FEMA DRF Major Disaster Assistance: Alaska

Overview

The Disaster Relief Fund (DRF) is managed by the Federal Emergency Management Agency (FEMA) and is the primary source of funding used to provide assistance following a major disaster declaration. The authority to declare a major disaster is provided to the President under the Robert T. Stafford Emergency Relief and Disaster Assistance Act (P.L. 93-288).

The information below includes only the funding provided as a result of a major disaster declaration, not other assistance funded through the DRF. Additionally, this information does not include other federal sources of disaster assistance, such as Small Business Administration disaster loans.

FEMA administers disaster relief through regional offices around the country. Alaska is part of Region X, headquartered in Seattle, WA.

Major Disaster Declarations: FY2000-FY2013

A total of 20 major disaster declarations were made in the state of Alaska between FY2000 and FY2013. During that time, there was one request for a major disaster declaration that was denied. The approved declarations led to \$275 million in federal obligations from the Disaster Relief Fund. This funding does not include the assistance that was provided directly by the state, either as a cost-share for federal assistance, or through the state's own authorities and programs. There was a high level of variation in the amount of funding obligated each year, with nearly \$80 million obligated in FY2013 alone. **Figure 1** displays the total funding obligated to Alaska each year. The highest number of declarations in a single fiscal year was three, which occurred in both FY2003 and FY2007.

Significant Incidents

Alaska received more than \$60 million in federal assistance from the DRF following a flooding incident in FY2013, which resulted in one of the two declarations during that fiscal year. The state also received more than \$45 million in FY2009 as a result of flooding and ice jams and more than \$23 million in FY2003 following an earthquake.

Figure 1. DRF Obligations for Declared Major Disasters in Alaska, by Fiscal Year

Figures are in millions of dollars. The number of declarations per year is in parentheses.

Notes: Figures above reflect both actual obligations and projected obligations. Only obligations from the FEMA Disaster Relief Fund are included. Please consult the "Additional Resources" section for information on other federal assistance programs.

Types of Assistance Provided for Major Disasters

A major disaster declaration can include funding for different purposes, depending on the needs of the state. These purposes include:

- Public Assistance (PA) that is used to conduct debris removal operations, repair or replace damaged public infrastructure, and other assistance;
- Individual Assistance (IA) that provides direct aid to impacted households, and other assistance;
- Hazard Mitigation (HM) that funds resilience projects and programs, typically across the whole state; and
- FEMA administrative costs associated with each disaster declaration.

The decision to provide certain types of assistance is made at the time of the major disaster declaration. For many major disasters, all of the assistance types outlined above will be authorized. For others, some assistance types will not be included. **Figure 2** compares the amounts expended for different types of assistance that were provided to Alaska from FY2000 to FY2013.

County Impact

Since 2000, 33 different boroughs, statistical areas, or other regions in Alaska have received aid under a major disaster declaration. The Lower Yukon Education Attendance Area has received more declarations than any other, with seven.

Other Assistance Funded Through the DRF

In addition to the major disasters listed above, there are also other forms of assistance that are funded through the Disaster Relief Fund. These include both Emergency Declarations and Fire Management Assistance Grants. The assistance provided for these declarations typically involves lower obligation levels than major disaster declarations, although there is significant variation across incidents.

Emergency Declarations are often made at the time a threat is recognized and are issued to assist state, local, and tribal efforts prior to the incident.

Fire Management Assistance Grants (FMAGs) provide aid for the control, management, and mitigation of fires.

Additional Resources

There are many existing CRS products that address issues related to the Disaster Relief Fund, the disaster declaration process, and federal emergency management policy. Below is a list of several of these resources:

- CRS Report R41981, *Congressional Primer on Responding to Major Disasters and Emergencies*
- CRS Report R43519, *Natural Disasters and Hazards: CRS Experts*
- CRS Report RL34146, *FEMA's Disaster Declaration Process: A Primer*
- CRS Report R42845, *Federal Emergency Management: A Brief Introduction*
- CRS Report R43537, *FEMA's Disaster Relief Fund: Overview and Selected Issues*
- CRS Report RL33053, *Federal Stafford Act Disaster Assistance: Presidential Declarations, Eligible Activities, and Funding*

FEMA is also responsible for administering the National Flood Insurance Program (NFIP). More information on whether your community participates in this program can be found in the NFIP Community Status Book at fema.gov.
