----------------------------------	---

In late 2015, health officials in Brazil saw a spike in the number of infants born with microcephaly, a birth defect that may be associated with significant, permanent brain damage. The increase in microcephaly was later linked to prenatal infection with the Zika virus (ZIKV), which appears to have emerged in Brazil early in 2015. ZIKV has spread from South America into Central America and the Caribbean. Puerto Rico has been hard hit, with more than 6,500 locally transmitted (i.e., mosquito-borne) infections reported to date. In late July 2016, local transmission of ZIKV was reported for the first time on the U.S. mainland, in Miami, FL, and case counts surged in Puerto Rico. On August 12, 2016, the Secretary of Health and Human Services (HHS) declared the situation in Puerto Rico to be a public health emergency, allowing more flexibility to hire workers for education, outreach, and mosquito control.

Zika virus is transmitted through the bite of an infected mosquito, through sexual transmission, from mother to fetus, or through blood transfusion from an infected person. No vaccine or specific treatment is available. Most Zika infections are mild. However, rare but serious neurologic disorders may occur in anyone who is infected. Due to the substantial risk of birth defects, protecting pregnant women from ZIKV infection is a public health priority.

CRS has several products that address issues associated with the ZIKV outbreak, as well as prevention and control efforts. Please contact the authors of the individual reports listed below for additional information on these issues.

Experts List

CRS Report R44385, *Zika Virus: CRS Experts*, by (name redacted)

Budget and Appropriations

CRS Report R44460, *Zika Response Funding: Request and Congressional Action*, coordinated by (name redacted) .

CRS Recorded Event WRE00136, *FY2017 International Affairs Budget: Issues for Congress*, by (name redacted), (name redacted), and (name redacted) .

CRS In Focus IF10131, *U.S. Global Health Assistance: FY2014-FY2017 Request*, by (name redacted) .

Mosquito Control

CRS In Focus IF10439, *Mosquito Control in the United States*, by (name redacted) and Grant D. Clinkingbeard.

CRS In Focus IF10401, *Genetically Engineered Mosquitoes: A Vector Control Technology for Reducing Zika Virus Transmission*, by (name redacted).

CRS In Focus IF10353, *Mosquitoes, Zika Virus, and Transmission Ecology*, by (name redacted), (name redacted), and (name redacted) .

CRS Report RL32884, *Pesticide Use and Water Quality: Are the Laws Complementary or in Conflict?*, by (name redacted) .

Country Reports

CRS Report R44545, *Zika Virus in Latin America and the Caribbean: U.S. Policy Considerations*, coordinated by (name redacted) .

CRS Report R44575, *The 2016 Olympic Games: Health, Security, Environmental, and Doping Issues*, coordinated by (name redacted) and (name redacted).

CRS Insight IN10471, *Brazil in Crisis*, by (name redacted)

CRS Report RL33456, *Brazil: Background and U.S. Relations*, by (name redacted)

CRS In Focus IF10430, *Panama: Political and Economic Situation and U.S. Relations*, by (name redacted) .

CRS In Focus IF10407, *Dominican Republic*, by (name redacted) .

Additional Topics

CRS Insight IN10544, *Zika Poses New Challenges for Blood Centers*, by (name redacted) and (name redacted)

CRS Insight IN10551, *Stafford Act Assistance for Public Health Incidents*, by (name redacted) and (name redacted) .

CRS Insight IN10555, *The Zika Outbreak Is Declared a Public Health Emergency in Puerto Rico*, by (name redacted)

EveryCRSReport.com

The Congressional Research Service (CRS) is a federal legislative branch agency, housed inside the Library of Congress, charged with providing the United States Congress non-partisan advice on issues that may come before Congress.

EveryCRSReport.com republishes CRS reports that are available to all Congressional staff. The reports are not classified, and Members of Congress routinely make individual reports available to the public.

Prior to our republication, we redacted names, phone numbers and email addresses of analysts who produced the reports. We also added this page to the report. We have not intentionally made any other changes to any report published on EveryCRSReport.com.

CRS reports, as a work of the United States government, are not subject to copyright protection in the United States. Any CRS report may be reproduced and distributed in its entirety without permission from CRS. However, as a CRS report may include copyrighted images or material from a third party, you may need to obtain permission of the copyright holder if you wish to copy or otherwise use copyrighted material.

Information in a CRS report should not be relied upon for purposes other than public understanding of information that has been provided by CRS to members of Congress in connection with CRS' institutional role.

EveryCRSReport.com is not a government website and is not affiliated with CRS. We do not claim copyright on any CRS report we have republished.
