RL32760

Summary

The Temporary Assistance for Needy Families (TANF) block grant funds a wide range of benefits and services for low-income families with children. TANF was created in the 1996 welfare reform law (P.L. 104-193). This report responds to some frequently asked questions about TANF; it does not describe TANF rules (see, instead, CRS Report RL32748, *The Temporary Assistance for Needy Families (TANF) Block Grant: A Primer on TANF Financing and Federal Requirements*, by Gene Falk).

TANF Funding. TANF provides fixed funding to states, the bulk of which is provided in a \$16.5 billion-per-year basic block grant. States are required in total to contribute, from their own funds, at least \$10.4 billion under a maintenance-of-effort (MOE) requirement. The basic block grant is not adjusted for inflation or changes in the cash welfare caseload (see “The Caseload,” below). It has lost 28% of its value to inflation from FY1997 through FY2011.

State Spending. Though TANF is best known for funding cash welfare payments for needy families with children, the block grant and MOE funds are used for a wide variety of benefits and activities. In FY2009, expenditures on basic assistance (cash welfare) totaled \$9.3 billion—28% of total federal TANF and MOE dollars. TANF also contributes funds for child care and services for children who have been, or are at risk of being, abused and neglected.

Cash Welfare Caseload. A total of 1.9 million families, composed of 4.6 million recipients, received TANF- or MOE-funded cash in June 2011. The bulk of the “recipients” were children—3.4 million in that month. The cash welfare caseload is very heterogeneous. The type of family historically thought of as the “typical” cash welfare family—one with an unemployed adult recipient—accounted for less than half of all families on the rolls in FY2008. Additionally, 15% of cash welfare families had an employed adult, while almost half of all families had no adult recipient. Child-only families include those with disabled adults receiving Supplemental Security Income (SSI), adults who are nonparents (e.g., grandparents, aunts, uncles) caring for children, and families consisting of citizen children and ineligible noncitizen parents.

Cash Welfare Benefits. TANF cash benefits are set by states. In July 2009, the maximum monthly benefit for a family of three ranged from \$923 in Alaska to \$170 in Mississippi. Benefits in all states represent a fraction of poverty-level income. In the median state (Kansas), the maximum monthly benefit of \$429 for a family of three represents 28% of poverty-level income.

Cash Welfare Work Requirements. TANF requires states to engage 50% of all families and 90% of two-parent families in work activities. However, these standards are reduced by caseload reduction from FY2005. Further, states may get an extra credit against these standards by spending more than required under the TANF MOE. In FY2009, states achieved an all-family participation rate of 29.4% and a two-parent rate of 28.3%. That year, eight jurisdictions failed the all-family standard, and seven jurisdictions failed the two-parent standard. States that fail to meet work standards are *at risk* of being penalized by a reduction in their block grant.

Introduction

This report provides responses to frequently asked questions about the Temporary Assistance for Needy Families (TANF) block grant. It is intended to serve as a quick reference to provide easy access to information and data. This report does not provide information on TANF program rules. For such information, see CRS Report RL32748, *The Temporary Assistance for Needy Families (TANF) Block Grant: A Primer on TANF Financing and Federal Requirements*, by Gene Falk. For a non-technical overview of TANF, see CRS Report R40946, *The Temporary Assistance for Needy Families Block Grant: An Introduction*, by Gene Falk. For a discussion of current TANF legislative issues, see CRS Report R41781, *The Temporary Assistance for Needy Families Block Grant: Issues for the 112th Congress*, by Gene Falk.

Current Topics

What is TANF’s Current Funding Level?

TANF currently operates under a three-month extension of funding, through December 31, 2011. P.L. 112-35 extended TANF basic block grants (the state family assistance grant), healthy marriage and responsible fatherhood grants, and certain other funds at their FY2011 funding level through the first quarter of FY2012. In addition, legislation enacted in 2010 (P.L. 111-242) provided an FY2012 appropriation of \$612 million for TANF contingency funds. P.L. 112-35 provided no funds for TANF supplemental grants.

Table 1 shows TANF funding for FY2006 through FY2012. The FY2012 figure represents annualized funding for the first three months of FY2012 as provided under P.L. 112-35.

Table 1. TANF Funding: FY2006 through FY2012

(Dollars in millions)

	2006	2007	2008	2009	2010	2011	2012 (first three months under P.L. 112- 35, at the full-year rate)

Source: Congressional Research Service (CRS), based on data from HHS.

a. The FY2012 appropriation for the contingency fund was provided in P.L. 111-242.

In addition to federal TANF funds, states are required in total to contribute, from their own funds, at least \$10.4 billion per year for TANF-related activities for low-income families with children. This level of state funding, known as *maintenance-of-effort* (MOE) funding, was also established in the 1996 welfare law and has not been changed since then.

Has the President Proposed Reauthorization Legislation for TANF?

No. The President’s FY2012 budget proposed funding for TANF in FY2012 at current law levels plus funding for supplemental grants at the historical level (\$319 million per year). While the budget itself did not propose a long-term reauthorization of TANF, it provided some “general principles” for reauthorization. The Department of Health and Human Services’ (HHS) FY2012 *Budget in Brief* says

When TANF reauthorization is considered, the Administration would be interested in exploring with Congress a variety of strategies to strengthen the program’s ability to improve outcomes for families and children, including helping more parents succeed as workers by building on the recent successes with subsidized employment, using performance indicators to drive program improvement; and preparing the program to respond more effectively in the event of a future economic downturn.

Is the Cash Welfare Caseload Rising Because of the Current Recession?

The TANF cash welfare caseload has been increasing since the summer of 2008. The caseload hit its lowest level since 1969 in July 2008, but has increased since then. From July 2008 to December 2010, the TANF cash welfare caseload increased by 16%, adding about 273,000 families to the benefit rolls.

How Can States Pay for Any Caseload Increases Caused by the Recession?

There is no additional, recession-related funding provided in the one-year TANF extension included in P.L. 111-291 for the remainder of FY2011. Absent additional funding, states will have to reallocate funds from other block grant activities to finance any cash welfare caseload increases resulting from the lingering effects of 2007-2009 recession.

Over the period FY2007 to the first quarter of FY2011, states drew \$7.1 billion in combined funds from the TANF regular contingency fund created in the 1996 welfare reform law and the TANF “Emergency Contingency Fund” (ECF) created in the American Recovery and Reinvestment Act of 2009 (P.L. 111-5) to provide extra funding in FY2009 and FY2010. It expired, as originally scheduled, on September 30, 2010.

Not all these contingency funds financed cash welfare caseload increases. Regular contingency funds helped pay for increased costs in the wide range of benefits, services, and activities funded through TANF. The ECF helped pay for increased costs of cash welfare, non-recurrent short-term aid, and subsidized employment.

May States Require Drug Testing of Welfare Recipients?

Yes. The 1996 welfare reform law gave states the *option* of requiring drug tests for welfare recipients and penalizing those who fail such tests. (See Section 902 of P.L. 104-193.)

In addition to this option, the 1996 welfare reform law contained two other provisions related to drug abuse and TANF applicants or recipients. The law established a lifetime ban on eligibility for TANF and food stamps for those convicted of a drug-related felony. However, states may either opt out entirely or modify and limit this lifetime ban. (See Section 115 of P.L. 104-193.)

Further, TANF allows states to establish Individual Responsibility Plans (IRPs) for their TANF families. The IRP may require participation in a substance abuse treatment program. A family may be sanctioned for failure to comply with its IRP.

History

When was the Temporary Assistance for Needy Families (TANF) Block Grant Created?

The TANF block grant was created by the 1996 welfare reform law, the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (P.L. 104-193). TANF replaced the program of Aid to Families with Dependent Children (AFDC), which dated back to the Social Security Act of 1935, and several other related programs.

Has Legislation Modified TANF Since the 1996 Law?

The Balanced Budget Act of 1997 (P.L. 105-33) included provisions establishing “welfare-to-work” grants for FY1998 and FY1999 and made several other policy and technical changes to TANF. No new welfare-to-work grants were made after FY1999.

The original funding authority for TANF ended on September 30, 2002. Over the four-year period from 2002 through 2005, Congress considered, but did not pass, legislation to modify and reauthorize TANF (see CRS Report RL33418, *Welfare Reauthorization in the 109th Congress: An Overview*, by Gene Falk, Melinda Gish, and Carmen Solomon-Fears). Over this four-year period, Congress passed 12 “temporary extensions” of TANF and related programs as stop-gap measures until it could reach agreement on a longer-term reauthorization. (See **Appendix A, Table A-1** for a listing of the temporary extensions.)

The Deficit Reduction Act of 2005 (DRA, P.L. 109-171) includes a long-term extension of funding for TANF through FY2010. It also modified TANF work participation standards; established \$100 million per year in TANF research and technical assistance funds for “healthy marriage promotion” initiatives; and provided \$50 million per year for “responsible fatherhood initiatives.” (For a discussion of TANF provisions in the DRA, see CRS Report RS22369, *TANF, Child Care, Marriage Promotion, and Responsible Fatherhood Provisions in the Deficit Reduction Act of 2005 (P.L. 109-171)*, by Gene Falk.)

Funding and Expenditures

How Much Has the TANF Grant Declined in Value Because of Inflation?

From FY1997 (the first full year of TANF funding) through FY2011 (ended September 30, 2011), the real value of the TANF block grant declined by 28%. **Table 2** shows the impact of inflation on the value of the TANF block grant for each year, FY1997 through FY2011.

Table 2. Basic TANF Block Grant in Constant 1997 Dollars

Fiscal Year	Value of the Block Grant in Billions of FY1997 Dollars	Cumulative Loss of Value in Percent
1997	\$16.5	0
1998	16.2	-2%
1999	15.9	-3%
2000	15.4	-6%
2001	14.9	-9%
2002	14.7	-11%
2003	14.4	-13%
2004	14.1	-15%
2005	13.6	-17%

Fiscal Year	Value of the Block Grant in Billions of FY1997 Dollars	Cumulative Loss of Value in Percent
2006	13.1	-20%
2007	12.8	-22%
2008	12.3	-25%

How Have States Used TANF Funds?

TANF is best known as a funding source of cash welfare benefits for needy families with children. However, states have considerable discretion in using TANF funds, and have used them for a wide range of benefits and services.

Figure 1 shows the uses of federal TANF grants to states and state MOE funds in FY2009. In FY2009, a total of \$33.5 billion of both federal TANF and state MOE expenditures were either expended or transferred to other block grant programs. Basic assistance, the category that most closely reflects cash welfare, had expenditures of \$9.3 billion in FY2009—28% of total TANF and MOE dollars. All three expenditure categories commonly associated with “welfare” for needy families with children—basic assistance, administrative costs, and work activities—accounted for less than half (\$14.2 billion or 42%) of all funds.

TANF is a major contributor of child care funding. In FY2009, 18% of all TANF funds used were either expended on child care or transferred to the child care block grant (the Child Care and Development Fund, or CCDF). TANF is also a major contributor to the child welfare system, which provides foster care, adoption assistance, and services to families with children who either have experienced or are at risk of experiencing child abuse or neglect. However, TANF’s accounting system does a poor job of capturing expenditures associated with spending on the child welfare system.¹ Most TANF funding for these programs is subsumed in the catch-all “other” expenditure category.

¹ For a discussion of the shortcomings of TANF financial data reporting, see the U.S. Government Accountability Office, *Better Information Needed to Understand Trends in States’ Uses of the TANF Block Grant*, GAO-06-414, March 2006. For an estimate of TANF’s contribution to child welfare agencies’ funding, see Scarcella et al, *The Cost of Protecting Vulnerable Children V*, Urban Institute, May 2006.

Figure 1. Federal TANF and State MOE Funds Used in FY2009, by Major Benefit and Service Category

(Dollars in billions; total federal and state MOE funds used—\$33.5 billion)

Source: Congressional Research Service (CRS), based on data from the U.S. Department of Health and Human Services (HHS).

See **Appendix A, Table A-3** for percentages of total federal TANF and state MOE funds associated with each of these categories. For state-specific information on the use of TANF funds, see **Appendix B, Table B-1**, and **Table B-2**.

How Much of the TANF Grant Has Gone Unspent?

TANF law permits states to “reserve” unused funds without time limit. This permits flexibility in timing of the use of TANF funds, including the ability to “save” funds for unexpected occurrences that might increase costs (such as recessions or natural disasters).

At the end of FY2009 (the most recent data available), a total of \$3.7 billion of federal TANF funding had neither been transferred nor spent. However, some of that \$3.7 billion represented funds that states had already committed to spend later. At the end of FY2009, states had made such commitments to spend—that is, had obligated—a total of \$1.6 billion. Generally, obligations are binding commitments to spend, and they come in the form of contracts and grants to provide benefits and services. However, the definition of “obligation” varies from program to program, and because TANF essentially consists of 54 different programs (one for each state, the District of Columbia, and the territories), what constitutes an obligation may vary.

The remaining \$2.1 billion in unspent funds is called the “unobligated balance.” These funds are available to states to make *new* spending commitments. **Table B-3** in **Appendix B** shows unspent TANF funds by state.

The Caseload

How Many Families Receive TANF- or MOE-Funded Benefits and Services?

This number is not known. Federal TANF reporting requirements focus on families receiving only ongoing *assistance* (generally cash welfare), with no complete reporting on families receiving other TANF benefits and services. As discussed in a previous section of this report, a little less than half of all TANF funds are used on activities not considered part of a traditional “welfare” program. Therefore, the federal reporting requirements that pertain to families receiving “assistance” are very likely to undercount the number of families receiving any TANF-funded benefit or service.

How Many Families and People Currently Receive TANF- or MOE-Funded Cash Welfare?

Table 3 provides cash welfare caseload information. A total of 1.9 million families, composed of 4.6 million recipients, received TANF- or MOE-funded cash in June 2011. The bulk of the “recipients” were children—3.4 million in that month. For state-by-state cash assistance caseloads, see **Table B-4** in **Appendix B**.

Table 3. TANF and MOE-Funded Cash Welfare Rolls, June 2011

Families	1,924,449
Recipients	4,606,278
Children	3,437,062
Adults	1,169,216

Source: Congressional Research Service on the basis of data from the U.S. Department of Health and Human Services (HHS).

How Does the Current Cash Welfare Caseload Level Compare With Historical Levels?

The number of families receiving cash welfare peaked in March 1994 at 5.1 million families. The cash welfare caseload fell rapidly in the late 1990s (after the 1996 welfare reform law) before leveling off in 2001. In 2004, the caseload began another decline, albeit at a slower pace than in the late 1990s. Nationally, the caseload began to rise beginning in August 2008.

Figure 2 provides a long-term historical perspective on the number of families receiving cash welfare, from July 1959 to June 2011.

Table B-5 shows recent trends in the number of cash welfare families by state.

Figure 2. Number of Families Receiving Cash Welfare
(Millions of families, July 1959 to June 2011)

Source: Congressional Research Service (CRS), based on data from the U.S. Department of Health and Human Services (HHS).

What Are the Characteristics of Cash Welfare Families?

Historically, the “typical” cash welfare family has been headed by a single parent (usually the mother) with one or two children. The single parent has also typically been unemployed.

However, the cash welfare caseload decline has occurred together with a major shift in the composition of the rolls. Today, less than half of all cash welfare families are headed by an unemployed adult recipient. Almost half of all cash welfare families had no adult recipient at all, with the adults in the family ineligible for aid and the benefits paid only on behalf of the child (these are known as “child-only” families). This shift occurred because the caseload decline was concentrated among the families thought of as the “typical” cash welfare families, and welfare-to-work efforts have been concentrated on this population.

Figure 3 shows the composition of the cash welfare caseload in FY2008. Families with an unemployed adult recipient represent 36% of all cash welfare families. Families with an

employed (in a regular job) adult recipient, who receive cash welfare as an earnings supplement, comprise an additional 15% of the cash welfare rolls. Within the “child-only” portion of the caseload, families with a parent (usually a disabled parent) receiving SSI and the children receiving TANF as a supplement to that benefit represent 11% of the cash welfare caseload. Families that are made up of children living with a non-parent relative (grandparents, aunts, uncles, etc.) represent 16% of the cash welfare caseload. Families with adults who were either sanctioned or time-limited off the rolls (and thus had their family’s benefit reduced) represented about 6% of all cash assistance families. Families of child citizens living with ineligible parents who are noncitizens or who have not reported their citizenship status make up 9% of the total cash welfare caseload. The remainder of the cash welfare caseload represents child recipients for whom data on the adults they live with are not available.

Figure 3. Composition of the Cash Welfare Caseload: FY2008

Source: Congressional Research Service (CRS) analysis of the FY2008 TANF National Data Files.

As previously discussed, the composition of the caseload has changed considerably over time. **Table A-4** shows the change in this categorization of families over time.

TANF Cash Benefits: How Much Does a Family Receive in TANF Cash Per Month?

There are *no* federal rules that help determine the amount of TANF cash benefits paid to a family. (There are also no federal rules that require states to use TANF to pay cash benefits, though all states do so.) Benefit amounts are determined solely by the states.

Table 4 shows the maximum monthly TANF cash benefit by state for a family of two and a family of three in July 2009.² The benefit amounts shown are those for a single-parent family with children. Some states vary their benefit amounts for other family types such as two-parent families or “child-only” cases. States also vary their benefits by other factors such as housing costs and sub-state geography.

Most states base TANF cash benefit amounts on family size, paying larger cash benefits to larger families on the presumption that they have greater financial needs. The maximum monthly cash benefit is usually paid to a family that receives no other income (e.g., no earned or unearned income) and complies with program rules. Families with income other than TANF often are paid a reduced benefit. Moreover, some families are financially sanctioned for failure to meet a program requirement (e.g., a work requirement), and are also paid a lower benefit.

The table also shows the benefit amounts relative to poverty-level income. TANF pays a family in cash only a fraction of poverty level income (as officially determined and published by the Department of Health and Human Services). For a family of two, the maximum TANF benefit paid in July 2009 varied from \$142 per month in Tennessee (12% of poverty-level income) to \$821 per month in Alaska (54% of poverty-level income). For a family of three, the maximum TANF benefit paid in July 2009 varied from \$170 per month in Mississippi (11% of poverty-level income) to \$923 per month in Alaska (48% of poverty-level income).

Table 4. Monthly TANF Cash Welfare Maximum Benefit Amount for a Family Sizes of Two and Three, July 2009

State	Family Size of Two		Family Size of Three	
	Dollars	Percent of Poverty Threshold	Dollars	Percent of Poverty Threshold
Alabama	\$190	15.6%	\$215	14.1%
Alaska	821	54.1	923	48.4
Arizona	220	18.1	278	18.2
Arkansas	162	13.3	204	13.4
California	561	46.2	694	45.5
Colorado	364	30.0	462	30.3

² States are not required to report to the federal government their cash welfare benefit amounts in either the TANF state plan (under section 402 of the Social Security Act) or in annual program reports (under section 407 of the Social Security Act). The benefit amounts shown are from the “Welfare Rules Database,” maintained by the Urban Institute and funded by the Department of Health and Human Services (HHS).

TANF Work Participation Standards

What Is the TANF Work Participation Standard States Must Meet?

The TANF statute requires states to have 50% of their caseload meet standards of participation in work or activities—that is, a family member must be in specified activities for a minimum number of hours.³ There is a separate participation standard that applies to the two-parent portion of a state’s caseload, requiring 90% of the state’s two-parent caseload to meet participation standards. States that fail the TANF work participation standards are at risk of being penalized by a reduction in their block grant amounts.

However, the statutory work participation standards are reduced by a “caseload reduction credit.” The caseload reduction credit reduces the participation standard one percentage point for each percentage point decline in the caseload. Through FY2006, states were given credit for caseload declines that occurred since FY1995.

Beginning in FY2007, states were only credited with caseload declines that have occurred since FY2005. The FY2007 effective (after-credit) standard is based on caseload declines from FY2005

³ Some families are excluded from the participation rate calculation.

to FY2006. However, under a regulatory provision, states may get “extra” credit for caseload reduction if they spend more than required under the TANF MOE. States can exclude those families funded by state funds in excess of required state spending.

The ARRA temporarily modifies the caseload reduction credit states receive toward their TANF work participation. The modification is effective for the FY2009 through FY2010 standards. The ARRA provides that a state’s credit would not be reduced for any caseload increases that occurred in FY2008 through FY2010.

What Actual Work Participation Rates Have the States Achieved?

In FY2009, the national average work participation rate achieved by states for all families was 29.4%. The participation rate within TANF achieved nationwide for the two-parent portion of the caseload was 28.3%. These rates are well below the statutory target of 50% for all families and 90% for two-parent families. They are also well below the targets even when adjusting for actual caseload reduction between FY2005 and FY2008. However, only eight jurisdictions failed the all-family standard, and seven jurisdictions failed the two-parent standard. This is because (1) many states obtained fairly large “extra” credits for spending above the required MOE level; (2) states were “held harmless” for any caseload increases between FY2007 and FY2008 (based on the temporary ARRA modification to the caseload reduction credit, noted above); and (3) many states eliminated two-parent families from their TANF and MOE caseloads. Presumably, many states aided two-parent families with their own funds.

The jurisdictions that failed to meet the all-family standard were California, the District of Columbia, Guam, Maine, Missouri, Ohio, Oregon, and Puerto Rico. The jurisdictions that failed to meet the two-parent standard were Alaska, Guam, Kentucky, Maine, Nevada, Oregon, and Rhode Island. States that fail to meet work standards are *at risk* of being penalized by a reduction in their block grant. States can avoid the penalty by entering into a corrective compliance plan with the Department of Health and Human Services (HHS). They can also claim reasonable cause for failing to meet the penalty. Further, penalties are reduced based on the degree of noncompliance, and may be reduced by the Secretary of HHS for those states that were economically needy during FY2009.

See **Table B-7** for state-by-state FY2009 work participation rates.

Appendix A. Supplementary Tables

**Table A-1. Temporary Extensions of TANF,
FY2003-FY2006**

Public Law	Time Period	Notes
P.L. 107-229	Oct. 1, 2002-Dec. 31, 2002	Extension as part of a continuing resolution.
P.L. 107-294	Jan. 1, 2003-Mar. 31, 2003	Extension as part of a continuing resolution.
P.L. 108-7	Apr. 1, 2003-June 30, 2003	Extension as part of the Consolidated Appropriations Act.
P.L. 108-40	July 1, 2003-Sept. 30, 2003	Free-standing bill that amended the Social Security Act to extend TANF and related programs.
P.L. 108-89	Oct. 1, 2003-Mar. 31, 2004	Multipurpose bill that extended programs through the first half of FY2004.
P.L. 108-210	Apr. 1, 2004-June 30, 2004	Freestanding bill that extended funding authority for the program through June 30, 2004.
P.L. 108-262	July 1, 2004-Sept. 30, 2004	Freestanding bill that extended funding authority for the program through Sept. 30, 2004.
P.L. 108-308	Oct. 1, 2004- Mar. 31, 2005	Freestanding bill that extended funding authority for the programs through Mar. 31, 2005.
P.L. 109-4	Apr. 1, 2005-June 30, 2005	Freestanding bill that extended funding authority for the programs through June 30, 2005.
P.L. 109-19	July 1, 2005-Sept. 30, 2005	Freestanding bill that extended funding authority for the programs through Sept. 30, 2005.
P.L. 109-68	Oct. 1, 2005-Dec. 31, 2005	Bill to provide extra funding to help states provide benefits to families affected by Hurricane Katrina, suspend certain requirements in states affected by the hurricane, and extend the funding authority for the programs through December 31, 2005.
P.L. 109-161	Jan. 1, 2006-Mar. 31, 2006	Freestanding bill that extended funding authority for the programs through March 31, 2006. It reduced the bonus for reducing out-of-wedlock births for FY2006-FY2010 to offset the costs of the temporary extension.
