense Department to report by February 15 on U.S. efforts to encourage Japan and other allied countries to increase their share of the allied defense burden. Became public law on November 30, 2005.

P.L. 109-171 (S. 1932). The Deficit Reduction Act of 2005. The conference report includes a repeal of the Byrd Amendment. Received final congressional action on February 1, 2006, and was signed by the President into law on February 8, 2006. The measure phases out the program over a period ending October 1, 2007.

H.Con.Res. 68 (Evans). Expresses the sense of Congress that the Government of Japan should formally issue a clear and unambiguous apology for the sexual enslavement of “comfort women” during the colonial occupation of Asia. Introduced March 17, 2005; referred to House Asia Pacific Subcommittee.

H.Con.Res. 168 (Hyde). Condemns the Democratic People’s Republic of Korea for the abductions and continued captivity of citizens of the Republic of Korea and Japan. Passed by the House (362-1) on July 11, 2005; referred to Senate Foreign Relations Committee.

H.Con.Res. 191 (Hyde). Commemorates the 60th anniversary of the conclusion of the War in the Pacific and reaffirms the judgments rendered by the International Military Tribunal for the Far East of 1946-1948, including the conviction of certain individuals as war criminals. Passed by the House (399-0) on July 14, 2005; referred to the Senate Committee on Foreign Relations.

H.Con.Res. 311 (Ramstad)/S.Con.Res. 67 (Coleman). Urges Japan to honor its commitments under a 1986 bilateral agreement on medical equipment and pharmaceuticals. House bill introduced December 7, 2005; referred to House Ways and Means Committee. Senate bill introduced November 18, 2005; referred to Foreign Relations Committee.

H.Res. 137 (Moran)/S.Res. 87 (Thune). Expresses the sense of the respective Houses of Congress that the U.S. government should impose economic sanctions against Japan, if Japan does not lift its ban on U.S. beef. Neither resolution has seen committee action.

H.Res. 321 (Leach). Expresses support for a “regionally balanced expansion” of the membership of the United Nations Security Council, which would include adding Japan, India, Germany, Brazil, and an African country. Introduced June 15, 2005; referred to the House Committee on International Relations.

H.R. 30 (Mica). To provide compensation for certain World War II veterans who survived the Bataan Death March and were held as prisoners of war by the Japanese. Introduced January 4, 2005; referred to House Committee on Armed Services. Similar legislation in the 108th Congress (H.R. 595) did not see action outside of committee.

H.R. 4179 (Salazar) and S. 1922 (Conrad). Require the President to impose extra tariffs on various Japanese products beginning on January 1, 2006, if Japan has not lifted its ban on imports of U.S. beef. H.R. 4179 introduced October 28, 2005; referred to House Ways and Means Committee. S. 1922 introduced October 26, 2005; referred to Senate Finance Committee.

S. 377 (Lieberman). Requires negotiation and appropriate action with Japan, China, and other countries that have engaged in currency manipulation. Introduced February 15, 2005; referred to Senate Finance Committee.
