R41253

Summary

Self-employment is one potential pathway to exit a spell of unemployment. The regular Unemployment Compensation (UC) program generally requires unemployed workers to be actively seeking work and to be available for wage and salary jobs as a condition of eligibility for UC benefits. These requirements constitute a barrier to self-employment and small business creation for unemployed workers who need income support. The Self-Employment Assistance (SEA) program, however, provides an avenue for combining income support during periods of unemployment with activities related to starting one's own business.

Thus, within the joint federal-state UC program, the SEA program focuses on the reemployment of UC beneficiaries. State SEA programs help unemployed workers generate their own jobs through small business creation. SEA waives state UC work search requirements for those individuals who are working full time to establish their own small businesses. SEA provides a weekly allowance in the same amount and for the same duration as regular UC benefits. It is available only to individuals who would otherwise be entitled to UC benefits and have been determined likely to exhaust their UC benefits. Despite the unique configuration of SEA, which pairs self-employment activities and income support, participation in the program by states as well as unemployed workers is limited. Currently, only 10 states have active SEA programs for UC claimants, and in one of these states—New York—authorization for the SEA program is scheduled to expire December 7, 2017. In part, the small-scale nature of the program is likely due to the authorizing legislation requirement that SEA be budget neutral; that is, no UC funds may be used to provide self-employment training.

P.L. 103-182, the North American Free Trade Agreement Implementation Act, created the SEA program on December 8, 1993. It was permanently authorized by P.L. 105-306, the Noncitizen Benefit Clarification and Other Technical Amendments Act, which was signed on October 28, 1998. Like the rest of UC, the SEA program is financed by federal taxes under the Federal Unemployment Tax Act (FUTA) and by state payroll taxes under the State Unemployment Tax Acts (SUTA).

Most recently, provisions in P.L. 112-96, the Middle Class Tax Relief and Job Creation Act of 2012, gave states the authority to expand SEA participation to certain claimants in the Extended Benefit (EB) and temporary, now-expired Emergency Unemployment Compensation (EUC08) programs.

The Self-Employment Assistance Program

In 2015, 9.5 million workers were self-employed, making up 6.4% of all workers.¹ Yet the joint federal-state Unemployment Compensation (UC) program does not provide benefits to the self-employed.² To be eligible for UC benefits, individuals generally must be able, available, and actively seeking work in wage and salary jobs. The Self-Employment Assistance (SEA) program offers an exception to this eligibility framework. It pays a weekly SEA allowance, which is identical in amount and duration to what an individual would have received as a regular UC benefit. Unlike regular UC, however, SEA waives state requirements that individuals be actively searching for wage and salary jobs. Instead, UC-eligible individuals participate in self-employment activities and must meet additional requirements, including being determined likely to exhaust their UC benefits.

SEA allowances are available to individuals who are eligible for unemployment benefits and who meet certain other requirements. SEA is one of three programs operating within UC that focuses on the reemployment of UC beneficiaries. The other two UC reemployment service programs include the Short-Term Compensation (STC) program and the Worker Profiling and Reemployment Services (WPRS) program. In participating states, STC programs provide pro-rated unemployment benefits to workers whose hours have been reduced in lieu of a layoff, thereby retaining workers.³ WPRS requires all states to establish systems to identify UC claimants likely to exhaust benefits and refer them to various types of reemployment services (e.g., orientation, assessment, counseling, placement services, a job search workshop, and referral to training). Thus, in addition to the job-sharing of STC and the profiling of WPRS, SEA attempts to reemploy UC beneficiaries through self-employment. Although SEA offers this alternative route out of unemployment, participation in the program by states and unemployed workers is low, partly as a result of a budget neutrality requirement.

P.L. 103-182, the North American Free Trade Agreement Implementation Act, created the SEA program in 1993.⁴ P.L. 105-306, the Noncitizen Benefit Clarification and Other Technical Amendments Act of 1998, made the program permanent. The SEA program is financed—as is the case with UC, in general—by federal taxes on employers under the Federal Unemployment Tax Act (FUTA) and by state payroll taxes on employers under the State Unemployment Tax Acts (SUTA). The operation of SEA programs in states may not cost more than what would have been spent if a state had not participated in the program (i.e., budget neutrality). Moreover, the number of individuals participating in the SEA program in states may not exceed 5% of all UC beneficiaries.

P.L. 112-96, the Middle Class Tax Relief and Job Creation Act of 2012, authorized the expansion of SEA to permit states to set up SEA programs available to certain claimants in the Extended

¹ Data on employment, including self-employment, are available from the Current Population Survey (CPS). Conducted by the Bureau of Labor Statistics, the CPS is a monthly survey of approximately 60,000 U.S. households. It provides information on the labor force status of the civilian population aged 16 and older.

² For information on the UC program as well as other types of unemployment benefits available to workers, see CRS Report RL33362, *Unemployment Insurance: Programs and Benefits*, by (name redacted) and (name redacted).

³ Currently, approximately half of the states and the District of Columbia have STC programs. For more information on short-time compensation, see CRS Report R40689, *Compensated Work Sharing Arrangements (Short-Time Compensation) as an Alternative to Layoffs*, by (name redacted).

⁴ Section 3306(t) of the Federal Unemployment Tax Act (FUTA) defines the Self-Employment Assistance (SEA) program. Section 303(a)(5) of the Social Security Act permits the use of expenditures from the Unemployment Trust Fund (UTF) for SEA.

Benefit (EB) and temporary, now-expired Emergency Unemployment Compensation (EUC08) programs.⁵ P.L. 112-96 also provided \$35 million in grants to states for FY2012 and FY2013 for the purposes of establishing or improving administration of SEA programs for regular UC, EB, or EUC08 claimants as well as promoting and enrolling eligible individuals.

SEA Eligibility for UC Claimants⁶

To participate in a state SEA program, workers do not need to be actively searching for jobs. Rather, SEA beneficiaries must engage in full-time activities related to the establishment of a business and becoming self-employed.

To be eligible for a SEA allowance, workers must meet the following requirements:

- Eligible for UC
- Permanently laid off from previous job
- Identified as likely to exhaust UC benefits
- Participating in self-employment activities including entrepreneurial training, business counseling, and technical assistance

States identify UC claimants likely to exhaust benefits through the same worker profiling mechanism used in the WPRS program.⁷ As described above, the WPRS program establishes a targeting system to deliver a variety of reemployment services to unemployed workers deemed at risk of benefit exhaustion.

SEA Amount, Duration, and Program Interaction for UC Claimants

Weekly SEA allowances are the same in amount and duration as a qualifying individual's regular UC benefit.

Participants in state SEA programs for UC claimants are not eligible for the temporary, now-expired EUC08 program or the permanent EB program, both of which may provide additional weeks of benefits for unemployed workers.⁸ As described below in the section on "SEA Expansion Under P.L. 112-96," however, SEA allowances for certain claimants of EB (and

⁵ Authorization for the EUC08 program expired the week ending on or before January 1, 2014 (i.e., December 28, 2013, or December 29, 2013, in New York State). No EUC08 benefits are payable for weeks of unemployment after this expiration date. For more information on EUC08, see CRS Report R42444, *Emergency Unemployment Compensation (EUC08): Status of Benefits Prior to Expiration*, by (name redacted) and (name redacted).

⁶ This section describes eligibility for SEA under state UC programs. The eligibility requirements for SEA programs authorized by P.L. 112-96 are generally similar to the requirements for SEA for UC claimants—with some additional restrictions as well as the need for state action to set up SEA programs for EB (and EUC08 when the program was still authorized). For more information on eligibility for SEA allowances for EB (and EUC08 when authorized) claimants, see the "SEA Expansion Under" section in this report.

⁷ P.L. 103-152, the Unemployment Compensation Amendments of 1993, requires all states to establish WPRS systems. These systems must identify UC claimants who are likely to exhaust regular UC benefits. Most states use statistical methods to identify these workers.

⁸ For additional details on all of these unemployment benefits, see CRS Report RL33362, *Unemployment Insurance: Programs and Benefits*, by (name redacted) and (name redacted).

EUC08 when it was authorized) may be available in states that have established SEA programs for EB (or EUC08 when it was authorized).

State Availability of SEA for UC Claimants

In 2016, 10 states have active SEA programs for UC claimants (authorization for the SEA program in New York is scheduled to expire December 7, 2017). In four of these states (Maine, New Jersey, Pennsylvania, and Vermont), however, there were no SEA participants in 2015. In addition, one state (Louisiana) has the authority in law for SEA, but does not have an active program. Details are provided in **Table 1**.

Table 1. States with SEA Programs for UC Claimants in 2016

State	Active SEA Program	Law Authorizing SEA, but No Active Program
Delaware	X	
Louisiana		X
Maine	X	
Mississippi	X	
New Hampshire	X	
New Jersey	X

Note: Authorization, as well as the current expiration date, for the SEA program in New York is set out under Consolidated Laws of New York, Labor, Article 18, Title 7, §591-a.

Barriers to Participation in SEA for UC Claimants

Nationally, 6.4% of all workers are self-employed (9.5 million workers). Some studies suggest that workers may be more likely to move into self-employment during economic recessions and to move out of self-employment during periods of economic growth.⁹ Yet, as described below, participation in SEA is low. Less than 1% of UC claimants participate in the program; in large part, because few states have active programs.¹⁰ Additional reasons for this low participation most likely include barriers at both the state and individual levels.

⁹ See Ellen R. Rissman, *Self-Employment as an Alternative to Unemployment*, Federal Reserve Bank of Chicago, Working Paper no. 34, Fourth Quarter 2003; Daniel Aaronson, Ellen R. Rissman, and Daniel Sullivan, “Assessing the Jobless Recovery,” *Economic Perspectives*, Second Quarter 2004 (Federal Reserve Bank of Chicago), pp. 6-9.

¹⁰ Stephen Wandner, “Employment Programs for Recipients of Unemployment Insurance,” *Monthly Labor Review*, (continued...)

State-Level Barriers

Under current law, no more than 5% of individuals receiving regular UC benefits in a state may participate in the program. The authorizing legislation also requires that a SEA program be budget neutral. State SEA programs may not incur additional costs above what the state would have spent on the regular UC program. Despite this budget neutrality stipulation, states are required to provide entrepreneurial training, business counseling, and technical assistance to SEA participants. Most state unemployment agencies partner with the relevant agency responsible for employment and training programs or Small Business Development Centers (SBDCs) to provide SEA training and services. According to one estimate, SEA program administration may cost \$300-\$600 per participant and entrepreneurial program services may cost \$200-\$1,200 per participant.¹¹ States must locate non-UC funds to pay for these SEA-specific costs. Thus, not only is participation in SEA capped, but states must seek out their own money to finance program administration and training. Both of these issues likely contribute to low SEA participation rates.

Individual-Level Barriers

In addition to state-level barriers, there are individual-level barriers that may explain why unemployed workers do not participate in SEA programs, even if they are available. First, SEA participation generally makes workers ineligible for other unemployment benefits (i.e., EB [and EUC08 when authorized], as described above).¹² Therefore, individuals may prefer to access the additional income support rather than participate in SEA. Also, the recent recession and current economic climate provide a challenging environment for starting a new business.

As a result of these restrictions and challenges, the number of individuals participating in state SEA programs for UC claimants is relatively small. In 2015, there were only 2,217 SEA participants nationwide. **Table 2** presents data on SEA participants by state for recent years.

Source: DOL, Employment and Training Administration.

Notes: These SEA participant numbers come from administrative data provided to the DOL by state workforce agencies.

A “0” in this table indicates that there were no SEA participants in a state in a given year, which may be due to a state (1) no longer having the authority in law for a SEA program; (2) having an inactive SEA program; or (3) having no SEA participants in an active SEA program. DOL data do not distinguish between these three conditions.

Three states are excluded from this table because they either (1) had an active SEA program in the past, but never had any SEA participants (Washington); (2) previously had a law authorizing an SEA program for UC claimants, but never had an active SEA program (California); or (3) currently have a law authorizing an SEA program, but do not have an active SEA program (Louisiana).

SEA Expansion Under P.L. 112-96¹³

Under P.L. 112-96, states are authorized to set up SEA programs for individuals who (1) have at least 13 weeks of remaining benefit entitlement through the EB program (or EUC08 program, when it was authorized) and (2) are participating in entrepreneurial training activities.¹⁴ To set up a SEA program for EB claimants, states must enact state legislation.¹⁵ In states that establish SEA

¹³ For additional details on SEA expansion under P.L. 112-96 <LISRef number="96" congress="112" title="Middle Class Tax Relief and Job Creation Act of 2012" type="publicLaw" url="http://www.congress.gov/cgi-lis/bdquery/R?d112:FLD002:@1(112+96)" id="4068743607" />, see DOL, Unemployment Insurance Program Letter no. 20-12, May 24, 2012, at http://wdr.doleta.gov/directives/attach/UIPL/UIPL_20_12.pdf.

¹⁴ For information on the EB program, see CRS Report RL33362, *Unemployment Insurance: Programs and Benefits*, by (name redacted) and (name redacted) . For information on the now-expired EUC08 program, see CRS Report R42444, *Emergency Unemployment Compensation (EUC08): Status of Benefits Prior to Expiration*, by (name redacted) and (name redacted) .

¹⁵ Alternatively, a state may establish a SEA program for EB claimants through regulation or executive order, if the (continued...)

programs for EB, individuals may not participate unless the state UC agency has an expectation that the individual has a remaining EB entitlement of at least 13 weeks.¹⁶ Because authorization for the EUC08 expired the week ending on or before January 1, 2014 (i.e., December 28, 2013, or December 29, 2013, in New York State), states may no longer set up SEA programs for any claimants in the EUC08 program.¹⁷

Participation in SEA programs for EB claimants (and EUC08 claimants when EUC08 was authorized) is capped at 1% in each state for each program.¹⁸ SEA benefits available to EB claimants (and EUC08 claimants prior to EUC08 expiration) are paid in the same amount as UC benefits and participants are exempt from any work availability and work search requirements. An individual receiving these SEA benefits may stop participation and receive any remaining EB (or EUC08 benefits when authorized).

P.L. 112-96 also provided \$35 million in SEA grant funding for FY2012 and FY2013 to be distributed to states based on applications to the U.S. DOL. These funds could have been used for the purposes of establishing or improving administration of SEA programs for regular UC, EB, or EUC08 claimants as well as promoting and enrolling eligible individuals. These grant funds were to be distributed to states with approved applications based on the percentage of unemployed individuals in that state relative to the percentage of unemployed individuals in all states.¹⁹

Assessment of SEA Programs

Prior to the authorization of SEA, two self-employment demonstration projects were conducted in the early 1990s in Massachusetts and Washington. Findings from this pilot are generally positive. Researchers concluded that the self-employment demonstration projects increased the likelihood of self-employment and the amount of time participants were employed.²⁰ In addition, the demonstration evaluation determined that the structure of the Massachusetts program, which became the model for the future SEA program authorization, was a cost-effective approach to promoting reemployment among workers.

(...continued)

state has the authority to do so. For additional details on SEA expansion under P.L. 112-96, see DOL's Unemployment Insurance Program Letter no. 20-12, May 24, 2012, at http://wdr.doleta.gov/directives/attach/UIPL/UIPL_20_12.pdf.

¹⁶ Individuals in states with fewer than 26 weeks of regular UC benefits may not participate in a SEA program for EB claimants unless the state is in a high unemployment period (HUP) period of EB. For an explanation, see DOL, Unemployment Insurance Program Letter no. 20-12, at http://wdr.doleta.gov/directives/attach/UIPL/UIPL_20_12.pdf. For information on states that have acted to reduce their UC duration to less than 26 weeks, see CRS Report R41859, *Unemployment Insurance: Consequences of Changes in State Unemployment Compensation Laws*, by (name redacted) .

¹⁷ Previously, when EUC08 was authorized, states were able to set up SEA programs for certain EUC08 claimants through an agreement with U.S. DOL (i.e., no state legislation required). EUC08 claimants were not able to participate in these SEA programs unless the state UC agency had an expectation that the individual had a remaining entitlement to at least 13 weeks of EB or EUC08.

¹⁸ Prior to the expiration of the EUC08, the combined SEA benefits available from SEA programs for EB and EUC08 were not authorized to exceed 26 total weeks for any particular individual.

¹⁹ For a breakdown of U.S. DOL SEA grant funds by state, see DOL, "US Labor Department Announces Availability of \$35 Million in Grants to Implement or Improve Self-Employment Assistance Programs," news release, 12-1073-NAT, May 24, 2012, at http://www.doleta.gov/ETA_News_Releases/20121073.cfm.

²⁰ Jacob M. Benus, Michelle Wood, and Neelima Grover, *Self-Employment as a Reemployment Option: Demonstration Results and National Legislation*, DOL, Employment and Training Administration, Unemployment Insurance Occasional Paper no. 94-3, 1994.

The most recent, comprehensive evaluation of state SEA programs for UC claimants was completed in 2001.²¹ This study provides details on the state SEA programs established between 1995 and 1999 as well as SEA program participants. It also evaluates SEA program outcomes using survey data in three states: Maine, New Jersey, and New York. Based on a group comparison between SEA participants and SEA-eligible (but non-participating) individuals, the study highlights several positive outcomes. First, the analysis concludes that SEA participants were 19 times more likely than eligible non-participants in sample states to be self-employed at any point after their period of unemployment. Second, the study finds that SEA program participants were four times more likely to have obtained any type of employment (i.e., self-employment or wage/salary employment) than eligible non-participants. Finally, SEA program participants reported high levels of satisfaction with self-employment and the training they received as part of the SEA program.

The evaluation also has several limitations. Because the study failed to use a randomized, experimental design, the findings may be due not only to the impact of the SEA program, but also to unobserved differences between SEA participants and eligible non-participants. Additionally, this study was conducted during a time of relatively low unemployment in the three target states. Consequently, it remains unknown how SEA program participants might fare under different economic circumstances or state contexts.

Although not an analysis of SEA programs specifically, results from a 2008 evaluation of Project GATE (Growing America Through Entrepreneurship) also shed light on the impact of self-employment support for unemployed workers. Project GATE was a federally funded demonstration project implemented in seven sites in three states (Minnesota, Pennsylvania, and Maine) between 2003 and 2005. Designed to help individuals start or expand their own businesses, Project GATE provided self-employment training and other services. Although SEA programs are available only to eligible UC claimants likely to exhaust their unemployment benefits, Project GATE was designed for a wider population (i.e., anyone interested in starting or growing a small business).

Researchers conducted an impact analysis of one subgroup of Project GATE participants composed of recent unemployment benefit claimants in Minnesota, providing a parallel with SEA participants. This analysis finds both positive and negative outcomes for these Project GATE participants.²² For this subgroup of recent UC benefit claimants, participation in Project GATE increased the probability of owning a business and being employed. Yet, participants in this SEA-like program earned less in wage and salary jobs and earned no more in self-employment than non-participants. Finally, for recent unemployment benefit claimants, Project GATE increased the duration of unemployment benefit receipt by about three weeks.
