R42695

Summary

Several federal agencies, including the Small Business Administration (SBA), provide training and other assistance to veterans seeking civilian employment. For example, the Department of Defense, in cooperation with the SBA, Department of Labor, Department of Veterans Affairs, and several other federal agencies, operates the Transition Goals Plans Success program (Transition GPS), which provides employment information and entrepreneurship training to exiting military servicemembers to assist them in transitioning from the military to the civilian labor force.

In recent years, the SBA has focused increased attention on meeting the needs of veteran small business owners and veterans interested in starting a business. In FY2015, the SBA provided management and technical assistance services to more than 100,000 veterans through its various management and technical assistance training partners (e.g., Small Business Development Centers, Women's Business Centers [WBCs], Service Corps of Retired Executives [SCORE], and Veterans Business Outreach Centers [VBOCs]). The SBA's Office of Veterans Business Development (OVBD) also administers several programs to assist veterans.

Congressional interest in the SBA's veteran assistance programs has increased in recent years primarily due to reports by veteran organizations that veterans were experiencing difficulty accessing the SBA's programs. Congress also has a continuing interest in assisting veterans, especially those returning from overseas in recent years, in their transition from military into civilian life. The unemployment rate (as of July 2016) among veterans (4.7%) was lower than for nonveterans 18 years and older (4.9%). The unemployment rate of veterans who have left the military since September 2001 was 5.9%.

The expansion of federal employment training programs targeted at specific populations, such as women and veterans, has also led some Members and organizations to ask if these programs should be consolidated. In their view, eliminating program duplication among federal business assistance programs across federal agencies, and within the SBA, would result in lower costs and improved services. Others argue that keeping these business assistance programs separate enables them to offer services that match the unique needs of various underserved populations, such as veterans. In their view, instead of considering program consolidation as a policy option, the focus should be on improving communication and cooperation among the federal agencies providing assistance to entrepreneurs.

This report opens with an examination of the economic circumstances of veteran-owned businesses drawn from the Bureau of the Census's 2012 Survey of Business Owners (SBO). It then provides a brief overview of veterans' employment experiences, comparing unemployment and labor force participation rates for veterans, veterans who have left the military since September 2001, and nonveterans. The report also describes the employment assistance programs offered by several federal agencies to assist veterans in their transition from the military to the civilian labor force and examines, in greater detail, the SBA's veteran business development programs, the SBA's efforts to assist veterans' access to capital, and the SBA's veteran contracting programs. It also discusses the SBA's Military Reservist Economic Injury Disaster Loan program and P.L. 114-38, the Veterans Entrepreneurship Act of 2015, which authorized and made permanent the SBA's current practice of waiving the SBAExpress loan program's one time, up-front loan guarantee fee for veterans (and their spouse).

SBA Assistance for Veterans

The Small Business Administration (SBA) administers several programs to support small business owners and prospective entrepreneurs. For example, it provides access to entrepreneurial education programs to assist with business formation and expansion; loan guaranty programs to enhance small business owners' access to capital; and programs to increase small business opportunities in federal contracting, including oversight of the service-disabled veteran-owned small business federal procurement goaling program.¹ The SBA also provides direct loans for owners of businesses of all sizes, homeowners, and renters to assist their recovery from natural disasters.

One of the SBA's disaster loan programs, the Military Reservist Economic Injury Disaster Loan (MREIDL) program, is of particular interest to veterans. The MREIDL program provides disaster assistance in the form of direct loans of up to \$2 million to help small business owners who are not able to obtain credit elsewhere meet ordinary and necessary operating expenses that they could have met but are not able to because an essential employee has been called up to active duty in his or her role as a military reservist or member of the National Guard due to a period of military conflict.²

In FY2015, the SBA provided management and technical assistance services to more than 100,000 veterans through its various management and technical assistance training partners (e.g., Small Business Development Centers, Women's Business Centers, Service Corps of Retired Executives [SCORE], and Veterans Business Outreach Centers [VBOCs]). In addition, the SBA's Office of Veterans Business Development (OVBD) administers several programs to assist veteran-owned small businesses.³

In recent years, the SBA has focused increased attention on meeting the needs of veteran small business owners and veterans interested in starting a business, especially veterans who are transitioning from military to civilian life. For example, in FY2012, the SBA's OVBD launched the Operation Boots to Business: From Service to Startup initiative, "a comprehensive veteran entrepreneurship initiative for transitioning servicemembers."⁴

⁴ SBA, "FY2013 Congressional Budget Justification and FY2011 Annual Performance Report," p. 62, at [https://www.sba.gov/sites/default/files/files/1-508%20Compliant%20FY%202013%20CBJ%20FY%202011%20APR\(1\).pdf](https://www.sba.gov/sites/default/files/files/1-508%20Compliant%20FY%202013%20CBJ%20FY%202011%20APR(1).pdf); and SBA, "Operation Boots to Business: From Service to Startup," at <http://www.sba.gov/bootstobusiness>.

The Obama Administration requested, and Congress approved, \$7 million in appropriations to expand the Boots to Business program in FY2014.⁵ The SBA indicated that the additional funds would enable the program to be expanded “nationwide to the 250,000 yearly transitioning servicemembers in all branches of the military.”⁶ The SBA also announced that the program “will become a standard portion of the curricula offered at the revised Transition Assistance Program (TAP) to servicemembers,” which is administered by the Department of Defense (DOD) in cooperation with the Department of Labor (DOL), Department of Veterans Affairs (VA), Department of Education (DOE), Department of Homeland Security (DHS), Office of Personnel Management (OPM), and the SBA.⁷ Congress subsequently approved additional appropriations to continue the program in FY2015 and FY2016. Also, legislation has been introduced and reported favorably by the Senate Committee on Small Business and Entrepreneurship to provide the program statutory authorization (S. 1866, the Veterans Small Business Ownership Improvements Act of 2015).⁸ To date, more than 25,000 servicemembers have participated in the Boots to Business program.⁹

Congressional interest in the SBA’s veteran assistance programs has increased in recent years primarily due to reports by veteran organizations that veterans were experiencing difficulty accessing the SBA’s programs. Congress also has a continuing interest in assisting veterans, especially those returning from overseas in recent years, transition from military to civilian life. The unemployment rate (as of July 2016) among veterans (4.7%) was lower than for nonveterans 18 years and older (4.9%). The unemployment rate of veterans who have left the military since September 2001 was 5.9%.¹⁰

⁷ The Department of Defense introduced a redesigned curriculum for the TAP program, called the Transition Goals Plans Success pilot program (Transition GPS), at seven military bases in the summer of 2012. Transition GPS is now offered nationwide. It includes a five-day core program intended to ensure that servicemembers are “career ready” when they leave military service. The core curriculum includes the following modules: pre-separation counseling (4 hours), Department of Veterans Affairs benefits (6 hours), employment workshop (24 hours), financial planning (4 hours), resilient transition (1 hour), and a crosswalk between military and civilian skills that includes a “skills gap” analysis (2 hours). Transition GPS is mandatory for nearly all exiting servicemembers. See U.S. Department of Defense, “Turbo Tap,” at <http://www.turbotap.org/register.tpp>; and CRS Report R42790, *Employment for Veterans: Trends and Programs*, coordinated by (name redacted) .

⁸ Congress recommended \$7.5 million for the Boots to Business initiative in FY2015. Congress did not specify an appropriations amount for the Boots to Business initiative in FY2016, opting instead to include it as an eligible expense within the appropriations amount recommended for SBA Veterans Outreach (\$12.3 million). See Rep. Harold Rogers, “Explanatory Statement Submitted by Mr. Rogers of Kentucky, Chairman of the House Committee on Appropriations Regarding the House Amendment to the Senate Amendment on H.R. 83,” *Congressional Record*, vol. 160, part 151 (December 11, 2014), p. H9740; and Rep. The expansion of federal employment training programs targeted at specific populations, such as women and veterans, has also led some Members and organizations to ask if these programs should be consolidated. In their view, eliminating program duplication among federal business assistance programs across federal agencies, and within the SBA, would result in lower costs and improved services. Others argue that keeping these business assistance programs separate enables them to offer services that match the unique needs of various underserved populations, such as veterans. In their view, instead of considering program consolidation as a policy option, the focus should be on improving communication and cooperation among the federal agencies providing assistance to entrepreneurs.

This report examines the economic circumstances of veteran-owned businesses drawn from the Bureau of the Census's 2012 Survey of Business Owners (SBO). It also provides a brief overview of veterans' employment experiences, comparing unemployment and labor force participation rates for veterans, veterans who have left the military since September 2001, and nonveterans. The report also describes the employment assistance programs offered by several federal agencies to assist veterans transitioning from the military to the civilian labor force and examines, in greater detail, the SBA's veteran business development programs, the SBA's efforts to enhance veterans' access to capital, and the SBA's veteran contracting programs.

It also discusses the SBA's Military Reservist Economic Injury Disaster Loan program and P.L. 114-38, the Veterans Entrepreneurship Act of 2015, which authorized and made permanent the SBA's current practice of waiving the SBAExpress loan program's one time, up-front loan guarantee fee for veterans (and their spouse).

An Economic Profile of Veteran-Owned Businesses

Every five years since 1972, for years ending in "2" and "7," the U.S. Bureau of the Census has sent a questionnaire to a stratified random sample of nonfarm businesses in the United States that file Internal Revenue Service tax forms as individual proprietorships, partnerships, or any type of corporation, and with receipts of \$1,000 or more.¹¹ The questionnaire asks for information about the characteristics of the businesses and their owners. About 66% of the 1.75 million businesses that received the 2012 SBO responded.¹² The SBO "provides the only comprehensive, regularly collected source of information on selected economic and demographic characteristics for businesses and business owners by gender, ethnicity, race, and veteran status."¹³

The Census Bureau uses information from the SBO to provide estimates of the number of employer and nonemployer firms and their sales and receipts, annual payroll, and employment. Data aggregates are provided by gender, ethnicity, race, and veteran status for the United States by North American Industry Classification System (NAICS) classification; the kind of business;

and state, metropolitan and micropolitan statistical area, and county. The information obtained from the SBO is combined with data collected through the Census Bureau's main economic census and administrative records to provide a variety of searchable data products on Census's website, <http://www.census.gov/econ/sbo/>, including the most detailed economic information available on veterans and veteran-owned firms.

Demographics

The Bureau of the Census estimates that in 2012 about 9.2% of nonfarm firms in the United States (2.54 million of 27.62 million) were owned by veterans.¹⁴ Four states had more than 100,000 veteran-owned firms: California (254,873), Texas (215,217), Florida (187,074) and New York (138,670). Of the 2.54 million veteran-owned, nonfarm firms in 2012,

- 82.3% (2.09 million) had no paid employees and 17.7% (450,807) had paid employees. This ratio is similar to comparable national figures of 80.4% (22.20 million) with no paid employees and 19.6% (5.42 million) with paid employees.¹⁵
- 84.3% (2.14 million) were owned by a male, 15.1% were owned by a female (384,549), and 0.6% (14,035) were owned equally by a male and a female. Veteran-owned firms were more likely than other firms in 2012 to be owned by a male. The comparable national figures are 54.3% (14.99 million) were owned by a male, 36.0% (9.93 million) were owned by a female, and 9.0% (2.50 million) were owned equally by a male and a female.¹⁶
- 85.1% (2.16 million) were owned by a Caucasian, 10.7% (270,702) were owned by an African American, 2.1% (52,933) were owned by an Asian, 1.3% (34,174) were owned by an American Indian or Alaska Indian, 0.3% (7,011) were owned by a native Hawaiian or other Pacific Islander, and 2.2% (56,091) were owned by "some other race." Veteran-owned firms were somewhat more likely than other firms in 2012 to be owned by a Caucasian and somewhat less likely to be owned by an Asian. The comparable national figures for 2012 are 78.7% (21.74 million) were owned by a Caucasian, 9.4% (2.59 million) were owned by an African American, 7.0% (1.94 million) were owned by an Asian, 1.0% (274,238) were owned by an American Indian or Alaska Indian, 0.2% (55,077) were owned by a native Hawaiian or other Pacific Islander, and 4.3% (1.18 million) were owned by "some other race."¹⁷

¹⁴ An additional 599,335 nonfarm U.S. firms (about 2.2% of all nonfarm U.S. firms) were owned equally (50%-50%) by veterans and nonveterans. See U.S. Bureau of the Census, "Preliminary Statistics for All U.S. Firms by Sector, Veteran Status, and Gender for the U.S. and States: 2012," at http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=SBO_2012_00CSA02&prodType=table. Veteran status was based on self-identification. Respondents were asked to report if a business owner is a veteran of the U.S. military service including the Coast Guard. Businesses could be categorized as: veteran-owned (U.S. military service veterans own 51% or more of the equity, interest, or stock of the business); equally veteran/nonveteran-owned (50% veteran and 50% nonveteran ownership of the equity, interest, or stock of the business); or nonveteran-owned (nonveterans own 51% or more of the equity, interest, or stock of the business).

¹⁵ U.S. Bureau of the Census, "Preliminary Statistics for All U.S. Firms by Sector, Veteran Status, and Gender for the U.S. and States: 2012," at http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=SBO_2012_00CSA02&prodType=table.

¹⁶ Ibid.

¹⁷ The total percentage exceeds 100 because each owner had the option of selecting more than one race and was included in each race selected. See U.S. Bureau of the Census, "American Fact Finder: Preliminary Statistics for All (continued...)"

- 3.3% (76,250 of the 2,299,501 reporting) were owned by an individual under the age of 35, 22.6% (520,472) were owned by an individual aged 35 to 54, and 74.5% (1,712,779) were owned by an individual aged 55 or older. Veteran-owned firms were more likely than other firms in 2012 to be owned by an individual aged 55 or older. The comparable national figures (minus veterans) for 2012 are 14.7% (2,943,446 of the 19,990,309 reporting) of nonfarm firms were owned by an individual under the age of 35; 48.1% (9,613,854) were owned by an individual aged 35 to 54; and 37.2% (7,433,009) were owned by an individual aged 55 or older.¹⁸
- 7.3% (167,052 of the 2,292,035 reporting) were owned by an individual who reported that he or she had a service-connected disability.¹⁹

In addition, 99.8% of veteran-owned employer firms (441,799) had fewer than 500 employees and 0.2% (686) had at least 500 employees. This ratio is similar to comparable national figures for 2012, according to which 99.7% (5.41 million) had fewer than 500 employees and 0.3% (17,724) had at least 500 employees.²⁰

Employment, Payroll, and Sales/Receipts

In 2012, veteran-owned firms employed more than 5.5 million persons, reported a total payroll of \$220.8 billion, and generated more than \$1.47 trillion in total sales/receipts.²¹

Veteran-owned employer firms

- employed 5.5 million persons (about 4.8% of total U.S. employment);
- reported a total payroll of \$220.8 billion (about 4.2% of total U.S. payroll);
- generated \$1.375 trillion in total sales/receipts (about 4.2% of total U.S. receipts); and
- had average sales/receipts of \$3.1 million.²²

Veteran-owned nonemployer firms

- generated 6.4% (\$94.5 billion) of the total sales/receipts generated by veteran-owned firms; and
- had average sales/receipts of \$45,198.

²² Ibid.

The comparable national figures for sales/receipts in 2012 were \$6.0 million for employer firms and \$47,679 for nonemployer firms.²³

Access to Capital

As shown in **Table 1**, in 2012, veterans most frequently used personal or family savings to start or acquire a business (886,471 veterans, or 59.4% of respondents), followed by a personal or business credit card (148,856 veterans, or 10.0% of respondents), a business loan from a bank or financial institution (116,045 veterans, or 7.8% of respondents), and personal or family assets other than the owner’s savings (92,748 veterans, or 6.2% of respondents).

Table 1. Source of Capital for Veteran Business Owners Starting or Acquiring Their Businesses, 2012

Source of Capital	Number of Veteran Responses	% of Veteran Respondents
Personal or Family Savings	886,471	59.4%
Personal or Business Credit Card	148,856	10.0%
Business Loan from a Bank or Financial Institution	116,045	7.8%
Personal or Family Assets Other Than the Owner’s Savings	92,748	6.2%
Personal or Family Home Equity Loan	39,014	2.6%
Business Loan or Investment from Family or Friends	20,882	1.4%
Government-Guaranteed Business Loan from a Bank or Financial Institution	9,869	0.7%
Investment from Venture Capitalists	2,707	0.2%
Business Loan from a Federal, State, or Local Government	2,002	0.1%
Grant	1,478	0.1%
Other Source(s) of Capital	28,686	1.8%
Did Not Need Any Capital to Start or Acquire Their Business	353,917	17.9%
Did Not Recall Where They Received the Capital to Start or Acquire Their Business	83,047	5.6%
Total Responses/Respondents	1,785,722 responses (1,492,583 respondents)	112.5% (100.0%)

Source: U.S. Bureau of the Census, “American Fact Finder: Statistics for All U.S. Firms by Sources of Capital Used to Start or Acquire the Business by Industry, Gender, Ethnicity, Race, and Veteran Status for the U.S.: 2012,” at http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=SBO_2012_00CSCB13&prodType=table.

Note: The sum of the number of responses for each source of capital exceeds the total number of respondents and the sum of the percentages for each source of capital exceeds 100.0% because each owner had the option of selecting more than one source of capital.

²³ Ibid.

As shown in **Table 2**, the source of capital most frequently used by veterans to expand or make capital improvements to an existing business in 2012 was personal or family savings (313,296 veterans, or 20.8% of respondents). The next most frequently used source of capital to expand or make capital improvements to an existing business was a personal or business credit card (114,815 veterans, or 7.6% of respondents), followed by business profits or assets (82,182 veterans, or 5.5% of respondents), and a government-guaranteed business loan from a bank or financial institution (64,499 veterans, or 4.3% of respondents).

Table 2. Source of Capital for Veteran Businesses Owners Expanding or Making Capital Improvements to Their Businesses, 2012

Source of Capital	Number of Veteran Responses	% of Veteran Respondents
Personal or Family Savings	313,296	20.8%
Personal or Business Credit Card	114,815	7.6%
Business Profits or Assets	82,182	5.5%
Government-Guaranteed Business Loan from a Bank or Financial Institution	64,499	4.3%
Personal or Family Assets Other Than the Owner's Savings	35,220	2.3%
Personal or Family Home Equity Loan	20,173	1.3%
Business Loan or Investment from Family or Friends	5,923	0.4%
Business Loan from a Federal, State, or Local Government	3,062	0.2%
Business Loan from a Bank or Financial Institution	1,324	0.1%
Investment from Venture Capitalists	1,200	0.1%
Grant	1,369	0.1%
Other Source(s) of Capital	9,651	0.6%
Did Not Expand or Make Capital Improvements	931,199	61.8%
Wanted To Expand or Make Capital Improvements But Could Not Obtain Funding	18,840	1.3%
Did Not Recall Where They Received the Capital to Expand or Make Capital Improvements to Their Business	101,230	6.7%
Total Responses/Respondents	1,703,983 responses (1,505,631 respondents)	113.8% (100.0%)

Source: U.S. Bureau of the Census, “American Fact Finder: Statistics for All U.S. Firms by Sources Used to Finance Expansion or Capital Improvements by Industry, Gender, Ethnicity, Race, and Veteran Status for the U.S.: 2012” at http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=SBO_2012_00CSCB28&prodType=table.

Note: The sum of the number of responses for each source of capital exceeds the total number of respondents and the sum of the percentages for each source of capital exceeds 100.0% because each owner had the option of selecting more than one source of capital.

Veterans' Employment Data

The Department of Labor's Bureau of Labor Statistics (BLS) provides monthly updates of the employment status of the nation's veterans. The BLS reports that as of July 2016, there were nearly 21.0 million veterans.²⁴ There were 10.6 million veterans in the civilian labor force (i.e., they were either employed or unemployed and available for work, except for temporary illness, and had made specific efforts to find employment sometime during the four-week period ending with the reference week). Of those veterans in the civilian labor force, about 10.1 million were employed and about 499,000 were unemployed.²⁵

As of July 2016, the unemployment rate for veterans (4.7%) was lower than for nonveterans 18 years and older (4.9%). Veterans also had a lower labor force participation rate (the percentage of the available workforce that is employed or actively seeking employment) than nonveterans aged 18 and older (50.9% compared with 65.8%).²⁶ A report by the Council of Economic Advisers and the National Economic Council attributed the lower labor force participation rate for veterans to several factors, including the difficulty many civilian employers have in understanding a military resume and how military job titles translate into civilian job skills, the presence of a service-connected disability, especially among the post-9/11 veteran population, and the number of post-9/11 veterans (about 217,000) who have been diagnosed with post-traumatic stress disorder.²⁷

The employment experiences of veterans who left the military since September 2001 differ somewhat from the employment experiences of veterans who left the military before September 2001. As of July 2016, veterans who left the military since September 2001 had both higher levels of unemployment (5.9% compared with 4.2%) and higher levels of labor force participation (82.4% compared with 43.6%) than veterans who left the military before September 2001. The higher labor force participation rate for veterans who left the military since September 2001 was not wholly unexpected. They entered the civilian workforce more recently and have had less time to develop a reason (e.g., health issue, family responsibility, discouragement, retirement) to withdraw from the civilian workforce than veterans who left the military before September 2001.

Veterans' Employment and Business Development Programs

Several federal agencies, including the SBA, sponsor employment and business development programs to assist veterans in their transition from the military into the civilian labor force. As

²⁴ DOL, Bureau of Labor Statistics, "Table A-5. Employment status of the civilian population 18 years and over by veteran status, period of service, and sex, not seasonally adjusted," at <http://www.bls.gov/news.release/empsit.t05.htm>.

²⁷ Executive Office of the President, Council of Economic Advisers and the National Economic Council, "Military Skills for America's Future: Leveraging Military Service and Experience to Put Veterans and Military Spouses Back to Work," May 31, 2012, pp. 4-6, at http://www.whitehouse.gov/sites/default/files/docs/veterans_report_5-31-2012.pdf. The report indicated that military spouses also face a number of employment barriers. For example, military spouses are "ten times more likely to have moved across state lines in the last year compared to their civilian counterparts," affecting job tenure, advancement opportunities, and, for those in occupations requiring a state-specific occupational license or certification, the need to re-qualify for their license or certification after moving across state lines. See *ibid.*, pp. 8-10.

will be discussed, the expansion of federal employment and business development training programs targeted at specific populations, such as women and veterans, has led some Members and organizations to ask if these programs should be consolidated. Others question if the level of communication and coordination among federal agencies administering these programs has been sufficient to ensure the programs are being administered in the most efficient and effective manner.

The SBA's Veterans Business Development Programs

In an effort to assist veteran entrepreneurs, the SBA has either provided or supported management and technical assistance training for veteran-owned small businesses since its formation as an agency.²⁸ In FY2015, the SBA provided management and technical assistance training services to more than 100,000 veterans through its various management and technical assistance training partners (e.g., Small Business Development Centers, Women's Business Centers, Service Corps of Retired Executives [SCORE], and Veterans Business Outreach Centers [VBOCs]).²⁹ In addition, the SBA's OVBD administers several programs to assist veteran-owned businesses, including

- the Entrepreneurship Bootcamp for Veterans with Disabilities Consortium of Universities, which provides “experiential training in entrepreneurship and small business management to post-9/11 veterans with disabilities” at eight universities;³⁰
- the Veteran Women Igniting the Spirit of Entrepreneurship (V-WISE) program, administered through a cooperative agreement with Syracuse University, which offers women veterans a 15-day, online course focused on entrepreneurship skills and the “language of business,” followed by a 3-day conference (offered twice a year at varying locations) in which participants “are exposed to successful entrepreneurs and CEOs of Fortune 500 companies and leaders in government” and participate in courses on business planning, marketing, accounting and finance, operations and production, human resources, and work-life balance;³¹
- the Operation Endure and Grow Program, administered through a cooperative agreement with Syracuse University, which offers an eight-week online training program “focused on the fundamentals of launching and/or growing a small business” and is available to National Guard and reservists and their family members;³²
- the Boots to Business program, which is “an elective track within the Department of Defense’s revised Training Assistance Program called Transition Goals, Plans, Success (Transition GPS) and has three parts: the *Entrepreneurship Track Overview*—a 10-minute introductory video shown during the mandatory five-day

- Transition GPS course which introduces entrepreneurship as a post-service career option; *Introduction to Entrepreneurship*—a two-day classroom course on entrepreneurship and business fundamentals offered as one of the three Transition GPS elective tracks; and *Foundations of Entrepreneurship*—an eight-week, instructor-led online course that offers in-depth instruction on the elements of a business plan and tips and techniques for starting a business”;³³ and
- the VBOC program, which provides veterans and their spouses management and technical assistance training at 19 locations, including assistance with the Boots to Business program, the development and maintenance of a 5-year business plan, and referrals to other SBA resource partners when appropriate for additional training or mentoring services.³⁴

The SBA indicated in its FY2017 congressional budget justification document that it will continue to expand its veteran technical assistance programs and announced on May 17, 2016, that it provided \$1.5 million in grant funding for 6 additional VBOCs (bringing the total to 19).³⁵

The SBA also continues to work closely with the Interagency Task Force for Veterans Small Business Development, which was established by executive order on April 26, 2010, held its first public meeting on October 15, 2010, and issued its first report on November 1, 2011, to identify “gaps in ensuring that transitioning military members who are interested in owning a small business get needed assistance and training.”³⁶ The task force’s second report, issued on

November 29, 2012, focused on progress made since the initial report.³⁷ The task force continues to meet on a quarterly basis to foster communication and monitor agency progress in assisting transitioning servicemembers.

Congressional Issues: Duplication of Services

The SBA's OVBD, which serves as the SBA's focal point for its veteran assistance programs, was created by P.L. 106-50, the Veterans Entrepreneurship and Small Business Development Act of 1999. The act addressed congressional concerns that the United States generally, and the SBA in particular, was not, at that time, doing enough to meet the needs of veteran entrepreneurs, especially service-disabled veteran entrepreneurs.³⁸ At that time, several Members of Congress argued that "the needs of veterans have been diminished systematically at the SBA" as evidenced by the agency's elimination of direct loans, including direct loans to veterans, in 1995; and a decline in the SBA's "training and counseling for veterans ... from 38,775 total counseling sessions for veterans in 1993 to 29,821 sessions in 1998."³⁹ To address these concerns, the act authorized the establishment of the federally chartered National Veterans Business Development Corporation (known as the Veterans Corporation and reconstituted, without a federal charter, in 2012 as Veteranscorp.org).⁴⁰ Its mission is to

(1) expand the provision of and improve access to technical assistance regarding entrepreneurship for the Nation's veterans; and (2) to assist veterans, including service-disabled veterans, with the formation and expansion of small business concerns by working with and organizing public and private resources, including those of the Small Business Administration, the Department of Veterans Affairs, the Department of Labor, the Department of Commerce, the Department of Defense, the Service Corps of Retired Executives ..., the Small Business Development Centers ..., and the business development staffs of each department and agency of the United States.⁴¹

P.L. 106-50 reemphasized the SBA's responsibility "to reach out to and include veterans in its programs providing financial and technical assistance."⁴² It included veterans as a target group for the SBA's 7(a), 504 Certified Development Company (504/CDC), and Microloan lending

³⁷ The Interagency Task Force on Veterans Small Business Development, "Heroes on the Home Front: Supporting Veteran Success as Small Business Owners," November 29, 2012, at https://www.sba.gov/sites/default/files/files/Veterans_Report_FINAL.pdf. The Interagency Task Force on Veterans Small Business Development includes senior-level representatives of the SBA, the Departments of Defense, Labor, Treasury, and Veterans Affairs, the General Services Administration, the Office of Management and Budget, and four representatives from veterans' service or military organizations appointed by the SBA administrator. SBA Acting Associate Administrator Barbara Carson serves as its chair. See Executive Order 13540, "Interagency Task Force on Veterans Small Business Development," 75 *Federal Register* 22497-22498, April 29, 2010; and U.S. Small Business Administration, "Inter-Agency Task Force on Veterans Small Business Development: Kick Off Meeting Wednesday, September 15, 2010," at <https://www.sba.gov/offices/headquarters/ovbd/resources/14368>.

⁴¹ P.L. 106-50, the Veterans Entrepreneurship and Small Business Development Act of 1999, Section 33. National Veterans Business Development Corporation. Also, see 15 U.S.C. §657c.

⁴² U.S. Congress, House Committee on Small Business, *Veterans Entrepreneurship and Small Business Development Act of 1999*, report to accompany H.R. 1568, 106th Cong., 1st sess., June 29, 1999, H.Rept. 106-206 (Washington: GPO, 1999), p. 14.

programs. It also required the SBA to enter into a memorandum of understanding with SCORE to, among other things, establish “a program to coordinate counseling and training regarding entrepreneurship to veterans through the chapters of SCORE throughout the United States.”⁴³ In addition, it directed the SBA to enter into a memorandum of understanding with small business development centers, the VA, and the National Veterans Business Development Corporation “with respect to entrepreneurial assistance to veterans, including service-disabled veterans.”⁴⁴ The act specified that the following services were to be provided:

- (1) Conducting of studies and research, and the distribution of information generated by such studies and research, on the formation, management, financing, marketing, and operation of small business concerns by veterans.
- (2) Provision of training and counseling to veterans concerning the formation, management, financing, marketing, and operation of small business concerns.
- (3) Provision of management and technical assistance to the owners and operators of small business concerns regarding international markets, the promotion of exports, and the transfer of technology.
- (4) Provision of assistance and information to veterans regarding procurement opportunities with Federal, State, and local agencies, especially such agencies funded in whole or in part with Federal funds.
- (5) Establishment of an information clearinghouse to collect and distribute information, including by electronic means, on the assistance programs of Federal, State, and local governments, and of the private sector, including information on office locations, key personnel, telephone numbers, mail and electronic addresses, and contracting and subcontracting opportunities.
- (6) Provision of Internet or other distance learning academic instruction for veterans in business subjects, including accounting, marketing, and business fundamentals.
- (7) Compilation of a list of small business concerns owned and controlled by service-disabled veterans that provide products or services that could be procured by the United States and delivery of such list to each department and agency of the United States. Such list shall be delivered in hard copy and electronic form and shall include the name and address of each such small business concern and the products or services that it provides.⁴⁵

The SBA’s OVBD was established to address these statutory requirements by promoting “veterans’ small business ownership by conducting comprehensive outreach, through program and policy development and implementation, ombudsman support, coordinated agency initiatives, and direct assistance to veterans, service-disabled veterans, reserve and National Guard members, and discharging active duty service members and their families.”⁴⁶

As mentioned previously, the OVBD provided, or supported third parties in providing, management and technical assistance training services to more than 100,000 veterans during FY2015. These services were provided

⁴³ P.L. 106-50, Section 301. Score Program.

⁴⁵ *Ibid.*

⁴⁶ SBA, “FY2013 Congressional Budget Justification and FY2011 Annual Performance Report,” p. 62, at [https://www.sba.gov/sites/default/files/files/FY%202015%20CBJ%20FY%202013%20APR%20FINAL%20508\(1\).pdf](https://www.sba.gov/sites/default/files/files/FY%202015%20CBJ%20FY%202013%20APR%20FINAL%20508(1).pdf).

through funded SBA district office outreach; OVBD-developed and distributed materials; websites; partnering with DOD [Department of Defense], DOL [Department of Labor] and universities; agreements with regional veterans business outreach centers; direct guidance, training and assistance to Agency veteran customers; and through enhancements to intra-agency programs used by the military and veteran communities.⁴⁷

The expansion of the SBA's outreach efforts to veterans has led some Members and organizations to ask if the nation's veterans might be better served if some of the veteran employment and business development programs offered by federal agencies were consolidated. For example, as mentioned previously, DOD, in cooperation with several federal agencies, operates the recently revised Transition Assistance Program, Transition GPS, which provides employment information and training to exiting servicemembers to assist them in transitioning from the military into the civilian labor force. In addition, DOL's Jobs for Veterans State Grants program provides states funding for Disabled Veterans' Outreach Program specialists and Local Veterans' Employment Representatives to provide outreach and assistance to veterans, and their spouses, seeking employment.⁴⁸ DOL also administers the Veterans Workforce Investment Program, which provides grants to fund programs operated by eligible state and local government workforce investment boards, state and local government agencies, and private nonprofit organizations to provide various services designed to assist veterans' transitions into the civilian labor force.⁴⁹ The DOL-administered Homeless Veterans Reintegration Program provides grants to fund programs operated by eligible state and local government workforce investment boards, state and local government agencies, and private nonprofit organizations that provide various services designed to assist homeless veterans achieve meaningful employment and to aid in the development of a service delivery system to address problems facing homeless veterans.⁵⁰

Advocates of consolidating veteran employment and business development programs argue that eliminating program duplication among federal agencies would result in lower costs and improved services. For example, H.R. 4072, the Consolidating Veteran Employment Services for Improved Performance Act of 2012, which was introduced during the 112th Congress and ordered to be reported by the House Committee on Veterans' Affairs on April 27, 2012, would have transferred several veteran employment training programs from the DOL to the VA.⁵¹

Also, in 2011, 2012, 2013, 2014, and 2015 the House Committee on Small Business, in its "Views and Estimates" letter to the House Committee on the Budget, recommended that funding for the SBA's VBOCs be either eliminated or transferred to the Department of Veterans Affairs because, as it stated in 2012, "the SBA already provides significant assistance to veterans who are seeking to start or already operate small businesses. The VBOCs duplicate services already available from the SBA, other entrepreneurial development partners and programs available from

⁵¹ U.S. House of Representatives, Committee on Veterans' Affairs, "Debunking the Myths: H.R. 4072," at <http://veterans.house.gov/4072>.

the Department of Veterans Affairs.”⁵² In 2014, the House Committee on Small Business also recommended that if additional funds were to be provided to VBOCs, those funds should come from the SBA’s Boots to Business initiative.

Advocates of consolidating federal veteran employment and business development programs point to various U.S. Government Accountability Office (GAO) reports that have generally characterized the broader category of federal support for entrepreneurs, including veteran entrepreneurs, as fragmented and having overlapping missions. For example, in 2012, GAO identified 53 programs within the SBA and the Departments of Commerce, Housing and Urban Development, and Agriculture designed to support entrepreneurs, including 36 programs that provide entrepreneurs technical assistance, such as business training, counseling, and research and development support. GAO found that “the overlap among these programs raise[s] questions about whether a fragmented system is the most effective way to support entrepreneurs” and suggested agencies should “determine whether there are more efficient ways to continue to serve the unique needs of entrepreneurs, including consolidating programs.”⁵³

Instead of consolidating programs, some argue that improved communication and cooperation among the federal agencies providing entrepreneur support programs, and among the SBA’s management and technical assistance training resource partners, would enhance program efficiencies while preserving the ability of these programs to offer services that match the unique needs of various underserved populations, such as veterans. For example, during the 111th Congress, the House passed H.R. 2352, the Job Creation Through Entrepreneurship Act of 2009, on May 20, 2009, by a vote of 406-15. The Senate did not take action on the bill. In its committee report accompanying the bill, the House Committee on Small Business concluded at that time that

each ED [Entrepreneurial Development] program has a unique mandate and service delivery approach that is customized to its particular clients. However, as a network, the programs have established local connections and resources that benefit entrepreneurs within a region. Enhanced coordination among this network is critical to make the most of scarce resources available for small firms. It can also ensure that best practices are shared amongst providers that have similar goals but work within different contexts.⁵⁴

Also see GAO, *Entrepreneurial Assistance: Opportunities Exist to Improve Programs’ Collaboration, Data-Tracking, and Performance Management*, GAO-12-819, August 23, 2012, pp. 60-61, at <http://www.gao.gov/assets/650/647267.pdf>.

⁵⁴ U.S. Congress, House Committee on Small Business, *Job Creation Through Entrepreneurship Act of 2009*, report to accompany H.R. 2352, 111th Cong., 1st sess., May 15, 2009, H.Rept. 111-112 (Washington: GPO, 2009), pp. 17-18.

The bill was designed to enhance oversight and coordination of the SBA's management and technical assistance training programs by requiring the SBA to coordinate these programs "with State and local economic development agencies and other federal agencies as appropriate" and to "report annually to Congress, in consultation with other federal departments and agencies as appropriate, on opportunities to foster coordination, limit duplication, and improve program delivery for federal entrepreneurial development activities."⁵⁵

In a related development, as mentioned previously, the Obama Administration formed the Interagency Task Force for Veterans Small Business Development by executive order on April 26, 2010. The SBA's representative chairs the task force, which is composed of senior representatives from seven federal agencies and four representatives from veterans' organizations.⁵⁶ One of the task force's goals is to improve "collaboration, integration and focus across federal agencies, key programs (e.g., the Transition Assistance Program), veterans' service organizations, states, and academia."⁵⁷

On November 1, 2011, the task force issued its first set of recommendations, which included several recommendations designed to increase and augment federal entrepreneurial training and technical assistance programs offered to veterans. For example, it recommended the development of a "standardized, national entrepreneurship training program specifically for veterans" that "could utilize expert local instructors, including academics and successful small business owners, to provide training in skills used to create and grow entrepreneurial ventures and small business. The national program could provide engaging training modules and workshops dedicated to the basics of launching a business."⁵⁸ The task force also recommended the development of a web portal "that allows veterans to access entrepreneurship resources from across the government."⁵⁹

The task force issued its second report on November 29, 2012. The document was essentially a progress report concerning the task force's activities since the initial report's release:

In FY2012, the Task Force, along with the interagency Veterans Employment Initiative, developed and piloted a re-designed military transition program, entitled Transition GPS, that includes an entrepreneurship training program called "Operation Boots to Business: from Service to Startup." This program is expected to be rolled out nationally in the coming year. The Task Force has also worked to streamline programs and cut paperwork for veteran small businesses through support for initiatives such as BusinessUSA [an online website with links to over 1,000 federal and state resources, over 130 success stories, and over 3,750 events nationwide] and QuickApp for [SBA-guaranteed] surety bonds [under \$250,000 featuring a streamlined application process] and it has continued the efforts begun last year to make the process of winning Federal government contracts simpler and easier for service-disabled veterans and veteran-owned small business.⁶⁰

⁵⁵ H.R. 2352, the Job Creation Through Entrepreneurship Act of 2009, Section 601. Expanding Entrepreneurship.

⁵⁶ The seven federal agencies are the SBA, U.S. General Services Administration, U.S. Office of Management and Budget, and the Departments of Defense, Labor, Treasury, and Veterans Affairs. The four veterans' organizations are Association of State Directors of Veterans Affairs, Student Veterans of America, the American Legion, and VET-Force. SBA Deputy Administrator Marie Johns served as the task force's chair until she left the agency in May 2013.

Veterans' Access to Capital

The SBA administers several loan guaranty programs, including the 7(a) and the 504/CDC programs, to encourage lenders to provide loans to small businesses “that might not otherwise obtain financing on reasonable terms and conditions.”⁶¹

The SBA’s 7(a) loan guaranty program is considered the agency’s flagship loan guaranty program. Its name is derived from Section 7(a) of the Small Business Act of 1953 (P.L. 83-163, as amended), which authorizes the SBA to provide business loans to American small businesses.

The 7(a) loan guaranty program provides SBA-approved lenders a guaranty of up to 85% of loans of \$150,000 or less and up to 75% of loans exceeding \$150,000, up to the program’s maximum gross loan amount of \$5 million (up to \$3.75 million maximum guaranty). In FY2015, the average approved 7(a) loan amount was \$371,627.⁶²

Proceeds from 7(a) loans may be used to establish a new business or to assist in the operation, acquisition, or expansion of an existing business. Specific uses include to acquire land (by purchase or lease); improve a site (e.g., grading, streets, parking lots, and landscaping); purchase, convert, expand, or renovate one or more existing buildings; construct one or more new buildings; acquire (by purchase or lease) and install fixed assets; purchase inventory, supplies, and raw materials; finance working capital; and refinance certain outstanding debts. The 7(a) program’s loan maturity for working capital, machinery, and equipment (not to exceed the life of the equipment) is typically 5 years to 10 years, and the loan maturity for real estate is up to 25 years. Interest rates are negotiated between the borrower and lender but are subject to maximum rates.⁶³

As shown in **Table 3**, the number and amount of veteran 7(a) loan approvals have generally increased since FY2012. In FY2015, the SBA approved 63,461 7(a) loans totaling \$23.58 billion, including 3,091 loans to veterans (4.9%) totaling \$1.12 billion (5.2%). In FY2015, the average approved veteran 7(a) loan amount was \$393,779.⁶⁴

Table 3. 7(a) Loan Guaranty Program Approvals, FY2010-FY2015

(\$ in millions)

FY	total # of 7(a) loans approved	total amount of 7(a) loans approved	# of veteran 7(a) loans approved	total amount of veteran 7(a) loans approved
2015	63,461	\$23,583	3,091	\$1,217
2014	52,044	\$19,190	2,113	\$598
2013	46,395	\$17,865	2,313	\$626

FY	total # of 7(a) loans approved	total amount of 7(a) loans approved	# of veteran 7(a) loans approved	total amount of veteran 7(a) loans approved
2012	44,376	\$15,153	2,301	\$607
2011	53,710	\$19,640	3,355	\$941
2010	47,000	\$12,406	3,201	\$615

Sources: Small Business Administration, “SBA Lending Statistics for Major Programs (as of 9/30/2014),” at http://www.sba.gov/sites/default/files/aboutsbaarticle/WebsiteReport_asof9_30_2014.pdf; and Small Business Administration, “SBA Lending Statistics for Major Programs (as of 9/30/2015),” at https://www.sba.gov/sites/default/files/aboutsbaarticle/WebsiteReport_asof_09_30_2015.pdf.

Notes: The number of 7(a) loans approved annually is typically 10% to 20% higher than the number of loans disbursed (e.g., a borrower decides not to accept the loan or a change in business ownership). The amount of 7(a) loans approved annually is typically 10% to 15% higher than the amount disbursed. SBA, Office of Congressional and Legislative Affairs, correspondence with the author, November 21, 2013.

The SBA’s 504/CDC loan guaranty program is administered through nonprofit certified development companies (CDCs). It provides long-term fixed rate financing for major fixed assets, such as land, buildings, equipment, and machinery. Of the total project costs, a third-party lender must provide at least 50% of the financing, the CDC provides up to 40% of the financing through a 100% SBA-guaranteed debenture, and the applicant provides at least 10% of the financing. The 504/CDC program’s name is derived from Section 504 of the Small Business Investment Act of 1958 (P.L. 85-699, as amended), which provides the most recent authorization for the sale of 504/CDC debentures.⁶⁵ In FY2015, the average approved 504/CDC loan amount was \$742,688.⁶⁶

As shown in **Table 4**, in recent years, the number and amount of veteran 504/CDC loan approvals peaked in FY2012, declined in FY2013 and FY2014, and leveled off in FY2015. In FY2015, the SBA approved 5,787 504/CDC loans totaling \$4.29 billion, including 263 loans to veterans (4.5%) totaling \$168.3 million (3.9%). In FY2015, the average approved veteran 504/CDC loan amount was \$640,110.⁶⁷

Table 4. 504/CDC Loan Guaranty Program Approvals, FY2010-FY2015
(\$ in millions)

FY	Total # of 504/CDC loans approved	Total amount of 504/CDC loans approved	# of veteran 504/CDC loans approved	Total amount of veteran 504/CDC loans approved
2015	5,787	\$4,297	263	\$168
2014	5,885	\$4,199	263	\$166
2013	7,708	\$5,227	382	\$223
2012	9,471	\$6,712	476	\$323

2011	7,983	\$4,845	420	\$259
2010	7,833	\$4,433	367	\$185

Sources: Small Business Administration, “SBA Lending Statistics for Major Programs (as of 9/30/2014),” at http://www.sba.gov/sites/default/files/aboutsbaarticle/WebsiteReport_asof9_30_2014.pdf; and Small Business Administration, “SBA Lending Statistics for Major Programs (as of 9/30/2015),” at https://www.sba.gov/sites/default/files/aboutsbaarticle/WebsiteReport_asof_09_30_2015.pdf.

Notes: Based on previous experience, the number of 504/CDC loans approved is typically about 4% to 5% higher than the actual number of loans disbursed (e.g., some borrowers decide not to accept the loan or there is a change in ownership); and the amount of debentures (loans) approved is typically 10% to 12% higher than the amount of debentures disbursed.

The SBA also administers several 7(a) loan guaranty subprograms that offer streamlined and expedited loan procedures to encourage lenders to provide loans to specific groups of borrowers identified by the SBA as having difficulty accessing capital. In the past, the Patriot Express program (2007–2013) encouraged lenders to provide loans to veterans and their spouses. It provided loans of up to \$500,000 (with a guaranty of up to 85% of loans of \$150,000 or less and up to 75% of loans exceeding \$150,000).⁶⁸

The SBA considered the Patriot Express program a success, but some veterans’ organizations expressed concern that many veterans, especially during and immediately following the Great Recession (December 2007 to June 2009), experienced difficulty finding lenders willing to provide them Patriot Express loans.⁶⁹ In addition, GAO reported in September 2013 that with the exception of loans approved in 2007, Patriot Express loans defaulted at a higher rate than regular 7(a) loans and loans made under the SBA Express program (a 7(a) loan guaranty subprogram offering streamlined borrower application and lender approval procedures).⁷⁰ Over its history, the Patriot Express program disbursed 9,414 loans totaling more than \$791 million.⁷¹

⁶⁸ Eligible businesses were required to be owned and controlled (51% or more) by one or more of the following groups: veteran, active duty military participating in the military’s Transition Assistance Program, reservist or National Guard member or a spouse of any of these groups, a widowed spouse of a servicemember who died while in service, or a widowed spouse of a veteran who died of a service-connected disability. See SBA, “SOP 50 10 5(E): Lender and Development Company Loan Programs,” (effective June 1, 2012), pp. 83, 127, at [https://www.sba.gov/sites/default/files/SOP%2050%2010%205\(E\)%20\(5-16-2012\)%20clean.pdf](https://www.sba.gov/sites/default/files/SOP%2050%2010%205(E)%20(5-16-2012)%20clean.pdf). The program’s interest rates were negotiable with the lender, subject to the same maximum rate limitations as the 7(a) program, which vary depending upon the size and maturity of the loan. It also had the same fees as the 7(a) program, which also vary depending on the size and maturity of the loan.

⁷¹ SBA, Office of Congressional and Legislative Affairs, correspondence with the author, February 21, 2014.

On January 1, 2014, the SBA implemented a new, streamlined application process for 7(a) loans of \$350,000 or less. As part of an overall effort to streamline and simplify its loan application process, the SBA also eliminated several 7(a) subprograms, including the Patriot Express program. In anticipation of ending the Patriot Express program, the SBA announced on November 8, 2013, that it would waive the up-front, one-time loan guaranty fee for loans to a veteran or veteran's spouse under the SBAExpress program from January 1, 2014, through the end of FY2014 (called the Veterans Advantage Program).⁷²

The SBA announced that this fee waiver was part "of SBA's broader efforts to make sure that veterans have the tools they need to start and grow a business."⁷³ The Obama Administration continued this fee waiver for veterans through the end of FY2015.

During the 113th Congress, S. 2143, the Veterans Entrepreneurship Act, would have authorized and made the Veterans Advantage Program's fee waiver permanent. P.L. 113-235, the Consolidated and Further Continuing Appropriations Act, 2015, provided statutory authorization for the fee waiver for FY2015.

During the 114th Congress, P.L. 114-38, the Veterans Entrepreneurship Act of 2015, authorized and made the SBA's current practice of waiving the SBAExpress loan program's one time, up-front guaranty fee for veterans (and their spouse) permanent beginning on or after October 1, 2015, except during any upcoming fiscal year for which the President's budget, submitted to Congress, includes a cost for the 7(a) program, in its entirety, that is above zero.⁷⁴

The SBAExpress program is designed to increase the availability of credit to small businesses by permitting lenders to use their existing documentation and procedures in return for receiving a reduced SBA guaranty on loans.⁷⁵ It provides a 50% loan guaranty on loan amounts up to \$350,000. In FY2015, the SBA approved 32,252 SBAExpress loans (51.0% of total 7(a) program loan approvals) totaling \$2.20 billion (9.3% of total 7(a) program amount approvals).⁷⁶

⁷² The SBAExpress program's fees are the same as the 7(a) loan program's fees. SBAExpress loans of \$150,000 or less approved in FY2014 do not have an up-front, one-time loan guaranty fee, and these loans do not have an annual, ongoing loan servicing fee. SBAExpress loans of \$150,001 to the SBAExpress limit of \$350,000, with a maturity of one year or less, have a 0.25% up-front, one-time loan guaranty fee and a 0.52% annual, ongoing loan servicing fee. SBAExpress loans of \$150,001 to the SBAExpress limit of \$350,000, with a maturity over one year have a 3.0% up-front, one-time loan guaranty fee and a 0.52% annual, ongoing loan servicing fee. To qualify for a waiver of the 3.0% up-front, one-time loan guaranty fee, the business must be 51% or more owned and controlled by an individual or individuals in one or more of the following groups: veterans (other than dishonorably discharged); service-disabled veterans; active duty military servicemembers participating in the military's Transition Assistance Program (TAP); reservists and National Guard members; current spouse of any veteran, active duty servicemember, or any reservist or National Guard member; or widowed spouse of a servicemember who died while in service or of a service-connected disability. See SBA, "SBA Announces New Measures to Help Get Small Business Loans Into the Hands of Veterans," November 8, 2013, at <https://www.sba.gov/content/sba-announces-new-measures-help-get-small-business-loans-hands-veterans>; and SBA, "Procedural Notice: SBA Veterans Advantage," December 18, 2013, at https://www.sba.gov/sites/default/files/lender_notices/5000-1299_0.pdf.

⁷³ SBA, "SBA Announces New Measures to Help Get Small Business Loans Into the Hands of Veterans," November 8, 2013, at <https://www.sba.gov/content/sba-announces-new-measures-help-get-small-business-loans-hands-veterans>.

⁷⁴ U.S. Congress, House Committee on Small Business, Veterans Entrepreneurship Act of 2015, report to accompany H.R. 2499, 114th Cong., 1st sess., June 25, 2015, H.Rept. 114-187 (Washington: GPO, 2015), p. 9. The act also increased the 7(a) program's FY2015 authorization limit to \$23.5 billion from \$18.75 billion.

⁷⁵ SBA, "The SBA Express Pilot Program: Inspection Report," June 1998, p. 3.

⁷⁶ SBA, "SBA Lending Statistics for Major Programs (as of 9/30/2015)," at https://www.sba.gov/sites/default/files/aboutsbaarticle/WebsiteReport_asof_09_30_2015.pdf.

In FY2014, the SBA also waived the up-front, one-time loan guaranty fee and the annual, ongoing servicing fee for all 7(a) loans of \$150,000 or less. The Obama Administration has continued these fee waivers through the end of FY2016. In addition, “to encourage lending to veteran-owned small businesses” the Administration waived 50% of the up-front, one-time loan guaranty fee on all non-SBAExpress 7(a) loans to veterans exceeding \$150,000 in FY2015, and has continued this fee waiver through the end of FY2016.⁷⁷

The Obama Administration has announced that the SBA plans to waive 100% of borrower (up-front) fees on 7(a) loans up to \$150,000, waive 50% of borrower (up-front) fees on all non-SBAExpress loans to veterans of \$150,001 up to and including \$500,000, and waive 100% of borrower (up-front) fees on SBAExpress loans to veterans up to \$350,000 “as long as [the credit] subsidy [cost] remains zero.”⁷⁸

Congressional Issues: Access

As mentioned previously, the SBA has indicated in both testimony at congressional hearings and in press releases that it viewed the Patriot Express program and its own overall effort to enhance veterans’ access to capital as a success.⁷⁹ For example, when the SBA announced its veterans’ fee waiver for the SBAExpress program, it also announced that its lending to veteran-owned small businesses had nearly doubled since 2009 and that “in FY 2013, SBA supported \$1.86 billion in loans for 3,094 veteran-owned small businesses.”⁸⁰

Congressional testimony provided by various veteran service organizations provides a somewhat different perspective. The SBA’s self-evaluation of its success in assisting veterans access capital has focused primarily on the agency’s efforts to streamline the loan application approval process (e.g., minimizing paperwork requirements and reducing the time necessary for the SBA to review and approve applications submitted by local lenders) and aggregate lending amounts (e.g., the number and amount of loans approved). In contrast, veteran service organizations focus primarily on program outcomes, especially the likelihood of a veteran being approved for a SBA loan by a local lender. For example, a representative of the American Legion testified at a congressional hearing in 2010 that, at that time, being turned down for a SBA Patriot Express loan by a private lender “is probably the largest, most frequent complaint that we receive from our business owners.”⁸¹ At that same congressional hearing, a representative of the Vietnam Veterans of America testified in response to that statement that “I would have to concur ... in talking with some of the veterans with regard to the Patriot Express Loan, they are having difficulties also to acquire that capital. The rationale seems to be ... the banks in general seem to be tightening the

⁷⁹ U.S. Congress, House Committee on Veterans’ Affairs, Subcommittee on Economic Opportunity, *Status of Veterans Small Business*, hearing, 111th Cong., 2nd sess., April 29, 2010, House Committee on Veterans’ Affairs Serial No. 111-74 (Washington: GPO, 2010), p. 75.

⁸⁰ SBA, “SBA Announces New Measures to Help Get Small Business Loans Into the Hands of Veterans,” November 8, 2013, at <https://www.sba.gov/content/sba-announces-new-measures-help-get-small-business-loans-hands-veterans>.

⁸¹ U.S. Congress, House Committee on Veterans’ Affairs, Subcommittee on Economic Opportunity, *Status of Veterans Small Business*, hearing, 111th Cong., 2nd sess., April 29, 2010, House Committee on Veterans’ Affairs Serial No. 111-74 (Washington: GPO, 2010), p. 17.

credit, their lending practices, so that is ... what we are hearing.”⁸² More recently, GAO reported in 2013 that “selected loan recipients, lenders, and veteran service organizations said that a low awareness of the Patriot Express program among the military community was among the most frequently cited challenges.”⁸³

No empirical assessments of veterans’ experiences with either the SBA’s Patriot Express or SBAExpress loan programs exist that would be useful for determining the relative ease or difficulty for veteran-owned small business owners of accessing capital through the SBA’s loan programs. Since 2010, many lenders report that they have eased their credit standards, at least somewhat, for small business loans, suggesting the experiences of veterans seeking a SBA loan guaranty today may be improved compared with their experiences in 2010. However, GAO found in 2013 that many veterans were not fully aware of the SBA’s Patriot Express program and that “over half of the Patriot Express loan recipients, six of the eight lenders, and two veteran service organizations ... said that [the] SBA could do more to increase outreach to veteran entrepreneurs and better market the program to the military community.”⁸⁴ GAO reported that low awareness of the SBA’s Patriot Express program and the SBA’s participating lenders were a continuing challenge for the SBA.⁸⁵

One option to provide additional information concerning veterans’ experiences with the SBA’s lenders would be to survey veterans who have received a SBA guaranteed loan. The survey could include questions concerning these veterans’ views of the programs, including the application process. However, obtaining a comprehensive list of veterans to survey who have been turned down for a SBA guaranteed loan by a private lender would be difficult given privacy concerns.

In a related development concerning veterans’ access to capital, legislation has been introduced during the 114th Congress (S. 1870, the Veterans Entrepreneurial Transition Act of 2015, and its House companion bill, H.R. 3248) to authorize a three-year pilot program, administered by the SBA, to provide grants to no more than 250 GI-Bill benefit-eligible veterans to start or acquire a qualifying business. The grant amount would be calculated according to a formula related to the unused portion of the recipient’s GI-Bill benefits. Recipients would be required to complete specified training and meet other program requirements, such as having an approved business plan. S. 1870 was ordered to be reported with an amendment in the nature of a substitute by the Senate Committee on Small Business and Entrepreneurship on July 29, 2015.

In addition, H.R. 5698, the Strengthening Technical Assistance, Resources, and Training to Unleash the Potential of Veterans Act of 2016 (STARTUP Vets Act of 2016), and its companion bill in the Senate, S. 2273, would authorize the SBA to provide up to \$1.5 million in grants annually “from amounts made available to the Office of Veterans Business Development” to organizations to create and operate business incubators and accelerators that provide technical assistance and training to veterans (including their spouse and dependents) to enable them “to effectively transfer relevant skills to launch and accelerate small business concerns owned and controlled by covered individuals; and to create an avenue for high-performing covered individuals to meet and collaborate on business ideas.”⁸⁶

Federal Contracting Goals for Service-Disabled Veteran-Owned Small Businesses

Since 1978, federal agency heads have been required to establish federal procurement contracting goals, in consultation with the SBA, “that realistically reflect the potential of small business concerns” to participate in federal procurement. Each agency is required, at the conclusion of each fiscal year, to report its progress in meeting the goals to the SBA.⁸⁷ The SBA negotiates the goals with each federal agency and establishes a *small business eligible* baseline for evaluating the agency’s performance.

The small business eligible baseline excludes certain contracts that the SBA has determined do not realistically reflect the potential for small business participation in federal procurement, such as contracts awarded to mandatory and directed sources, awarded and performed overseas, funded predominately from agency-generated sources, not covered by Federal Acquisition Regulations, and not reported in the Federal Procurement Data System (e.g., contracts or government procurement card purchases valued less than \$3,000).⁸⁸ These exclusions typically account for 18% to 20% of all federal prime contracts each year.

The SBA then evaluates the agencies’ performance against their negotiated goals annually, using data from the Federal Procurement Data System—Next Generation, managed by the U.S. General Services Administration, to generate the small business eligible baseline. This information is compiled into the official Small Business Goaling Report, which the SBA releases annually.

Over the years, federal government-wide procurement contracting goals have been established for small businesses generally (P.L. 100-656, the Business Opportunity Development Reform Act of 1988, and P.L. 105-135, the HUBZone Act of 1997—Title VI of the Small Business Reauthorization Act of 1997); small businesses owned and controlled by socially and economically disadvantaged individuals (P.L. 100-656); women (P.L. 103-355, the Federal Acquisition Streamlining Act of 1994); small businesses located within a Historically Underutilized Business Zone, or HUBZone (P.L. 105-135); and small businesses owned and controlled by a service-disabled veteran (P.L. 106-50, the Veterans Entrepreneurship and Small Business Development Act of 1999).

The current federal small business contracting goals are

- at least 23% of the total value of all small business eligible prime contract awards to small businesses for each fiscal year;
- 5% of the total value of all small business eligible prime contract awards and subcontract awards to small disadvantaged businesses for each fiscal year;
- 5% of the total value of all small business eligible prime contract awards and subcontract awards to women-owned small businesses;
- 3% of the total value of all small business eligible prime contract awards and subcontract awards to HUBZone small businesses; and

⁸⁷ P.L. 95-507, a bill to amend the Small Business Act and the Small Business Investment Act of 1958.

⁸⁸ See U.S. General Services Administration, Federal Procurement Data System—Next Generation, “Small Business Goaling Report: Fiscal Year 2013,” at https://www.fpds.gov/downloads/top_requests/FPDSNG_SB_Goaling_FY_2013.pdf.

- 3% of the total value of all small business eligible prime contract awards and subcontract awards to service-disabled veteran-owned small businesses.⁸⁹

There are no punitive consequences for not meeting the small business procurement goals. However, the SBA’s Small Business Goaling Report is distributed widely, receives media attention, and heightens public awareness of the issue of small business contracting. For example, agency performance as reported in the SBA’s report is often cited by Members during their questioning of federal agency witnesses in congressional hearings.

As shown in **Table 5**, the FY2015 Small Business Goaling Report, using data in the Federal Procurement Data System, indicates that federal agencies met the federal contracting goal for small businesses generally (for the third year in a row and the third time in nine years), small disadvantaged businesses, women-owned small businesses (for the first time), and service-disabled veteran-owned small businesses in FY2015.

Federal agencies awarded 25.75% of the value of their small business eligible contracts (\$352.3 billion) to small businesses (\$90.7 billion), 10.06% to small disadvantaged businesses (\$35.4 billion), 5.05% to women-owned small businesses (\$17.8 billion), 1.82% to HUBZone small businesses (\$6.4 billion), and 3.93% to service-disabled veteran-owned small businesses (\$13.8 billion).⁹⁰ The percentage of total reported federal contracts (without exclusions) awarded to those small businesses in FY2015 is also provided in the table for comparative purposes.

Table 5. Federal Contracting Goals and Percentage of FY2015 Federal Contract Dollars Awarded to Small Businesses, by Type

Business Type	Federal Goal	Percentage of FY2015 Federal Contracts (small business eligible)	Percentage of FY2015 Federal Contracts (all reported contracts)
Small Businesses	23.0%	25.75%	22.22%
Small Disadvantaged Businesses	5.0%	10.06%	8.57%
Women-Owned Small Businesses	5.0%	5.05%	4.23%
HUBZone Small Businesses	3.0%	1.82%	1.55%
Service-Disabled Veteran-Owned Small Businesses	3.0%	3.93%	3.28%

Notes: The Federal Procurement Data System (FPDS) is a dynamic system with records updated daily. The small business goaling report for FY2015 reports that small business eligible contracts, as of February 19, 2016, totaled \$352.3 billion and that \$90.7 billion was awarded to small businesses, \$35.4 billion to small disadvantaged businesses, \$17.8 billion to women-owned small businesses, \$6.4 billion to SBA-certified HUBZone small businesses, and \$13.8 billion to service-disabled veteran-owned small businesses. The small business goaling

⁸⁹ 15 U.S.C. §644(g)(1)-(2).

⁹⁰ U.S. General Services Administration, Federal Procurement Data System—Next Generation, “Small Business Goaling Report: Fiscal Year 2015,” at https://www.fpds.gov/downloads/top_requests/FPDSNG_SB_Goaling_FY_2015.pdf.

report for FY2015 does not indicate the total amount of federal contracts reported in the FPDS at the time it was generated. Therefore, the percentages provided in the column for all reported contracts in FY2015 were calculated using FPDS data as reported on March 2, 2016: \$437.6 billion in total contracts, \$97.3 billion awarded to small businesses, \$37.5 billion to small disadvantaged businesses, \$18.5 billion to women-owned small businesses, \$6.8 billion to HUBZone small businesses, and \$14.3 billion to service-disabled veteran-owned small businesses.

In a related development, on November 17, 2015, the House passed H.R. 1694, the Fairness to Veterans for Infrastructure Investment Act of 2015. The bill would revise the requirement that 10% of the award of contracts for federal-aid highway, federal public transportation, and highway safety research and development programs be set-aside for small businesses owned and controlled by socially and economically disadvantaged individuals. The bill would require the set-aside to include veteran-owned small businesses.

In another related development, the U.S. Supreme Court's recent decision in *Kingdomware Technologies, Inc. v. United States* (decided on June 16, 2016) requiring the VA to grant VOSBs certain preferences when awarding procurement contracts could result in the VA awarding additional contracts to VOSBs.⁹¹

In addition, the prevention of fraud in federal small business contracting programs, and in the SBA's loan programs as well, has been a priority for both Congress and the SBA for many years, primarily because reports of fraud in these programs emerge with some regularity.⁹² Of particular interest to veterans, GAO has found that "the lack of an effective government-wide fraud-prevention program" has left the service-disabled veteran-owned small business program "vulnerable to fraud and abuse."⁹³

Under the Small Business Act, a small business owned and controlled by a service-disabled veteran can qualify for a federal government procurement set-aside (a procurement in which only certain businesses may compete) or a sole-source award (awards proposed or made after soliciting and negotiating with only one source) if the small business is at least 51% unconditionally and directly owned and controlled by one or more service-disabled veteran.⁹⁴ A

⁹¹ CRS Legal Sidebar WSLG1602, *Supreme Court Resolves Lingering Dispute over Contract "Set-Asides" for Veteran-Owned Small Businesses*, by (name redacted). "... In particular, the Court's holding that 38 U.S.C. §8127(d) "unambiguously requires" the VA to "set aside" contracts for VOSBs in certain circumstances means that the VA cannot continue its former practice of making purchases from non-VOSBs through the Federal Supply Schedules (FSS) without first considering whether the contract could be set aside for VOSBs. (A set-aside is a competition in which only eligible small businesses may compete. The FSS is a simplified method for purchasing "commercial items.") This change in procurement practices is likely to increase the VA's spending with VOSBs and could improve its performance as to its goals from contracting with small businesses. However, the VA had previously expressed concern that such a change could negatively affect its mission and operations." See also CRS Report R44401, *Kingdomware Technologies, Inc. v. United States: A Case of Statutory Interpretation and Its Implications for Federal Contracting*, by (name redacted), (name redacted), and (name redacted).

⁹³ GAO, *Service-Disabled Veteran-Owned Small Business Program: Preliminary Information on Actions Taken by Agencies to Address Fraud and Abuse and Remaining Vulnerabilities*, GAO-11-589T, July 28, 2011, p. 3, at <http://www.gao.gov/products/GAO-11-589T>.

⁹⁴ 15 U.S.C. §632(q)(1) & (4); P.L. 108-183, the Veterans Benefits Act of 2003; and P.L. 109-461, the Veterans Benefits, Health Care, and Information Technology Act of 2006.

veteran is defined as a person who has served “in the active military, naval, or air service, and who was discharged or released under conditions other than dishonorable.”⁹⁵ A disability is service related when it “was incurred or aggravated ... in [the] line of duty in the active military, naval, or air service.”⁹⁶

Federal agencies may set aside procurements for service-disabled veteran-owned small businesses only if the contracting officer reasonably expects that offers will be received from at least two responsible small businesses and the award will be made at a fair market price (commonly known as the “rule of two” because of the focus on there being at least two small businesses involved).⁹⁷

Federal agencies may award sole contracts to service-disabled veteran-owned small businesses when (1) the contracting officer does not reasonably expect that two or more service-disabled veteran-owned small businesses will submit offers; (2) the anticipated award will not exceed \$4.0 million (\$6.5 million for manufacturing contracts); and (3) the award can be made at a fair and reasonable price.⁹⁸ Otherwise, sole-source awards may only be made to service-disabled veteran-owned small businesses under other authority, such as the Competition in Contracting Act.⁹⁹ Service-disabled veteran-owned small businesses are not eligible for price evaluation preferences in unrestricted competitions.

The VA is statutorily required to establish annual goals for the awarding of VA contracts to both service-disabled veteran-owned small businesses and small businesses owned by other veterans.¹⁰⁰ The VA is authorized to use “other than competitive procedures” in meeting these goals. For example, it may award any contract whose value is below the simplified acquisition threshold (generally \$150,000) to a veteran-owned business on a sole-source basis, and it may also make sole-source awards of contracts whose value (including options) is between \$150,000 and \$5 million, provided that certain conditions are met. When these conditions are not met, the VA is generally required to set aside the contract for service-disabled or other veteran-owned small businesses.¹⁰¹

Service-disabled veteran-owned small businesses can generally self-certify as to their eligibility for contracting preferences available under the Small Business Act.¹⁰² However, in an effort to address fraud in VA contracting, veteran-owned and service-disabled veteran-owned small

¹⁰² 13 C.F.R. §125.15.

businesses must be listed in the VA's VetBiz database and have their eligibility verified by the VA to be eligible for preferences in certain VA contracts.¹⁰³

Firms that fraudulently misrepresent their size or status have long been subject to civil and criminal penalties under Section 16 of the Small Business Act; SBA regulations implementing Section 16; and other provisions of law, such as the False Claims Act, Fraud and False Statements Act, Program Fraud Civil Remedies Act, and Contract Disputes Act.¹⁰⁴

Several bills were introduced during the 112th Congress to address fraud in small business contracting programs in various ways. Of particular interest to veterans, S. 3572, the Restoring Tax and Regulatory Certainty to Small Businesses Act of 2012, and S. 633, the Small Business Contracting Fraud Prevention Act of 2011, would have, among other changes, amended Section 16 of the Small Business Act to expressly include service-disabled veteran-owned small businesses among the types of small businesses subject to penalties for fraud under that section.¹⁰⁵ The bills would also have required service-disabled veteran-owned small businesses to register in the VA's VetBiz database, or any successor database, and have their status verified by the VA to be eligible for contracting preferences for service-disabled veteran-owned small businesses under the Small Business Act.

In addition, during the 113th Congress, S. 2334, the Improving Opportunities for Service-Disabled Veteran-Owned Small Businesses Act of 2013, and its companion bill in the House, H.R. 2882, and H.R. 4435, the Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015, which was passed by the House on May 22, 2014, included a provision that would have authorized the transfer of the VetBiz database's administration and the verification of service-disabled veteran owned small businesses from the VA to the SBA.

Advocates of requiring service-disabled veteran-owned small businesses to register in the VetBiz database and have their status verified by the VA (or the SBA) to be eligible for contracting preferences under the Small Business Act argue that doing so would reduce fraud.¹⁰⁶ As then-Senator Snowe stated on the Senate floor when she introduced S. 633, "Our legislation attempts to remedy the spate of illegitimate firms siphoning away contracts from the rightful businesses trying to compete within the SBA's contracting programs."¹⁰⁷

Others worry that requiring service-disabled veteran-owned small businesses to register in the VetBiz database and have their status verified by the VA (or the SBA) to be eligible for

¹⁰³ 38 U.S.C. §8127(a)(1)(A). P.L. 109-461 requires the Secretary of Veterans Affairs to "establish a goal for each fiscal year for participation in Department contracts (including subcontracts)" by veteran-owned small businesses. The Secretary is also required to establish a separate goal for the participation of service-disabled veteran-owned small businesses in agency contracts and subcontracts. 38 U.S.C. §8127(a)(1)(A). However, the latter goal can be no less than the government-wide goal for the percentage of contract and subcontract dollars awarded to service-disabled veteran-owned small businesses given in Section 15(g)(1) of the Small Business Act (currently 3%), while the former goal is within the Secretary's discretion. See 38 U.S.C. §8127(a)(2)-(3).

¹⁰⁴ See 15 U.S.C. §645; and 13 C.F.R. §125.29.

¹⁰⁵ Currently, Section 36 of the Small Business Act, which governs set-asides and sole-source awards for service-disabled veteran-owned small businesses, provides that "[r]ules similar to the rules of paragraphs (5) and (6) of Section 637(m) of this title shall apply for purposes of this section." Section 8(m) governs set-asides for women-owned small businesses and itself provides that such businesses are subject to penalties for fraud under Section 16. Thus, an argument could potentially be made that service-disabled veteran-owned small businesses are currently subject to penalties under Section 16 even if they are not expressly included there. See CRS Report R43573, *Federal Contracting and Subcontracting with Small Businesses: Legislation in the 113th Congress*, by (name redacted).

¹⁰⁶ See 13 C.F.R. §§125.9-125.13.

¹⁰⁷ Senator Olympia Snowe, "Statements on Introduced Bills and Joint Resolutions," remarks in the Senate, *Congressional Record*, vol. 157, part no. 41 (March 17, 2011), p. S1843.

contracting preferences under the Small Business Act may add to the paperwork burdens of small businesses. They seek alternative ways to address the need to reduce fraud in federal small business procurement programs that do not increase the paperwork requirements of small businesses.¹⁰⁸ Still others note that the effectiveness of any change to prevent fraud in veteran-owned and service-disabled veteran-owned small business procurement programs largely depends upon how the change is implemented. For example, in July 2011, the VA's Office of Inspector General concluded that the VA's implementation of its veteran-owned and service-disabled veteran-owned small business procurement fraud prevention programs needed improvement:

We project that VA awarded ineligible businesses at least 1,400 VOSB [Veteran Owned Small Business] and SDVOSB [Service-Disabled Veteran Owned Small Business] contracts valued at \$500 million annually and that it will award about \$2.5 billion in VOSB and SDVOSB contracts to ineligible businesses over the next 5 years if it does not strengthen oversight and verification procedures. VA and the Office of Small and Disadvantaged Business Utilization (OSDBU) need to improve contracting officer oversight, document reviews, completion of site visits for "high-risk" businesses, and the accuracy of VetBiz Vendor Information Pages information.¹⁰⁹

For further information and analysis concerning legislation designed to address fraud in small business contracting programs, see CRS Report R43573, *Federal Contracting and Subcontracting with Small Businesses: Legislation in the 113th Congress*, by (name redacted).

The Military Reservist Economic Injury Disaster Loan Program

P.L. 106-50, the Veterans Entrepreneurship and Small Business Development Act of 1999, signed into law on August 17, 1999, authorized the SBA's Military Reservist Economic Injury Disaster Loan (MREIDL) program. The SBA published the final rule establishing the program in the *Federal Register* on July 25, 2001, with an effective date of August 24, 2001.¹¹⁰

The Senate Committee on Small Business provided, in its committee report on the Veterans Entrepreneurship and Small Business Development Act of 1999, the following reasons for supporting the authorization of the MREIDL Program:

During and after the Persian Gulf War in the early 1990's, the Committee heard from reservists whose businesses were harmed, severely crippled, or even lost, by their absence. Problems faced by reservists called to active duty and their small businesses were of a varied nature and included cash-flow problems, difficulties with training an appropriate alternate manager on very short notice to run the business during the period of service, lost clientele upon return, and on occasion, bankruptcy. These hardships can occur during a period of national emergency or during a period of contingency operation when troops are deployed overseas.

¹¹⁰ SBA, "Military Reservist Economic Injury Disaster Loans," 66 *Federal Register* 38528-38531, July 25, 2001.

To help such reservists and their small businesses, the Committee seeks to provide credit and management assistance to small businesses when an essential employee (i.e., an owner, manager or vital member of the business' staff) is a reservist called to active duty. The Committee believes that financial assistance in the form of loans, loan deferrals and managerial guidance are effective ways to minimize the adverse financial demands of the call to active duty. They not only ameliorate financial difficulties but also strengthen small businesses.¹¹¹

The House Committee on Small Business also supported the program's authorization, indicating in its committee report that the program

will also fulfill a long unmet need to assist our military reservists who are small business owners. Often these individuals, called to service at short notice, come back from fighting to protect our freedoms only to find their businesses in shambles. H.R. 1568 will establish loan deferrals, technical and managerial assistance, and loan programs for these citizen soldiers so that while they risk their lives they need not risk their livelihoods.¹¹²

As mentioned previously, the SBA provides direct loans for owners of businesses of all sizes, homeowners, and renters to assist their recovery from natural disasters. The SBA's MREIDL program provides disaster assistance in the form of direct loans of up to \$2 million to help small business owners who are not able to obtain credit elsewhere to (1) meet ordinary and necessary operating expenses that they could have met but are not able to meet; or (2) enable them to market, produce, or provide products or services ordinarily marketed, produced, or provided by the business that cannot be done because an essential employee has been called up to active duty in his or her role as a military reservist or member of the National Guard due to a period of military conflict.¹¹³ Under specified circumstances, the SBA may waive the \$2 million limit (e.g., the small business is in immediate danger of going out of business, is a major source of employment, employs 10% or more of the workforce within the commuting area in which the business is located).¹¹⁴

P.L. 106-50 defines an essential employee as "an individual who is employed by a small business concern and whose managerial or technical expertise is critical to the successful day-to-day operations of that small business concern."¹¹⁵ The act defines a military conflict as (1) a period of war declared by Congress; or (2) a period of national emergency declared by Congress or the President; or (3) a period of contingency operation. A contingency operation is designated by the Secretary of Defense as an operation in which our military may become involved in military actions, operations, or hostilities (peacekeeping operations).¹¹⁶

¹¹² *Ibid.*, p. 15.

¹¹³ SBA, "Disaster Assistance Program: SOP 50-30-7," May 13, 2011, p. 48, at <https://www.sba.gov/sites/default/files/sops/SOP%2050%2030%207.pdf>; and 13 C.F.R. §123.508. For further information and analysis concerning the SBA's disaster assistance loan program, see CRS Report R41309, *The SBA Disaster Loan Program: Overview and Possible Issues for Congress*, by (name redacted) .

¹¹⁴ 13 C.F.R. §123.507.

¹¹⁵ P.L. 106-50, the Veterans Entrepreneurship and Small Business Development Act of 1999, Section 402. Assistance To Active Duty Military Reservists; and 15 U.S.C. §636(b). The SBA's Military Reservist Economic Injury Disaster Loan Program applies to economic injury suffered or likely to be suffered as the result of a period of military conflict occurring or ending on or after March 24, 1999.

¹¹⁶ P.L. 106-50, Section 402 and 15 U.S.C. §636(c).

The SBA is authorized to make such disaster loans either directly or in cooperation with banks or other lending institutions through agreements to participate on an immediate or deferred basis. The loan term may be up to a maximum of 30 years and is determined by the SBA in accordance with the borrower's ability to repay the loan. The loan's interest rate is the SBA's published interest rate for an Economic Injury Disaster Loan at the time the application for assistance is approved by the SBA. Economic Injury Disaster Loan interest rates may not exceed 4%.

The SBA is not required by law to require collateral on disaster loans. However, the SBA has established collateral requirements for disaster loans based on "a balance between protection of the Agency's interest as a creditor and as a provider of disaster assistance."¹¹⁷ The SBA generally does not require collateral to secure a MREIDL loan of \$50,000 or less. Larger loan amounts require collateral, but the SBA will not decline a request for a MREIDL loan for a lack of collateral if the SBA is reasonably certain the borrower can repay the loan.¹¹⁸

The SBA disbursed one MREIDL loan of \$19,500 in FY2014, and none in FY2015. Since the MREIDL's inception through September 30, 2015, the SBA has disbursed 346 MREIDL loans amounting to \$32.42 million. Of these 346 loans, 73 loans (21.1% of the total number of MREIDL loans disbursed), amounting to \$7.76 million (23.96% of the total amount of MREIDL loans disbursed), have been charged off (a declaration that the debt is unlikely to be collected) by the SBA.¹¹⁹

Because the MREIDL program is relatively small and noncontroversial, this report does not present a discussion of the congressional issues affecting the program.

Concluding Observations

Congressional interest in federal programs designed to assist veterans in their transitions from military into civilian life has increased in recent years for a variety of reasons, especially because of the relatively high rate of unemployment experienced by veterans who have left the military since 2001. The SBA's veteran assistance programs have also experienced a heightened level of congressional interest and scrutiny in recent Congresses. For example, the SBA's veteran business development programs, loan guaranty programs, and federal procurement programs for small businesses generally, including service-disabled veteran-owned small businesses, have all been subject to congressional hearings during the past two Congresses. Also, as has been discussed, several bills have been introduced in recent Congresses to address the SBA's management of these programs and fraud.

Given the many factors that influence business success, measuring the effectiveness of the SBA's veteran assistance programs, especially the programs' effect on veteran job retention and creation, is both complicated and challenging. For example, it is difficult to determine with any degree of precision or certainty the extent to which any changes in the success of a small business result primarily from that business's participation in the SBA's programs or from changes in the broader economy. That task is made even more challenging by the absence of performance outcome measures that could serve as a guide. In most instances, the SBA uses program performance

¹¹⁷ SBA, "Disaster Assistance Program: SOP 50-30-7," May 13, 2011, p. 152, at <https://www.sba.gov/sites/default/files/sops/SOP%2050%2030%207.pdf>.

¹¹⁸ 13 C.F.R. §123.513.

¹¹⁹ SBA, Office of Congressional and Legislative Affairs, "Correspondence with Robert Dilger," April 7, 2016. In FY2011, the SBA disbursed 10 MREIDL loans amounting to \$1.15 million. In FY2012, the SBA disbursed seven MREIDL loans amounting to \$834,300. In FY2013, the SBA disbursed three MREIDL loans amounting to \$121,200.

measures that focus on indicators that are primarily output related, such as the number and amount of loans approved for veteran-owned small businesses and the number and amount of federal contracts awarded to service-disabled veteran-owned small businesses.

Both GAO and the SBA's Office of Inspector General have recommended that the SBA adopt more outcome-related performance measures for the SBA's loan guaranty programs, such as tracking the number of borrowers that remain in business after receiving a SBA guaranteed loan to measure the extent to which the SBA contributed to their ability to stay in business.¹²⁰ Other performance-oriented measures that Congress might also consider include requiring the SBA to survey veterans who participate in its business development programs or who have received a SBA guaranteed loan. This survey could provide information related to the difficulty the veterans experienced in obtaining a loan from the private sector, their experiences with the SBA's loan application process, and the role the SBA loan had in creating or retaining jobs. The SBA could also survey service-disabled veteran-owned small businesses that were awarded a federal contract to determine the extent to which the SBA was instrumental in their receiving the award and the extent to which the award contributed to their ability to create jobs or expand their scope of operations.
