R40082

Summary

Medicare is a federal insurance program that pays for covered health care services of most individuals aged 65 and older and certain disabled persons. In 2016, the program is expected to cover about 57 million persons (48 million aged and 9 million disabled) at a total cost of \$683 billion. Most individuals (or their spouses) aged 65 and older who have worked in covered employment and paid Medicare payroll taxes for 40 quarters receive premium-free Medicare Part A (Hospital Insurance). Those entitled to Medicare Part A (regardless of whether they are eligible for premium-free Part A) have the option of enrolling in Part B, which covers such things as physician and outpatient services and medical equipment.

Beneficiaries have a seven-month initial enrollment period, and those who enroll in Part B after this initial enrollment period and/or reenroll after a termination of coverage may be subject to a *late-enrollment penalty*. This penalty is equal to a 10% surcharge for each 12 months of delay in enrollment and/or reenrollment. Under certain conditions, select beneficiaries are exempt from the late-enrollment penalty; these exempt beneficiaries include working individuals (and their spouses) with group coverage through their current employment, some military retirees, and some international volunteers.

Whereas Part A is financed primarily by payroll taxes paid by current workers, Part B is financed through a combination of beneficiary premiums and federal general revenues. The standard Part B premiums are set to cover 25% of projected average per capita Part B program costs for the aged, with federal general revenues accounting for the remaining amount. In general, if projected Part B costs increase or decrease, the premium rises or falls proportionately. However, most Part B enrollees are protected by a provision in the Social Security Act (the *hold-harmless provision*) that prevents their Medicare Part B premiums from increasing more than the annual increase in their Social Security benefit payments. This protection does not apply to four main groups of beneficiaries: low-income beneficiaries whose Part B premiums are paid by the Medicaid program; high-income beneficiaries who are subject to income-related Part B premiums; those whose Medicare premiums are not deducted from Social Security benefits; and new Medicare and Social Security enrollees.

Most Part B participants must pay monthly premiums, which do not vary with a beneficiary's age, health status, or place of residence. However, since 2007, higher-income enrollees pay higher premiums to cover a higher percentage of Part B costs. Additionally, certain low-income beneficiaries may qualify for Medicare cost-sharing and/or premium assistance from Medicaid through a Medicare Savings Program. The premiums of those receiving benefits through Social Security are deducted from their monthly payments.

Each year, the Centers for Medicare & Medicaid Services (CMS) determines the Medicare Part B premiums for the following year. The standard monthly Part B premium for 2016 is \$121.80. However, due to a 0% Social Security cost-of-living adjustment (COLA) in 2016, the hold-harmless provision applies to about 70% of Part B enrollees; their premiums are being held flat at the 2015 premium amount of \$104.90 through 2016. Higher-income beneficiaries, currently defined as individuals with incomes over \$85,000 per year or couples with incomes over \$170,000 per year, pay \$170.50, \$243.60, \$316.70, or \$389.80 per month, depending on their income levels.

The Medicare trustees estimate that, absent the application of the hold-harmless provision, 2017 premiums will be about the same as in 2016. However, based on preliminary data, the Medicare trustees are projecting only a very small Social Security COLA increase in 2017. Should this be the case, it is possible that most of those held harmless in 2016 could be held harmless again in

2017 and, absent legislation, those who do not qualify for hold-harmless protection could be subject to significantly higher premiums. The actual 2017 Social Security COLA and Medicare premiums will not be announced until the fall of 2016 and could be higher or lower than projected.

Current issues related to the Part B premium that may come before Congress include the amount of the premium and its rate of increase (and the potential net impact on Social Security benefits), the impact of the hold-harmless provision on those not held harmless, modifications to the late-enrollment penalty, and possible increases in Medicare premiums as a means to reduce federal spending and deficits.

On October 18, 2016, the Social Security Administration announced that there will be a 0.3% Social Security COLA in 2017. Subsequently, on November 10, 2016, CMS announced the Part B premiums and deductibles for 2017. In 2017, those not held harmless (about 30% of enrollees) will pay monthly premiums of \$134.00, and higher-income enrollees will pay \$187.50, \$267.90, \$348.30, or \$428.60, depending on their level of income. CMS estimates that those held harmless in 2017 (about 70% of enrollees) will pay, on average, about \$109.00 per month for their Part B premiums. Because there is a small Social Security COLA in 2017, the increase in the premiums of those protected under the hold-harmless rule will vary depending on the amount of the increase in their Social Security benefits.

This CRS report will be updated in 2017.

Introduction

Medicare is a federal insurance program that pays for covered health care services of most individuals aged 65 and older and certain disabled persons. Medicare serves approximately one in six Americans and virtually all of the population aged 65 and over. In calendar year (CY) 2016, the program is expected to cover about 57 million persons (48 million aged and 9 million disabled) at a total cost of \$683 billion, accounting for approximately 3.6% of gross domestic product.¹ The Medicare program is administered by the Centers for Medicare & Medicaid Services (CMS).

Medicare consists of four parts—Parts A through D. Part A covers hospital services, skilled nursing facility services, home health visits, and hospice services. Part B covers a broad range of medical services and supplies, including physician services, laboratory services, durable medical equipment, and outpatient hospital services. Enrollment in Part B is voluntary; however, most beneficiaries (about 91%) with Part A are also enrolled in Part B. Part C (Medicare Advantage) provides private plan options, such as managed care, for beneficiaries who are enrolled in both Part A and Part B. Part D provides optional outpatient prescription drug coverage.²

Each part of Medicare is funded differently.³ Part A is financed primarily through payroll taxes imposed on current workers (2.9% of earnings, shared equally between employers and workers), which are credited to the Hospital Insurance (HI) Trust Fund. Beginning in 2013, workers with annual wages over \$200,000 for single tax filers or \$250,000 for joint filers pay an additional 0.9%.⁴ Beneficiaries generally do not pay premiums for Part A. In 2016, total Part A expenditures are expected to reach about \$287 billion, representing about 42% of program costs.⁵ Parts B and D, the voluntary portions, are funded through the Supplementary Medical Insurance (SMI) Trust Fund, which is financed primarily by general revenues (transfers from the U.S. Treasury) and premiums paid by enrollees. In 2016, about \$3 billion in fees on manufacturers and importers of brand-name prescription drugs also will be used to supplement the SMI Trust Fund.⁶ In 2016, Part B expenditures are expected to reach about \$293 billion and Part D expenditures are expected to reach about \$103 billion, representing 43% and 15% of program costs, respectively. (Part C is financed proportionately through the HI and SMI Trust Funds; expenditures for Parts A and B services provided under Part C are included in the above expenditure figures.)

Part B beneficiary premiums are normally set at a rate each year equal to 25% of average expected per capita Part B program costs for the aged for the year.⁷ Higher-income enrollees pay

¹ Estimates from Boards of Trustees, Federal Hospital Insurance and Federal Supplementary Medical Insurance Trust Funds, 2016 Annual Report of the Boards of Trustees of the Federal Hospital Insurance and Federal Supplementary Medical Insurance Trust Funds, June 22, 2016, at <https://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/ReportsTrustFunds/Downloads/TR2016.pdf>. (Hereinafter, 2016 Medicare Trustees' Report.)

² For additional information on the Medicare program, see CRS Report R40425, *Medicare Primer*.

³ See CRS Report R43122, *Medicare Financial Status: In Brief*.

⁴ See Internal Revenue Service, *Questions and Answers for the Additional Medicare Tax*, at <http://www.irs.gov/Businesses/Small-Businesses-&Self-Employed/Questions-and-Answers-for-the-Additional-Medicare-Tax>.

⁵ All expenditure data are from the 2016 Medicare Trustees' Report.

⁶ For additional information, see archived CRS Report R41128, *Health-Related Revenue Provisions in the Patient Protection and Affordable Care Act (ACA)*.

⁷ Beneficiary premiums cover approximately 12.9% of the costs of "traditional" Medicare (Parts A and B combined), 12.3 % from Part B premiums, and 0.6% from voluntary Part A premiums. See **Appendix D** for information on Part A premiums.

higher premiums set to cover a greater percentage of Part B costs,⁸ while those with low incomes may qualify for premium assistance through one of several Medicare Savings Programs administered by Medicaid.⁹ Individuals who receive Social Security or Railroad Retirement Board (RRB) retirement or disability benefits have their Part B premiums automatically deducted from their benefit checks. Part B premiums are generally announced in the fall prior to the year that they are in effect (for example, the 2016 Part B premiums were announced in November 2015).¹⁰

In 2016, the standard monthly Part B premium is \$121.80.¹¹ However, about 70% of Part B enrollees are protected by a provision in the Social Security Act (the *hold-harmless provision*) that prevents their Medicare Part B premiums from increasing more than the annual increase in their Social Security benefit payments.¹² Due to a 0% Social Security cost-of-living (COLA) increase in 2016, these individuals are continuing to pay the 2015 premium amount of \$104.90. Some beneficiaries do not qualify for protection under the hold-harmless provision, including high-income enrollees, those who do not receive Social Security benefits, those whose premiums are paid by Medicaid, and individuals who are new to Medicare and/or Social Security in 2016.¹³

2016 Medicare Part B Premiums			
	Beneficiaries Who File an Individual Tax Return with Income:	Beneficiaries Who File a Joint Tax Return with Income:	Monthly Premium
Held Harmless	Less than or equal to \$85,000	Less than or equal to \$170,000	\$104.90
Not Held Harmless	Less than or equal to \$85,000	Less than or equal to \$170,000	121.80
	Greater than \$85,000 and less than or equal to \$107,000	Greater than \$170,000 and less than or equal to \$214,000	170.50
	Greater than \$107,000 and less than or equal to \$160,000	Greater than \$214,000 and less than or equal to \$320,000	243.60
	Greater than \$160,000 and less than or equal to \$214,000	Greater than \$320,000 and less than or equal to \$428,000	316.70
	Greater than \$214,000	Greater than \$428,000	389.80
Source: CMS, Announcement of 2016 Medicare Parts A & B Premiums and Deductibles.			

⁸ Depending on their level of income, beneficiaries subject to the income-related monthly adjustment pay a total monthly premium of 35%, 50%, 65%, or 80% of expected per capita Part B costs for the aged. See “Income-Related Premium.”

⁹ See “Premium Assistance for Low-Income Beneficiaries.”

¹⁰ The 2016 Part B premium rates were announced in November of 2015. See CMS, “2016 Medicare Parts A & B Premiums and Deductibles Announced,” press release, November 10, 2015, at <https://www.cms.gov/Newsroom/MediaReleaseDatabase/Press-releases/2015-Press-releases-items/2015-11-10.html>.

¹¹ Centers for Medicare & Medicaid Services (CMS), “Medicare Program: Medicare Part B Monthly Actuarial Rates, Premium Rate, and Annual Deductible Beginning January 1, 2016,” 80 *Federal Register* 70811, November 16, 2015, at <http://www.gpo.gov/fdsys/pkg/FR-2015-11-16/pdf/2015-29181.pdf>.

¹² SSA §1839(f). To be held harmless in a given year, a beneficiary must have received Social Security benefit checks in both December of the previous year and January of the current year, and must also have had Medicare Part B premiums deducted from both checks. The hold-harmless provision operates by comparing the net dollar amounts of the two monthly benefit payments; if the net Social Security benefit for January of the current year is lower than in December of the previous year, then the hold-harmless provision applies to that person.

¹³ See “Protection of Social Security Benefits from Increases in Medicare Part B Premiums.”

In addition to premiums, Part B beneficiaries must pay other out-of-pocket costs when they use services. The annual deductible for Part B services is \$166 in 2016.¹⁴ After the annual deductible is met, beneficiaries are responsible for coinsurance costs, which are generally 20% of Medicare-approved Part B expenses.

2017 Premiums

On October 18, 2016, the Social Security Administration announced that there will be a 0.3% Social Security COLA in 2017.¹⁵ Subsequently, on November 10, 2016, CMS announced the Part B premiums and deductibles for 2017.¹⁶ In 2017, those not held harmless (about 30% of enrollees) will pay monthly premiums of \$134.00, and higher-income enrollees will pay \$187.50, \$267.90, \$348.30, or \$428.60, depending on their level of income. CMS estimates that those held harmless in 2017 (about 70% of enrollees) will pay, on average, about \$109.00 per month for their Part B premiums. Because there will be a small Social Security COLA in 2017, the increase in the premiums of those protected under the hold-harmless rule will vary depending on the amount of the increase in their Social Security benefits. For example, someone whose monthly Social Security benefit increased by \$4.00 per month could see a \$4.00 increase in his or her Medicare premium in 2017 (for a total premium of about \$109.00), and someone with a \$6.00 Social Security benefit increase could see a \$6.00 increase in his or her 2017 premium (for a total premium of about \$111.00).¹⁷ Additionally, many of those not held harmless in 2016 because they were new to Medicare in that year may qualify to be held harmless in 2017. The premiums for those individuals will be equal to the 2016 premium of \$121.80, plus the dollar amount of the increase in their monthly Social Security benefit.¹⁸

In 2017, the Part B deductible will increase to \$183.00. Deductibles are not protected by the hold-harmless rule; therefore, all Part B enrollees will be subject to the higher amount.

This CRS report will be updated in 2017.

This report provides an overview of Medicare Part B premiums, including information on Part B eligibility and enrollment, late-enrollment penalties, collection of premiums, determination of annual premium amounts, premiums for high-income enrollees, premium assistance for low-income enrollees, protections for Social Security recipients from rising Part B premiums, and historical Medicare Part B premium trends. This report also provides a summary of various premium-related issues that may be of interest to Congress. Specific Medicare and Social Security publications and other resources for beneficiaries, and those who provide assistance to them, are cited where appropriate.

Medicare Part B Eligibility and Enrollment

An individual (or the spouse of an individual) who has worked in covered employment and paid Medicare payroll taxes for 40 quarters is entitled to receive premium-free Medicare Part A benefits upon reaching the age of 65. Those who have paid in for fewer than 40 quarters may enroll in Medicare Part A by paying a premium.¹⁹ All persons entitled to Part A (regardless of

¹⁴ Annual increases in the deductibles are not protected by the hold-harmless provision.

¹⁵ See Social Security Administration, “Social Security Announces 0.3 Percent Benefit Increase for 2017,” press release, October 18, 2016, <https://www.ssa.gov/news/press/releases/#/post/10-2016-1>.

¹⁶ See Centers for Medicare & Medicaid Services, “2017 Medicare Parts A & B Premiums and Deductibles Announced,” press release, November 10, 2016, <https://www.cms.gov/Newsroom/MediaReleaseDatabase/Press-releases/2016-Press-releases-items/2016-11-10-2.html>; and CMS, “Medicare Program; Medicare Part B Monthly Actuarial Rates, Premium Rate, and Annual Deductible Beginning January 1, 2017,” 81 Federal Register 80063, November 15, 2016, at <https://www.gpo.gov/fdsys/pkg/FR-2016-11-15/pdf/2016-27425.pdf>.

¹⁷ The figures used to calculate actual premiums under the hold-harmless rule are subject to certain rounding conventions; the above numbers serve only as examples of potential variation.

¹⁸ Subject to the rounding conventions mentioned in footnote 17.

¹⁹ For additional information on Part A premiums, see **Appendix D**.

whether they are eligible for premium-free Part A) are also entitled to enroll in Part B. An aged person not entitled to Part A may enroll in Part B if he or she is aged 65 or over and either a U.S. citizen or an alien lawfully admitted for permanent residence who has resided in the United States continuously for the immediately preceding five years.

Those who are receiving Social Security or Railroad Retirement Board benefits are automatically enrolled in Medicare, and coverage begins the first day of the month they turn 65.²⁰ These individuals will receive a Medicare card and a “Welcome to Medicare” package about three months before their 65th birthday.²¹ Those who are automatically enrolled in Medicare Part A also are automatically enrolled in Part B.²² However, because beneficiaries must pay a premium for Part B coverage, they have the option of turning it down.²³ Disabled persons who have received cash payments for 24 months under the Social Security or RRB disability programs also automatically receive a Medicare card and are enrolled in Part B unless they specifically decline such coverage.²⁴ Those who choose to receive coverage through a Medicare Advantage plan (Part C) must enroll in Part B.

Persons who are not receiving Social Security or RRB benefits, for example because they are still working²⁵ or have chosen to defer enrollment because they have not yet reached their full retirement benefit eligibility age,²⁶ must file an application with the Social Security Administration or RRB for Medicare benefits.²⁷ There are two kinds of enrollment periods, one

²⁰ For additional information on enrolling in Medicare Parts A and B, see Medicare publication “Enrolling in Medicare Part A & Part B,” at <http://www.medicare.gov/Pubs/pdf/11036.pdf>.

²¹ See “Welcome to Medicare” publication at <https://www.medicare.gov/Pubs/pdf/11095.pdf>. When first becoming eligible for Medicare, beneficiaries need to make a number of choices regarding the benefits they wish to sign up for and how they wish to receive them. For example, new enrollees need to decide whether they wish to remain in traditional Medicare (Parts A and B, the default option) or if they would like to receive their A and B benefits through a private Medicare Advantage Plan (Part C). Additionally, beneficiaries need to decide whether they would like to sign up for an outpatient prescription drug plan (Part D). These options are described in the “Welcome to Medicare” package. For free personalized health insurance counseling, beneficiaries may contact their local State Health Insurance Assistance Programs (SHIPs); contact information may be found at <http://www.medicare.gov/contacts/> and <https://www.shiptalk.org/About/SHIPProfileSearchForm.aspx>.

²² Those who live in Puerto Rico are not automatically enrolled in Medicare Part B. They need to sign up for Part B during the initial enrollment period or possibly be subject to a penalty. See CRS Report R44275, *Puerto Rico and Health Care Finance: Frequently Asked Questions*, and Social Security Administration Publication “Medicare in Puerto Rico,” at <http://www.socialsecurity.gov/pubs/EN-05-10521.pdf>. H.R. 1418, S. 1453, S. 1961, S. 2675 and S. 3044 introduced in the 114th Congress, would extend this automatic enrollment to residents of Puerto Rico, as well as create a special enrollment period and reduce late-enrollment penalties for those who did not sign up for Part B when first eligible.

²³ Should a beneficiary decline Part B coverage, a new Medicare card will be issued that indicates that the beneficiary has Part A coverage only.

²⁴ Individuals with Amyotrophic Lateral Sclerosis are not subject to the 24-month waiting period; for these individuals Medicare coverage begins the first day of the month during which disability benefits start. Additionally, the Medicare coverage period for persons diagnosed with end-stage renal disease generally begins in the third month after the month when dialysis begins.

²⁵ For additional information, see CMS, “Helping You Help Your Employees with Medicare Enrollment,” September 25, 2015, at <http://blog.cms.gov/2015/09/25/helping-you-help-your-employees-with-medicare-enrollment/> and CMS, “Employer Community: Information about Medicare Enrollment,” at <https://www.cms.gov/Outreach-and-Education/Find-Your-Provider-Type/Employers/Employer-Community.html>.

²⁶ In the past, individuals generally were eligible to receive both full Social Security retirement benefits and Medicare coverage starting at the age of 65. However, the age to receive full retirement benefits has changed for some people, depending on the year they were born. For example, those turning 65 in 2016 will not be eligible for full Social Security benefits until the age of 66. See <http://www.ssa.gov/planners/retire/retirechart.html>.

²⁷ To apply, individuals can call or visit their local Social Security office or call Social Security at 1-800-772-1213. (continued...)

that occurs when individuals are initially eligible for Medicare and one annual general enrollment period for those who missed signing up during their initial enrollment period. A beneficiary may drop Part B enrollment and reenroll an unlimited number of times; however, premium penalties may be incurred.

Initial Enrollment Periods

Those who are not automatically enrolled in Medicare may sign up during a certain period when they first become eligible. The *initial enrollment* period is seven months long and begins three months before the month in which the individual first turns 65. (See **Table 1.**) Beneficiaries who do not file an application for Medicare benefits during their initial enrollment period could be subject to the Part B late-enrollment penalty. (See “Late-Enrollment Premium Penalty and Exemptions.”) If an individual accepts the automatic enrollment in Medicare Part B, or enrolls in Medicare Part B during the first three months of the initial enrollment period, coverage will start with the month in which an individual is first eligible, that is, the month of the individual’s 65th birthday. Those who enroll during the last four months will have their coverage start date delayed from one to three months after enrollment.²⁸ The initial enrollment period of those eligible for Medicare based on disability or permanent kidney failure is linked to the date the disability or treatment began.²⁹

Table 1. Initial Enrollment Period
(month of enrollment and effective dates)

	3 Months Before the Month One Turns 65	The Month During Which One Turns 65	Up to 3 Months After the Month One Turns 65
Effective Dates	If one signs up during the first 3 months of one’s initial enrollment period, Part B coverage starts the 1 st day of one’s birthday month. ^a	If one enrolls during one’s birthday month, the start date will be the 1 st day of the next month.	The start date will be delayed if one enrolls during the last 3 months of the initial enrollment period. <ul style="list-style-type: none"> • If one signs up in the month after the month one turns 65, coverage starts 2 months after enrollment. • If one signs up 2 or 3 months after the month one turns 65, coverage starts 3 months after enrollment.

Example for Someone Turning 65 During the Month of June (The seven-month initial enrollment period would run from March 1 through September 30.)	If one enrolls in March, April, or May, coverage begins June 1.	If one enrolls in June, coverage begins July 1.	<ul style="list-style-type: none"> • If one enrolls in July, coverage begins September 1. • If one enrolls in August, coverage begins November 1. • If one enrolls in September, coverage begins December 1.

Source: Social Security Administration Publication No. 05-10043.

- a. If one's birthday falls on the 1st of the month, then the enrollment period starts a month earlier and coverage may begin on the 1st day of the month prior to one's birthday month.

General Enrollment Period

An individual who does not sign up for Medicare during the initial enrollment period must wait until the next *general enrollment* period. In addition, persons who decline Part B coverage when first eligible, or terminate Part B coverage, must also wait until the next general enrollment period to enroll or reenroll. The general enrollment period lasts for three months from January 1 to March 31 of each year, with coverage beginning on July 1 of that year. A late-enrollment penalty may apply.³⁰

Late-Enrollment Premium Penalty and Exemptions

Beneficiaries who do not sign up for Part B when first eligible, or who drop it and then sign up again later, may have to pay a late-enrollment penalty for as long as they are enrolled in Part B.³¹ Monthly premiums for Part B may go up 10% for each full 12-month period that one could have had Part B but did not sign up for it. (See "Calculation of Penalty.") Some may be exempt from paying a late-enrollment penalty if they meet certain conditions that allow them to sign up for Part B during a special enrollment period (SEP). (See "Exemptions to Penalty.") In 2014, about 1.4% of Part B enrollees (about 750,000) paid this penalty.³² On average, their total premiums (standard premium plus penalty) were about 29% higher than what they would have been had they not been subject to the penalty.

Those who receive premium assistance through a Medicare Savings Program do not pay the late-enrollment penalty.³³ Additionally, for those disabled persons under the age of 65 subject to a premium penalty, once the individual reaches the age of 65, he or she qualifies for a new enrollment period and no longer pays a penalty.

³⁰ The Part B general enrollment period is different from the Medicare Advantage and Part D annual enrollment period which runs from October 15 to December 7 each year, with coverage effective the following January.

³¹ For more information, see Medicare.gov "Part B Late Enrollment Penalty," at <http://www.medicare.gov/your-medicare-costs/part-b-costs/penalty/part-b-late-enrollment-penalty.html>.

³² Figures provided to CRS by CMS, September 2015.

³³ The state pays the standard premium regardless of the date the beneficiary first became eligible for Medicare Part B. See Social Security Administration, *Program Operations Manual*, Section HI 00815.001, "State Buy-In Program General Description," at <https://secure.ssa.gov/apps10/poms.nsf/lnx/0600815001>; and *Ibid.*, Section HI 00815.039, "Effect of Buy-In on the Individual," at <https://secure.ssa.gov/apps10/poms.nsf/lnx/0600815039>.

The penalty provision was included in the original Medicare legislation enacted in 1965 to help prevent adverse selection by creating a strong incentive for all eligible beneficiaries to enroll in Part B.³⁴ Adverse selection occurs when only those persons who think they need the benefits actually enroll in the program. When this happens, per capita costs are driven up and premiums go up, causing more enrollees (presumably the healthier and less costly ones) to drop out of the program.³⁵ With most eligible persons over the age of 65 enrolled in Part B, the costs are spread over the majority of this population and per capita costs are less than would be the case if adverse selection had occurred.

As the Part B late-enrollment penalty is tied to Medicare eligibility and not to access to covered services, individuals who live in areas where Medicare benefits are generally not provided, such as outside of the United States or in prison, could still be subject to the Part B late-enrollment penalty if they do not sign up for (or if they drop) Part B when eligible.³⁶ To illustrate, if a retired Medicare-eligible individual stopped paying Part B premiums while living overseas for a three-year period and reenrolled when returning to the United States, he or she would not be entitled to an SEP. This individual would instead need to enroll during the general enrollment period and could also be subject to late-enrollment penalties based on that three-year lapse in coverage.

Additionally, Part B does not have a “creditable” coverage exemption similar to that under the Part D outpatient prescription drug benefit.³⁷ Except for certain circumstances discussed below, having equivalent coverage does not entitle one to an SEP should one decide to enroll in Part B later. For example, an individual who has retiree coverage similar to Part B and therefore decides not to enroll in Part B when first eligible could be subject to late-enrollment penalties if he or she enrolls in Part B at a later time (for example, because the retiree coverage was discontinued).

³⁴ Social Security Act (SSA) §1839(b).

³⁵ Specifically, adverse selection occurs when beneficiaries, who generally have more information than insurers about their own health status and expected health care needs, make insurance purchasing decisions based on their expected use of the insurance benefit. Their decision to purchase insurance is based on a comparison of the value of the insurance coverage, given their expected use, and the cost of the insurance. Should only (or disproportionately) persons who are high health care users enroll in the program, per capita costs would increase, thereby making the health insurance purchase decision less attractive for healthier, and presumably less costly, beneficiaries who then, in turn, might drop out of the program. Subsequent iterations of this cycle would drive premium costs higher and higher for a smaller and smaller subset of ever sicker and costlier beneficiaries.

³⁶ By comparison, to be eligible for the outpatient prescription drug benefit under Part D, a Medicare beneficiary must reside in a geographic area where a Part D plan is available. Individuals who are incarcerated or who live outside the United States are therefore *not eligible* to enroll in (or continue enrollment in) Part D. Because the Part D penalty is based on periods when one is eligible but not enrolled, periods of incarceration or extended residence outside of the United States would not be included in that calculation. For example, an individual living outside of the country during his or her initial enrollment period would be given a special enrollment period (SEP) upon returning to the United States and would be able to sign up for Part D at that time without penalty. See Social Security Administration, *Program Operations Manual*, Section HI 03001.001, “Description of the Medicare Part D Prescription Drug Program,” at <https://secure.ssa.gov/poms.nsf/lnx/0603001001>, and CMS Publication, “Understanding Medicare Part C & D Enrollment Periods,” at <http://www.medicare.gov/Pubs/pdf/11219.pdf>.

³⁷ Under Part D, individuals who have maintained drug coverage equivalent to Medicare’s standard prescription drug coverage prior to enrolling in Part D are not subject to a late-enrollment penalty. Examples of “creditable” Part D drug coverage include drug coverage from a former employer or union, TRICARE, the Department of Veterans Affairs (VA), the Federal Employees Health Benefits Program (FEHBP), or the Indian Health Service. As an illustration, if an individual did not sign up for Part D when first becoming eligible because he or she already had equivalent coverage through a former employer, the individual could sign up for Part D at any time without penalty during the time he or she maintained creditable coverage. Should that coverage end, the individual would be entitled to a special enrollment period and could enroll in Part D without penalty. Beneficiaries who have a break in creditable prescription drug coverage usually have 63 consecutive days to enroll in Part D during an SEP.

Calculation of Penalty

The late-enrollment penalty is equal to a 10% premium surcharge for each full 12 months of delay in enrollment and/or reenrollment during which the beneficiary was eligible for Medicare.³⁸ The period of the delay is equal to (1) the number of months that elapse between the end of the initial enrollment period and the end of the enrollment period in which the individual actually enrolls or (2) for a person who reenrolls, the months that elapse between the termination of coverage and the close of the enrollment period in which the individual enrolls.

Generally, individuals who do not enroll in Part B within a year of the end of their initial enrollment period would be subject to the premium penalty. For example, if an individual's initial enrollment period ended in September 2013 and the individual subsequently enrolled during the 2014 general enrollment period (January 1 through March 31), the delay would be less than 12 months and the individual would not be subject to a penalty. However, if that individual delayed enrolling until the 2016 general enrollment period, the premium penalty would be 20% of that year's standard premium. (Although the elapsed time covers a total of 30 months of delayed enrollment, the episode includes only two full 12-month periods.) An individual who waits more than 10 years to enroll in Part B would pay twice the standard premium amount.

The late-enrollment surcharge is calculated as a percentage of the monthly standard premium amount (e.g., \$121.80 in 2016),³⁹ and that amount is added to the beneficiary's premium each month.⁴⁰ The hold-harmless provision does not provide protection from increases in the penalty amounts. This means that although those who are held harmless in 2016 (see "Application of the Hold-Harmless Rule in 2016") are continuing to pay the 2015 premium amount of \$104.90 per month, any late-enrollment penalties are based on the 2016 premium of \$121.80 per month.

Using the example above in which an individual is subject to a 20% premium penalty, the total monthly premium in 2016 would be calculated as follows:

³⁸ SSA §1839(b).

³⁹ Social Security Administration, *Program Operations Manual*, Section HI 01001.010, "Premium Increase for Late Enrollment," at <https://secure.ssa.gov/poms.nsf/lnx/0601001010>.

⁴⁰ A late-premium calculator may be found on the Medicare.gov website at <http://www.medicare.gov/your-medicare-costs/part-b-costs/penalty/part-b-late-enrollment-penalty.html>.

Calculation of Late-Enrollment Penalty

$$\text{Premium Penalty} = \text{Standard Premium} \times \text{Applicable Percentage}$$

$$\text{Penalty-Adjusted Premium} = \text{Monthly Premium} + \text{Premium Penalty}$$

Example of a 20% penalty in 2016 for an individual who is

- **not held harmless:**

$$\text{Premium Penalty} = \$121.80 \times 20\% = \$24.36$$

$$\text{Penalty-Adjusted Premium} = \$121.80 + \$24.36 = \$146.20^*$$

- **held harmless:**

$$\text{Premium Penalty} = \$121.80 \times 20\% = \$24.36$$

$$\text{Penalty-Adjusted Premium} = \$104.90 + \$24.36 = \$129.30^*$$

*Premium amounts are rounded to the nearest 10 cents.

For those subject to the high-income premium (see “Income-Related Premiums”), the late-enrollment surcharge applies only to the standard monthly premium amount and not to the higher-income adjustment portion of their premiums. Using the example of a 20% penalty for a beneficiary with an income of between \$85,000 and \$107,000, the applicable income-related adjustment of \$48.70 would be added on to the penalty-adjusted premium of \$146.20, for a total monthly premium of \$194.90.⁴¹

There is no upper limit on the amount of the surcharge that may apply, and the penalty continues to apply for the entire time the individual is enrolled in Part B. Each year, the surcharge is calculated using the standard premium amount for that particular year. Therefore, if premiums increase in a given year, the dollar value of the surcharge will increase as well.

Exemptions to Penalty

Under certain conditions, select beneficiaries may be exempt from the late-enrollment penalty. Beneficiaries who are exempt include working individuals (and their spouses) with group coverage, some military retirees, some international volunteers, and those who based their non-enrollment decision on incorrect information provided by a federal representative. Individuals who are permitted to delay enrollment have their own SEPs.

Current Workers

A working individual and/or the spouse of a working individual may be able to delay enrollment in Medicare Part B without being subject to the late-enrollment penalty. Delayed enrollment is permitted when an individual aged 65 or older has group health insurance coverage based on the individual’s or spouse’s current employment (with an employer with 20 or more employees). About 1.9 million of the 2.6 million working aged population are enrolled in Part A only, with

⁴¹ Those who pay the high-income premiums are not protected by the hold-harmless provision. For additional information, see Social Security Administration, *Programs Operation Manual*, Section HI 01101.031, “How IRMAA is Calculated and How IRMAA Affects the Total Medicare Premium,” at <https://secure.ssa.gov/apps10/poms.nsf/lnx/0601101031>.

most of the rest enrolled in both Parts A and B.⁴² Delayed enrollment is also permitted for certain disabled persons who have group health insurance coverage based on their own or a family member's current employment with a large group health plan. For the disabled, a large group health plan is defined as one that covers 100 or more employees.

Specifically, persons permitted to delay coverage without penalty are those persons whose Medicare benefits are determined under the Medicare Secondary Payer program.⁴³ Under Medicare Secondary Payer rules, an employer (with 20 or more employees) is required to offer workers aged 65 and over (and workers' spouses aged 65 and over) the same group health insurance coverage that is made available to other employees.⁴⁴ The worker has the option of accepting or rejecting the employer's coverage. If he or she accepts the coverage, the employer plan is primary (i.e., pays benefits first) for the worker and/or spouse aged 65 or over, and Medicare becomes the secondary payer (i.e., fills in the gaps in the employer plan, up to the limits of Medicare's coverage). Similarly, a group health plan offered by an employer with 100 or more employees is the primary payer for its employees under 65 years of age, or their dependents, who are entitled to Medicare because of disability.⁴⁵

Such individuals may sign up for Medicare Part B (or Part A) anytime that they (or their spouse) are still working, and they are covered by a group health plan through the employer or union based on that work. Additionally, those who qualify for Medicare based on age may sign up during the eight-month period after employment or group health plan coverage ends, *whichever happens first*. (If an individual's group health plan coverage, or the employment on which it is based, ends during the *initial enrollment period*, that individual would not qualify for an SEP.)⁴⁶ Disabled individuals whose group plan is involuntarily terminated have six months to enroll without penalty.⁴⁷

Individuals who fail to enroll during this special enrollment period are considered to have delayed enrollment and thus could be subject to the penalty. For example, even though an individual may have continued health coverage through the former employer after retirement or have COBRA

⁴² 2014 *Medicare Working-Aged Beneficiary Counts* from CMS 100% Unloaded Enrollment Database.

⁴³ SSA §1837(i) and 42 C.F.R. §407.20. See Medicare Publication "Medicare and Other Health Benefits: Your Guide to Who Pays First," at <http://www.medicare.gov/publications/pubs/pdf/02179.pdf> and CMS, "Medicare Secondary Payer," at <https://www.cms.gov/Medicare/Coordination-of-Benefits-and-Recovery/Coordination-of-Benefits-and-Recovery-Overview/Medicare-Secondary-Payer/Medicare-Secondary-Payer.html>. Also see CRS Report RL33587, *Medicare Secondary Payer: Coordination of Benefits*.

⁴⁴ The requirement that large employers' coverage pays primary for Medicare-eligible employees was created by the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248) and amended by the Consolidated Omnibus Budget Reconciliation Act of 1985 (P.L. 99-272).

⁴⁵ For Medicare-eligible beneficiaries employed by organizations with fewer than 20 employees (or fewer than 100 employees for the disabled), Medicare generally pays primary and the employer group health plan generally pays secondary. In such cases, employers may offer coverage that wraps around the Medicare benefit and beneficiaries may need to enroll in Medicare Part B when first eligible to avoid potential late-enrollment penalties and/or gaps in coverage. Individuals who are turning 65 and still working should check with their employers' benefit administrator to learn how their employer health coverage works with Medicare.

⁴⁶ See "Special Enrollment Period" section of Social Security webpage: Social Security Administration, "Retirement Planner: Applying for Medicare Only," at <http://www.socialsecurity.gov/retire2/justmedicare.htm>.

⁴⁷ The Balanced Budget Act of 1997 (BBA; P.L. 105-33) added this exception to the penalty. This exception is for disabled persons (a) who, at the time they first become eligible for Part B, are enrolled in a group health plan (regardless of size) by virtue of their current or former employment and (b) whose continuous enrollment under the plan is involuntarily terminated at a time when their enrollment in the plan is by virtue of their or their spouse's former (i.e., not current) employment. These individuals have a special six-month enrollment period beginning on the first day of the month in which the termination occurs.

coverage,⁴⁸ he or she must sign up for Part B within eight months of retiring to avoid paying a Part B penalty if he or she eventually enrolls. Individuals who return to work and receive health care coverage through that employment may be able to drop Part B coverage, qualify for a new special enrollment period upon leaving that employment, and reenroll in Part B without penalty as long as enrollment is completed within the specified time frame.

Certain Military Retirees

Some military retirees may also be exempt from the late-enrollment penalty. Health care coverage for military retirees was expanded by the Floyd D. Spence National Defense Authorization Act for FY2001 (P.L. 106-398). This law established the TRICARE for Life program, which acts as a secondary payer to Medicare and provides supplemental coverage to TRICARE-eligible beneficiaries who are entitled to Medicare Part A and have Medicare Part B, based on age, disability, or end-stage renal disease (ESRD). The Patient Protection and Affordable Care Act (ACA; P.L. 111-148, Section 3110) established a 12-month SEP for certain individuals who are otherwise eligible for TRICARE and entitled to Medicare Part A based on disability or ESRD but have declined Part B. The Secretary of Defense is required to identify and notify individuals of their eligibility for this SEP. The SEP begins the first day of the month following the end of the individual's initial enrollment period or, if later, the month the individual is notified that he or she is entitled to Medicare Parts A and B. The late-enrollment surcharge is waived for those who enroll during the SEP. (If the individual does not enroll during the SEP, he or she may only enroll during the general enrollment period and the late-enrollment surcharge could apply.)

International Volunteers

Some international volunteers may also be exempt from the Part B late-enrollment penalty. The Deficit Reduction Act of 2005 (P.L. 109-171) permits certain individuals to delay enrollment in Part B without a late-enrollment penalty if they volunteered outside of the United States for at least 12 months through a program sponsored by a tax-exempt organization defined under Section 501(c)(3) of the Internal Revenue Code.⁴⁹ These individuals must demonstrate that they had health insurance coverage while serving in the international program. Individuals permitted to delay enrollment have a six-month SEP, which begins on the first day of the first month they no longer qualify under this provision.

Equitable Relief

Under certain circumstances, an SEP may be created and/or late-enrollment penalties may be waived if a Medicare beneficiary can establish that an error, misrepresentation, or inaction of a federal worker or an agent of the federal government (such as an employee of the Social Security Administration, CMS, or a Medicare administrative contractor) resulted in late Part B enrollment.⁵⁰ To qualify for an exception under these conditions, the beneficiary must provide documentary evidence of the error, which “can be in the form of statements from employees,

⁵⁰ SSA §1837(h) and 42 C.F.R. §407.32.

agents, or persons in authority that the alleged misinformation, misadvice, misrepresentation, inaction, or erroneous action actually occurred.”⁵¹

Collection of the Part B Premium

Part B premiums may be paid in a variety of ways.⁵² If an enrollee is receiving Social Security or Railroad Retirement benefits,⁵³ the Part B premiums must, by law, be deducted from these benefits. Additionally, Part B premiums are deducted from the benefits of those receiving a Federal Civil Service Retirement annuity.⁵⁴ The purpose of collecting premiums by deducting them from benefits is to keep premium collection costs at minimum.

This withholding does not apply to those beneficiaries receiving state public assistance through a Medicare Savings Program because their premiums are paid by their state Medicaid program. (See “Premium Assistance for Low-Income Beneficiaries.”) Additionally, premium payments may be made on behalf of Medicare beneficiaries by an employee, union, lodge, or other organization, or by an entity of a state or local government if it enters into a group-billing arrangement with CMS. Those approved as group billers include such entities as city and county governments, state teacher retirement systems, and certain religious orders.

Any Part B enrollees whose premiums are not deducted from Social Security, Railroad Retirement, or Civil Service Retirement monthly benefits; paid by Medicaid; or paid under an approved group-billing arrangement by a private organization must pay premiums directly to CMS.⁵⁵

Deduction of Part B Premiums from Social Security Checks

By law, a Social Security beneficiary who is enrolled in Medicare Part B must have the Part B premium automatically deducted from his or her Social Security benefits.⁵⁶ Automatic deduction from the Social Security benefit check also applies to Medicare Advantage participants who are enrolled in private health care plans in lieu of traditional Medicare.⁵⁷ About 66% of Social Security beneficiaries (39 million persons) have Medicare Part B premiums deducted from their benefit checks.⁵⁸

⁵¹ For additional information, see Social Security Administration, *Program Operations Manual*, Section HI 00805.170, “Conditions for Providing Equitable Relief,” at <https://secure.ssa.gov/poms.nsf/lnx/0600805170> and Ibid, Section HI 00805.175, “Evidence of Government Error or Delay,” at <https://secure.ssa.gov/poms.nsf/lnx/0600805175>.

⁵² Ibid., Section HI 01001.020, “Collection of Premiums,” at <https://secure.ssa.gov/poms.nsf/lnx/0601001020>.

⁵³ SSA §1840(a)(1) and §1840(b)(1). See CRS Report R42035, *Social Security Primer*, and CRS Report RS22350, *Railroad Retirement Board: Retirement, Survivor, Disability, Unemployment, and Sickness Benefits*.

⁵⁴ See CRS Report 98-810, *Federal Employees’ Retirement System: Benefits and Financing*.

⁵⁵ 42 C.F.R. §408.60.

⁵⁶ SSA §1840(a)(1).

⁵⁷ Beneficiaries who receive their Parts A and B benefits through Medicare Advantage (MA, Part C), must still pay the monthly Part B premium, but may pay different amounts. For example, some MA plans may offer an additional benefit by reducing the amount one pays for the Part B premium. Alternatively, some MA plans may be more expensive than traditional Medicare, for example because they provide benefits beyond what is provided under traditional Medicare, and may charge a premium in addition to the Part B premium. The Social Security Administration has in place a “safety net” to prevent the deduction of more than \$300 of Part C and Part D plan premiums from a single Social Security check. For amounts over \$300, the enrollee may be billed directly.

⁵⁸ Number of people as of April 2015. Figures provided to CRS by the Social Security Administration.

Social Security beneficiaries who do not pay Medicare Part B premiums include those who are under the age of 65 and do not yet qualify for Medicare (e.g., began receiving Social Security benefits at the age of 62); receive low-income assistance from Medicaid to pay the Part B premium; have started to receive Social Security disability insurance (SSDI) but are not eligible for Medicare Part B because they have not received SSDI for 24 months; or chose not to enroll in Medicare Part B.

The amount of an individual's Social Security benefits cannot go down from one year to the next as a result of the annual Part B premium increase, except in the case of higher-income individuals subject to income-related premiums. (See "Protection of Social Security Benefits from Increases in Medicare Part B Premiums.") For those beneficiaries "held harmless," the dollar amount of their Part B premium increases would be held below or equal to the amount of the increase in their monthly Social Security benefits.

Part B Enrollees Who Do Not Receive Social Security Benefits

About 3% of Medicare Part B enrollees do not receive Social Security benefits.⁵⁹ For example, some individuals aged 65 and older may have deferred signing up for Social Security for various reasons, for example if they have not yet reached their full Social Security retirement age⁶⁰ or are still working. Additionally, certain persons who spent their careers in employment that was not covered by Social Security—including certain federal, state, or local government workers and certain other categories of workers—do not receive Social Security benefits but may still qualify for Medicare. For those who receive benefit payments from the Railroad Retirement Board (RRB)⁶¹ or the Civil Service Retirement System (CSRS),⁶² Part B premiums are deducted from the enrollees' monthly benefit payments. While RRB retirement benefit amounts are protected by the hold-harmless provision, CSRS benefits are not held harmless from annual increases in the Part B premium.

For those who do not receive these types of benefit payments, Medicare will bill directly for their premiums every three months.⁶³ The enrollee who is being billed does not necessarily have to pay his or her own premiums; premiums may be paid by the enrollee, a relative, friend, organization, or anyone else.⁶⁴ Nonpayment of premiums results in termination of enrollment in the Part B program, although a grace period (through the last day of the third month following the month of the due date) is allowed for beneficiaries who are billed and pay directly.⁶⁵

⁵⁹ Figure provided to CRS by CMS, September 2015.

⁶⁰ See CRS Report R41962, *The Social Security Retirement Age: In Brief*.

⁶¹ SSA §1840(b)(1).

⁶² Generally, employees of the federal government hired before 1984 are covered by the Civil Service Retirement System (CSRS) and are not covered by Social Security. Most federal workers first hired into federal service on or after January 1984 participate in the Federal Employees' Retirement System (FERS), which includes Social Security coverage. However, the Tax Equity and Fiscal Responsibility Act (P.L. 97-248) enabled federal workers to be eligible for Medicare based on their federal employment. See CRS Report R42741, *Laws Affecting the Federal Employees Health Benefits (FEHB) Program*.

⁶³ Payment may be made by check, money order, or credit card; alternatively, one may schedule a payment to be automatically deducted from one's bank account. Premium billing form and information may be found at <http://www.medicare.gov/forms-help-and-resources/mail-about-medicare/notice-of-medicare-premium-payment-due.html>.

⁶⁴ Social Security Administration, *Program Operations Manual*, Section HI 01001.225, "When Premium Notices May Be Sent to an Individual Other Than an Enrollee," at <https://secure.ssa.gov/apps10/poms.nsf/lnx/0601001225>.

⁶⁵ This grace period may be extended for up to an additional three months if the enrollee can establish that nonpayment was due to circumstances beyond his or her control, such as being physically or mentally incapable of making premium (continued...)

Determining the Part B Premium

Each year, the CMS actuaries estimate total per capita Part B costs for beneficiaries aged 65 and older over for the following year and set the Part B premium to cover 25% of expected Part B expenditures.⁶⁶ However, because prospective estimates may differ from the actual spending for the year, contingency margin adjustments are made to ensure sufficient income to accommodate potential variation in actual expenditures during the year. (See “Contingency Margin.”) The Part B premium is a single national amount that does not vary with a beneficiary’s age, health status, or place of residence. However, premiums may be adjusted upward for late enrollment (see “Late-Enrollment Premium Penalty and Exemptions”) and for beneficiaries with high incomes (see “Income-Related Premiums”), or they may be adjusted downward for those protected by the hold-harmless provision (see “Protection of Social Security Benefits from Increases in Medicare Part B Premiums”).

Monthly Part B premiums are based on the estimated amount that would be needed to finance Part B expenditures on an incurred basis during the year. In estimating needed income and to account for potential variation, CMS takes into consideration the difference in prior years of estimated and actual program costs, the likelihood and potential impact of potential legislation affecting Part B in the coming year, and the expected relationship between incurred and cash expenditures (e.g., payments for some services provided during a particular year may not be paid until the following year). Once the premium has been set for a year, it will not be changed during that year.

While both aged and disabled Medicare beneficiaries may enroll in Part B, the statute provides that Part B premiums are to be based only on the expected program costs—that is, the monthly *actuarial rate*—for the aged (those 65 years of age and older).⁶⁷ The actuarial rate for the aged is defined as one-half of the expected average monthly per capita program costs for the aged plus any contingency margin adjustments. Standard Part B premiums are one-half of the actuarial rate. (See **Appendix A** for a discussion of the history of the premium methodology.) Part B costs not covered by premiums are paid for through transfers from the General Fund of the Treasury. The monthly actuarial rates for *both* aged and disabled enrollees, however, are used to determine the needed amount of matching general revenue funding.⁶⁸

Changes to the Calculation of Medicare Part B Premiums in 2016 Made by the Bipartisan Budget Act of 2015

Under normal circumstances, standard Medicare Part B premiums are set at an amount to cover 25% of projected average per capita Part B expenditures plus an appropriate contingency margin. Due to expected growth in the cost

(...continued)

payments or due to an administrative error. There is no financial hardship exemption, although those with sufficiently low income may qualify for premium assistance from a state Medicaid program.

⁶⁶ Part B premium announcements are generally made in the fall prior to the effective year. For example, the 2016 Part B premium rate was announced in November 2015.

⁶⁷ SSA §1839(a).

⁶⁸ The actuarial rate for the disabled is defined as one-half of the expected average monthly cost per disabled enrollee. Average per capita costs for the disabled are generally higher than those for the aged; therefore, were these average costs included in the premium determination, all Part B enrollees could pay higher premiums. As general revenue funding is determined using both the average costs of the aged and the disabled, this funding is sufficient to compensate for the reduction in premium revenues due to not including the costs of the disabled in determining the premium amount.

of Part B benefits, the Medicare trustees projected that in order to cover 25% of benefit costs as well as to build up adequate contingency reserves, the 2016 Part B premiums would need to be increased to about \$121 per month from the 2015 amount of \$104.90.⁶⁹ However, due to the absence of a Social Security COLA in 2016 and the resulting widespread application of the hold-harmless provision, most Part B enrollees are continuing to pay the 2015 premium amount of \$104.90 through 2016. With about 70% of enrollees continuing to pay \$104.90, the only way that premiums could cover 25% of per capita expenditures would be if those not held harmless (the remaining 30%) bore the entire cost increase (i.e., if the aggregate increase in premiums were spread out over fewer people). The Medicare trustees estimated that the premiums of those not held harmless would therefore need to be increased to about \$159 per month.⁷⁰ The Trustees also estimated that high-income beneficiaries (i.e., those earning more than \$85,000) would need to pay significantly higher monthly premiums of about \$223, \$319, \$414, or \$510 depending on their level of income (compared to their respective 2015 premiums of \$147, \$210, \$273, and \$336 per month).

To mitigate the expected large premium increases for those not held harmless, the Bipartisan Budget Act of 2015 (BBA 15; P.L. 114-74) required that 2016 Medicare Part B premiums be set as if the hold-harmless rule were not in effect—in other words, to calculate premiums as if all enrollees were paying the same annual inflation-adjusted standard premium (about \$121 per month). To compensate for the lost premium revenue (below the required 25%) and to ensure that the Supplementary Medical Insurance (SMI) Trust Fund has adequate income to cover payments for Part B benefits in 2016, the act allows for additional transfers from the General Fund of the Treasury to the SMI Trust Fund. (See **Table 2** for actual premiums as determined under the methodology dictated by BBA 15.)

To offset the approximately \$9 billion in increased federal spending in 2016 resulting from the reduction in standard premiums for those not held harmless (i.e., the additional amounts transferred from the General Fund), as well as the loss of income due to reductions in the income-related monthly adjustment for high-income enrollees, the law requires that a \$3.00 per month surcharge be added to standard premiums (higher amounts for those with high incomes) each year until the \$9 billion is “repaid.”⁷¹ It is expected that this surcharge will be applied to premiums through about 2022.⁷² The monthly repayment surcharge is only paid by those not held harmless.

Should there again be no Social Security COLA in 2017, BBA 15 allows for a similar Medicare Part B premium setting mechanism for 2017; additional surcharges would be imposed to offset the federal costs of holding down the premiums of those not held harmless in that year. BBA 15 does not allow for similar adjustments beyond 2017.

Premium Calculation for 2016⁷³

To determine the 2016 monthly Part B premium amount, CMS first estimated the monthly actuarial rate for enrollees aged 65 and older using actual per-enrollee costs by type of service from program data through 2013 and projected these costs through 2016. For 2016, CMS estimated that the monthly amount needed to cover one-half of the total benefit and administration costs for the aged would be \$227.86. However, because of expected variations between projected and actual costs, a contingency adjustment of \$11.61 was added to this amount. (See “Contingency Margin,” below.) After a reduction of \$1.87 to account for expected

⁶⁹ 2015 Medicare Trustees’ Report, p. 32.

⁷⁰ See archived CRS Report R44224, *Potential Impact of No Social Security COLA on Medicare Part B Premiums in 2016*.

⁷¹ The \$9 billion consists of about \$7.4 billion in increased federal spending due to the reduced standard premiums and about \$1.6 billion lost revenues due to the reduction in high-income adjustments. The \$3.00 standard premium surcharge “pays for” the increased general revenue transfers in 2016, while the additional high-income surcharge adjustments are used to offset the reduction in the income-related adjustment amounts. CMS, “Medicare Program: Medicare Part B Monthly Actuarial Rates, Premium Rate, and Annual Deductible Beginning January 1, 2016,” 80 *Federal Register* 70811, November 16, 2015.

⁷² In the final year of the repayment adjustments, the surcharge may be set at less than \$3.00 to avoid overpayment. Congressional Budget Office (CBO), “Estimate of the Budgetary Effects of H.R. 1314, the Bipartisan Budget Act of 2015, as reported by the House Committee on Rules on October 27, 2015,” at <https://www.cbo.gov/sites/default/files/114th-congress-2015-2016/costestimate/hr1314.pdf>. Note: CBO reports on a fiscal year basis, whereas Medicare premiums are set for a calendar year.

⁷³ CMS, “Medicare Program: Medicare Part B Monthly Actuarial Rates, Premium Rate, and Annual Deductible Beginning January 1, 2016,” 80 *Federal Register* 70811, November 16, 2015.

interest on trust fund assets, the monthly actuarial rate for the aged was determined to be \$237.60. The 2016 Part B standard premium is one-half of \$237.60, or \$118.80 per month (25% of the monthly expected per capita costs of the aged).⁷⁴ The BBA 15 repayment surcharge of \$3.00 was then added onto that amount for a total monthly premium of \$121.80. (As noted, only those not held harmless pay the standard 2016 premium and surcharge. Those held harmless in 2016 continue to pay the 2015 premium amount of \$104.90 per month.)

Contingency Margin

The contingency margin is the amount set aside to cover an appropriate degree of variation between actual and projected costs in a given year. In recent years, CMS has noted that Part B expenditures have been higher than expected under current law.⁷⁵ In some cases, legislation that resulted in increased Medicare Part B expenditures for the year was enacted after the premium for the year had been set. For example, in their 2015 report, the Medicare trustees noted that “(l)egislation enacted at the end of 2014 and the beginning of 2015 raised Part B physician expenditures substantially compared to the law in effect in the fall of 2014 when the 2015 financing was established.”⁷⁶ Higher-than-expected utilization of Part B services also contributed to this increase. While the Medicare trustees estimated that program financing, including beneficiary premiums established for 2015, would be adequate to cover expected expenditures, they also noted that the funding “would need to be increased in future years in order to restore the financial status of the Part B account to a satisfactory level.”⁷⁷

The Medicare trustees consider a ratio of asset reserves to expected expenditures in the Part B account of the Supplementary Medical Insurance (SMI) Trust Fund of between 15% and 20% for a given year to be adequate, and they aim for a 17% ratio when determining Part B financing for the upcoming year. Due to the decrease in these reserves in 2015 (to a ratio of about 12%), the 2016 contingency margin includes an adjustment to build the reserves back up to 17% of expected annual expenditures.

Additionally, starting in 2011, manufacturers and importers of brand-name drugs began paying a fee that is allocated to the SMI Trust Fund. The contingency margin was thus reduced to account for this additional revenue. Further, certain payment incentives to encourage the development and use of health information technology (HIT) by Medicare physicians are excluded from premium determinations. (HIT bonuses or penalties are directly offset through transfers of general funds from the Treasury.) The 2016 contingency margin adjustment of \$11.61 reflects the expected net effects of all of the above factors.

⁷⁴ In the absence of the Bipartisan Budget Act of 2015 (BBA 15; P.L. 114-74), the actuarial amount would have been \$318.00 and premiums would have been \$159 per month.

⁷⁵ CMS, “Medicare Program: Medicare Part B Monthly Actuarial Rates, Premium Rate, and Annual Deductible Beginning January 1, 2016,” 80 *Federal Register* 70811, November 16, 2015, at <http://www.gpo.gov/fdsys/pkg/FR-2015-11-16/pdf/2015-29181.pdf>.

⁷⁶ 2015 Medicare Trustees’ Report, p. 87, at <https://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/ReportsTrustFunds/Downloads/TR2015.pdf>. The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA; P.L. 114-10) changed the methodology used to update Medicare payments to physicians and made other Medicare payment adjustments. CBO estimated that MACRA changes related to physician payment rates would increase direct federal spending by about \$175 billion over the period 2015 through 2025; this estimate includes increased spending in 2015 of \$6.0 billion and in 2016 of \$11.4 billion. See CBO, *Cost Estimate and Supplemental Analyses for H.R. 2, the Medicare Access and CHIP Reauthorization Act of 2015*, March 25, 2015, at <https://www.cbo.gov/publication/50053>, and CRS Report R43962, *The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA; P.L. 114-10)*.

⁷⁷ 2015 Medicare Trustees’ Report, pp 96-97.

Income-Related Premiums

For the first 41 years of the Medicare program, all Part B enrollees paid the same Part B premium, regardless of their income. However, the Medicare Modernization Act of 2003 (MMA; P.L. 108-173)⁷⁸ required that, beginning in 2007, high-income enrollees pay higher premiums.⁷⁹ About 6% of Medicare Part B enrollees are expected to pay these higher premiums in 2016.⁸⁰

Adjustments are made to the standard Part B premiums for high-income beneficiaries, with the share of expenditures paid by beneficiaries increasing with income. This share ranges from 35% to 80% of the value of Part B coverage. In 2016, individuals whose incomes exceed \$85,000 and couples whose combined income exceeds \$170,000 are subject to higher premium amounts.⁸¹ Income thresholds used in determining high-income Part B premiums for 2011 through 2017 are frozen at the 2010 levels.⁸² The hold-harmless provision that prevents a beneficiary's Social Security benefits from decreasing from one year to the next as a result of the Part B premium increase does not apply to those subject to an income-related increase in their Part B premiums. (See "Protection of Social Security Benefits from Increases in Medicare Part B Premiums.")

Determination of Income

To determine those subject to the high-income premium, Social Security uses the most recent federal tax return provided by the Internal Revenue Service. In general, the taxable year used in determining the premium is the second calendar year preceding the applicable year. For example, the 2015 tax return (2014 income) was used to determine who would pay the 2016 high-income premiums.⁸³

High-income adjustments to Part B premiums are referred to as the *income-related monthly adjustment amount* (IRMAA). The income definition on which these premiums are based is

⁷⁸ The MMA would have phased in the increase over five years; however, the Deficit Reduction Act of 2005 (DRA; P.L. 109-171) shortened the phase-in period to three years.

⁷⁹ At the time of enactment of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA; P.L. 108-173), CBO estimated that 1.2 million persons (3% of beneficiaries) would pay higher premiums in 2007 and that 2.8 million persons (6% of beneficiaries) would pay higher premiums in 2013. CBO further estimated that the MMA provision would reduce federal outlays by \$13.3 billion over the 2007-2013 period. CBO estimated that the DRA provision accelerating the phase-in would increase premium collections by \$1.6 billion over the 2007-2010 period. The MMA estimate and the DRA estimate were made by CBO at the time of enactment of each law. Both estimates were based on the CBO budget baseline in effect at the time. As is the case for all CBO estimates, the earlier estimates are incorporated into subsequent CBO baselines. Therefore, the two savings estimates cannot be added together.

⁸⁰ Estimated provided to CRS by CMS, September 2015.

⁸¹ For additional information see Social Security Administration Publication, "Medicare Premiums: Rules for Higher-Income Beneficiaries," at <https://www.ssa.gov/pubs/EN-05-10536.pdf>.

⁸² Section 3402 of the Patient Protection and Affordable Care Act (ACA; P.L. 111-148, as amended) froze the thresholds used to determine high-income premiums at the 2010 level. These levels will be maintained through 2017. In 2018 and 2019, Section 402 of MACRA maintains the freeze on the income thresholds for the lower two high-income premium tiers but reduces the threshold levels for the two highest income tiers so that more beneficiaries will fall into the higher percentage categories. Beginning in 2020, the thresholds will be adjusted annually for inflation. See "Income Thresholds and Premium Adjustments," and CRS Report R43962, *The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA; P.L. 114-10)*.

⁸³ If an enrollee amended his or her tax return and doing so changed the income used to determine the high-income adjustments, the updated information may be provided to the Social Security Administration so that the administration may correct or remove the income-related monthly adjustment amounts.

modified adjusted gross income (MAGI),⁸⁴ which is different from gross income. Specifically, gross income is all income from all sources, minus certain statutory exclusions (e.g., nontaxable Social Security benefits).⁸⁵ From gross income, adjusted gross income (AGI)⁸⁶ is calculated to reflect a number of deductions, including trade and business deductions, losses from sale of property, and alimony payments. MAGI is defined as AGI plus certain foreign-earned income and tax-exempt interest.⁸⁷

If a person had a one-time increase in taxable income in a particular year (such as from the sale of income-producing property), that increase would be considered in determining the individual's total income for that year and thus his or her liability for the income-related premium two years ahead. It would not be considered in the calculations for future years.

In the case of certain major life-changing events that result in a significant reduction in MAGI, an individual may request to have the determination made for a more recent year than the second preceding year.⁸⁸ Major life-changing events include (1) death of a spouse; (2) marriage; (3) divorce or annulment; (4) partial or full work stoppage for the individual or spouse; (5) loss by individual or spouse of income from income-producing property when the loss is not at the individual's direction (such as in the case of a natural disaster); and (6) reduction or loss for individual or spouse of pension income due to termination or reorganization of the plan or scheduled cessation of the pension.⁸⁹ Certain types of events, such as those that affect expenses but not income or those that result in the loss of dividend income because of the ordinary risk of investment, are not considered major life-changing events.⁹⁰

If Medicare enrollees disagree with decisions regarding their IRMAAs, they may file an appeal with Social Security. Enrollees may either submit a "Request for Reconsideration"⁹¹ or contact their local Social Security office to file an appeal. (An enrollee does not need to file an appeal if he or she is requesting a new decision based on a life-changing event described above or if the enrollee has shown that Social Security used the wrong information to make the original decision.)

Income Thresholds and Premium Adjustments

Depending on their level of income, Medicare beneficiaries may be classified into one of five income categories.⁹² In 2016, individuals with incomes less than \$85,000 a year (\$170,000 for a couple) pay the standard premium, which is based on 25% of the average Part B per capita cost. Individuals with incomes over \$85,000 per year and couples with combined income over \$170,000 per year pay a higher percentage of Part B costs. Depending on one's level of income over these threshold amounts, premiums may be adjusted to cover 35%, 50%, 65%, or 80% of the

⁸⁴ Defined at SSA §1839(i)(4). See also Social Security Administration, *Program Operations Manual*, Section HI 01101.010, "Modified Adjusted Gross Income (MAGI)," at <https://secure.ssa.gov/poms.nsf/lnx/0601101010>.

⁸⁵ Internal Revenue Code §61.

⁸⁶ Internal Revenue Code §62.

⁸⁷ The definition of MAGI for the income-related monthly adjustment amount (IRMAA) in Medicare is different from the MAGI definition in certain ACA Medicaid provisions. CRS Report R43861, *The Use of Modified Adjusted Gross Income (MAGI) in Federal Health Programs*.

⁹² SSA §1839(i).

value of Part B coverage (with the rest being subsidized through federal general revenues). Additionally, high-income individuals pay surcharges ranging from \$4.20 to \$9.60 per month to offset increased federal spending in 2016 due to premium reductions under BBA 15 (compared to a \$3.00 surcharge for those who pay the standard premium). Total IRMAAs for the four high-income levels, including the additional BBA 15 surcharges, are \$48.70, \$121.80, \$194.90, and \$268.00 respectively.

The income categories and associated premiums for 2016, including the applicable BBA 15 repayment surcharges, are shown below in **Table 2**. When both members of a couple are enrolled in Part B, each pays the applicable premium amount. (It is possible for members of a couple to pay different premium amounts in cases where one member qualifies for protection under the hold-harmless rule and the other one does not.)

Table 2. Monthly Medicare Part B Premiums for 2016

Levels of Premium Adjustment and Percentage of Costs Covered by Premiums	Beneficiaries Who File an Individual Tax Return with Income	Beneficiaries Who File a Joint Tax Return with Income ^a	Premium Based on Applicable Percentage of Benefit Costs	BBA 15 Monthly Repayment Surcharge ^b	Total Monthly Premium (premium + surcharge) ^c
Held Harmless	Less than or equal to \$85,000	Less than or equal to \$170,000	n/a	\$0.00	\$104.90
Not Held Harmless Standard (25%)	Less than or equal to \$85,000	Less than or equal to \$170,000	\$118.80	3.00	121.80
Level 1 (35%)	Greater than \$85,000 and less than or equal to \$107,000	Greater than \$170,000 and less than or equal to \$214,000	166.30	4.20	170.50
Level 2 (50%)	Greater than \$107,000 and less than or equal to \$160,000	Greater than \$214,000 and less than or equal to \$320,000	237.60	6.00	243.60
Level 3 (65%)	Greater than \$160,000 and less than or equal to \$214,000	Greater than \$320,000 and less than or equal to \$428,000	308.90	7.80	316.70
Level 4 (80%)	Greater than \$214,000	Greater than \$428,000	380.20	9.60	389.80

Source: CMS, "Medicare Program: Medicare Part B Monthly Actuarial Rates, Premium Rate, and Annual Deductible Beginning January 1, 2016," 80 *Federal Register* 70811, November 16, 2015.

Notes: The above income thresholds will remain the same through 2017. The hold-harmless provision does not apply to individuals in the high-income categories. n/a = not applicable.

- Members of a couple with a joint income of \$170,000 or less could pay different premium amounts if one member qualifies to be held harmless and the other does not. Members of a couple in the high-income categories both pay the same applicable income-adjusted premium amount.
- BBA = Bipartisan Budget Act of 2015 (P.L. 114-74).
- Total income-related monthly adjustment amounts (IRMAAs) are the amounts by which total monthly premiums exceed the standard premium (\$121.80). For the 35% category (Level 1), the IRMAA is \$48.70. The IRMAAs for the 50% through 80% categories (Levels 2 through 4) are \$121.80, \$194.90, and \$268.00, respectively.

Married persons who lived with their spouse at some point during the year but who filed separate returns are subject to different premium amounts. There are two higher-income categories that determine the additional monthly premium adjustment for these beneficiaries. The income levels and premium amounts are shown in **Table 3**.

Table 3. Part B Premium Adjustment for Married Beneficiaries Filing Separately for 2016

Beneficiaries Who Are Married and Lived with Their Spouse at Any Time During the Year but File a Separate Tax Return from Their Spouse with Income	Premium Based on Applicable Percentage of Benefit Costs	BBA 15 Monthly Repayment Surcharge^a	Total Monthly Premium (premium + surcharge)
Held Harmless			
Less Than or Equal to \$85,000	n/a	\$0.00	\$104.90
Not Held Harmless			
Less Than or Equal to \$85,000	\$118.80	3.00	121.80
Greater Than \$85,000 and Less Than or Equal to \$129,000	308.90	7.80	316.70
Greater Than \$129,000	380.20	9.60	389.80

Source: CMS, "Medicare Program: Medicare Part B Monthly Actuarial Rates, Premium Rate, and Annual Deductible Beginning January 1, 2016," 80 *Federal Register* 70811, November 16, 2015.

Notes: The above income thresholds will remain the same through 2017. n/a= not applicable.

a. BBA = Bipartisan Budget Act of 2015 (P.L. 114-74).

The original provision establishing the Part B income-related premiums set the initial income threshold and high-income-level ranges. Prior to 2010, annual adjustments to these levels were based on annual changes in the consumer price index for urban consumers (CPI-U), rounded to the nearest \$1,000. However, the ACA froze the income thresholds and ranges at the 2010 level through 2019 rather than allowing them to rise with inflation.⁹³ As a result, as incomes have increased with inflation, a greater share of Medicare enrollees are reaching the high-income thresholds and paying the high-income premiums than would have been the case without this freeze.

Section 402 of the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA; P.L. 114-10)⁹⁴ makes changes to the income thresholds in the top two income categories beginning in 2018, as shown in **Table 4**, below. Individuals with incomes between \$133,500 and \$160,000 per year will be in the 65% applicable percentage group (instead of those with incomes between \$160,000 and \$214,000), and the income threshold for the highest group (80%) will be \$160,000 (instead of \$214,000). The thresholds for the lower two income groups will remain unchanged. In 2019, the thresholds will remain the same as in 2018. For the years 2020 and after, the thresholds will be adjusted annually for inflation based on the new (2018 and 2019) threshold levels.⁹⁵

⁹³ ACA §3402. Because more beneficiaries are expected to pay this higher premium over time and therefore reduce the amount of general revenues needed to fund Part B, CBO scored this provision as saving the federal government \$25 billion over 10 years (FY2010-FY2019), at <http://www.cbo.gov/sites/default/files/cbofiles/ftpdocs/113xx/doc11379/amendreconprop.pdf>.

⁹⁴ See CRS Report R43962, *The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA; P.L. 114-10)*.

⁹⁵ Under prior law (ACA §3402), in 2020 and subsequent years, the income thresholds were to be indexed to inflation as if they had not been frozen between 2011 and 2019. In other words, the income thresholds would have reverted to (continued...)

Table 4. Income Thresholds for High-Income Premiums in 2018 and 2019

Beneficiaries Who File Individual Tax Returns with Income	Percentage of Costs Covered by Premiums
Less Than or Equal to \$85,000	25%
More Than \$85,000 but Not More Than \$107,000	35%
More Than \$107,000 but Not More Than \$133,500	50%
More Than \$133,500 but Not More Than \$160,000	65%
More Than \$160,000	80%

Source: Section 402 of the Medicare Access and CHIP Reauthorization Act of 2015 (P.L. 114-10).

Note: Income thresholds beyond 2019 will be adjusted annually for inflation.

Premium Assistance for Low-Income Beneficiaries

Medicare beneficiaries with limited income and resources may be able to qualify for assistance with their premiums and other out-of-pocket expenses.⁹⁶ About one in five Medicare beneficiaries receives Part B premium subsidies.

Medicare beneficiaries who qualify for full Medicaid benefits (*full dual-eligibles*) have most of their health care expenses paid for by either Medicare or Medicaid. For these individuals, Medicaid covers the majority of Medicare premium and cost-sharing expenses, and it supplements Medicare by providing coverage for services not covered under Medicare, such as dental services and long-term services and supports. In cases where services are covered by both Medicare and Medicaid, Medicare pays first and Medicaid picks up most of the remaining costs. Each state has different rules about eligibility and applying for Medicaid.⁹⁷

Beneficiaries who do not meet their respective state's eligibility criteria for Medicaid may still qualify for assistance with Part B premiums if they have incomes of less than 135% of the federal poverty level (FPL) and assets of less than \$7,280 for an individual or \$10,930 for a couple in 2016.⁹⁸ These assistance programs are commonly referred to as *Medicare Savings Programs*

(...continued)

the levels they would have reached had they been indexed for inflation since 2007, thereby reducing the proportion of beneficiaries who would be subject to higher premiums. CBO estimated that this provision would save \$34.3 billion over 10 years. CBO, *Cost Estimate of H.R. 2, Medicare Access and CHIP Reauthorization Act of 2015*, March 25, 2015, <https://www.cbo.gov/publication/50053>.

⁹⁶ See Medicare.gov, "Medicare Savings Programs," at <http://www.medicare.gov/your-medicare-costs/help-paying-costs/medicare-savings-program/medicare-savings-programs.html> and Medicare Publication, "Get Help with Your Medicare Costs," at <https://www.medicare.gov/Pubs/pdf/10126.pdf>. Subsidies are also available for low-income beneficiaries enrolled in Part D, the outpatient prescription drug benefit. Those who are eligible for assistance with Part B premiums through their Medicaid programs are automatically eligible to receive the Part D low-income subsidy. Other low-income beneficiaries with incomes below 150% of the federal poverty level (FPL) and who meet the resource tests may also be eligible for the drug subsidy.

⁹⁷ See CRS Report R43357, *Medicaid: An Overview*. In those states that have extended Medicaid coverage to individuals 64 years of age and under with incomes of up to 138% of FPL, certain individuals at the higher income levels may no longer qualify for Medicaid when they turn 65. In other words, traditional Medicaid categorical and income eligibility (i.e., income and asset) rules will apply when an individual becomes eligible for Medicare.

⁹⁸ Income and asset requirements may vary by state and change each year. These amounts do not include a burial-fund allowance of \$1,500 per person.

(MSPs).⁹⁹ Three of these programs provide assistance with Part B premiums. The type of assistance is based on a beneficiary's level of income.

Qualified Medicare Beneficiaries

Aged or disabled persons with incomes at or below FPL may qualify for the Qualified Medicare Beneficiary (QMB) program.¹⁰⁰ In 2016, the QMB monthly qualifying income levels are \$1,010 for individuals and \$1,355 for a couple (annual income of \$12,120 and \$16,260, respectively).¹⁰¹ QMBs are entitled to have their Medicare Parts A and B cost-sharing charges, including the Part B premium and all deductibles and coinsurance, paid by Medicaid.¹⁰² (See **Table 5**.) For QMBs, Medicaid coverage is limited to the payment of Medicare cost-sharing charges (i.e., the Medicare beneficiary is *not* entitled to coverage of Medicaid plan services, unless the individual is otherwise entitled to Medicaid).

Specified Low-Income Medicare Beneficiaries

Individuals whose income is more than 100% but less than 120% of FPL may qualify for assistance as a Specified Low-Income Medicare Beneficiary (SLMB). In 2016, the monthly income limits are \$1,208 for an individual and \$1,622 for a couple (annual income of \$14,496 and \$19,464, respectively).¹⁰³ Medicaid pays the Medicare Part B premiums for SLMBs, but not other cost sharing.

Qualifying Individuals

Individuals whose income is between 120% and 135% of FPL may qualify for assistance as Qualifying Individuals (QIs). In 2016, the monthly income limit for a QI is \$1,357, and for a couple it is \$1,823 (annual income of \$16,284 and \$21,876, respectively). Medicaid protection for these individuals is limited to payment of the monthly Medicare Part B premium. Expenditures under the QI program are, however, paid for (100%) by the federal government from the Medicare SMI Trust Fund up to the state's allocation level.¹⁰⁴ A state is required to cover only the number of people that would bring the state's spending on these population groups in a year up to

⁹⁹ For additional information about these programs and to learn whether a beneficiary might qualify for Medicare premium assistance, contact the applicable State Medical Assistance (Medicaid) office. (As the names of these programs may vary by state, one should specifically inquire about Medicare Savings Programs.) The contact information for state Medicaid offices may be obtained by calling 1-800-MEDICARE (1-800-633-4227) or by visiting the Medicare "contacts" website at <http://www.medicare.gov/contacts>.

¹⁰⁰ The federal poverty levels for 2016 are \$11,880 per year for an individual and \$16,020 for a couple. (These levels are slightly higher in Alaska and Hawaii.) See *The 2016 HHS Poverty Guidelines* at <https://aspe.hhs.gov/poverty-guidelines>.

¹⁰¹ The qualifying levels are slightly higher than the monthly federal poverty level because, by law, \$20 per month of unearned income is disregarded in the calculation. See Social Security Administration, *Program Operations Manual*, Section HI 00815.023, "Medicare Savings Programs Income Limits," at <https://secure.ssa.gov/poms.nsf/lnx/0600815023>.

¹⁰² The Qualified Medicare Beneficiary (QMB) program does not provide assistance with drug costs. Low-income beneficiaries who qualify for a Medicare Savings Program are automatically enrolled in Medicare Part D; their premiums and most cost sharing are paid for by the Part D low-income subsidy, which is financed through Medicare. States pay some of the costs for Part D low-income assistance through state transfer payments.

¹⁰³ The qualifying levels are calculated the same way as for the QMB program.

¹⁰⁴ In general, Medicaid payments are shared between the federal government and the states according to matching formulas.

its allocation level. Any expenditures beyond that level are voluntary and paid entirely by the state.

Funding for the QI program was first made available by the Balanced Budget Act of 1997 (BBA97; P.L. 105-33).¹⁰⁵ Subsequent legislation extended the program and the amounts available through allocation.¹⁰⁶ MACRA permanently extended the QI program and appropriated \$535 million for the remainder of CY2015 (April 1, 2015, through December 31, 2015) and \$980 million for CY2016.¹⁰⁷

Table 5. 2016 Medicare Savings Program Eligibility Standards

	Monthly Income ^a	Resources ^b	Benefits
Qualified Medicare Beneficiary (QMB)	At or Below 100% FPL ^c \$1,010 (single) \$1,355 (couple)	\$7,280 (single) \$10,930 (couple)	Part B Premium ^d Coverage of Parts A and B Deductibles and Coinsurance
Specified Low-Income Medicare Beneficiary (SLMB)	Above 100% but Less Than 120% FPL ^c \$1,010-\$1,208 (single) \$1,355-\$1,622 (couple)	\$7,280 (single) \$10,930 (couple)	Part B Premium
Qualifying Individual (QI)	At or Above 120% but Less Than 135% FPL ^c \$1,208-\$1,357 (single) \$1,622-\$1,823 (couple)	\$7,280 (single) \$10,930 (couple)	Part B Premium

Notes:

- These amounts include a \$20 general income exclusion, under which \$20 from any income is not counted toward the income limits. CMS rounds up to the nearest dollar when computing monthly income limits.
- Resources include money in checking and savings accounts, stocks, bonds, mutual funds, and Individual Retirement Accounts (IRAs). Resources do not include one’s primary residence, a life insurance policy worth up to \$1,500, one car, burial plots, up to \$1,500 per person for burial expenses, and household items. Some states have no limits on resources.
- Federal Poverty Levels (FPLs) are updated each year, usually in January or February. Income levels are higher for Hawaii and Alaska and for those living with dependents.
- Most people do not pay a premium for Part A because they have worked 40 or more quarters in covered employment. For those without sufficient work history to qualify for premium-free Part A, Medicaid will also pay Part A premiums for QMBs.

¹⁰⁵ §4732(c) of BBA 97 added §1933(c) of the SSA.

¹⁰⁶ See archived CRS Report R43958, *Health Care-Related Expiring Provisions, First Session of the 114th Congress*.

¹⁰⁷ The amount of funding for CY2017 and subsequent calendar years will be based on the product of the following: (1) the previous year’s Qualifying Individuals (QI) allocation; (2) the increase from the previous year in Medicare Part B premium; and (3) the estimated increase from the previous year in Part B enrollment. See CRS Report R43962, *The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA; P.L. 114-10)*.

Protection of Social Security Benefits from Increases in Medicare Part B Premiums

After a person becomes eligible to receive Social Security benefits, his or her monthly benefit amount is adjusted annually to compensate for increases in the prices of goods and services over time.¹⁰⁸ Near the end of each year, the Social Security Administration announces the cost-of-living adjustment (COLA) payable in January of the following year. The amount of the COLA is based on inflation as measured by the Consumer Price Index-Urban Wage Earners and Clerical Workers (CPI-W).¹⁰⁹ If the CPI-W decreases, Social Security benefits stay the same—benefits are not reduced during periods of deflation.

When the annual Social Security COLA is not sufficient to cover the standard Medicare Part B premium increase, most Medicare beneficiaries are protected by a *hold-harmless* provision in the Social Security Act.¹¹⁰ Specifically, if in a given year the increase in the standard Part B premium would cause a beneficiary's Social Security check to be less, in dollar terms, than it was the year before, then the Part B premium is reduced to ensure that the amount of the individual's Social Security check does not decline.¹¹¹ This determination is made by the Social Security Administration.

To be held harmless in a given year, a Social Security beneficiary must have received Social Security benefit checks in both December of the previous year and January of the current year, and the beneficiary must also have had Part B premiums deducted from both checks.¹¹² The hold-harmless provision operates by comparing the net dollar amounts of the two monthly benefit payments; if the net Social Security benefit for January of the current year is lower than in December of the previous year, then the hold-harmless provision applies to that person. Premiums of those held harmless are then reduced to an amount that would not cause their Social Security benefits to decline in the next year. The premium paid by those held harmless is called the Variable Supplementary Medical Insurance premium.¹¹³ Those not held harmless pay the standard premium as determined for that year.

Typically, the hold-harmless provision affects only a small number of beneficiaries and has had minimal impact on Part B financing.¹¹⁴ In most years, this rule primarily protects those with

¹⁰⁸ For more information, see CRS Report R42035, *Social Security Primer*.

¹⁰⁹ The Consumer Price Index-Urban Wage Earners and Clerical Workers (CPI-W) tracks the prices of a fixed market basket of goods and services over time. Social Security's cost-of-living adjustment (COLA) is calculated as the change in the CPI-W from the third quarter of the prior calendar year to the third quarter of the current calendar year. If the CPI-W increases during this period, Social Security benefits for the next year increase proportionately.

¹¹⁰ SSA §1839(f). This provision was originally created by the Deficit Reduction Act of 1984 (P.L. 98-369, Section 2302), extended by subsequent legislation, and made permanent by the Catastrophic Coverage Act of 1988 (P.L. 100-360, Section 211(b)) (this provision was not repealed when that law was repealed in 1989). Those who receive RRB benefits are also protected by this provision. The hold-harmless provision was first implemented in January 1987.

¹¹¹ For more information on the hold-harmless provision, see archived CRS Report R44224, *Potential Impact of No Social Security COLA on Medicare Part B Premiums in 2016*.

¹¹² Note that Social Security benefit checks reflect benefit entitlements for the previous month, whereas Part B premiums are deducted in advance. For example, a November Social Security benefit check is not received until December, but it has December's Part B premium deducted from it.

¹¹³ Social Security Administration, *Program Operations Manual*, Section HI 01001.004, "The Variable Supplementary Medical Insurance Premium," at <https://secure.ssa.gov/poms.nsf/lnx/0601001004>.

¹¹⁴ The hold-harmless provision is applied on a case-by-case basis. For example, in a given year a Social Security COLA applied to most benefit levels may be sufficient to cover the dollar amount of a Part B premium increase for (continued...)

relatively low Social Security payments. However, in years in which there is no Social Security COLA, such as in 2010 and 2011, and again in 2016, a large number of beneficiaries may be protected by this provision. (See “Application of the Hold-Harmless Rule in Prior Years” and “Application of the Hold-Harmless Rule in 2016.”)

Some Beneficiaries Are Not Protected by the Hold-Harmless Provision

Not all beneficiaries are protected by the hold-harmless provision and, under some circumstances, may be subject to significantly higher premiums than those who are held harmless. Groups that are not protected include the following:

- **Higher-Income Beneficiaries.** Higher-income beneficiaries who are required to pay income-related Part B premiums are explicitly excluded by law from protection under the hold-harmless provision. They are required to pay the full amount of any increase in their Part B premiums. (See “Income-Related Premiums.”)
- **Lower-Income Beneficiaries.** Lower-income beneficiaries who receive premium assistance from Medicaid are not held harmless as their premiums are not deducted from their Social Security benefits. However, the Medicaid program pays the full amount of any increase in their Part B premiums. (See “Premium Assistance for Low-Income Beneficiaries.”)
- **Those Who Do Not Receive Social Security.** This group includes those who have not yet signed up for Social Security for various reasons, for example because they have deferred signing up because they have not reached full retirement age¹¹⁵ or are still working. It also includes disabled beneficiaries whose Social Security Disability Insurance (SSDI) cash benefits have been discontinued because they have returned to work but who are still eligible for Medicare.¹¹⁶ Additionally, those who receive benefits exclusively through a different retirement plan are not held harmless.¹¹⁷ This group includes certain

(...continued)

most beneficiaries; however, it may not be sufficient to fully cover the increase for someone who receives a smaller benefit amount, (i.e., the COLA percentage is applied to a smaller number, and the resulting dollar increase may not be sufficient to fully cover the Part B premium increase). In such a case, the hold-harmless provision would apply to that individual, and his or her Part B premiums may be lower than those paid by most beneficiaries in a given year. Thus, the hold-harmless provision may apply to a small number of beneficiaries each year.

¹¹⁵ See CRS Report R41962, *The Social Security Retirement Age: In Brief*.

¹¹⁶ See CRS Report R41934, *Ticket to Work and Self-Sufficiency Program: Overview and Current Issues*. Social Security Administration, The Redbook, pp. 31-33, at <http://www.ssa.gov/redbook/documents/TheRedBook2015.pdf>; and Social Security Administration, *Disability Benefits For Wounded Warriors*, pp. 13-14, at <http://www.ssa.gov/pubs/EN-05-10030.pdf>. Disabled military personnel may be required to enroll in Part B to maintain coverage under the Department of Defense health insurance, Tricare. Some persons with low incomes and limited resources may be eligible for state assistance with these costs under various Medicare Savings Programs.

¹¹⁷ A person who is entitled to Social Security spousal benefits, based on a spouse’s work record instead of his or her own work record, may or may not be covered by the hold-harmless provision. If the government pension offset (GPO) were to reduce spousal benefits to zero, then the individual would not meet the hold-harmless provision’s requirement of having benefit checks for December of the previous year and January of the current year. Therefore, this person would not be held harmless. If the person were to receive a Social Security spousal benefit for a positive dollar amount, then he or she would be covered by the hold-harmless provision. For more on the GPO, see CRS Report RL32453, *Social Security: The Government Pension Offset (GPO)*.

- federal retirees under the Civil Service Retirement System¹¹⁸ as well as certain state and local government workers—such as teachers, law-enforcement personnel, and firefighters—who have their own pension programs.¹¹⁹
- **Those Who Did Not Have Medicare Premiums Deducted from Their Social Security Checks at the End of One Year and the Beginning of the Next.** This category includes those who enroll in Social Security or Medicare during the year in which the hold-harmless provision is in effect, including SSDI recipients who become eligible for Medicare that year after the 24-month waiting period.¹²⁰ It also includes those who had Medicare premiums paid on their behalf one year, for example by Medicaid, but lost that coverage during the next year.

Some people protected by the hold-harmless provision may still see a decrease in their Social Security checks due to an increase in Medicare Part D premiums. Part D premiums are not covered by the hold-harmless provision, although beneficiaries with low-income subsidies would not be affected.

Additionally, those who pay the late-enrollment penalty are not fully protected from the hold-harmless rule. (See “Late-Enrollment Premium Penalty and Exemptions.”) In a year in which the hold-harmless provision is in effect, the late-enrollment surcharges are calculated as a percentage of the premiums of those not held harmless. These surcharges are considered “nonstandard” premiums and thus are not limited by the hold-harmless provision.

Application of the Hold-Harmless Rule in Prior Years

As described earlier, an individual’s Social Security COLA is determined by multiplying his or her benefit amount by the inflation rate, the CPI-W. Part B premiums are determined by projected Part B program costs. Thus, the number of people held harmless can vary widely from year to year, depending on inflation rates and projected Part B costs. For most years, the hold-harmless provision has affected a relatively small number of beneficiaries.¹²¹ However, due to low inflation, no COLA adjustments were made to Social Security benefits in 2010 and 2011. Most Medicare beneficiaries (about 73%) were protected by the hold-harmless provision and continued to pay the 2009 standard monthly premium of \$96.40 in both 2010 and 2011.¹²² Because Part B

¹¹⁸ Federal employees who exclusively worked under the Civil Service Retirement System (CSRS) are not eligible for Social Security benefits based on their own work record. See CRS Report 98-810, *Federal Employees’ Retirement System: Benefits and Financing*. This program uses the same measuring period and formula for determining its COLAs as Social Security. See CRS Report 94-834, *Cost-of-Living Adjustments for Federal Civil Service Annuities*.

¹²⁰ See archived CRS Report RS22195, *Social Security Disability Insurance (SSDI) and Medicare: The 24-Month Waiting Period for SSDI Beneficiaries Under Age 65*.

¹²¹ For an example of the Social Security benefit thresholds of those who qualified to be held harmless in 2001 through 2010, see Figure 2 of archived CRS Report RS22195, *Social Security Disability Insurance (SSDI) and Medicare: The 24-Month Waiting Period for SSDI Beneficiaries Under Age 65*. For additional information, see Social Security Administration, *Variable Supplementary Medical Insurance Premiums*, Actuarial Note No. 147, by Jacqueline A. Walsh and Burt M. Kestenbaum, March 2006, at http://www.ssa.gov/OACT/NOTES/pdf_notes/note147.pdf.

¹²² The standard Part B premium in 2009 was also the same as that in 2008, \$96.40; however, the lack of change in those years was not a result of the hold-harmless provision. At the end of 2008, it was determined that Part B premiums and general revenue financing in recent years had been set at somewhat higher levels than otherwise would be required to maintain an adequate contingency reserve, and that the level of assets in the Part B account of the SMI Trust Fund were more than adequate. Therefore, it was estimated that an adequate level of assets could be maintained throughout the next year, 2009, without an increase in premiums.

expenditures were still expected to increase in those years, and because beneficiary premiums are required to cover 25% of those costs, the premiums for those not held harmless (27% of beneficiaries) were higher than they would have been had the rest of the beneficiaries not been held harmless. The standard monthly premiums paid by those not held harmless were \$110.50 in 2010 and \$115.40 in 2011.¹²³ In 2011, of the 27% who were not eligible to be held harmless, about 3% were new Medicare enrollees, about 5% were high-income, about 17% had their premiums paid for by Medicaid, and the remaining 2% did not have their premiums withheld from Social Security benefit payments.

In 2012 and 2013, Social Security beneficiaries received a 3.6% and a 1.7% COLA, respectively, which more than covered the Part B premium increases in those years; therefore, the hold-harmless provision was not applicable for most beneficiaries. Similarly, in 2014 and 2015, with a Social Security COLA increase of 1.5% and 1.7% and no increase in Part B premiums, the hold-harmless provision also was not broadly applicable in those years.¹²⁴

Application of the Hold-Harmless Rule in 2016

In 2016, for a third time, there was no Social Security COLA increase, but there was a projected increase in Medicare Part B premiums—from \$104.90 per month in 2015 to about \$121 per month in 2016.¹²⁵ Similar to its application in 2010 and 2011, the hold-harmless provision as applied in 2016 protects some beneficiaries but not others. In 2016, about 70% of Part B enrollees are held harmless and continue to pay the 2015 monthly premium amount of \$104.90 through 2016. Those *not* held harmless include those eligible for premium assistance through their state Medicaid programs (about 19%), those who pay the high-income premiums (about 6%), those who do not receive Social Security benefits (3%), and new enrollees in 2016 (5%).¹²⁶

Absent legislation, the premiums of those not held harmless (the remaining 30%) would have been higher than the premiums would have been had the hold-harmless provision not been in effect.¹²⁷ However, BBA 15 mitigated the expected large increases for those not held harmless and required that their premiums be calculated as if the hold-harmless rule were not in effect. BBA 15 also required that a monthly surcharge of \$3.00 be added to standard premiums (more for those with high incomes) until the increased cost to the federal government of reducing the premiums is offset. (See “Determining the Part B Premium.”) The total standard premium amount for those Part B enrollees not held harmless in 2016, including the \$3.00 per month surcharge, is \$121.80.¹²⁸ (High-income amounts and corresponding monthly surcharges may be found in **Table 2.**)

¹²³ Most new enrollees in 2010 were eligible to be held harmless in the second year of no COLA (i.e., 2011); these individuals continued to pay the 2010 standard premium of \$110.50 in 2011.

¹²⁴ Social Security Administration, “Cost-of-Living Adjustment (COLA) Information for 2015,” at <http://www.socialsecurity.gov/cola/> and Social Security Administration Fact Sheet, “2015 Social Security Changes,” at <http://www.ssa.gov/news/press/factsheets/colafacts2015.html>.

¹²⁵ 2015 Medicare Trustees’ Report, p. 32.

¹²⁶ As there is some overlap in categories—for example, some individuals may pay the high-income premiums and not yet receive Social Security benefits—these figures sum to more than 30%.

¹²⁷ In the absence of BBA 15, the standard premiums of those not held harmless would have increased by about 52%, compared to an increase of about 16% that would have been paid by all enrollees had the hold-harmless rule not been in effect. For additional detail on how premiums would have been set for those not held harmless absent the enactment of BBA 15, see archived CRS Report R44224, *Potential Impact of No Social Security COLA on Medicare Part B Premiums in 2016*.

¹²⁸ The CMS actuaries determined a 2016 standard premium of \$118.80 per month. After the addition of the \$3 per (continued...)

Table 6. Beneficiaries Impacted by the Hold-Harmless Provision in 2016

	Number of Beneficiaries (in millions)	Percentage of Medicare Part B Enrollees
Protected by the Hold-Harmless Provision	36.7	70%
Excluded from the Hold-Harmless Provision^a	15.5	30
Dual Eligibles	10.0	19
High-Income Enrollees	3.1	6
Direct Remittance ^b	1.6	3
New Enrollees	2.6	5

- a. There is overlap among subcategories. For example, one can be both a new enrollee and a high-income enrollee. Therefore, the numbers and percentages in the subcategories add to more than the total number and percentage of those not held harmless.
- b. Those whose premiums are not deducted from Social Security or Railroad Retirement benefits or not paid by Medicaid.

Potential Applicability of Hold-Harmless Rule in 2017¹²⁹

The Medicare trustees estimate that, absent the application of the hold-harmless provision, 2017 Part B premiums will be about the same as in 2016. Additionally, should there be another 0% Social Security COLA in 2017, the BBA 15 adjustments would again apply. In that circumstance, most of those held harmless in 2016 would continue to pay the 2015 premium amount of \$104.90 through 2017, whereas the rates of those not held harmless would be calculated under the BBA 15 methodology and would likely be similar to current 2016 premiums of \$121.80 per month, plus an additional surcharge amount.¹³⁰

In their 2016 annual report, however, the Social Security Trustees project that there will be a very small, 0.2% Social Security COLA in 2017.¹³¹ While a majority of Medicare beneficiaries likely would still qualify for protection under the hold-harmless rule in this circumstance, beneficiaries could still see small premium increases in 2017. (Under the hold-harmless rule, the dollar amount of one's Medicare premiums cannot be larger than the increase in the dollar amount of the increase in one's Social Security benefit from one year to the next. This means that the dollar amount of one's Medicare premiums can increase by as much as the increase in the dollar amount of one's Social Security benefit.) As the amount of the increase in one's Social Security benefit would vary depending on the level of one's benefit, the premium increases for those eligible for protection under the hold-harmless provision could also vary.

(...continued)

month surcharge added by the BBA 15, total standard premiums are \$121.80 per month. CMS, "Medicare Program: Medicare Part B Monthly Actuarial Rates, Premium Rate, and Annual Deductible Beginning January 1, 2016," 80 *Federal Register* 70811, November 16, 2015.

¹²⁹ This report was written prior to the announcement of the 2017 premiums. See text box in "Introduction" for actual 2017 premiums.

¹³⁰ See "Changes to the Calculation of Medicare Part B Premiums in 2016 Made by the Bipartisan Budget Act of 2015."

¹³¹ 2016 *Annual Report of the Boards of Trustees of the Federal Old-Age and Survivors Insurance and Federal Disability Insurance*, July 22, 2016, Table V.C1, at <https://www.ssa.gov/oact/tr/2016/tr2016.pdf>.

To illustrate, a Medicare Part B enrollee who is protected by the hold-harmless rule in 2016 currently pays the 2015 premium amount of \$104.90 per month (instead of the 2016 premium amount of \$121.80 per month). If this individual were receiving a Social Security benefit of \$1,500 per month, then a 0.2% COLA would increase that Social Security benefit by \$3.00 per month. This would mean that the individual's Medicare premium could go up \$3.00 per month in 2017 (to \$107.90). However, if that individual were receiving a Social Security benefit of \$2,500 per month, then a 0.2% COLA would mean a benefit increase of \$5.00 per month, and therefore that enrollee's Medicare premium could go up \$5.00 per month in 2017.

As noted, in 2017, the BBA 15 adjustments only apply in the event of a 0% COLA. Therefore, under the above scenario of a very small Social Security COLA adjustment, beneficiaries who do not qualify for protection under the hold-harmless provision could thus face large premium increases in 2017, similar to the increases faced in 2016 prior to the enactment of BBA 15.¹³² If there were a 0.2% Social Security COLA in 2017, the Medicare trustees estimate that the standard premiums of those not held harmless would increase to \$149 per month, with those paying the high-income premiums potentially facing monthly premiums ranging from \$204.40 to \$467.20. (See **Appendix C**.)

Alternatively, if there were a large enough Social Security COLA to cover the approximately \$17.00 increase in premiums for those currently held harmless (from \$104.90 to about \$121.80), most of those held harmless in 2016 would not be eligible for premium reductions in 2017 and would pay the normal standard premium amounts. In this situation, the hold-harmless provision would not be broadly applied and everyone, whether held harmless or not in 2016, would pay the same standard premiums in 2017. (For someone with a Social Security benefit of \$1,300 per month, a COLA of a little over 1.3% would be needed to increase that benefit by \$17.00 per month.)

The Social Security COLA is calculated as the change in the CPI-W from the third quarter of the prior calendar year to the third quarter of the current calendar year. The final COLA determination, therefore, cannot be made until full CPI-W data is available for July through September of 2016.¹³³ The actual Social Security COLA and Medicare premiums for 2017 will be announced in fall 2016 and could be larger or smaller than currently projected.

Part B Premiums over Time

Part B premium changes over time generally reflect the growth in total Part B expenditures, although the exact relationship between Part B expenditures covered by the Part B premium has been changed by statute at various points. (See **Appendix A**.) The monthly Part B premium has risen from \$3.00 in 1966 to \$121.80 in 2016. (See **Figure 1**.) For comparison, during a similar time period, average annual Part B benefit costs per beneficiary have increased from about \$101 in 1970 (about \$8.42 per month) to a projected \$5,536 per beneficiary (about \$461.33 per month) in 2016.¹³⁴

¹³² Under current law, the only way to generate enough premium revenue to cover 25% of Part B costs is to have those not held harmless pay higher premiums to offset the premium reductions of those held harmless. For more information see archived CRS Report R44224, *Potential Impact of No Social Security COLA on Medicare Part B Premiums in 2016*.

¹³³ The June CPI data was released subsequent to the issuance of the 2016 Medicare Trustees' Report. The CPI-W for June 2016 is about 0.9% higher than the average CPI-W for the third quarter of 2015. Social Security Administration, *COLA Estimates*, accessed July 26, 2016, <https://www.ssa.gov/cgi-bin/bri.cgi>.

¹³⁴ 2016 Medicare Trustees' Report, Table III.C5. For data on recent growth in specific Part B services, see the 2016 (continued...)

Prior to 2000, the Part B premium decreased from year to year twice. The first instance was from 1989 (\$31.90) to 1990 (\$28.60) as a result of the repeal of the Medicare Catastrophic Coverage Act of 1988 (P.L. 100-360). The second was from 1995 (\$46.10) to 1996 (\$42.50) as a result of the transition from a premium as determined by a fixed dollar amount under the Omnibus Reconciliation Act of 1990 (P.L. 101-508) to 25% of costs as directed under the Omnibus Budget Reconciliation Act of 1993 (P.L. 103-66).

More recently, because of the absence of a Social Security COLA in 2010 and 2011, most beneficiaries were held harmless and paid the 2009 premium of \$96.40 per month during those years. The standard 2010 and 2011 premiums, paid by those who were not held harmless, were thus higher than they would have been had the hold-harmless provision not been in effect. (See prior section “Protection of Social Security Benefits from Increases in Medicare Part B Premiums” for additional detail.)

Since 2000, the Medicare Part B premium has more than doubled, from \$45.50 in 2000 to the current premium of \$121.80 in 2016.¹³⁵ Increases have been due to a number of factors that have raised per capita Part B expenditures during that time, including the rising prices of health care services and equipment, new technologies, and increased utilization of Medicare Part B services. While Part B expenditure growth has slowed in recent years, the Medicare trustees project faster benefit spending growth over the next five years (a 6.7% Part B average annual growth rate compared with a 5.3% growth rate over the last five years).

The Medicare trustees estimate that, absent the application of the hold-harmless provision, 2017 premiums will be about the same as in 2016 and that premiums will increase thereafter at an average rate of about 4% per year through 2025. (For estimates of premiums in future years through 2025, see **Appendix C**.) Should there be a very small Social Security COLA in 2017 as currently projected, those held harmless may see increases in their Part B premiums up to the dollar amount of the increase in their Social Security benefits, while those not held harmless could see premiums increase by about \$36 per month—from \$121.80 in 2016 to about \$149.00 in 2017. See “Potential Applicability of Hold-Harmless Rule in 2017.”

(...continued)

Medicare Trustees’ Report, pp. 127-135.

¹³⁵ This is the amount that is currently paid by those not held harmless and includes the BBA 15 required \$3.00 repayment surcharge. If the hold-harmless provision had not been in effect in 2016, and BBA 15 not enacted, the 2016 standard monthly premium would have been \$118.80.

Figure I. Monthly Medicare Part B Premiums
(1966-2025)

Source: CRS figure, based on data from the *2016 Annual Report of the Boards of Trustees of the Federal Hospital Insurance and Federal Supplementary Medical Insurance Trust Funds*, June 22, 2016, Table V.E2.

Note: Premiums through 2016 are actual; premiums from 2017 to 2025 are estimates.

Current Issues

Premium Amount and Annual Increases

The Medicare trustees estimate that over the next decade, Medicare Part B premiums will increase, on average, by about 4% each year.¹³⁶ (See **Appendix C**.) Rising Medicare premiums could have a large effect on Social Security beneficiaries, particularly on those who rely on Social Security as their primary source of income.¹³⁷ In 2015, for example, among Americans aged 65 and older, 53% of married couples and 74% of unmarried persons received more than half of their income from Social Security, and 22% of married couples and 47% of unmarried persons received more than 90% of their income from Social Security.¹³⁸ Some of these beneficiaries may see a decline in their standard of living as their Medicare premiums rise.

¹³⁶ CRS calculation based on premium projections in Table V.E2 of the 2016 Medicare Trustees' Report.

¹³⁷ Other sources of income may include earnings from employment employer-sponsored pension benefits and investment earnings. In addition, retirees may draw down on their accumulated assets to supplement their income.

¹³⁸ Social Security Basic Facts, as of October 13, 2015, at <https://www.ssa.gov/news/press/basicfact.html>.

Once a person receives Social Security, his or her benefit is indexed to inflation and thereafter grows with annual Social Security COLAs.¹³⁹ However, Medicare premiums are based on the per capita cost growth of Part B benefits, which reflects the growth in the cost of medical care and in the utilization and intensity of services used by beneficiaries, factors that have historically grown faster than CPI-W. Additionally, as there has been a continuing shift from providing care in inpatient (Part A) to outpatient settings (Part B), a greater portion of Medicare spending is expected to be covered by beneficiary premiums.¹⁴⁰ This means that, over time, Medicare premiums are expected to represent a growing proportion of most beneficiaries' Social Security income.¹⁴¹ Since 2000, Social Security's annual COLA has resulted in a cumulative benefit increase of about 39%, significantly less than the Part B premium growth of close to 170%. The Medicare trustees estimated that average Part B plus Part D premiums would represent close to 12% of the average Social Security benefit in 2016 and would increase to an estimated 17% in 2090.¹⁴² (See **Appendix B** and **Appendix C** for historical, current, and projected Part B premiums.)

Additionally, while the hold-harmless provision provides protection against increases in the Part B premium, the rule does not apply to Part D premiums or to late-enrollment penalties. Therefore, even in a year with a 0% Social Security COLA, beneficiaries may still see a decline in benefits as a result of increases in Part D premiums and/or any applicable late-enrollment penalties.

Impact of the Hold-Harmless Provision on Those Not Held Harmless

The law does not specify how Medicare Part B financing (premiums and general revenues) should be established in years in which the hold-harmless provision applies to a large number of Medicare beneficiaries. Under current law, the only way to generate enough premium revenue to cover 25% of Part B costs is to have those not held harmless shoulder the entire beneficiary share of any increase in premiums.¹⁴³ Absent legislation such as BBA 15, the premiums of those not held harmless could therefore be significantly greater than if there were no hold-harmless provision. As the Medicare trustees pointed out in their 2010 annual report, “(t)his approach to preventing exhaustion of the Part B trust fund account is the only one available under current law,” despite the “serious equity issues” that this method raises.¹⁴⁴

¹³⁹ The COLA increases the benefits paid to *current* beneficiaries. In contrast, average Social Security benefits (those paid to new and current beneficiaries) have risen at a faster rate than the annual COLA, because the formula for calculating initial Social Security benefits is linked to *wage* growth, whereas the COLA is based on *price* growth. Generally, wages rise faster than prices.

¹⁴⁰ In 2000, the ratio of Part A expenditures to Part B expenditures was 59:41. This ratio decreased to 50:50 in 2014 and is expected to drop to 47:53 in 2025. This means that over time, the proportion of Medicare expenditures covered under Part B is expected to increase. While providing more services on an outpatient basis may be more cost-effective for the program as a whole, it also means that beneficiaries will be expected to bear a larger portion of program costs over time. See CRS Report R43122, *Medicare Financial Status: In Brief*.

¹⁴¹ The hold-harmless provision caps the annual Part B premium increase (but not the Part D increase) at the dollar amount of a beneficiary's COLA.

¹⁴² Similarly, average Medicare cost sharing is estimated to be about 11% of the Social Security benefit in 2016, and it is expected to increase to approximately 17% in 2090. 2016 Medicare Trustees' Report, pp. 39-40.

¹⁴³ The law does not specify that this method be used, but it also does not prohibit it.

¹⁴⁴ Boards of Trustees, *Federal Hospital Insurance and Federal Supplementary Medical Insurance Trust Funds, 2010 Annual Report of the Boards of Trustees of the Federal Hospital Insurance and Federal Supplemental Medical Insurance Trust Funds*, August 5, 2010, pp. 97-98, at <https://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/ReportsTrustFunds/downloads/tr2010.pdf>.

In years in which there has been both a 0% Social Security COLA and a Medicare premium increase, concerns have been raised about the potential financial impact of the premium increases on those not held harmless as well as on the state Medicaid agencies that pay Part B premiums on behalf of low-income beneficiaries. For example, individuals in retirement systems other than Social Security or RRB also may not have received a COLA but could face significantly higher Medicare premiums than those who qualified for protection under the hold-harmless provision.¹⁴⁵ Some have proposed changes to the hold-harmless provision to avoid the disproportionate impact of premium increases on those not held harmless, such as holding all Part B enrollees harmless in years in which there is no Social Security COLA¹⁴⁶ or allowing Social Security checks to decline as a result of Medicare premium increases in some years.¹⁴⁷

In their 2016 report, the Medicare trustees project that although Part B premiums are not expected to increase in 2017, the Social Security COLA is currently projected to be a fraction of a percent. This small COLA increase would mean that most individuals held harmless in 2016 would again be held harmless in 2017. (See “Potential Applicability of Hold-Harmless Rule in 2017.”) As the BBA 15 adjustments only apply in 2017 in the event of a 0% Social Security COLA, this means that under this circumstance, absent additional congressional action, those not held harmless could face large premium increases in 2017.¹⁴⁸

Proposals to Modify the Late-Enrollment Penalty

Periodically, proposals have been offered to modify or eliminate the Part B premium penalty either for all enrollees or alternatively for a selected population group. As an increasing number of new Medicare-eligible beneficiaries must actively sign up for Medicare because they are not yet receiving Social Security benefits (e.g., their full retirement Social Security age exceeds the Medicare age of eligibility), there is concern that more people could become subject to late-enrollment penalties. For example, the Medicare Rights Center reported a large number of calls to its hotline related to transitioning to Medicare. Their report notes that “(m)any individuals who call Medicare Rights are confused by Medicare enrollment rules, and specifically by decision-making related to taking or declining Part B” and that “Medicare-eligible people who do not understand Part B enrollment rules and fail to enroll in Medicare when they first became eligible may face late-enrollment penalties, gaps in coverage, and disruptions to access to needed care.”¹⁴⁹

¹⁴⁵ For example, the annual increase in the CSRS benefits is tied to the same inflation measure as Social Security; therefore, those under this system also received a 0% COLA in 2016.

¹⁴⁶ For example, S. 2148, the Protecting Medicare Beneficiaries Act of 2015, and H.R. 3696, the Medicare Premium Fairness Act, both introduced on October 7, 2015, would have kept the 2016 Part B premiums at the 2015 level for all beneficiaries, including those with high incomes. Late-enrollment surcharges also would have been based on the 2015 standard premium. The loss of income from holding premiums flat in 2016 would have been offset by increased general revenue contributions. Note that these bills would have affected only premium determinations for 2016 and would not have made permanent changes to the hold-harmless provision.

¹⁴⁷ Charles Blahous, “How Social Security’s COLA Politics Lead to Bad Policy,” Economic Policies for the 21st Century at the Manhattan Institute, November 22, 2015, at <http://www.economics21.org/commentary/social-security-cola-politics-charles-blahous-11-23-2015>.

¹⁴⁸ See archived CRS Report R44224, *Potential Impact of No Social Security COLA on Medicare Part B Premiums in 2016*, for expected premium increases faced by those not held harmless prior to the enactment of BBA 15.

¹⁴⁹ Medicare Rights Center, “Medicare Trends and Recommendations: An Analysis of 2014 Call Data from the Medicare Rights Center’s National Helpline,” January 2016, at <http://www.medicarerights.org/pdf/2014-helpline-trends-report.pdf>. The Medicare Rights Center also recently issued a related report entitled “A Costly Mistake: Missing Part B Enrollment,” April 2015, at <http://www.medicarerights.org/pdf/medicare-snapshot-040915.pdf>.

Some proposals have suggested modifying the penalty provision to limit both the amount and the duration of the surcharge, as is the case for delayed Part A enrollment, which has a maximum 10% surcharge and a duration of twice the number of years that enrollment was delayed. (See **Appendix D** for information on the Part A premium and late-enrollment penalty.)

Some have also suggested that Medicare Part B have a creditable-coverage exemption, similar to that under Part D, that would allow Medicare beneficiaries with equivalent coverage to postpone enrollment in Part B without being subject to a penalty. For example, under the Part D prescription drug benefit, individuals are not subject to a late-enrollment penalty if they have maintained “creditable” prescription drug coverage prior to enrollment—that is, coverage that is expected to pay at least as much as Medicare’s standard prescription drug coverage.¹⁵⁰ Creditable prescription drug coverage includes employer-based prescription drug coverage, qualified State Pharmaceutical Assistance Programs, and military-related coverage (e.g., Veterans Affairs and TRICARE).¹⁵¹

Other suggestions include formally training employers about Medicare coverage and interaction with other insurance; improving education on Medicare, including late-enrollment penalties, for those nearing Medicare-eligibility age; and expanding equitable relief to include remedies for actions based on misinformation provided by entities in addition to an agent of the federal government, such as an agent of state or local government, and/or an employer or insurer.

In recent Congresses, several bills have been introduced that would address some of the issues associated with the Part B late-enrollment penalty. For example, H.R. 5772, introduced in the 114th Congress, would require Medicare to provide advance notification to those approaching Medicare eligibility; would expand the eligibility for special enrollment periods for those who meet exceptional conditions, as defined by the Secretary of HHS, and would require the creation of a special appeals process for enrollment problems, including those due to “good faith” mistakes. Also introduced in the 114th Congress, H.R. 4090 would, among other changes, eliminate late-enrollment penalties for those between the ages of 65 and 70. Additionally, H.R. 2476 would establish a special Medicare Part B enrollment period for individuals enrolled in COBRA (Consolidated Omnibus Budget Reconciliation Act) continuation coverage who elected not to enroll in Part B during their initial enrollment period. Similar legislation introduced in the 112th Congress, H.R. 1654, would have created a continuous enrollment period that would have allowed Medicare-eligible beneficiaries to sign up for Part B outside of the general enrollment period and to receive health coverage the following month. H.R. 1654 would have also expanded eligibility for equitable relief to those who based enrollment decisions on incorrect information provided by group health plans and plan sponsors, and it would have directed the Government Accountability Office to study problems with Part B enrollment. In the 111th Congress, H.R. 2235 would have limited the penalty for late Part B enrollment to 10% and limited the duration to twice the period of no enrollment, similar to the Part A late-enrollment penalty. It also would have excluded periods of COBRA and retiree coverage from the penalty.

¹⁵⁰ See Medicare publication “Your Guide to Medicare Prescription Drug Coverage,” p.19, at <http://www.medicare.gov/Publications/Pubs/pdf/11109.pdf>.

¹⁵¹ Employers or unions may also qualify for a federal subsidy to maintain prescription drug coverage for their retirees. Such subsidies are generally less expensive to the federal government than providing full coverage to such enrollees under Part D. 2016 Medicare Trustees’ Report, Table IV.B9.

Deficit Reduction Proposals

As Medicare currently represents about 15% of federal spending,¹⁵² many proposals to reduce federal deficits include suggestions to reduce Medicare program spending and/or increase program income. For example, some recent proposals would increase Medicare premiums as a portion of total program funding, whereas others would limit the amount of federal contributions.

Increasing Medicare Premiums

Certain proposals would limit premium increases to high-income beneficiaries. For example, the President's FY2017 budget proposal would increase the percentage of per capita expenditures paid by high-income enrollees from the current range of 35% to 80% of expenditures to a range of between 40% and 90%, and it would increase the number of high-income brackets from four to five.¹⁵³ The proposal would also continue the freeze on income thresholds until 25% of beneficiaries were subject to the high-income premiums.

Other proposals would increase premiums paid by all beneficiaries. For example, a proposal introduced by then Senators Lieberman and Coburn¹⁵⁴ suggested raising the standard Part B premium from the current 25% of program costs to 35% over five years.

Impose a Part B Premium Surcharge for Beneficiaries in Medigap Plans with Near First-Dollar Coverage

About 23% of beneficiaries enrolled in traditional Medicare buy Medigap policies from private insurance companies that cover some or all of Medicare's cost sharing.¹⁵⁵ Individuals who purchase Medigap must pay a monthly premium, which is set by, and paid to, the insurance company selling the policy. There are 10 standardized Medigap plans with varying levels of coverage. Two of the 10 standardized plans cover Parts A and B deductibles and coinsurance in full (i.e., offer *first-dollar* coverage). In 2014, 66% of all beneficiaries who purchased Medigap insurance were covered by one of these two plans.¹⁵⁶

Some are concerned that beneficiaries enrolled in Medigap plans with low cost-sharing requirements may have less incentive to consider the cost of health care services and may thus increase costs to the Medicare program. To address this, Section 401 of MACRA prohibits the sale of Medigap policies that cover Part B deductibles to newly eligible Medicare beneficiaries beginning in 2020. Some have also proposed imposing a Part B premium surcharge for Medicare beneficiaries who purchase certain types of Medigap plans. For example, the President's FY2016 budget proposal¹⁵⁷ suggests imposing a Part B premium surcharge of approximately 15% of the average Medigap premium (about 30% of the Part B premium) for new Medicare beneficiaries who enroll in a near first-dollar Medigap plan.

¹⁵² The federal spending amount is net of beneficiary premiums.

¹⁵⁷ See CRS Report R43934, *President's FY2016 Budget: Centers for Medicare & Medicaid Services (CMS) Legislative Proposals*. The President's FY2017 budget does not contain this proposal.

Limit Federal Subsidies

Finally, other proposals, such as that put forth in the FY2016 House budget,¹⁵⁸ would place limits on the amount of the federal subsidy, and premiums would vary depending on the plan in which the beneficiary enrolled. In general, such *premium support* proposals would limit federal spending by changing the current Medicare program from a defined-benefit to a defined-contribution system.¹⁵⁹ Most such proposals would limit the growth in the annual federal premium subsidy. Depending on how such a proposal is designed, and should Medicare costs grow more quickly than the limit, beneficiary premiums could increase more rapidly than the amount of the premium subsidy.

Considerations

Some of the issues that would need to be addressed when evaluating these types of deficit reduction proposals include (1) the ability of Medicare beneficiaries to absorb increased costs given their current levels of income and assets, as well as their other out-of-pocket expenditures (both health and non-health related); (2) the willingness of high-income beneficiaries to continue participating in Medicare Part B should their premiums continue to increase; and (3) the capacity of the Medicaid program to continue providing premium assistance to low-income beneficiaries should premiums increase.

¹⁵⁸ H.Con.Res. 27. A similar proposal was included in the FY2015 House budget. See CRS Report R43479, *Overview of Health Care Changes in the FY2015 House Budget*.

¹⁵⁹ Most premium support models combine Parts A and B benefits; the premium subsidy and beneficiary premiums would apply to both of these parts of Medicare.

Appendix A. History of the Part B Premium

Statutory Policy and Legislative Authority

The basis for determining the Part B premium amount has changed several times since the inception of the Medicare program, reflecting different legislative views of what share beneficiaries should bear as expenditures have increased. When the Medicare program first went into effect in July 1966, the Part B monthly premium was set at a level to cover 50% of Part B program costs. Legislation enacted in 1972 limited the annual percentage increase in the premium to the same percentage by which Social Security benefits were adjusted for changes in the cost-of-living adjustments (i.e., COLAs). Under this formula, revenues from premiums soon dropped from 50% to below 25% of program costs because Part B program costs increased much faster than inflation as measured by the Consumer Price Index on which the Social Security COLA is based (see **Table A-1**).

From the early 1980s, Congress regularly voted to set Part B premiums at a level to cover 25% of program costs, in effect overriding the COLA limitation. The 25% provisions first became effective January 1, 1984, with general revenues covering the remaining 75% of Part B program costs. Premiums increased in 1989 as a result of the Medicare Catastrophic Coverage Act of 1988 (P.L. 100-360), which added a catastrophic coverage premium to the Part B premium. The act was repealed in November 1989, and the Part B premium for 1990 fell as a result.

Congress returned to the general approach of having premiums cover 25% of program costs in the Omnibus Budget Reconciliation Act of 1990 (OBRA 90; P.L. 101-508). However, OBRA 90 set specific dollar figures, rather than a percentage, in law for Part B premiums for the years 1991-1995. These dollar figures reflected Congressional Budget Office estimates of what 25% of program costs would be over the five-year period. However, program costs grew more slowly than anticipated, in part due to subsequent legislative changes. As a result, the 1995 premium of \$46.10 actually represented 31.5% of Medicare Part B program costs.

The Omnibus Budget Reconciliation Act of 1993 (OBRA 93; P.L. 103-66) extended the policy of setting the Part B premium at a level to cover 25% of program costs for the years 1996-1998. As was the case prior to 1991, a percentage rather than a fixed dollar figure was used, which meant that the 1996 premium (\$42.50) and the 1997 premium (\$43.80) were lower than the 1995 premium (\$46.10). The Balanced Budget Act of 1997 (BBA 97; P.L. 105-33) permanently set the premium at 25% of program costs so that, generally speaking, premiums rise or fall with Part B program costs.¹⁶⁰

The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA; P.L. 108-173), as modified by the Deficit Reduction Act of 2005 (DRA; P.L. 109-171), required that beginning in 2007, higher-income beneficiaries pay higher Part B premiums.¹⁶¹ The income

¹⁶⁰ The Balanced Budget Act of 1997 (BBA 97; P.L. 105-33) made a change that had the effect of increasing the Part B premium over time. Prior to BBA 97, both Parts A and B of Medicare covered home health services. Payments were made under Part A, except for those few persons who had no Part A coverage. To extend the solvency of the Part A (Hospital Insurance) Trust Fund, BBA 97 gradually transferred coverage of some home health visits from Part A to Part B. Beginning January 1, 2003, Part A covers only post-institutional home health services for up to 100 visits, except for those persons with Part A coverage only who are covered without regard to the post-institutional limitation. Part B covers other home health services.

¹⁶¹ The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA; P.L. 108-173) increased the Part B premium percentage for high-income enrollees; the Deficit Reduction Act of 2005 (DRA; P.L. 109-171) accelerated the phase-in period for such premiums.

thresholds used to determine eligibility for the high-income premium are to be adjusted each year by the growth in the Consumer Price Index.¹⁶² The Patient Protection and Affordable Care Act (ACA; P.L. 111-148, as amended, Section 3402), however, froze these thresholds for the period of 2011 through 2019 at the 2010 levels. In 2020, the thresholds were to return to the levels they would have been had they been adjusted for inflation each year during the freeze and again indexed to inflation each year. As this would have resulted in higher income thresholds, it would have had the effect of reducing the number of beneficiaries who pay the high-income premiums in 2020.

Section 402 of the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA; P.L. 114-10) maintains the freeze on the income thresholds for all income categories through 2017 and on the lower two high-income premium tiers through 2019. Beginning in 2018, MACRA reduces the threshold levels for the two highest income tiers so that more beneficiaries will fall into the higher percentage categories. (See **Table 4**.) Additionally, starting in 2020, the income thresholds for all income categories will be adjusted annually for inflation based on the 2019 income thresholds. This will, in effect, maintain the proportion of beneficiaries who pay the high-income premium.

Due to a 0% Social Security COLA coupled with an increase in Medicare premiums, a large percentage of Medicare Part B enrollees are protected by the hold-harmless provision in 2016 and continue to pay the 2015 premium of \$104.90 per month. The Medicare trustees estimated that the standard premiums of those not held harmless in 2016 would therefore need to be increased to approximately \$159 per month for aggregate premiums to still cover 25% of per capita benefit costs. The Bipartisan Budget Act of 2015 (BBA 15; P.L. 114-74), however, mitigated this sharp premium increase and required that the 2016 Part B standard premium be calculated as if the hold-harmless rule were not in effect and the increased costs had been spread across all beneficiaries. Instead of having those not held harmless bear the increase for all of the Part B enrollee population, the act allows for the transfer of additional general revenues to the SMI Trust Fund to make up for the shortfall in premium revenue. As a result of this change, Part B enrollees not held harmless pay a standard monthly premium of \$121.80 in 2016.¹⁶³ To offset the increased costs, a \$3 surcharge is being added to the monthly premium (the surcharge increases on a sliding scale for those who pay high-income premiums, up to \$9.60) and will be applied in 2016 and in future years until the additional federal cost of about \$9 billion is fully offset. The BBA 15 provides for similar premium adjustments in 2017 if there is a 0% Social Security COLA again in that year.

Table A-1. Monthly Part B Premiums, 1966-2016

Year	Monthly Premium	Effective Date	Governing Policy; Legislative Authority
1966	\$3.00	7/1966	Fixed dollar amount; Social Security Amendments (SSA) of 1965
1967	\$3.00		Fixed dollar amount; SSA of 1965
1968	\$4.00	4/1968	Fixed dollar amount through March; Medicare Enrollment Act of 1967. Beginning April: 50% of costs; SSA of 1965
1969	\$4.00		50% of costs; SSA of 1967
1970	\$5.30	7/1970	50% of costs; SSA of 1967
1971	\$5.60	7/1971	50% of costs; SSA of 1967

¹⁶² SSA §1839(i)(5).

¹⁶³ This amount includes the \$3.00 per month BBA 15 surcharge.

Year	Monthly Premium	Effective Date	Governing Policy; Legislative Authority
1972	\$5.80	7/1972	50% of costs; SSA of 1967
1973	\$6.30	9/1973	50% of costs; SSA of 1967 (cost-of-living adjustment [COLA] limit, added by SSA of 1972, could have applied, but was not needed). Limitations imposed by Economic Stabilization program set 7/1973 amount at \$5.80 and 8/73 amount at \$6.10.
1974	\$6.70	7/1974	50% of costs; SSA of 1967 (COLA limit, added by SSA of 1972, could have applied, but was not needed)
1975	\$6.70		Technical error in law prevented updating
1976	\$7.20	7/1976	COLA limit; SSA of 1972
1977	\$7.70	7/1977	COLA limit; SSA of 1972
1978	\$8.20	7/1978	COLA limit; SSA of 1972
1979	\$8.70	7/1979	COLA limit; SSA of 1972
1980	\$9.60	7/1980	COLA limit; SSA of 1972
1981	\$11.00	7/1981	COLA limit; SSA of 1972
1982	\$12.20	7/1982	COLA limit; SSA of 1972
1983	\$12.20		Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) had set 25% rule for updates in 7/1983 and 7/1984. However, SSA of 1983 froze premiums 7/1983-12/1983 and changed future updates to January.
1984	\$14.60	1/1984	25% of costs; TEFRA, as amended by SSA of 1983
1985	\$15.50	1/1985	25% of costs; TEFRA, as amended by SSA of 1983
1986	\$15.50	1/1986	25% of costs; Deficit Reduction Act (DEFRA) of 1984
1987	\$17.90	1/1987	25% of costs; DEFRA of 1984
1988	\$24.80	1/1988	25% of costs, Consolidated Omnibus Budget Reconciliation Act (OBRA) of 1985
1989	\$31.90	1/1989	25% of costs, OBRA 87, plus \$4 catastrophic coverage premium added by Medicare Catastrophic Coverage Act of 1988
1990	\$28.60	1/1990	25% of costs; OBRA 89. Medicare Catastrophic Coverage Repeal Act of 1989 repealed additional catastrophic coverage premium, effective 1/90
1991	\$29.90	1/1991	Fixed dollar amount; OBRA 90
1992	\$31.80	1/1992	Fixed dollar amount; OBRA 90
1993	\$36.60	1/1993	Fixed dollar amount; OBRA 90
1994	\$41.10	1/1994	Fixed dollar amount; OBRA 90
1995	\$46.10	1/1995	Fixed dollar amount; OBRA 90
1996	\$42.50	1/1996	25% of costs; OBRA 93
1997	\$43.80	1/1997	25% of costs; OBRA 93
1998	\$43.80	1/1998	25% of costs; OBRA 93 and Balanced Budget Act (BBA) 97
1999	\$45.50	1/1999	25% of costs; BBA 97
2000	\$45.50	1/2000	25% of costs; BBA 97
2001	\$50.00	1/2001	25% of costs; BBA 97
2002	\$54.00	1/2002	25% of costs; BBA 97
2003	\$58.70	1/2003	25% of costs; BBA 97
2004	\$66.60	1/2004	25% of costs; BBA 97
2005	\$78.20	1/2005	25% of costs; BBA 97

Year	Monthly Premium	Effective Date	Governing Policy; Legislative Authority
2006	\$88.50	1/2006	25% of costs; BBA 97
2007	\$93.50	1/2007	25% of costs; BBA 97 (Medicare Modernization Act of 2003 [MMA] and Deficit Reduction Act of 2005 [DRA] authorize higher premiums for high-income enrollees: 1 st year of 3-year phase-in)
2008	\$96.40	1/2008	25% of costs; BBA 97 (MMA and DRA authorize higher premiums for high-income enrollees: 2 nd year of 3-year phase-in)
2009	\$96.40	1/2009	25% of costs; BBA 97 (MMA and DRA authorize higher premiums for high-income enrollees: 3 rd year of 3-year phase-in)
2010	\$110.50	1/2010	25% of costs; BBA 97 (MMA and DRA authorize higher premiums for high-income enrollees, fully phased-in); hold-harmless provision applied to most enrollees who paid the 2009 rate of \$96.40
2011	\$115.40	1/2011	25% of costs; BBA 97 (MMA and DRA authorize higher premiums for high-income enrollees, fully phased-in; Patient Protection and Affordable Care Act [ACA] freezes income thresholds at 2010 levels from 2011 through 2019); hold-harmless provision applied to most enrollees who paid the 2009 rate of \$96.40
2012	\$99.90	1/2012	25% of costs; BBA 97 (MMA and DRA authorize higher premiums for high-income enrollees, fully phased-in; ACA freezes income thresholds at 2010 levels from 2011 through 2019)
2013	\$104.90	1/2013	25% of costs; BBA 97 (MMA and DRA authorize higher premiums for high-income enrollees, fully phased-in; ACA freezes income thresholds at 2010 levels from 2011 through 2019)
2014	\$104.90	1/2014	25% of costs; BBA 97 (MMA and DRA authorize higher premiums for high-income enrollees, fully phased-in; ACA freezes income thresholds at 2010 levels from 2011 through 2019)
2015	\$104.90	1/2015	25% of costs; BBA 97 (MMA and DRA authorize higher premiums for high-income enrollees, fully phased-in; ACA as modified by the Medicare Access and CHIP Reauthorization Act of 2015 [MACRA] freezes income thresholds at 2010 levels from 2011 through 2017)
2016	\$121.80	1/2016	Less than 25% of costs; BBA 97 and BBA 15 (MMA and DRA authorize higher premiums for high-income enrollees, fully phased-in; ACA as modified by the Medicare Access and CHIP Reauthorization Act of 2015 [MACRA] freezes income thresholds at 2010 levels from 2011 through 2017); hold-harmless provision holds the premium at \$104.90 for most beneficiaries; for those not held harmless, BBA 15 required that 2016 premiums be determined as if the hold-harmless provision were not in effect and allowed for additional federal general revenue transfers to the SMI Trust Fund to cover the shortfall in premium revenues; to offset the additional federal costs, a repayment surcharge is being added to monthly premiums and will continue until the full amount is repaid.

Sources: CMS, Annual Notices, "Medicare Program; Medicare Part B Monthly Actuarial Rates, Premium Rate, and Annual Deductible," 2007 through 2015, and CMS, "Medicare Program: Medicare Part B Monthly Actuarial Rates, Premium Rate, and Annual Deductible Beginning January 1, 2016," 80 *Federal Register* 70811, November 16, 2015.

Note: When both are enrolled in Part B, each person in a couple pays the same individual premium amount.

- a. The standard Part B premium in 2009 was the same as that in 2008; however, the lack of change was not due to the hold-harmless provision. CMS determined that 2008 premiums and revenues were slightly higher

than needed to cover costs in that year and that 2009 financing would be adequate at the same premium level.

- b. Due to no Social Security COLA in 2010 and 2011, most Part B enrollees were held harmless and paid the 2009 standard monthly premium of \$96.40. Similarly, in 2016, those who are held harmless pay the 2015 premium of \$104.90 per month.

Table B-2. Income Levels for Determining Part B Premium Adjustment for Married Beneficiaries Filing Separately and Associated Premiums, 2007-2016
(in nominal dollars)

Income Level	2007	2008	2009	2010	2011	2012	2013-2015	2016
Standard	Less than or equal to \$80,000 \$93.50	Less than or equal to \$82,000 \$96.40	Less than or equal to \$85,000 \$96.40	Less than or equal to \$85,000 \$110.50	Less than or equal to \$85,000 \$115.40	Less than or equal to \$85,000 \$99.90	Less than or equal to \$85,000 \$104.90	Less than or equal to \$85,000 \$121.80
Lower Adjustment Category	Greater than \$80,000 and less than or equal to \$120,000 \$142.90	Greater than \$82,000 and less than or equal to \$123,000 \$199.70	Greater than \$85,000 and less than or equal to \$128,000 \$250.50	Greater than \$85,000 and less than or equal to \$129,000 \$287.30	Greater than \$85,000 and less than or equal to \$129,000 \$299.90	Greater than \$85,000 and less than or equal to \$129,000 \$259.70	Greater than \$85,000 and less than or equal to \$129,000 \$272.70	Greater than \$85,000 and less than or equal to \$129,000 \$316.70

Appendix C. Estimated Future Part B Premiums¹⁶⁴

Table C-1. Projected Part B Premiums

	Percentage of Program Costs Represented by Premium				
	25% (Standard)	35%	50%	65%	80%
2017	\$121.80/\$149.00 ^a	\$166.30/\$204.40 ^b	\$237.60/\$292.00	\$308.90/\$379.60	\$380.20/\$467.20
2018	124.40	169.90	242.70	315.50	388.30
2019	131.60	180.00	257.20	334.40	411.50
2020	138.90	190.30	271.80	353.30	434.90
2021	144.70	200.30	286.20	372.10	457.90
2022	150.90	211.30	301.80	392.30	482.90
2023	159.60	223.40	319.10	414.80	510.60
2024	167.80	234.90	335.60	436.30	537.00
2025	176.30	246.80	352.50	458.30	564.00

Source: 2016 Medicare Trustees' Report, Tables V.E2 and V.E3.

Notes: These figures only represent estimates of future premiums. Actual premiums are determined each year in the fall prior to the actual year the premium will be in effect.

- a. The higher 2017 estimates are based on the assumption that there will be a very small Social Security COLA in 2017 and, similar to 2016, most Part B enrollees would again be protected by the hold-harmless provision. The higher premiums shown for 2017 are those that would be paid by those enrollees not held harmless. Should the Social Security COLA be 0% in 2017 (so that the BBA provisions apply) or large enough to allow all Part B enrollees to pay the full 2017 premium, then the estimated 2017 premiums are expected to be about the same as the 2016 premiums (the smaller figures shown in the table). The Social Security COLA and 2017 Part B premiums won't be known with certainty until the fall of 2016.
- b. The Medicare trustees included the BBA repayment surcharges in their projections of standard premiums, but did not include these surcharges in their projections of high-income premiums (35%-80% of cost categories). The following surcharge amounts should be added to determine the total high-income premiums: \$4.20 for the 35% category premium, \$6.00 for the 50% category, \$7.80 for the 65% category, and \$9.60 for the 80% category. These surcharges will be applicable until the total amount collected offsets the increased federal costs due to the BBA premium reductions in 2016. The Trustees did not provide an estimate of when such repayments would be completed.

¹⁶⁴ This report was written prior to the announcement of the 2017 premiums. See text box in "Introduction" for actual 2017 premiums.

Appendix D. Part A Premiums

The vast majority of persons turning the age of 65 are automatically entitled to Medicare Part A based on their own or their spouse's work in covered employment. However, individuals aged 65 and older who are not otherwise eligible for Medicare Part A benefits and certain disabled individuals who have exhausted other entitlement may voluntarily purchase Part A coverage.¹⁶⁵ In most cases, persons who voluntarily purchase Part A must also purchase Part B. The periods during which one can enroll are the same as those for Part B (see "Medicare Part B Eligibility and Enrollment").

The monthly Part A premium is equal to the full average per capita value of the Part A benefit (\$411 per month in 2016). Persons who have at least 30 quarters of covered employment (or are married to someone who has such coverage) pay a premium that is 45% less than the full Part A premium (\$226 per month in 2016).¹⁶⁶ CMS estimates that in 2016, about 652,000 individuals will voluntarily enroll in Part A by paying the full premium and about 61,000 will pay the reduced premium.¹⁶⁷

Similar to Part B, a penalty is imposed for persons who delay Part A enrollment beyond their initial enrollment period (which is the same seven-month period applicable for enrollment in Part B).¹⁶⁸ However, both the amount of the penalty and the duration of the penalty are different than under Part B. Persons who delay Part A enrollment for at least 12 months beyond their initial enrollment period are subject to a 10% premium surcharge.¹⁶⁹ The surcharge is 10% regardless of the length of the delay. Further the surcharge only applies for a period equal to twice the number of years (i.e., 12-month periods) during which an individual delays enrollment. Thus, an individual who delays enrollment for three years under Part A would be subject to a 10% penalty for six years, whereas a person who delays enrollment for the same three-year period under Part B would be subject to a permanent 30% penalty.¹⁷⁰

¹⁶⁵ An individual eligible to enroll must be a resident of the United States. Further, the individual must either be a citizen or an alien lawfully admitted for permanent residence who has resided in the United States continuously for the immediately preceding five years. Section 1818A of the SSA provides for voluntary enrollment in Medicare Part A for certain disabled individuals who were entitled to coverage due to their receipt of disability benefits, but who have lost those benefits because they have returned to work and their incomes exceed the level of "substantial gainful activity." For additional information on Part A benefits for the disabled returning to work, see Social Security website "Working While Disabled," at <http://www.socialsecurity.gov/pubs/10095.html>.

¹⁶⁶ The hold-harmless provision does not apply to Part A premiums.

¹⁶⁷ "Medicare Program; CY 2016 Part A Premiums for the Uninsured Aged and for Certain Disabled Individuals Who Have Exhausted Other Entitlement," 80 *Federal Register* 70805, November 16, 2015, at <https://www.gpo.gov/fdsys/pkg/FR-2015-11-16/pdf/2015-29176.pdf><https://www.gpo.gov/fdsys/pkg/FR-2015-11-16/pdf/2015-29176.pdf>.

¹⁶⁸ The Consolidated Appropriations Act of 2001 (P.L. 106-554) exempts certain state and local retirees, retiring prior to January 1, 2002, from the Part A late-enrollment penalty. These are groups of persons for whom the state or local government elects to pay the Part A late-enrollment penalty for life. The amount of the penalty which would otherwise be assessed is to be reduced by an amount equal to the total amount of Medicare payroll taxes paid by the employee and the employer on behalf of the employee. The provision applies to premiums beginning January 2002.

¹⁶⁹ Similar to Part B, if one qualifies for and signs up during a special enrollment period, e.g., within 8 months of retiring, one may not be subject to a penalty.

¹⁷⁰ Prior to enactment of the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA; P.L. 99-272), there was no upper limit on the amount of the Part A surcharge or duration of the surcharge. COBRA limited the amount of the Part A surcharge to 10% and the duration to twice the period of delayed enrollment.
