Committees of Congress

# Examples of Legislative Provisions in Annual Appropriations Acts

## Summary

Over the years, House and Senate rules generally have been used to promote the separate consideration of substantive legislation and measures providing annual appropriations to federal agencies, chiefly so that the regular funding of the federal government is not impeded by controversies associated with authorizing and other legislation.

The key rules upon which this separation is based are House Rule XXI and Senate Rule XVI. On July 26, 1999, the Senate agreed to S.Res.160, a measure effectively overturning a 1995 precedent that had caused the Senate's ban against considering legislative provisions in annual appropriations acts not to be enforced for several years.

The procedural separation, however, is not ironclad because (1) the rules are not self-enforcing; (2) the rules may be waived in various ways; and (3) the rules are not fully comprehensive in their coverage and application.

Legislative provisions may generate controversy with any type of annual appropriations act, including regular, continuing, and supplemental appropriations acts. The most visible controversies in recent years often have been associated with omnibus appropriations acts, which are measures that combine two or more regular appropriations acts. During the 1980s and 1990s and continuing into the 2000s, there has been a greater use of omnibus appropriations acts; in some instances, a considerable portion of these omnibus appropriations acts has consisted of legislative provisions.

This report illustrates House and Senate practices regarding legislative provisions by listing dozens of major legislative provisions that were included in 13 omnibus appropriations acts enacted in recent years, as well legislative provisions included in recent supplemental appropriations acts. In addition, the report lists more than a dozen legislative provisions that were dropped from three of the omnibus appropriations acts.

The report will be updated as developments warrant. (For more information on omnibus appropriations acts, see CRS Report RL32473, *Omnibus Appropriations Acts: Overview of Recent Practices*, by Robert Keith.)

# Examples of Legislative Provisions in Annual Appropriations Acts

## The Separation of Legislation and Appropriations

For well over a century, the House and Senate have had rules meant to promote the separate consideration of substantive legislation and measures providing annual appropriations to federal agencies. The chief reason behind this procedural division is to ensure that the regular funding of the federal government is not impeded by controversies associated with authorizing and other legislation that establishes and organizes agencies, authorizes and reauthorizes programs, and sets forth policy guidelines and restrictions.

Despite these rules, substantive legislation sometimes is included in annual appropriations acts. Provisions in annual appropriations acts carrying substantive legislation are referred to as “legislative provisions.”<sup>1</sup>

The House and Senate Appropriations Committees typically report three different types of annual appropriations acts each year. Each of the House and Senate Appropriations subcommittees develop one regular appropriations act, which provides budget authority to federal agencies for the upcoming fiscal year.<sup>2</sup> Supplemental appropriations acts provide additional budget authority during the fiscal year when the regular appropriation is insufficient, or to finance activities not provided for in the regular appropriation. Continuing appropriations acts, also called continuing resolutions, provide stop-gap funding for agencies that have not yet received a regular appropriation.

---

<sup>1</sup> Legislative provisions in annual appropriations acts often are referred to colloquially as “riders.” In many instances, the term “riders” is intended by some to apply also to “limitation provisions” (i.e., provisions that bar the use of appropriations for certain specified purposes) in such acts. Whereas legislative provisions usually deal with matters extraneous to the issue of funding and usually are out of order under House and Senate rules, limitation provisions are an integral part of funding issues and usually do not violate the rules. The use of the term “riders” is avoided in this report because it is slang and because there is no common agreement as to whether it should apply to limitation provisions as well as legislative provisions.

<sup>2</sup> From the late 1960s through 2004, the House and Senate Appropriations Committees had 13 parallel subcommittees that each reported one of the regular appropriations acts. The two Appropriations Committees revised their subcommittee structure in 2005, at the beginning of the 109<sup>th</sup> Congress, reducing the number of subcommittees to 10 in the House Appropriations Committee and 12 in the Senate Appropriations Committee. The subcommittee structure was revised again in 2007, at the beginning of the 110<sup>th</sup> Congress, resulting in 12 parallel subcommittees in the House and Senate Appropriations Committees.

An *omnibus* appropriations act generally is regarded as a regular appropriations act or a continuing resolution that has been expanded to encompass agencies and accounts normally covered in two or more of the regular appropriations acts. In the case of a continuing resolution that is an omnibus appropriations act, it typically goes beyond formula-funding for multiple bills to include the full text of the regular appropriations acts.

**House Rule XXI.** In the House, Rule XXI is intended to keep the consideration of annual appropriations acts separate from the consideration of substantive legislation. Clauses 2(b) and 2(c) of the rule prohibit the inclusion of “legislative provisions” (i.e., provisions changing existing law or otherwise carrying substantive law) in *general* appropriations bills reported by the committee or offered as floor amendments. In addition, Clause 4 prohibits the inclusion of appropriations in legislation reported by any committee other than the Appropriations Committee.<sup>3</sup> The House, unlike the Senate, does not regard continuing resolutions to be general appropriations bills.

**Senate Rule XVI.** In the Senate, Rule XVI serves to separate the consideration of legislative and appropriations matters in a fashion similar to that employed by the House. In 1995, however, during the Senate’s consideration of a supplemental appropriations bill, the chair’s ruling that a particular amendment offered by a Senator was out of order as legislation was overturned by the full Senate; this action came to be referred to as the “Hutchison precedent.”<sup>4</sup> In the aftermath of that ruling, the Senate for several years did not enforce the portion of the rule prohibiting legislative provisions in annual appropriations acts. On July 26, 1999, the Senate agreed by a vote of 53 to 45 to S.Res. 160, a measure effectively overturning the Hutchison precedent and restoring the long-standing prohibition against legislative provisions.<sup>5</sup>

In addition, Senate Rule XXVIII in part bars conferees from inserting new matter (i.e., matter not in the bills passed by either body) into a conference report. In 1996, in an action known as the “FedEx precedent,” the Senate overturned a ruling of the chair, thereby allowing new matter to be included in a conference report. As a consequence of this action, the restriction in Rule XXVIII against the inclusion of new matter in conference reports was not enforced for several years. In the case of annual appropriations acts, the suspension of this part of Rule XXVIII facilitated the inclusion of legislative provisions during this period. Toward the end of the 106<sup>th</sup> Congress, a provision overturning the FedEx precedent (effective at the beginning

---

<sup>3</sup> Under the recodification of the House rules on January 6, 1999 (pursuant to the adoption of H.Res. 5), this provision was moved to Clause 4 from Clause 5(a).

<sup>4</sup> See the consideration in the Congressional Record of March 16, 1995, of an amendment offered by Senator Kay Bailey Hutchison to H.R. 889, a supplemental appropriations and rescission act.

<sup>5</sup> The measure simply declared the following: “Resolved, That the presiding officer of the Senate should apply all precedents of the Senate under rule 16, in effect at the conclusion of the 103<sup>rd</sup> Congress.”

of the 107<sup>th</sup> Congress) was enacted as part of the Consolidated Omnibus Appropriations Act for FY2001.<sup>6</sup>

## **Inclusion of Legislative Provisions in Appropriations Acts**

Although House and Senate rules and practices over the decades have promoted the separate consideration of legislation and appropriations, the separation has not been ironclad. In many instances, during the routine operation of the annual appropriations process, minor provisions are included in appropriations acts that technically may be regarded under the rules as legislative in nature, but do not significantly undermine the dichotomy between legislation and appropriations. At other times, however, the legislative provisions included in annual appropriations acts have been much more substantial and have represented a deliberate suspension of the usual procedural boundaries.

In the House and Senate, legislative provisions may be included in annual appropriations acts in several ways, as discussed below.

**Rules Are Not Self-Enforcing.** First, the rules that enforce the boundaries between legislation and appropriations are not self-enforcing. In order for a potential violation to be stopped, a Member must successfully raise a point of order and it must be sustained if challenged.

**Rules May Be Waived.** Second, like any other rules of the House and Senate, these rules may be waived in various ways. In the House, for example, it is not uncommon to waive Rule XXI under a “special rule,” reported by the House Rules Committee, governing consideration of the annual appropriations act. The Senate sometimes effectively waives its rules when it considers legislation under unanimous consent agreements.

**Rules Are Not Comprehensive.** Finally, the rules are not fully comprehensive in their coverage and application. Both House Rule XXI and Senate Rule XVI afford some exceptions, particularly in the Senate. For example, the House, as previously mentioned, does not regard continuing resolutions to be general appropriations bills; consequently, the prohibitions under Rule XXI do not apply to their consideration. Further, while the Senate’s restrictions against legislative provisions apply to amendments of the Senate Appropriations Committee made to a House-passed appropriations act, they do not apply to legislative provisions originated by the committee in a Senate-numbered appropriations act. In recent years, the Senate Appropriations Committee has originated a greater number of annual appropriations acts (i.e., acting on a Senate-numbered measure, rather than a House-passed measure, up to the stage of final action), thereby circumventing the Rule XVI prohibitions against legislative provisions.

---

<sup>6</sup> See Section 903 of H.R. 5666, the Miscellaneous Appropriations Act for FY2001, as enacted into law by cross-reference in P.L. 106-554 (114 Stat. 2763A-198; December 21, 2000).

It should be noted that a provision in an appropriations act generally is determined to be legislative by a ruling of the chair. In the Senate, the Members sometimes decide the matter by a vote, upon the raising of a point of order or an appeal of the chair's ruling. The provisions listed in this report, therefore, should be regarded only as "possibly" legislative in nature; although they meet criteria long used by the House and Senate to determine whether a provision is legislative, no ruling was made by the chair or the Senate in these cases. Many of the examples provided in the report explicitly state that they amend an existing law and cite a public law number or a section of the *United States Code* (often, a marginal note is provided in the slip law indicating the applicable section of the U.S.C.).

## Recent Practices

The inclusion of legislative provisions in annual appropriations acts has been a long-standing feature of the appropriations process. In many instances, legislative provisions are regarded as routine or technical and do not generate controversy. In other cases, legislative provisions may spark contentious debate, complicating and prolonging the consideration of the underlying appropriations measure.

Controversies regarding the use of legislative provisions sometimes arise in connection with the consideration of regular, continuing, and supplemental appropriations acts, particularly when such acts have been chosen by the House and Senate leadership as vehicles to carry other legislative matters. Controversies probably occur less often in the case of continuing resolutions, because these stop-gap funding measures usually are considered under circumstances where the pressures are greater to keep the measures "clean" and free of provisions that would impede their timely enactment.

With respect to regular and supplemental appropriations acts, the latter type of annual appropriations act is more likely to have been used in recent years as a vehicle for significant legislative matters. A recent supplemental appropriations act, for example, included separate titles dealing with funding shortfalls in a mandatory health program, an increase in the minimum wage, small business tax incentives, and other matters typically addressed outside of the annual appropriations process.

Several examples of legislative provisions included in recent supplemental appropriations acts are shown (in reverse chronological order) in **Table 1**. For each legislative provision, the subject matter is identified — if the provision is given a short title, such as the "Post-9/11 Veterans Educational Assistance Act of 2008," it is listed — and the *Statutes-at-Large* citation is provided. The listing of legislative provisions in **Table 1** (and in the other tables) for each act is intended merely to be illustrative; it does not represent a comprehensive or systematic survey and should not be used to assess or infer any trends in House and Senate practices.

- a. A provision in an appropriations act is determined to be “legislative” by a ruling of the chair or a vote of the chamber, upon the raising of a point of order or appeal. The provisions listed in this table, therefore, should be regarded only as “possibly legislative” in nature; although they meet criteria long used by the House and Senate to determine whether a provision is legislative, no ruling was made by the chair or the chamber in these cases. The listing is intended merely to be illustrative; it does not represent a comprehensive or systematic survey and should not be used to assess or infer any trends in House and Senate practices.

Although legislative provisions may generate controversy with any type of annual appropriations act, the most visible controversies in recent years have tended to be associated with “omnibus” or “consolidated” appropriations acts, which merge two or more of the regular appropriations acts into a single measure.<sup>7</sup>

Beginning in the 1980s, various factors have contributed to the greater use of omnibus appropriations acts, particularly escalating disagreements between the President and Congress over general budgetary policy and policies in key program areas, and the resultant legislative gridlock. At first, the omnibus appropriations acts took the form of continuing resolutions, but in recent years they mostly have taken the form of bills.

**Table 2** lists the 13 most recent omnibus appropriations acts.

**Table 2. Omnibus Appropriations Acts: FY1986-FY2008**

Act	Public Law Number and Date of Enactment
Further Continuing Appropriations Act, 1986	P.L. 99-190; December 19, 1985
Continuing Appropriations Act, 1987	P.L. 99-500; October 18, 1986
Further Continuing Appropriations Act, 1988	P.L. 100-202; December 22, 1987
Omnibus Consolidated Rescissions and Appropriations Act of 1996	P.L. 104-134; April 26, 1996
Omnibus Consolidated Appropriations Act, 1997	P.L. 104-208; September 30, 1996
Omnibus Consolidated and Emergency Supplemental Appropriations Act, 1999	P.L. 105-277; October 21, 1998
Consolidated Appropriations Act, 2000	P.L. 106-113; November 29, 1999

<sup>7</sup> For more information on omnibus appropriations acts, see CRS Report RL32473, *Omnibus Appropriations Acts: Overview of Recent Practices*, by Robert Keith.

**Table 3** provides examples (in reverse chronological order) of legislative provisions that were included in those omnibus appropriations acts. The earliest three acts were continuing resolutions enacted in the mid-to-late 1980s; the remaining 10 acts were bills enacted in the 1990s and 2000s.

In some instances, a considerable portion of these omnibus appropriations acts has consisted of legislative provisions. Two reasons for this practice are that (1) legislation stalled at the end of a session, that otherwise might not advance, can be carried through to enactment on the funding bill, which is considered to be “must-pass” legislation; and (2) popular legislative provisions may be added to an appropriations act to increase its chances of enactment.

The practice of including major legislative provisions in annual appropriations acts, particularly omnibus acts, generates controversy for several reasons. Some Members decry the practice as undermining the deliberative process. They assert that in many instances the inclusion of such provisions in lengthy and complex appropriations bills considered toward the close of a session may require Members to vote on matters with which they are largely unfamiliar, may give them too little time to debate these matters, may usurp the prerogatives of the relevant authorizing committees, and may shield from proper scrutiny legislation that would not prevail on its own merits.

Advocates of the practice, however, argue that it provides needed flexibility to the legislative process, allowing Congress to process and complete its business more efficiently, especially in the waning days of a session. Many such provisions, they maintain, already have been given a thorough review under regular procedures. Further, their inclusion in annual appropriations bills often is at the behest of authorizing committee members, who have not been able to advance their legislation because of a crowded legislative agenda.

In 2004, circumstances in the Senate prompted some to advance another argument in favor of using an omnibus appropriations act for FY2005. By the beginning of the appropriations cycle for FY2005, the Senate had not agreed to the conference report on the FY2005 budget resolution (S.Con.Res. 95). Consequently, one of the principal procedural tools used to encourage spending restraint — points of order to enforce spending allocations to the Appropriations subcommittees under Section 302(b) of the Congressional Budget Act of 1974 — was not available. The Senate, however, had imposed a ceiling of \$814 billion on total appropriations for FY2005 (enforceable by a point of order) in the prior year’s budget resolution, which still was in effect. In order for the ceiling on total FY2005 appropriations to be enforced at that time, however, all of the regular appropriations bills for that fiscal year would have had to been considered in a single, omnibus measure. (Although the House and Senate did not reach final agreement on the FY2005 budget resolution, the Senate adopted a “deeming resolution” later in the session that resolved the enforcement problem for the remainder of the budget cycle.)<sup>8</sup>

---

<sup>8</sup> The Senate’s “deeming resolution” was included as Section 14007 in the Defense Appropriations Act for FY2005 (P.L. 108-287; August 5, 2004). For additional information (continued...)

The Consolidated Appropriations Act for FY2000 (P.L. 106-113) and the Consolidated Appropriations Act for FY2001 (P.L. 106-554) enacted several appropriations bills and legislative bills by cross-reference.

Although the House and Senate regularly incorporate major legislative provisions into annual appropriations acts, Members often are successful in getting legislative provisions dropped from such acts. **Table 4** provides a listing of legislative provisions dropped from three of the omnibus appropriations acts listed in the previous table. As with the other tables, the listing is intended merely to be illustrative.

For the sake of expedience, the examples provided in **Table 4** were drawn from articles contained in the *CQ Almanac* (for calendar year 1996) and the *CQ Monitor* (for calendar year 1998). In the case of the three omnibus appropriations acts listed in the table, all of the legislative provisions were dropped in conference; however, such provisions sometimes are dropped at earlier stages of the legislative process. Whether the provision originated in the House or the Senate is indicated. In this context, origination in a chamber means that it was offered in the markup of the Appropriations Committee or subcommittee of that chamber, was offered during floor consideration by that chamber, or was proposed in conference by the conferees of that chamber.

The three omnibus appropriations acts incorporated the full text of several of the regular appropriations acts. Legislative provisions listed under these omnibus acts may have been dropped in the conference on the omnibus act, or beforehand in a conference on one of the regular appropriations acts subsequently incorporated into the omnibus act.

On many occasions, the House and Senate resolved controversy over a contentious legislative provision by adopting a substantial modification of it rather than dropping it altogether. This report does not address such practices.

---

- a. A provision in an appropriations act is determined to be “legislative” by a ruling of the chair or a vote of the chamber, upon the raising of a point of order or appeal. The provisions listed in this table, therefore, should be regarded only as “possibly legislative” in nature; although they meet criteria long used by the House and Senate to determine whether a provision is legislative, no ruling was made by the chair or the chamber in these cases. The listing is intended merely to be illustrative; it does not represent a comprehensive or systematic survey and should not be used to assess or infer any trends in House and Senate practices.

**Table 4. Examples of Legislative Provisions Dropped From Omnibus Appropriations Acts**

Fiscal Year	Appropriations Act	Legislative Provision <sup>a</sup>	Commentary <sup>b</sup>
1996	Omnibus Consolidated Rescissions and Appropriations Act of 1996 (P.L. 104-134; April 26, 1996)	Modification of timber salvage policy	Originated in Senate; dropped in conference ( <i>CQA</i> , 1996, p. 10-14)
		District of Columbia school voucher plan	Originated in House; dropped in conference ( <i>CQA</i> , 1996, p. 10-11 and 12)
		Restriction on Medicaid payments for abortion	Originated in House; dropped in conference ( <i>CQA</i> , 1996, p. 10-16)
1997	Omnibus Consolidated Appropriations Act, 1997 (P.L. 104-208; September 30, 1996)	Abortion restrictions on overseas family planning funds (Mexico City policy)	Originated in House; dropped in conference ( <i>CQA</i> , 1996, p. 10-52)
		Collection by states of taxes from Indian tribal businesses	Originated in House; dropped in conference ( <i>CQA</i> , 1996, p. 10-58)
		General Accounting Office review of Forest Service's management plan for the Tongass National Forest	Originated in Senate; dropped in conference ( <i>CQA</i> , 1996, p. 10-58)
		Ban against most federal benefits to illegal immigrants	Originated in House; dropped in conference ( <i>CQA</i> , 1996, p. 10-66)
		Bar against Medicare, Medicaid, and Social Security administrative funds being used to support union activities	Originated in House; dropped in conference ( <i>CQA</i> , 1996, p. 10-66)
		Exemption for certain workplaces from a safety regulation requiring employees to wear long pants	Originated in House; dropped in conference ( <i>CQA</i> , 1996, p. 10-66)
1999	Omnibus Consolidated and Emergency Supplemental Appropriations Act, 1999 (P.L. 105-277; October 21, 1998)	Bar against homosexual couples adopting children	Originated in House; dropped in conference ( <i>CQM</i> , 10/20/98, p. 2)
		District of Columbia school voucher plan	Originated in House; dropped in conference ( <i>CQM</i> , 10/20/98, p. 2)
		Parental notification regarding the provision of contraceptives to minors	Dropped in conference ( <i>CQM</i> , 10/14/98, p. 3)

Fiscal Year	Appropriations Act	Legislative Provision <sup>a</sup>	Commentary <sup>b</sup>
		Term limits for high-level staff of the Federal Election Commission	Originated in House; dropped in conference ( <i>CQM</i> , 10/8/98, p. 7)
		Extension of tax credit for alternative fuels	Originated in Senate; dropped in conference ( <i>CQM</i> , 10/16/98, p. 4)

- a. A provision in an appropriations act is determined to be “legislative” by a ruling of the chair or a vote of the chamber, upon the raising of a point of order or appeal. The provisions listed in this table, therefore, should be regarded only as “possibly legislative” in nature; although they meet criteria long used by the House and Senate to determine whether a provision is legislative, no ruling was made by the chair or the chamber in these cases. The listing is intended merely to be illustrative; it does not represent a comprehensive or systematic survey and should not be used to assess or infer any trends in House and Senate practices.
- b. In the case of the three omnibus appropriations acts listed in this table, all of the legislative provisions were dropped in conference; however, such provisions sometimes are dropped at earlier stages of the legislative process. Whether the provision originated in the House or the Senate is indicated. In this context, origination in a chamber means that it was offered in the markup of the Appropriations Committee or subcommittee of that chamber, was offered during floor consideration by that chamber, or was proposed in conference by the conferees of that chamber.

The three omnibus appropriations acts incorporated the full text of several of the regular appropriations acts. Legislative provisions listed under these omnibus acts may have been dropped in the conference on the omnibus act or beforehand in a conference on one of the regular appropriations acts subsequently incorporated into the omnibus act.
