Summary

The Corporation for Public Broadcasting (CPB) receives virtually all of its funding through federal appropriations; overall, about 15% of public television and 10% of radio broadcasting funding comes from the federal appropriations that CPB distributes. CPB's appropriation is allocated through a distribution formula established in its authorizing legislation and has historically received two-year advanced appropriations. Congressional policymakers are increasingly interested in the federal role in supporting CPB due to concerns over the federal debt, the role of the federal government funding for public radio and television, and whether public broadcasting provides a balanced and nuanced approach to covering news of national interest.

It is also important to note that many congressional policymakers defend the federal role of funding public broadcasting. They contend that it provides news and information to large segments of the population that seek to understand complex policy issues in depth, and in particular for children's television broadcasting, has a significant and positive impact on early learning and education for children.

On June 20, 2012, the Corporation for Public Broadcasting released a report, *Alternative Sources of Funding for Public Broadcasting Stations*. The report was undertaken in response to the conference report accompanying the Military Construction and Veterans Affairs and Related Appropriations Act of 2012 (incorporated into the Consolidated Appropriations Act, FY2012, H.R. 2055, P.L. 112-74). The CPB engaged the consulting firm of Booz & Company to explore possible alternatives to the federal appropriation to CPB. Among its findings, the report stated that ending federal funding for public broadcasting would severely diminish, if not destroy, public broadcasting service in the United States.

The two-year advanced appropriations process for CPB means that in any given year congressional policymakers are considering what the CPB appropriations will be two years from that time. So as Congress considers funding for the FY2017 fiscal year, that deliberation will include CPB funding for FY2019. The Administration's request for FY2019 is \$445 million. On June 9, 2016, the Senate Appropriations Committee voted 29-1 to approve S.Rept. 114-274, the FY2017 Labor-HHS-Education Appropriations bill. Included in this report is \$445 million for CPB in FY2019. However, Congress has not passed a final FY2017 appropriations bill; the most recent funding is a continuing resolution bill, P.L. 114-223, which was signed into law by President Obama on December 9, 2016.

Background

The Corporation for Public Broadcasting (CPB) was incorporated in 1967 as a private nonprofit corporation under the authority of the Public Broadcasting Act of 1967 (P.L. 90-129). CPB funding promotes public television and radio stations and their programs. These CPB-funded stations reach virtually every household in the United States. CPB is the largest single source of funding for public television and radio programming.

Most CPB-funded television programs are distributed through the Public Broadcasting Service (PBS) created in 1969 by CPB. CPB-funded radio programs are distributed primarily through National Public Radio (NPR), created in 1970 by CPB. Both PBS and NPR are private, not for profit corporations.

The number of radio and television public broadcasting stations supported by CPB increased from 270 in 1969 to 1,406 in 2015¹ of which 365 are television stations. Public broadcasting stations are run by universities, nonprofit community associations, state government agencies, and local school boards, all of which are licensed by the FCC.

Corporation for Public Broadcasting

CPB is a nonprofit private corporation and is guided by a nine-member board of directors. These directors are appointed by the President with the advice and consent of the Senate. The directors serve for staggered six-year terms. The current chairman is Elizabeth Sembler, reappointed by President Obama and confirmed by the Senate in September 2014. CPB's principal function is to receive and distribute the federal appropriation in accordance with the Public Broadcasting Act, supporting qualified public radio and television stations and funding national content. Seventy percent of the federal appropriation is used to provide Community Service Grants (or CSGs) to stations that meet specified eligibility criteria. CPB exercises minimum control of program content and other activities of local stations, and is prohibited from owning or operating any of the primary facilities used in broadcasting. In addition, it may not produce, disseminate, or schedule programs. The current president and CEO of CPB is Patricia de Stacy Harrison, appointed by the board of directors in June 2005.

Approximately 15% of public television and 10% of radio broadcasting funding comes from the federal appropriations that CPB distributes.² However, among individual public broadcasting stations, the amount of federal dollars that contributes to a station's annual budget depends on the funds it receives from nonfederal sources; the number and extent of broadcast transmitters required to service its coverage area; the extent to which a station is serving rural areas and minority audiences; and whether or not it is a television or radio station.

While federal funding for CPB primarily comes from the Departments of Labor-Health and Human Services-Education appropriations bill as a separate entry under the "Related Agencies" section of that bill, it may receive other sources of funding from the federal government. For example, on September 8, 2015, CPB and PBS received a five-year Ready to Learn grant from the Department of Education's Office of Innovation and Improvement, which will provide \$19 million in the first year of funding. CPB and PBS are using this money to fund research,

development, and deployment of transmedia content to improve the math and literacy skills of children ages 2-8, especially those living in poverty.³

Public Television: PBS

PBS was created by CPB in 1969 to operate and manage a nationwide (now satellite) program distribution system interconnecting all the local public television stations, and to provide a distribution channel for national programs to those public television stations. Although PBS does not produce programs for its members, it aggregates funding for the creation and acquisition of programs by and for the stations, and distributes programs through its satellite distribution system. Paula Kerger became the sixth and current president and CEO of PBS in March 2006.

Public Radio: NPR

For radio, a different division of responsibilities was established. CPB created National Public Radio (NPR) in 1970 as a news-gathering, production, and program-distribution company governed by its member public radio stations. Unlike its public television counterpart, NPR is authorized to produce radio programs for its members as well as to provide, acquire, and distribute radio programming through its satellite program distribution system. NPR Inc., located in Washington, DC, provides these administrative operations. On July 2014, Jarl Mohn became the current president and CEO of NPR.

After the firing of Juan Williams, a news analyst for NPR,⁴ in October 2010, NPR Inc. announced that its board of directors had accepted several recommendations to provide greater clarity and transparency for its code of ethics regarding NPR employees. These include reviewing and updating of policies and training with respect to the role of NPR journalists appearing on other media outlets, reviewing and defining their roles (including those of news analysts) in a changing news environment, and encouraging a broad range of viewpoints to reflect the diversity of NPR's national audiences. At the same time these recommendations were announced, Ellen Weiss, vice president of news for NPR, resigned; it was also announced that Ms. Schiller would not receive a bonus for 2010. On March 9, 2011, Vivian Schiller resigned as president and CEO of NPR, over continued scrutiny and criticism over NPR's handling of an incident regarding Ronald Schiller (no relation) in a taped interview.

In response, some policymakers began to revisit the issue of whether federal appropriations should continue to support any part of the public broadcasting system. They are addressing the

³ Corporation for Public Broadcasting, "CPB and PBS Receive Ready to Learn Grant from the U.S. Department of Education," press release, September 8, 2015, <http://www.cpb.org/pressroom/release.php?pm=1235>.

⁴ On October 20, 2010, Juan Williams, a news analyst working as an independent contractor reporter for NPR, was fired by executives in the office of NPR News for comments Mr. Williams made on the Fox News Channel, as well as apparently for previous incidents that violated the terms of Mr. Williams's contract. In an appearance on the O'Reilly Factor show, Mr. Williams stated that he gets "nervous" when he sees someone in "Muslim garb" on an airplane. Two days after his appearance, Mr. Williams was notified by telephone that his contract with NPR was being terminated. In a memorandum to NPR staff on October 24, 2010, Vivian Schiller, then president and chief executive at NPR, stated that she "regrets that NPR executives did not meet with (Mr.) Williams in person to discuss the situation." In addition, Ms. Schiller also stated that Mr. Williams's comment was just the most recent in a series of objectionable remarks Mr. Williams has made while offering commentary on Fox News. This decision was supported by the leadership of NPR news. However, almost immediately there was a strong reaction from some among the media and public about the process and fairness of this firing. This incident became part of the discussion regarding any federal funding that supports NPR policies and programs.

overall federal appropriations for CPB (discussed below), as well as any direct funding the NPR Foundation receives from federal sources. H.R. 68 and H.R. 69 (Representative Lamborn, and discussed more fully later in this report) were introduced on January 5, 2011. These bills would have eliminated federal appropriations for NPR and CPB, respectively, in FY2013.

In FY2015, CPB distributed its community service grants (CSG) money to over 400 radio licensees operating more than 1,000 public radio stations. NPR directly received \$2 million in discretionary grants (\$0 in FY2011 and \$2.04 million in FY2012).⁵ In addition, there appears to be at least another source of federal funding for NPR. NPR Inc., which oversees the NPR system, states that annually NPR receives direct funding in the range of \$1.5 million to \$3 million from two federal agencies and CPB, and that this funding accounts for less than 2% of its annual budget. In FY2009 NPR Inc. received \$1.6 million and in FY2010, \$2.5 million. The sources of this funding are the National Endowment of the Arts, CPB, and the Department of Education.⁶

Federal Funding

The Obama Administration requested a \$445 million appropriation for CPB in its FY2019 budget request (which would be approved in FY2017). The vehicle that is used to provide appropriations to CPB is the Departments of Labor-Health and Human Services-Education bill. On June 9, 2016, the Senate Appropriations Committee approved, 29-1, S.Rept. 114-274, the FY2017 Labor-HHS-Education Appropriations bill. Among its provisions is \$445 million for CPB in 2019. However, Congress has not passed a final FY2017 appropriations bill; the most recent funding is a continuing resolution bill, P.L. 114-223, which was signed into law by President Obama on December 9, 2016. (For funding levels, see **Table 1**.)

From the last year of available information, the U.S. public broadcasting system—comprised of the national public radio and television stations—reported total revenue of \$2.8 billion in FY2012. According to CPB, for public broadcasting revenue by source, CPB funds made up 14.9% of the total; another 1.6% came from federal grants and contracts. The remaining 83.5% was raised from nonfederal sources (including individuals, businesses, foundations, state and local governments, and educational institutions). The largest single income source (28.5% in FY2013) came from membership.

Federal appropriations which go through CPB to the individual public radio and television stations generally are designated as unrestricted federal funds. CPB distributed \$69.31 million in FY2014 funding to public radio stations that qualify for its Community Service Grant program. However, member stations also pay NPR fees for content and programming; some contend that federal grant money is supporting part of the revenue streams back to NPR Inc.

A history of CPB appropriations is presented in **Table 1**. Additional information on both NPR and PBS funding may be obtained at their respective websites (<http://www.npr.org> and <http://www.pbs.org>, respectively).

⁵ Also described by NPR as “occasional projects.” It is important to note that the original numbers provided to CRS were \$3.9 million in FY2009 and \$4.1 million in FY2010, for a total of \$8 million. Telephone Conversation, Office of Congressional Affairs, Corporation for Public Broadcasting, October 21, 2010. The purposes of these grants were to develop HD radio technology for those who are “print- and hearing-impaired”; to distribute next generation public broadcasting technology to individual stations; to support collaborations between public radio and public broadcasting stations for content related to news events of 2008 and 2009; and for other projects. Mike Riksen, Vice President, Policy & Representation, letter to the Congressional Research Service, December 6, 2010, p. 2.

Legislative History: 111th-113th Congresses

There was significant legislative interest and activity regarding federal funding for CPB from the end of the 111th Congress through the 112th Congress. During the 111th Congress, Representative Lamborn (CO) introduced H.R. 5538, a bill that would have eliminated federal funding for CPB after FY2012.⁷ This bill was referred to the House Committee on Energy and Commerce. During the “lame duck” period of the 111th Congress in November 2010, Representative Lamborn sought to have his bill considered for floor action in the House, but this action was defeated by a vote of 239-171. In response, Representative Earl Blumenauer (OR) defended public broadcasting by stating that “National Public Radio is one of the few areas where the American public can actually get balanced information.”⁸

On January 5, 2011, Representative Lamborn introduced H.R. 68 (To amend the Communications Act of 1934 to prohibit Federal funding for the Corporation of Public Broadcasting after FY2013) and H.R. 69 (To prohibit Federal funding of certain public radio programming, to provide for the transfer of certain public debt, and for other purposes). The first bill, like its predecessor H.R. 5538, would have eliminated federal appropriations for CPB when its two-year advanced funding ends. The second bill would have prohibited federal funding to organizations incorporated for specified purposes related to (1) broadcasting, transmitting, and programming over noncommercial educational radio broadcast stations, networks, and systems; (2) cooperating with foreign broadcasting systems and networks in international radio programming and broadcasting; (3) assisting and supporting such noncommercial educational radio broadcasting pursuant to the Public Broadcasting Act of 1967; or (4) acquiring radio programs from such organizations. In effect, it would have prohibited any individual public radio station from using federal funding to engage in transactions with NPR Inc. Both bills were referred to the House Committee on Energy and Commerce.

On January 11, 2011, NPR Inc. responded to the two bills by stating, in part: “The proposal to prohibit public radio stations from using CPB grants to purchase NPR programming interjects federal authority into local station program decision-making. Furthermore, restrictions on the authority of CPB—a Congressionally chartered, independent, nonprofit organization—to make competitive grants to NPR, or any other public broadcasting entity, is misguided.”⁹

Other legislation was introduced addressing federal support for public broadcasting. On January 7, 2011, Representative Kevin Brady introduced H.R. 235 (Cut Unsustainable and Top-Heavy Spending Act of 2011 or the CUTS ACT), which provided that all unobligated balances held by the CPB that consist of federal funds be rescinded and no federal funds appropriated hereinafter shall be obligated or expended.

On January 24, 2011, Representative Jim Jordan introduced H.R. 408 (Spending Reduction Act of 2011), which would have reduced federal spending by \$2.5 trillion through FY2021 in part by eliminating the CPB.

On March 15, 2011, Representative Lamborn introduced H.R. 1076, a bill to prohibit the funding of National Public Radio and restrict the use of federal funds for member stations to acquire NPR broadcasting content. The House Rules Committee passed H.Res. 174, which permitted H.R.

⁷ Full title: “To amend the Communications Act of 1934 to prohibit Federal funding for the Corporation for Public Broadcasting after fiscal year 2012.”

⁸ Frances Symes, CQ Today Online News, “House Rejects GOP Bid to Reduce Federal Funding for NPR and Local Stations.” <http://www.cq.com/doc/news>.

⁹ *NPR Statement Regarding Proposed Legislation, H.R.68/69*, NPR, Inc., Washington, DC, January 11, 2011.

1076 to go directly to the floor and, without any points of order or amendments, be open to one hour of debate before a full vote in the House of Representatives. H.R. 1076 passed the House 228-192, and was referred to the Senate. No further action was taken on this bill.

Other proposals in the 112th Congress addressed federal funding for public broadcasting. On January 20, 2011, the Republican Study Group, a conservative caucus comprised of 100 Members of Congress, released its list of proposed budget cuts, including elimination of CPB's appropriations starting in FY2012. At the same time, Representative Ryan (WI), the chairman of the House Committee on the Budget for the 112th Congress, proposed a new continuing resolution that would have set the rest of the FY2011 budget at FY2008 levels (excluding defense, homeland security, and veterans' programs).

In the 113th Congress, several bills have been introduced addressing the Corporation for Public Broadcasting, National Public Radio, the Public Broadcasting System, and issues related to these institutions and their funding. H.R. 2597, a bill To Prohibit Federal Funding of National Public Radio and the Use of Federal Funds to Acquire Radio Content (Lamborn), was introduced on July 5, 2013, and was referred to the House Subcommittee on Communications and Technology of the Energy and Commerce Committee. As the title indicates, this bill would eliminate all direct federal funding for NPR as well as federal funding to sell or acquire NPR-based programming content. H.R. 2647, the Emergency Information Improvement Act of 2013 (Higgins), was introduced on July 10, 2013, and referred to the House Subcommittee on Economic Development, Committee on Public Buildings and Emergency Management. The bill would revise disaster relief law to include public broadcasting facilities, among other provisions. On July 11, 2013, S. 1284, the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriations Act, 2014 (Harkin), was introduced and placed on the Senate Legislative calendar. In this bill, the congressional request for CPB in FY2016—the forward two-year appropriation—is \$445 million.

114th Congress

To date, no legislation has been introduced addressing the federal role in funding or supporting public broadcasting in the 114th Congress. It is expected that appropriations for CPB in FY2019 will be addressed in the FY2017 Labor-HHS-Education appropriations bill later this year.

Issues

In an age of multiple cable channel options, digital radio, and computerized digital streaming, some ask whether there is a need for federal appropriations to support public broadcasting. The array of commercial all-news radio and radio talk shows, many of which are also streamed on the Internet, provides sources of news and opinion. Supporters of public broadcasting argue that public radio and television broadcasters, free of commercial interruption, provide perhaps the last bastion of balanced and objective information, news, children's education, and entertainment in an era of a changing media landscape. Still, others contend that public broadcasting has lost much of its early impact since the media choices have grown so much over the last several decades and that the federal role in public broadcasting should be re-evaluated as well.

Supporters of public broadcasting contend that public radio and public television provide education and news to many underserved parts of the American population. Public broadcasters may provide this service to an underserved and less commercially attractive population that commercial broadcasters do not address. For example, PBS broadcasting for children includes lessons in reading, counting, and spelling as part of its content, subjects not normally found on

commercial broadcasts. According to NPR Inc., approximately 90% of public radio stations provide local newscasts, airing both newscast and non-newscast content (primarily in weekday drive times and especially during morning drive-time). About half of all public radio stations carry local news during the weekends, says NPR, and 74% of stations are producing and inserting stories into their programming.

On June 20, 2012, the CPB released a report, *Alternative Sources of Funding for Public Broadcasting Stations*. The report was undertaken in response to language in the Military Construction and Veterans Affairs and Related Agencies Appropriations Act of 2012 directing the CPB to provide a report to congressional appropriations committees on alternative sources of federal funding for public broadcasting stations. (H.R. 2055, P.L. 112-74). The report, undertaken by the consulting firm of Booz & Company, provides several alternative or new funding options for public broadcasting stations, with possible benefits as well as liabilities for each option. Five options considered by Booz & Company are television advertising, radio advertising, retransmission consent fees, paid digital subscriptions, and digital game publishing. In addition, 14 current sources of revenue streams already employed by public broadcasting, ranging from merchandise licensing to mobile device applications, were also analyzed as options to replace federal funding for public broadcasting. Booz & Company found “there is simply no substitute for the federal investment” in public broadcasting and that “Ending federal funding for public broadcasting would severely diminish, if not destroy, public broadcasting service in the United States.”¹⁰ The report concludes that if the existing public broadcasting structure were commercialized, the new revenue streams would not offset the loss of federal funding; and that many public broadcasters would have to deviate from their statutory service mission or compete for advertising with established commercial broadcasters in a difficult economic environment.

Still, some critics contend that the report substantiates criticisms of the public broadcasting model: required to compete with commercial television and radio broadcasters that also provide news and entertainment, many public broadcasters could not adapt to a changing media world that provides multiple sources of information and entertainment. For these critics, if many public broadcasters struggle to operate with budget deficits even with federal funding available, what does that say about the need and viability of these stations in a multi-media world, or the ability of their audiences to sustain this business model going forward?

Several important issues are facing congressional policymakers as they address federal appropriations for all forms of public broadcasting. On the most fundamental level, many question the 1967 law that created the national public broadcasting system and whether the federal government should be in the “business” of providing general appropriations to CPB every year since 1969. They ask: is this still a relevant and appropriate role of the federal government? On a second level, some may contend that in an era of spiraling federal deficits, in which many (if not all) federal expenditures are being re-examined, appropriations for CPB should be reduced if not eliminated. These questions revolve around whether federal funding for public broadcasting should be continued at its current level; whether the funding should be modified or reduced; whether the arrangement between the federal funding process and public broadcasting should be changed; or whether federal funding for public broadcasting should be eliminated.

Public broadcasting retains its strong supporters. Most federal appropriations go through CPB to directly support member stations of NPR, PBS, and other independent affiliates. Since, according to NPR, federal funding to supplement administrative functions amounts to less than 2% of its

annual budget, some may question whether such a small amount is worthy of congressional action to eliminate. Independent of the 2011 controversy regarding NPR, over the last several years some in Congress have questioned whether the federal appropriations for CPB should be reduced or eliminated as well. Underlying this position are concerns that the federal role, once so clear in 1967, has been eclipsed in a multi-media Internet age; concerns that the size and scope of the federal government budget deficit requires significant cutbacks in many areas; and allegations that public broadcasting is not objective, balanced, or free of an ideological slant.

As indicated in **Table 1**, CPB has consistently received increasing federal appropriations since 1969. Some would contend that this demonstrates a general consensus among congressional policymakers that there is a federal role in public broadcasting. In addition, public support of public radio and television broadcasting generally has been consistent as well. Supporters of a public broadcasting network system contend that local programming content is not determined by NPR Inc., or PBS, and that most content is local serving community needs. Balanced against concerns about the role of the federal government in public broadcasting, as well as strong pressure to reduced federal spending, these issues will likely continue to be of interest to federal policymakers.

EveryCRSReport.com

The Congressional Research Service (CRS) is a federal legislative branch agency, housed inside the Library of Congress, charged with providing the United States Congress non-partisan advice on issues that may come before Congress.

EveryCRSReport.com republishes CRS reports that are available to all Congressional staff. The reports are not classified, and Members of Congress routinely make individual reports available to the public.

Prior to our republication, we redacted names, phone numbers and email addresses of analysts who produced the reports. We also added this page to the report. We have not intentionally made any other changes to any report published on EveryCRSReport.com.

CRS reports, as a work of the United States government, are not subject to copyright protection in the United States. Any CRS report may be reproduced and distributed in its entirety without permission from CRS. However, as a CRS report may include copyrighted images or material from a third party, you may need to obtain permission of the copyright holder if you wish to copy or otherwise use copyrighted material.

Information in a CRS report should not be relied upon for purposes other than public understanding of information that has been provided by CRS to members of Congress in connection with CRS' institutional role.

EveryCRSReport.com is not a government website and is not affiliated with CRS. We do not claim copyright on any CRS report we have republished.
