Following are selected highlights of H.R. 83, Division C, the version of the DOD Appropriations Act for FY2015 agreed to on December 9, 2015 by negotiators for the House and Senate. On June 20, 2014, by a vote of 340-73, the House passed H.R. 4870, the FY2015 DOD Appropriations bill that had been reported by the House Appropriations Committee on June 10. On July 17, 2014, the Senate Appropriations Committee approved an amended version of the same bill.

To expedite final action on the bill (which the Senate did not take up), negotiators from the House and Senate drafted a compromise version of the defense bill as part of an omnibus funding measure for the balance of FY2015. For procedural reasons, this “Consolidated and Further Continuing Appropriations Act for FY2015” has been packaged as a House amendment to a Senate amendment to H.R. 83, an unrelated bill. The DOD part of the omnibus is Division C of the proposed funding bill.

This CRS Fact Sheet, based on the joint explanatory statement of House and Senate negotiators, is intended as a time-urgent expedient to offer Members the best available information about the bill pending update of CRS Report R43788, *Defense: FY2015 Authorization and Appropriations*, by (name redacted).

Note: The House-passed version of H.R. 4870 appropriated for OCO \$79.45 billion, the placeholder amount that had been included in the Administration’s initial FY2015 budget request. The Senate committee version of the bill, approved with minor reductions the Administration’s revised OCO request of \$58.47 billion to cover war costs associated with Afghanistan, and efforts to reassure European allies in the wake of Russia’s occupation of Ukrainian territory. The Senate committee version of the bill also included funds for non-DOD OCO activities and for some military construction projects, which are outside the scope of the defense appropriations bill. By the time House and Senate negotiators drafted the final bill, the Administration had requested additional OCO funds to cover operations against the Islamic State and DOD activities to combat the Ebola virus. The final bill would shift from the base budget to OCO (which is not subject to the mandatory spending caps currently in force) \$2.9 billion worth of Operation and Maintenance funding.
