R41164

Summary

The American Recovery and Reinvestment Act (ARRA, P.L. 111-5) provided \$7.2 billion primarily for broadband grant and loan programs to be administered by two separate agencies: the National Telecommunications and Information Administration (NTIA) of the Department of Commerce (DOC) and the Rural Utilities Service (RUS) of the U.S. Department of Agriculture (USDA). The NTIA grant program is called the Broadband Technology Opportunity Program (BTOP). The RUS broadband grant and loan program is called the Broadband Initiatives Program (BIP).

As of October 1, 2010, all BTOP and BIP award announcements are complete. In total, NTIA and RUS announced awards for 540 projects, constituting \$7.58 billion in federal funding. This included 233 BTOP projects (totaling \$3.94 billion) and 307 BIP projects (totaling \$3.64 billion). Of the \$7.58 billion total announced, \$6.26 billion was grant funding, and \$1.32 billion was loan funding.

This report focuses on the distribution of ARRA broadband funding with respect to project category, broadband infrastructure technology deployed, and state-by-state distribution. Of all broadband infrastructure funding, a little more than half (51%) was awarded to middle mile projects and 49% was awarded to last mile projects. Deployment of broadband infrastructure can encompass a number of different types of technologies, including fiber, wireless, cable modem, DSL, satellite, and others. Projects involving fiber account for about two-thirds of all infrastructure projects.

Congress is likely to continue providing oversight on NTIA and RUS efforts to monitor funded projects. In the longer term, the Federal Communications Commission's (FCC's) National Broadband Plan has recommended a significant expansion of federal funding for broadband deployment in unserved areas. To the extent that Congress may consider whether broadband grant and loan programs should be expanded, the funding patterns and trends that emerged during Rounds One and Two, as well as the ultimate successes and failures of funded BTOP and BIP projects, could provide insights into whether and how such programs should be expanded, and if so, how these or similar programs might be fashioned within the context of a national broadband policy.

Introduction

The American Recovery and Reinvestment Act (ARRA, P.L. 111-5) provided \$7.2 billion primarily for broadband grant and loan programs to be administered by two separate agencies: the National Telecommunications and Information Administration (NTIA) of the Department of Commerce (DOC) and the Rural Utilities Service (RUS) of the U.S. Department of Agriculture (USDA).

The ARRA directed broadband grant and loan funding in the following way:

- \$4.35 billion¹ to NTIA/DOC for a competitive broadband grant program including broadband infrastructure grants, competitive grants for expanding public computer capacity, and grants to encourage sustainable adoption of broadband service. The NTIA grant program is called the Broadband Technology Opportunity Program (BTOP).
- \$2.5 billion to RUS/USDA for broadband grants, loans, and loan/grant combinations. The law states that 75% of the area to be served by an eligible project must be a rural area. A rural area is defined as any area not located within a city, town, or incorporated area that has a population of greater than 20,000 inhabitants; or not located within an urbanized area contiguous and adjacent to a city or town that has a population of greater than 50,000 inhabitants. The RUS broadband grant and loan program is called the Broadband Initiatives Program (BIP).

Subsequently, P.L. 111-226 (the education jobs and Medicaid funding bill), signed into law on August 10, 2010, rescinded \$302 million of unobligated BTOP money from NTIA.

There were two rounds of ARRA broadband funding. The first funding round was announced with the release of a Notice of Funds Availability (NOFA) on July 1, 2009. The second funding round NOFAs were released on January 15, 2010. The ARRA mandated that all funding be obligated and awarded by September 30, 2010. As of October 1, 2010, all ARRA broadband funds have been awarded.

This report focuses on the distribution of ARRA broadband funding.² The following presents a breakdown of applications and awards data as of October 1, 2010.

¹ Additionally, the ARRA directed \$350 million to NTIA for funding broadband data gathering and implementation of the State Broadband Data and Development Grant program. A portion of this money was also allocated to the Federal Communications Commission for the purpose of preparing a National Broadband Plan. Both the state data grant program and the development of the National Broadband Plan are separate activities and are not discussed in this report.

² For a comprehensive discussion of the ARRA broadband programs, see CRS Report R40436, *Broadband Infrastructure Programs in the American Recovery and Reinvestment Act*, by Lennard G. Kruger.

Applications

Round One

The first funding round was announced with the release of a Notice of Funds Availability (NOFA) on July 1, 2009. Broadband grants and loans fell into several first round project categories. For BTOP, projects could be:

- *last mile*, defined as any broadband infrastructure project the predominant purpose of which is to provide broadband service to end users;
- *middle mile*, defined as a broadband infrastructure project that does not predominantly provide broadband service to end users and may include interoffice transport, backhaul, Internet connectivity, or special access (up to \$1.2 billion in grants available for infrastructure consisting of last mile and middle mile projects);
- *public computer centers*, which provide broadband access to the general public or a specific vulnerable population (up to \$50 million in grants available); or
- *sustainable broadband adoption*, which demonstrate a sustainable increase in demand for and subscribership to broadband services (up to \$150 million in grants available).

For BIP, projects could be:

- *last mile remote area*, where “remote area” is a rural unserved area at least 50 miles from a nonrural area (up to \$400 million in grants available);
- *last mile nonremote area* (up to \$800 million in loans and loan/grant combinations available); or
- *middle mile* (up to \$800 million in loans and loan/grant combinations available).

On September 9, 2009, NTIA and RUS released data on applications received during the first round application period. In total, over 2,200 applications requested nearly \$28 billion in funding for proposed projects reaching all 50 states, five territories, and the District of Columbia. The total amount of federal funding requested was seven times the amount available in the first funding round.

Table 1 provides a breakdown of first round applications data with respect to program and project category.³

³ A searchable database is available at <http://www.ntia.doc.gov/broadbandgrants/applications/search.cfm>.

Table I. Numbers of First Round Applications and Funds Requested by Project Category

	Number of Applications	Funds Requested, grants, \$billions	Funds Requested, loans, \$billions	Funds Requested, grants plus loans, \$billions
Last Mile (BTOP Only)	114	1.78	N/A ^a	1.78
Last Mile Non-remote area	646	4.76	3.94	8.70
Last Mile Remote Area ^b	406	2.59	1.25	3.84
Middle Mile	372	7.84	1.31	9.15
Public Computer Centers	362	1.91	N/A	1.91
Sustainable Broadband Adoption	329	2.49	N/A	2.49
Total	2229	21.37	6.5	27.87

Source: Compiled by CRS from the Broadband USA Applications Database.

- a. Not applicable.
- b. Remote area applications are self-identified by applicants. The actual number of applications legitimately qualifying as “remote area” was less, as determined by RUS.

Round Two

On January 15, 2010, NTIA and RUS released NOFAs announcing the second and final round of ARRA broadband funding. A total of \$4.8 billion was made available, consisting of \$2.6 billion for BTOP and \$2.2 billion for BIP. Based on the agencies’ experiences with the first round, and drawing on public comments collected from a November 16, 2009, Joint Request for Information (RFI),⁴ both NTIA and RUS streamlined the application process and made significant changes to how the second round of BTOP and BIP would be structured and conducted. Highlights included the following:

- Unlike the first round, each agency had its own separate NOFA, and applicants had the option of applying to either BTOP or BIP, but not to both.
- NTIA/BTOP primarily focused on middle mile broadband infrastructure projects, while RUS/BIP focused primarily on last mile projects.
- BTOP reoriented its infrastructure program towards Comprehensive Community Infrastructure (CCI) grants, which support middle mile projects serving anchor institutions such as community colleges, libraries, hospitals, universities, and public safety institutions.
- BIP eliminated the “Remote Last Mile” project category, and offered a standard grant/loan combination (75% grant/25% loan) for all last mile and middle mile projects (unless waivers were sought).

⁴ Department of Agriculture, Rural Utilities Service and Department of Commerce, National Telecommunications and Information Administration, “Broadband Initiatives Program and Broadband Technology Opportunities Program,” 74 *Federal Register* 58940-58944, November 16, 2009.

- The first round requirement that eligible infrastructure projects must cover “unserved” or “underserved” areas was eliminated. In the second round, BIP projects were required to cover an area that is at least 75% rural and that does not have High Speed Access broadband service at the rate of 5 Mbps (upstream and downstream combined) in at least 50% of its area. Eligible BTOP projects required only an applicant that is an eligible entity, a fully completed application, and a nonfederal match of 20% or more. However, during the application evaluation, factors such as unserved and underserved areas, remoteness, and delivered speed were considered.
- BIP added three new grant programs: Satellite Projects, Rural Library Broadband, and Technical Assistance. RUS published a separate Request for Proposals for each of these programs.

On April 7, 2010, NTIA announced it had received 867 applications for second round funding, totaling \$11 billion in requested federal funding. The applications broke down as follows: 355 applications requesting a total of \$8.4 billion for Comprehensive Community Infrastructure, 251 applications requesting \$1.7 billion for Sustainable Broadband Adoption, and 261 applications requesting \$0.922 billion for Public Computer Centers.⁵

On April 16, 2010, RUS announced it had received a total of 776 applications requesting nearly \$11.2 billion in federal funds. Of that total, RUS received 30 middle mile applications requesting a total of \$845.88 million.

Combined, NTIA and RUS received 1643 applications in the second round, requesting a total of \$22.2 billion in federal funds. This is 26% less than the number of applications received by both agencies in the first round, and 21% less than the amount of federal funding requested in the first round.

Additionally, on August 30, 2010, RUS announced it received 27 applications for Satellite Projects, 51 applications for Technical Assistance, and 2 applications for Rural Library Broadband.⁶

Awards

As of October 1, 2010, all BTOP and BIP award announcements are complete. In total, NTIA and RUS announced awards for 540 projects, constituting \$7.58 billion in federal funding. This included 233 BTOP projects (totaling \$3.94 billion) and 307 BIP projects (totaling \$3.64 billion). Of the \$7.58 billion total announced, \$6.26 billion was grant funding, and \$1.32 billion was loan funding.

The following is a breakdown of awards data by project category and program, broadband technology deployed, and state-by-state distribution of funding. Awards data are derived from

⁵ NTIA, “Commerce Announced Continued Demand for Funding to Bring Broadband to More Americans,” April 7, 2010, available at http://www.ntia.doc.gov/press/2010/BTOP_Round2Applications_04072010.html.

⁶ For a complete listing, see directory at http://broadbandusa.sc.egov.usda.gov/BIPportal/files/BIP_Sat_TA_RLB_App_Directory.pdf.

NTIA and RUS press releases, BTOP project information,⁷ the BIP Round Two Application Directory,⁸ and the Broadband USA applications database.⁹

Breakdown by Project Category and Program

Table 2 and **Table 3** provide breakdowns of awards data by project category and program. Of all broadband infrastructure funding, a little more than half (51%) was awarded to middle mile projects (includes Comprehensive Community Initiative and public safety grants), and 49% was awarded to last mile projects (includes satellite grants). Middle mile projects are predominantly (but not exclusively) BTOP, while last mile projects are predominantly BIP. Given that only BIP offered loan funding, it is not surprising that the vast majority of loan funding (93%) was awarded to last mile projects.

Table 2. Broadband Stimulus Awards by Project Category

	Program	Number of Projects	Federal Funds Awarded, grants, \$millions	Federal Funds Awarded, loans, \$millions	Federal Funds Awarded, grants plus loans, \$millions
Comprehensive Community Infrastructure	BTOP	68	2091.708	0	2091.708
Middle Mile	BTOP and BIP	54	1049.464	95.957	1145.421
Last Mile (2 nd round)	BIP	229	1627.928	821.744	2449.673
Last Mile Non-remote area	BIP and BTOP	56	405.783	393.67	799.453

Table 3. Percentage of Broadband Awards by Project Category

	Percentage of funded projects	Percentage of grant funding awarded	Percentage of loan funding awarded	Percentage of total funding awarded
Comprehensive Community Infrastructure	12.6%	33.4%	0%	27.6%
Middle Mile	10%	16.7%	7.2%	15.1%
Last Mile (2 nd round)	42.4%	26.0%	62.1%	32.3%
Last Mile Non- remote area	10.4%	6.5%	29.8%	10.5%
Last Mile Remote Area	2.4%	2.4%	0.8%	2.1%
Public Safety	1.3%	6.1%	0%	5.0%
Satellite	0.7%	1.6%	0%	1.3%
Public Computer Centers	12.2%	3.2%	0%	2.6%
Sustainable Broadband Adoption	8.1%	4.0%	0%	3.3%
Total	100%	100%	100%	100%

Source: Compiled and calculated by CRS from NTIA and RUS press releases, BTOP project information, the BIP Round Two Application Directory, and the Broadband USA Applications Database. Data current as of October 1, 2010.

Breakdown by Type of Technology

Deployment of broadband infrastructure can encompass a number of different types of technologies, including fiber, wireless, cable modem, DSL, satellite, and others. **Table 4** shows that of all infrastructure projects funded, 56% are fiber projects. Additionally, given that most of the projects involving multiple technologies involve a deployment of both fiber and wireless technologies, it would be accurate to state that projects involving fiber account for about two-thirds of all infrastructure projects. Of last mile project technologies, 47% are fiber, 23% are DSL, 17% are wireless, 6% are multiple, 3% are cable modem, 1% are satellite, and the rest are unable to be determined from the public information that was released.

Table 4. Infrastructure Projects by Type of Technology

Technology	Number of awarded projects	Percentage of total infrastructure projects
Fiber	221	56%
Wireless	60	15%
DSL	69	18%
Cable modem	10	3%
Satellite	4	1%
Multiple ^a	28	7%

Source: Compiled and calculated by CRS from NTIA and RUS press releases, BTOP project information, the BIP Round Two Application Directory, and the Broadband USA Applications Database. Data current as of October 1, 2010.

a. Primarily combinations of fiber + wireless broadband technologies.

State-by-State Breakdowns

Table A-1 in the Appendix shows a state-by-state breakdown of grant and loan funding, **Table A-2** shows per capita funding by state, **Table A-3** shows a state-by-state breakdown of BTOP funding, and **Table A-4** shows a state-by-state breakdown of BIP funding. Forty-two BTOP and BIP projects involve a service area covering more than one state. In these cases, the award has been categorized with the principal recipient state, either as identified by RUS or NTIA, or based on the location of the applying organization. **Table A-5** lists awarded projects with service areas covering more than one state.

BTOP and BIP: Going Forward

With the broadband awards process concluded, NTIA and RUS move towards monitoring and overseeing the progression of the funded projects. Projects must be substantially completed within two years and fully completed within three years. In its FY2011 budget proposal, the Administration requested \$23.7 million for NTIA to continue operating its grant management office. S. 3636 (Commerce, Justice, Science, and Related Agencies Appropriations Act, 2011) would provide \$16 million to NTIA for the administration of BTOP grants and for the development and maintenance of the national broadband map.¹⁰

Congress is likely to continue providing oversight on NTIA and RUS efforts to monitor the funded projects. In the longer term, the FCC's National Broadband Plan has recommended a significant expansion of federal funding for broadband deployment in unserved areas.¹¹ To the

¹⁰ No funding for this purpose is currently provided under the Continuing Resolution (P.L. 111-242) which funds the federal government through December 3, 2010.

¹¹ The National Broadband Plan recommends expanding combination grant-loan programs at RUS, expanding the RUS Community Connect grant program, establishing a Tribal Broadband Fund, and significantly reorienting the FCC's Universal Service Fund program to support broadband. See Federal Communications Commission, *Connecting America: The National Broadband Plan*, March 2010, pp. 140-152.

extent that Congress may consider whether broadband grant and loan programs should be expanded, the funding patterns and trends that emerged during rounds one and two, as well as the ultimate successes and failures of funded BTOP and BIP projects, could provide insights into whether and how such programs should be expanded, and if so, how these or similar programs might be fashioned within the context of a national broadband policy.

Appendix.
