## Introduction

The federal government offers many opportunities for internships, fellowships, and work experiences. However, there is no single centralized source for finding information on every opportunity. This report describes the major and most popular Internet resources for such opportunities and gives applicants a place to begin their search. The Internet resources provided are not exhaustive. Telephone numbers for programs are provided if available.

Applying for an internship or fellowship is similar to applying for admission to a college or university. The application process takes time and effort, often requiring essays and interviews. Applicants should begin their search early and explore what best suits their interests and career goals. Application deadlines and program durations vary from agency to agency. Applicants should apply to more than one program because competition is stiff, with applicants often far exceeding the number of positions available. Opportunities are generally available in the spring, summer, and fall, with summer positions being the most popular and the most competitive.

The terms *fellowship* and *internship* are sometimes used interchangeably in the names of specific programs. Fellowships are generally intended for persons with advanced degrees or substantial professional experience and are usually salaried positions lasting nine months to a year or more. Internships, which are either salaried or volunteer short-term arrangements, usually require relatively little experience and are often filled by students.

Although they are sometimes confused with interns, congressional pages are high school students who serve Congress as messengers. The House page program ceased operations in August 2011, but the Senate still employs pages. For more information on the Senate page program, see its website at [http://www.senate.gov/reference/reference\\_index\\_subjects/Pages\\_vrd.htm](http://www.senate.gov/reference/reference_index_subjects/Pages_vrd.htm).

The duties, responsibilities, and salaries (if any) of interns and fellows vary from program to program. Most program responsibilities are substantive in nature and often involve challenging projects. They may range from conducting legislative research for a congressional office to biomedical research at the National Institutes of Health. Some programs or universities that offer academic credit may require the intern/fellow to produce a report on the work experience and obtain evaluations from program supervisors. In addition, some programs lead to federal job placement. Recruitment programs like Presidential Management Fellows and the Congressional Research Service Graduate Recruit Program may offer permanent employment after the successful completion of program requirements. Because program details vary from agency to agency, it is best to consult the appropriate website or to contact the program office directly.

## **Office of Personnel Management Programs**

Executive Order 13562 of December 27, 2010, <http://edocket.access.gpo.gov/2010/pdf/2010-33169.pdf>, created the Pathways Programs. The Pathways Programs are composed of two new programs—the Internship Program and the Recent Graduates Program—and the already existing Presidential Management Fellows Program. The executive order also directed the phasing out of two programs—the Student Career Experience Program and the Federal Career Intern Program.

The Final Rule implementing the Pathways Programs has been published and is effective as of July 10, 2012. The final rule aims to improve recruiting efforts and offer clear paths to federal internships and careers. The purpose of the final rule is to provide training and career development opportunities for individuals starting on the career path to federal service. For more information on the Final Rule, see <http://www.gpo.gov/fdsys/pkg/FR-2012-05-11/pdf/2012-11068.pdf>.

Some of the federal agencies that participate in the Pathways Programs include the U.S. Department of Housing and Urban Development, U.S. General Service Administration, and the Department of Health and Human Services.

## **Internship Program**

Created by Executive Order 13562 of December 2010, the Internship Program is for students attending high schools, community colleges, four-year universities, trade schools, career and technical education programs, and other qualifying educational institutions and programs with paid opportunities to explore federal careers while still in school. Participants must be enrolled or accepted for enrollment in a qualifying educational program. The Internship Program replaces the Student Career Experience Program and the Student Temporary Employment Program. More information is available at <http://www.opm.gov/policy-data-oversight/hiring-authorities/students-recent-graduates/#intern>.

## **Recent Graduates Program**

Created by Executive Order 13562 of December 2010, the Recent Graduates Program is for individuals who have recently graduated from qualifying educational institutions or programs with developmental experiences in the federal government. Participants must have obtained a qualifying degree or completed a qualifying career or technical education program within the preceding two years. Veterans applying to the program who are unable to qualify within the two-year period due to military service may apply within six years of obtaining a qualifying degree or completing a qualifying program. More information is available at <http://www.opm.gov/policy-data-oversight/hiring-authorities/students-recent-graduates/#graduates>.

## **Presidential Management Fellows Program**

The Presidential Management Fellows (PMF) Program was created to attract outstanding persons from many academic disciplines to the federal government who are interested in, and committed to careers in, the analysis and management of public policies and programs. Applicants must have received, within the preceding two years, a qualifying advanced degree as determined by OPM. Technology Fellows serve a two-year appointment. As per Executive Order 13562 of December 2010, participants no longer need to be nominated by their educational institution but may apply independently. This program includes a special track, Technology Fellows, for technology and computer science professionals. Information about this track is available at <https://cio.gov/technology-fellows-program/>.

## **Bibliography**

This selective bibliography lists more sources of information on internships, fellowships, and summer job opportunities. The publications can be used to find additional work experience opportunities, both inside and outside the federal government. These works may be available in local libraries or school or college guidance offices. Annotations identify publications that are issued annually. Other publications are updated irregularly; check with publishers for information on the latest editions.

*Congressional Intern Handbook: a Guide for Interns and Newcomers to Capitol Hill.* Washington, D.C.: Congressional Management Foundation, 2006.

This work can be found in many libraries in print or in electronic form, as the *Associations Unlimited* subscription database.

*Insider's Guide to Political Internships: What to Do Once You're In the Door.* Boulder, CO: Westview Press, 2002.

This publication provides advice on “surviving and thriving” in political internships, including on Capitol Hill and in congressional district offices.
