R44121

Summary

The Land and Water Conservation Fund (LWCF) Act of 1965 (P.L. 88-578) created the LWCF in the Treasury as a funding source to implement the outdoor recreation goals set out by the act. The fund is authorized at \$900 million annually through September 30, 2018. In general, monies in the fund are available for outdoor recreation purposes only if appropriated by Congress. The level of annual appropriations has varied widely since the origin of the fund.

The LWCF Act outlines uses of the fund for federal and state purposes. It lists the federal purposes for which the President is to allot LWCF funds “unless otherwise allotted in the appropriation Act making them available.” These purposes primarily relate to acquisition of lands and waters (and interests therein) by the federal government. With regard to state purposes, the act authorizes a matching grant program to states for outdoor recreation purposes, namely for recreation planning, acquisition of lands and waters (and interests therein), and development. Throughout the LWCF’s history, appropriations acts have provided funds for land acquisition and outdoor recreational grants to states.

Beginning in FY1998, appropriations also have been provided each year (except FY1999) to fund other purposes related to natural resources. The extent to which the LWCF should be used for purposes other than federal land acquisition and outdoor recreation grants to states, and which other purposes should be funded from the LWCF, continues to be of debate in Congress. Over the past two decades, Presidents have sought LWCF funds for a variety of purposes. Congress chooses which if any of these requests to fund, and it may choose other programs not suggested by the President. Appropriations have been provided for facility maintenance of the land management agencies, ecosystem restoration, the Historic Preservation Fund, the Payments in Lieu of Taxes program, the Forest Legacy program, State and Tribal Wildlife Grants under the Fish and Wildlife Service (FWS), the Cooperative Endangered Species Conservation Fund, U.S. Geological Survey science and cooperative programs, and Bureau of Indian Affairs Indian Land and Water Claim Settlements, among other programs.

Since FY1998, a total of \$2.5 billion has been appropriated for other purposes, of a total LWCF appropriation of \$17.5 billion over the history of the fund (since FY1965). FWS and the Forest Service (FS) have received the largest shares of the total appropriations for other purposes, about \$1.4 billion (55%) and \$0.9 billion (35%), respectively, from FY1998 to FY2016. Several agencies shared the remaining \$0.2 billion (10%) of the appropriations.

Both the dollar amounts and the percentages of annual LWCF appropriations for other purposes have varied widely since FY1998. The dollar amounts have ranged from \$0 in FY1999 to \$456.0 million in FY2001, with an average of \$129.2 million annually. The highest percentage of annual funds provided for other purposes occurred in FY2006 and FY2007 (59% in both years). In some years, the appropriation for other purposes was significantly less than the Administration requested. For instance, in FY2008 the George W. Bush Administration sought \$313.1 million for other purposes, or 83% of the total request. The FY2008 appropriation for other purposes was \$101.3 million, or 40% of the LWCF total.

In earlier years, several other purposes typically were funded each year from LWCF. Since FY2008, funds have been appropriated annually only for grants under two programs: Forest Legacy and Cooperative Endangered Species Conservation Fund. These two programs and a third grant program funded in the past from LWCF—FWS State and Tribal Wildlife Grants—have received about three-quarters (\$1.9 billion, 77%) of the total appropriation for other purposes since FY1998.

----------------------------------	----

Introduction

The Land and Water Conservation Fund (LWCF) Act of 1965¹ was enacted to “assist in preserving, developing, and assuring accessibility to ... outdoor recreation resources.”² Two main goals of the law were to facilitate participation in recreation and “to strengthen the health and vitality” of U.S. citizens.³ To accomplish these goals, purposes of the law included “providing funds” for federal land acquisition and for federal assistance to states generally related to outdoor recreation.

The law created the LWCF in the Treasury as a funding source to implement its outdoor recreation goals. The fund is authorized at \$900 million annually through September 30, 2018. The fund accumulates the majority of its revenues from oil and gas leases on the Outer Continental Shelf (OCS). It also accumulates revenues from the federal motorboat fuel tax and surplus property sales.

In general, monies in the fund are available for outdoor recreation purposes only if appropriated by Congress.⁴ The level of annual appropriations has varied widely since the fund’s origin in FY1965. Of the total revenues that have accrued throughout the program’s history (\$38.0 billion), less than half have been appropriated (\$17.5 billion). Thus, the unappropriated balance in the fund is currently estimated at approximately \$20.5 billion.⁵

The LWCF Act outlines uses of the fund for federal and state purposes. It lists the federal purposes for which the President is to allot LWCF funds “unless otherwise allotted in the appropriation Act making them available.”⁶ These purposes primarily relate to the acquisition of lands and waters (and interests therein)⁷ by the federal government. With regard to state purposes, the act authorizes a matching grant program to states for outdoor recreation purposes, specifically recreation planning, acquisition of lands and waters (and interests therein), and development.

In practice, over the history of the LWCF, appropriations acts have provided funding for three general purposes. First, for each year since FY1965, appropriations for land acquisition have been provided to some or all of the major federal land management agencies—the Bureau of Land Management (BLM), Fish and Wildlife Service (FWS), National Park Service (NPS), and Forest

¹ Land and Water Conservation Fund (LWCF) Act of September 3, 1964 (P.L. 88-578; 78 Stat. 897). The text of the law had been codified at 16 U.S.C. §§4601-4 et seq. It was recodified under P.L. 113-287 to 54 U.S.C. §§200301 et seq.

² P.L. 88-578, Section 1(b).

³ *Ibid.*

⁴ However, monies provided to the state grant program under §105, Division C, of the Tax Relief and Health Care Act of 2006 (P.L. 109-432) are permanently appropriated. These mandatory funds generally have comprised a relatively small portion of the appropriations for the state grant program to date, although the appropriations are expected to increase “significantly” beginning in FY2018 due to additional revenues from leasing in the Gulf of Mexico, according to the Administration. See U.S. Department of the Interior (DOI), National Park Service (NPS), *Budget Justifications and Performance Information, Fiscal Year 2016*, p. M-LASA-G-1.

⁵ These figures are derived primarily from DOI, Office of Budget, “Budget Background Information,” at <http://www.doi.gov/budget/budget-data.cfm>. See the entry for “Land and Water Conservation Fund Receipts: MS Excel Spreadsheet.” These data were updated by DOI on March 5, 2014, and by CRS using the annual Department of the Interior, *Interior Budget in Brief*. See for example *Fiscal Year 2017: The Interior Budget in Brief*, p. B-1, at <https://www.doi.gov/budget>.

In this report, in some cases the figures do not sum to the totals provided or the percentages do not correspond precisely to the numbers provided due to rounding.

⁶ 54 U.S.C. §200306(a).

⁷ An interest is something less than full ownership, such as a conservation easement or minerals.

Service (FS). Second, for nearly every year since FY1965, appropriations have funded the matching grant program to assist states in recreational planning, acquiring recreational lands and waters, and developing outdoor recreational facilities. Third, beginning in FY1998, appropriations from the LWCF have been provided each year, except FY1999, to fund other federal programs with related natural resource purposes. Hereinafter, the third type of appropriations is referred to as funding *other purposes*.

The \$17.5 billion appropriated from the fund through FY2016 has been allocated unevenly among federal land acquisition, the state grant program, and other purposes. The largest portion of the total—\$10.7 billion—has been appropriated for federal land acquisition. The state grant program has received the second-largest portion, \$4.4 billion. Other purposes have received the remaining \$2.5 billion.

Congress continues to consider the extent to which the LWCF should fund purposes other than federal land acquisition and outdoor recreation grants to states. Some Members of Congress, the Obama Administration, and others have supported funding a broader array of other purposes to draw on the balance in the fund for policy priorities, to shift the focus of the fund from land acquisition, or to achieve other goals. Activities proposed recently to be funded from the LWCF have included maintenance of facilities managed by the land management agencies, the Payments in Lieu of Taxes Program,⁸ certain offshore energy exploration activities, grants to economically distressed urban communities for indoor and outdoor recreation, and financial assistance (from the Secretary of Housing and Urban Development) for park and infrastructure projects.⁹ Some traditional fund advocates and beneficiaries have expressed concern about expanding the use of the funds, particularly if such expansion results in less appropriations for land acquisition and outdoor recreation grants to states.

The balance of this report discusses the other purposes for which LWCF appropriations have been provided throughout the fund's history. It identifies the amount of funding contained in annual appropriations laws for other purposes and the types of purposes for which funds have been appropriated.¹⁰

LWCF Appropriations for Other Purposes

Level of Funding

Congress first provided for the use of LWCF funds for other purposes in FY1998, appropriating \$72.0 million for other purposes. The appropriation included \$60.0 million for maintenance needs of the four land management agencies and \$12.0 million for rehabilitation and maintenance of the Beartooth Highway (in Wyoming and Montana). In FY1998, total LWCF appropriations spiked dramatically to \$969 million¹¹ from the FY1997 level of \$159 million.¹²

⁸ This program compensates counties and local governments for nontaxable lands within their jurisdictions. For additional information, see CRS Report RL31392, *PILT (Payments in Lieu of Taxes): Somewhat Simplified*, by (name redacted)

⁹ The American Battlefield Protection Program, which currently receives LWCF funding through the NPS, has been included in some proposals.

¹⁰ For additional background on the LWCF, see CRS Report RL33531, *Land and Water Conservation Fund: Overview, Funding History, and Issues*, by (name redacted)

¹¹ FY1998 was the first year that LWCF total appropriations exceeded the authorized level of \$900 million. The only other year in which total LWCF appropriations exceeded the authorized level was FY2001, with total appropriations of (continued...)

Both the dollar amounts and the percentages of annual LWCF appropriations for other purposes have varied widely since FY1998. The annual average dollar amount appropriated from FY1998 to FY2016 was \$129.2 million. Over the most recent 10 years, LWCF appropriations for other purposes declined from \$216.1 million in FY2007 to \$93.1 million in FY2016 (in current dollars). Since FY2011, appropriations for each year were less than \$100 million and lower than any year except for FY1998-FY2000.

Appropriations for other purposes were at their lowest dollar amount in FY1999, when no funds for other purposes were appropriated. The next-lowest dollar value was provided for FY2000, when a total of \$20.0 million was appropriated for three purposes: Elwha River Ecosystem restoration (in Washington), deferred maintenance of the National Park Service, and the FS Forest Legacy program.

By contrast, the dollar value of the appropriations for other purposes was much higher in FY2001 (\$456.0 million) than in any other year. These appropriations were used to fund more than a dozen programs in the Clinton Administration's Lands Legacy Initiative. In that year, total LWCF appropriations exceeded the authorized level, totaling nearly \$1 billion. This record level of funding was provided partly in response to the President's Lands Legacy Initiative, which sought \$1.4 billion for about two dozen resource-protection programs, including the LWCF. It also was provided partly in response to some congressional interest in securing increased and more certain funding for the LWCF.

The highest percentage of annual funds provided for other purposes occurred in FY2006 and FY2007 (59% in both years), in response to President George W. Bush's request for funding for an array of programs. For instance, in FY2007 the Bush Administration sought funding from the LWCF for 15 programs in addition to land acquisition and state grants. For that year, the appropriation for other purposes was \$216.1 million, out of a total LWCF appropriation of \$366.1 million.

In some years, the appropriation for other purposes was significantly less than the Administration requested. For example, for FY2008 the Bush Administration sought \$313.1 million for other purposes, or 83% of the total request of \$378.7 million. The FY2008 appropriation for other purposes was \$101.3 million, or 40% of the LWCF total of \$255.1 million.

The \$2.5 billion appropriated from the LWCF from FY1998 to FY2016 for other purposes represents 29% of the \$8.6 billion total appropriations from LWCF during the period. FWS and FS have received the largest shares of the appropriations for other purposes, about \$1.4 billion (55%) and \$0.9 billion (35%), respectively. BLM, NPS, the U.S. Geological Survey, and the Bureau of Indian Affairs have shared the remaining \$0.2 billion (10%) of the appropriations for other purposes.

(...continued)

\$995 million.

¹² The \$969 million appropriated in FY1998 was included in the Department of the Interior and Related Agencies Appropriations Act, 1998 (P.L. 105-83). The law contained \$270 million in the usual funding titles for land acquisition by the four federal land management agencies and the state grant program (administration only), and \$699 million in a new Title V (entitled "Priority Land Acquisitions, Land Exchanges, and Maintenance").

Types of Purposes

Because there is no set of other purposes specified to be funded from LWCF, presidents have sought funds for a variety of purposes. Congress has chosen which of these requests to fund¹³ and whether to fund any additional programs not suggested by the President. Appropriations for other purposes have been provided for more than a dozen diverse natural resource-related programs, including facility maintenance of the land management agencies, ecosystem restoration, the Historic Preservation Fund, the Payments in Lieu of Taxes program, the FS Forest Legacy program, FWS State and Tribal Wildlife Grants, the FWS Cooperative Endangered Species Conservation Fund, U.S. Geological Survey science and cooperative programs, and Bureau of Indian Affairs Indian Land and Water Claim Settlements.

Although in earlier years several other purposes typically were funded from LWCF, since FY2008 funds have been appropriated annually only for grants under two programs: Forest Legacy and Cooperative Endangered Species Conservation Fund. The total appropriation from LWCF for these two programs (since FY1998) is \$1.4 billion, or 59% of all appropriations for other purposes (\$2.5 billion). These two programs and a third grant program—FWS State and Tribal Wildlife Grants—have received about three-quarters (\$1.9 billion, 77%) of the total appropriations for other purposes. The appropriations to date are \$770.5 million for Forest Legacy (31% of the other purposes total), \$672.1 million for Cooperative Endangered Species Conservation Fund (27% of total), and \$448.5 million for State and Tribal Wildlife Grants (18% of total).

Grants under the Forest Legacy program are used to acquire lands or conservation easements to preserve private forests threatened by conversion to non-forest uses, such as agriculture or residences. FS provides matching grants through a competitive process that requires state approval and then national approval and ranking. The ranking is based on the importance of the project (potential public benefits from protection), the likelihood of the forest's conversion to non-forest uses, and the strategic relevance of the project. The program is implemented primarily through state partners, usually state forestry agencies. State partners generally acquire, hold, and administer the easements or land purchases, although the federal government also may do so.¹⁴

The Cooperative Endangered Species Conservation Fund provides grants "for species and habitat conservation actions on non-federal lands, including habitat acquisition, conservation planning, habitat restoration, status surveys, captive propagation and reintroduction, research, and education."¹⁵ In addition to appropriations from LWCF, the Cooperative Endangered Species Conservation Fund typically receives additional appropriations from the General Fund of the Treasury. In recent years, the appropriations from LWCF have been used for two types of land acquisition grants provided to state and other nonfederal entities on a matching basis. *Recovery* land acquisition grants have been made for acquisition of habitats by states or other entities in support of species recovery goals and objectives. *Habitat conservation plan* land acquisition

¹³ In a number of cases, presidents have sought LWCF funding for more other purposes than Congress has chosen to fund. For instance, for FY2005 President Bush requested \$900.2 million for LWCF; this total included \$586.1 million for 15 other purposes within the Bureau of Land Management (BLM); Fish and Wildlife Service (FWS); NPS; Forest Service (FS); and DOI's Departmental Management. The FY2005 appropriations law contained \$459.0 million for LWCF, including \$203.5 million for five other purposes.

¹⁴ For additional information on Forest Legacy, see CRS Report RL31065, *Forestry Assistance Programs*, by (name redacted) pp. 13-14 and FS, "Forest Legacy Program," at <http://www.fs.fed.us/spf/coop/programs/loa/flp.shtml>.

¹⁵ DOI, FWS, *Budget Justifications and Performance Information, Fiscal Year 2017*, p. CESC-3, at <https://www.doi.gov/budget>. Hereinafter this document is referred to as FY2017 FWS Budget Justification.

grants have been made for acquisition by states, territories, or other entities of lands that are associated with habitat conservation plans. Both programs acquire lands from willing sellers.¹⁶

State and Tribal Wildlife Grants are provided to states, territories, and tribes to develop and implement programs for the benefit of fish and wildlife and their habitats, including nongame species. Currently, the largest portion of the program is for formula grants to states and territories on a matching basis. Funds from the formula grants may be used to develop state conservation plans and to support specific conservation projects. Smaller amounts of funding have been appropriated for competitive grants to states and tribal governments or tribal wildlife agencies. The competitive grant programs do not have matching requirements.¹⁷

Table 1 and **Figure 1**, below, show the total LWCF appropriations for other purposes from FY1998 to FY2016. **Table 2** shows the other purposes that received LWCF appropriations each year, the amount of LWCF appropriations for each purpose, and the total annual appropriations for other purposes.

Source: Figures in this table were provided to CRS by Department of the Interior and Forest Service Budget Offices in April 2015, and updated by CRS from Department of the Interior, *Fiscal Year 2017: The Interior Budget in Brief*, p. B-1, at <https://www.doi.gov/budget>.

Notes: BLM = Bureau of Land Management, FWS = Fish and Wildlife Service, NPS = National Park Service, USGS = United States Geological Survey, BIA = Bureau of Indian Affairs, FS = Forest Service. In general, figures reflect rescissions, transfers, and sequestration (FY2013). Figures are in current dollars.

- a. This program affects multiple agencies in the Department of the Interior and agencies in other departments. It formerly was managed by BLM, but now is managed as a department-wide program through the Office of the Secretary of the Department of the Interior.
- b. The appropriations were for science and cooperative programs.
- c. This figure reflects appropriations for maintenance, including \$12.0 million for repair and maintenance of the Beartooth Highway as part of the Crown Butte/New World Mine land acquisition.
- d. This figure reflects \$50.0 million for deferred maintenance, \$20.0 million for the National Forest System for inventory and monitoring activities and planning, and \$4.0 million for State and Private Forestry for urban and community forestry programs, with rescissions.
- e. The total FY2001 FS appropriation from the LWCF was \$254.6 million. This total, and the appropriations reflected in this table for FS other programs, does not reflect a reduction of \$153.1 million for funds not "warranted" from LWCF. The Government Accountability Office defines *warrant* as "An official document that the Secretary of the Treasury issues upon enactment of an appropriation that establishes the amount of moneys authorized to be withdrawn from the central accounts that the Department of the Treasury maintains." See U.S. Government Accountability Office, *A Glossary of Terms Used in the Federal Budget Process*, p. 101, September 2005, on the agency's website at <http://www.gao.gov/new.items/d05734sp.pdf>.
- f. This figure does not reflect a \$4.5 million rescission of prior-year balances.

EveryCRSReport.com

The Congressional Research Service (CRS) is a federal legislative branch agency, housed inside the Library of Congress, charged with providing the United States Congress non-partisan advice on issues that may come before Congress.

EveryCRSReport.com republishes CRS reports that are available to all Congressional staff. The reports are not classified, and Members of Congress routinely make individual reports available to the public.

Prior to our republication, we redacted names, phone numbers and email addresses of analysts who produced the reports. We also added this page to the report. We have not intentionally made any other changes to any report published on EveryCRSReport.com.

CRS reports, as a work of the United States government, are not subject to copyright protection in the United States. Any CRS report may be reproduced and distributed in its entirety without permission from CRS. However, as a CRS report may include copyrighted images or material from a third party, you may need to obtain permission of the copyright holder if you wish to copy or otherwise use copyrighted material.

Information in a CRS report should not be relied upon for purposes other than public understanding of information that has been provided by CRS to members of Congress in connection with CRS' institutional role.

EveryCRSReport.com is not a government website and is not affiliated with CRS. We do not claim copyright on any CRS report we have republished.
