R44027

Summary

USAspending.gov, available at <http://www.USAspending.gov>, is a government source for data on federal awards by state, congressional district (CD), county, and zip code. The awards data in USAspending.gov is provided by federal agencies and represent contracts, grants, loans, and other forms of financial assistance. Using USAspending.gov to locate and compile accurate data on federal awards can be challenging due to continued data quality problems identified by the U.S. Government Accountability Office (GAO). Users of USAspending.gov need to be aware that while search results may be useful for informing consideration for certain questions, these results may be incomplete or have inaccuracies.

USAspending.gov was created under P.L. 109-282, the Federal Funding Accountability and Transparency Act of 2006 (FFATA), and is being enhanced by requirements of P.L. 113-101, the Digital Accountability and Transparency Act of 2014 (DATA Act).

Other related sources reviewed in this report include the following:

- Federal Procurement Data System (FPDS);
- Census Federal Audit Clearinghouse;
- U.S. Budget: Aid to State and Local Governments;
- Pew Charitable Trusts Fiscal Federalism Initiative;
- National Priorities Project;
- Census Federal Aid to States (FAS) and Consolidated Federal Funds Report (CFFR); and
- Additional federal grant awards databases, including sources tracking medical, scientific, and technical research.

----------------------------------	----

Introduction

USAspending.gov, <http://www.usaspending.gov>, is a government source for data on federal grants, contracts, loans, and other financial assistance. The website enables searching of federal awards and sub-awards from FY2008 to the present (with the option of downloading prime awards data back to FY2000) by state, congressional district (CD), county, and zip code. Grant awards include money the federal government commits for projects in states, local jurisdictions, regions, territories, and tribal reservations, as well as payments for eligible needs to help individuals and families. Contract awards refer to bids and agreements the federal government makes for specific goods and services.

For Congress, the ability to more accurately track these federal awards is necessary to better inform oversight of federal spending. In recent years, Congress has passed laws to create and improve systems for government departments and agencies to report and input data on federal awards for contracts, grants, and other financial assistance.

- P.L. 109-282, the Federal Funding Accountability and Transparency Act of 2006 (FFATA), called for the creation of a database that became USAspending.gov. The publicly available database replaced data collection and annual reports issued for more than 30 years in the Census Bureau's Federal Aid to States (FAS) report and Consolidated Federal Funds Report (CFFR).¹
- P.L. 111-5, the American Recovery and Reinvestment Act of 2009 (ARRA), required federal agencies awarding stimulus funding and state and local recipients of such funding to report spending back to the ARRA Recovery Board; this reporting also became a part of USAspending.gov.
- P.L. 113-101, the Digital Accountability and Transparency Act of 2014 (DATA Act), transferred responsibility for USAspending.gov from the Office of Management and Budget (OMB) to the Treasury Department and required that expenditures data be added to the federal agency obligations data already included in the USAspending.gov database. The DATA Act also requires that the Treasury Department and OMB develop government-wide data standardization to facilitate consolidating, automating, and simplifying reports on grant awards and contracts and to improve USAspending.gov underreporting and inconsistencies.

However, finding accurate and complete data on federal funds received by states and congressional districts continues to be challenging due to ongoing data quality problems identified by the Government Accountability Office (GAO) in June 2014.² A GAO report released on April 28, 2017, reiterated some continuing concerns with data quality relating to internal controls, challenges with guidance to reporting agencies, limitations with data quality assurance processes, and the pace at which OMB is working to establish a data governance structure.³ Users

¹ Congress subsequently defunded the Census office that issued these reports in FY2012, with FY2010 Federal Aid to States (FAS) report and Consolidated Federal Funds Report (CFFR) being the last reports issued.

² The U.S. Government Accountability Office (GAO) "estimates with 95 percent confidence that between 2 percent and 7 percent of the awards contained information that was fully consistent with agencies' records for all 21 data elements examined." See GAO Highlights, *Data Transparency: Oversight Needed to Address Underreporting and Inconsistencies on Federal Award Website*, GAO 14-476, June 2014, at <http://www.gao.gov/products/GAO-14-476>.

³ GAO Highlights, *DATA Act: As Reporting Deadline Nears, Challenges Remain That Will Affect Data Quality*, GAO-17-496, April 28, 2017, at http://www.gao.gov/products/GAO-17-496?utm_medium=email&utm_source=govdelivery.

of USAspending.gov should be aware that while search results may be useful for informing consideration of certain questions, these results may also be incomplete or have inaccuracies.

USAspending.gov Background

FFATA required OMB to create a public database of all federal funds awarded to the final recipient level. The current USAspending.gov database, redesigned by the Treasury Department, was launched on March 31, 2015. A beta version of a newly designed site, <https://beta.usaspending.gov/#/>, was released on May 9, 2017, and will eventually replace the current USAspending.gov site. The new site is to provide summary data on the budget categories and federal spending accounts and break the spending down into individual contracts, grants, or loans.

The DATA Act requires the Treasury Department and OMB to develop government-wide data standardization to consolidate, automate, and simplify reports on grant awards and contracts to improve underreporting and inconsistencies as identified by GAO.⁴ The purpose of the act is to expand on the transparency efforts originally mandated by FFATA, specifically by

- disclosing direct agency expenditures and linking federal contract, loan, and grant spending information to federal agency programs;
- establishing government-wide data standards for financial data and providing consistent, reliable, and searchable data that is displayed accurately;
- simplifying reporting, streamlining reporting requirements, and reducing compliance costs, while improving transparency; and
- improving the quality of data submitted to USAspending.gov by holding agencies accountable.⁵

In addition, no later than four years after enactment (by spring 2018), Treasury and OMB must ensure that all information published on USAspending.gov conforms to government-wide data standards. OMB is also required to issue guidance so that all agencies can follow government-wide data standards when reporting on grantee and contractor awards.

The data in USAspending.gov is submitted by federal agencies and represents awards, including grants, contracts, loans, and other financial assistance (e.g., Medicare benefits, food stamps, unemployment benefits.). USAspending.gov does not include data on actual spending by recipients. Federal agencies are required to submit reports on awards transactions within 30 days after transactions are implemented. There may be a longer lag-time with data from the Department of Defense, generally 90 days.

Site Features

USAspending.gov enables policy staff and the public to search for awards data by state, congressional district, and other jurisdictions. Awards are searchable back to FY2008, and there are data download capabilities for prime and sub-awards back to FY2000. The site includes the following features:

⁴ Ibid.

⁵ USAspending.gov beta site at <https://beta.usaspending.gov/#/relevantlegislation>.

- The homepage enables searching by *Recipient*, *Awards in Your Neighborhood* (by zip code), and *Awards by State* for the most current fiscal year (FY).
- Under the tab “Where is the Money Going,” the “Spending Map” option allows users to select criteria and view summary data of various geographic jurisdictions, including state and congressional districts (CDs). Lists of prime award recipients are displayed with funding amounts and Award IDs. More information about each transaction may be viewed by clicking on the Award ID. Data may not be downloaded from this page.
- The “Advanced Data Search” enables filtering by various criteria, including fiscal year (back to FY2008), award recipient, state or CD place of performance (where project is located or money is spent), and department or agency. Data may be exported to spreadsheets.
- The “Download Center” enables researchers to export detailed bulk data (from FY2000 to present) to spreadsheets, with full data elements for each recipient. Filtering must be done separately for *Prime Award* and *Sub-Award*; for *Contracts* or *Grants* or *Loans* or *Other Financial Assistance*; by single agency or *All*; and by state. Searching by CD is not an option, although downloaded spreadsheets include columns that show CD.

Issues With Tracking Awards

In addition to the data quality problems in USAspending.gov mentioned earlier,⁶ the following issues should be taken into consideration.

Recipient Location Versus Place of Performance

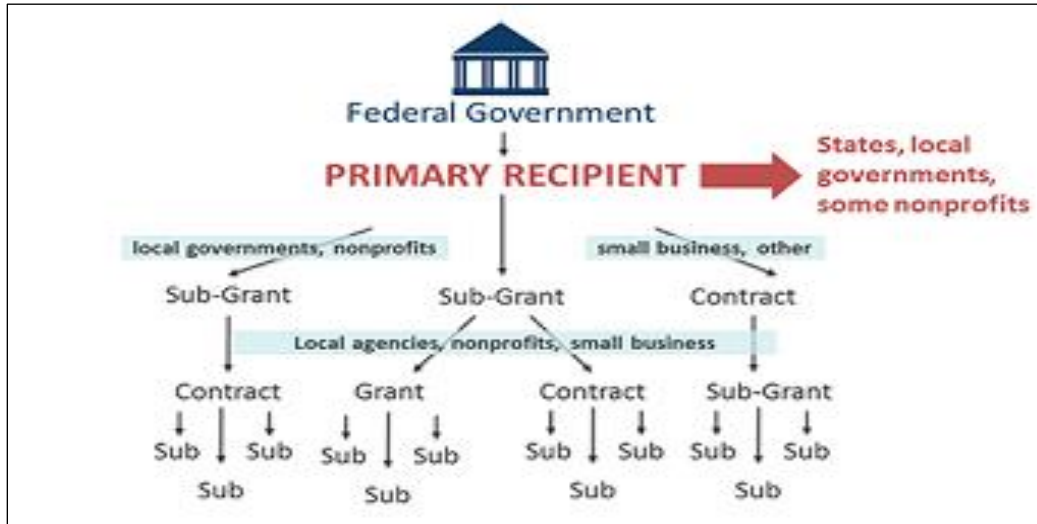

As recipients of federal grant funding, state and local governments may provide services directly to beneficiaries. Alternatively, a state may act as a pass through, re-disbursing federal grant funding to localities using a formula or a competitive process⁷ through sub-grants or subcontracts. Both federal grant and procurement awards thus may have a *where awarded* versus *where spent* component that is not fully identified in grant or procurement records. Most federal grant funding is awarded to states, which then sub-award or subcontract to eligible recipients elsewhere in the state (see **Figure 1**). A project’s *place of performance* may therefore differ from the initial *recipient location*.

⁶ For examples of the data quality problems GAO has identified in USAspending.gov, see the GAO website at <http://www.gao.gov>, particularly the search term *USAspending.gov* and the header *Data Transparency*.

⁷ See CRS Report R42769, *Federal Grants-in-Aid Administration: A Primer*, by (name redacted)

Figure 1. Examples of Federal Spending Streams

Recipients at Multiple Levels

Source: Jerry Brito, George Washington University, 2009; and the Congressional Research Service, 2016.

A funding award may pass through different jurisdictions (in different CDs) before reaching the final place of performance. For example,

- Federal grants may go first to the state (the state capital, in one CD), then be distributed to a city or county government (in one or more additional CDs), which then may pass the funds to an organization that spends the money in other CDs. A CD in which a state capital is located may appear to receive more federal funds than other CDs in the state, but searching USAspending.gov data by place of performance rather than recipient location would identify data by the project location.
- Procurement awards may be given to a corporation headquartered in one state (and one CD), but the company may spend the money manufacturing the purchased product at one or more of its manufacturing facilities in one or more additional states (and CDs).

Congressional District Data

For data prior to FY2007, CDs were not always identified for recipients of grant or procurement awards. P.L. 109-282 (FFATA), however, required departments and agencies to identify recipients' CDs when they awarded grants or contracts.

The USAspending.gov “Advanced Data Search” and “Spending Map” enable filtering by state and congressional district.

- For CD data, search USAspending.gov by place of performance rather than recipient location to identify awards by project location (see “Recipient Location Versus Place of Performance,” above).
- Use caution when comparing CD data over time. During decennial redistricting, CD borders and numbers may change but past data are not revised to account for redistricting. For example, comparing data from the 113th or 114th Congress with earlier data must take into account new district borders created by the 2010

decennial redistricting. Other geographic search options, such as by zip code or county, could be used to track funds within a CD, although borders may not exactly align.

- CDs that include state capitals will appear to receive more federal funds because states are prime recipients of federal block and formula grants. State Administering Agencies (SAAs) then pass through or sub-award federal funding for projects throughout the state.

Other Data Sources

Federal Procurement Data System

The General Services Administration (GSA) maintains the Federal Procurement Data System–Next Generation (FPDS–NG) at https://www.fpds.gov/fpdsng_cms/index.php/en/, which contains statistical information on federal contracts. The FPDS–NG

- serves as the source of USAspending.gov contracts data;
- makes available Federal Procurement Reports from FY2000 forward on its website;
- includes data on contracts of more than \$25,000 and summary data of procurements less than \$25,000; and
- provides selected search capabilities by state (including aggregate county statistics), contractor name, and product or service category.

For more refined searching, such as by CD, the FPDS Help Desk can guide congressional staff and the public through filtering for data needed (called *ad hoc reports*).

Federal Audit Clearinghouse

States, local governments, and nonprofits (including universities) spending \$750,000 or more⁸ in federal grants during a fiscal year are required to submit an audit detailing expenditures. Data from the audits are posted on the Census Bureau’s Federal Audit Clearinghouse, at <https://harvester.census.gov/facweb/Default.aspx>. No printed documents are produced.

- Because the audit data are for the fiscal year of the filing agency or organization (which may differ from the federal fiscal year), they are not comparable with data from any other federal source.
- Searches may be conducted by organization or institution, *Catalog of Federal Domestic Assistance* (CFDA) program number, and geographic location (by city or state but not by congressional district). See search options at <https://harvester.census.gov/facweb/>.

⁸ For fiscal years prior to December 26, 2014, the threshold was \$500,000 (<https://harvester.census.gov/facweb/FAQs.aspx>).

U.S. Budget: Aid to State and Local Governments

The *Analytical Perspectives* volume of the President's budget covers various topics, including "Aid to State and Local Governments" (Chapter 14 in the FY2018 report).⁹ Federal grants-in-aid to state and local governments, U.S. territories, and American Indian tribal governments are intended to support government operations or the provision of services to the public. Grants are most often awarded as direct cash assistance, but federal grants-in-aid also can include payments for grants-in-kind—nonmonetary aid such as commodities purchased for the National School Lunch Program. Federal revenues shared with state and local governments also are considered grants-in-aid.¹⁰

The FY2018 budget proposes \$703 billion in outlays for aid to state and local governments, an increase of 2.4% from FY2017.¹¹ Of total proposed grant spending in FY2018, 61.5% is for health programs, with most of the funding going to Medicaid, a program that pays for health care services for low-income Americans and individuals with disabilities. Beyond health programs, 15.2% of federal aid is estimated to go to income-security programs; 8.7 % to transportation; 8.5% to education, training, and social services; and 6.1% to all other functions.¹²

Individual program tables with state-by-state obligation data for grants-in-aid programs to state and local governments may be found on the OMB website. Tables 14-3 through 14-39 show state-by-state obligations for 35 federal grants-in-aid programs.¹³

Federal grants generally fall into one of two broad categories—categorical grants or block grants, depending on the requirements of the grant program. In addition, grants may be characterized by how the funding is awarded, such as by formula, by project, or by matching state and local funds. As recipients of federal grant funding, state and local governments may provide services directly to beneficiaries or states may act as a pass-through, disbursing grant funding to localities using a formula or a competitive process.¹⁴ As discussed above, this pass through, or sub-awarding, at the state level makes tracking federally originated funds to the final recipient a challenge.

Pew Charitable Trust and National Priorities Project

The following projects analyze government-issued data on federal spending in states. Please note that CRS cannot validate neither the research methodologies used nor the conclusions drawn by the organizations. These sources are included here because they are frequently cited in policy papers and the media.

- Pew Charitable Trusts Fiscal Federalism Initiative, *Federal Spending in the States: 2005 to 2014*, March 3, 2016
<http://www.pewtrusts.org/en/research-and-analysis/issue-briefs/2016/03/federal-spending-in-the-states-2005-to-2014>.

⁹ OMB, "Chapter 14: Aid to State and Local Governments," *Analytical Perspectives: Budget of the U.S. Government, Fiscal Year 2018*, at http://www.whitehouse.gov/omb/budget/Analytical_Perspectives. Note that Chapter 14 is variously numbered in earlier budgets.

¹⁰ Ibid., p. 172.

¹¹ Ibid., p. 171.

¹² Ibid., p. 172.

¹³ See Supplemental Materials as Spreadsheets, Tables 15-5 through 15-40, State-by-State Tables, *Analytical Perspectives*, at http://www.budget.gov/budget/Analytical_Perspectives.

¹⁴ See CRS Report R42769, *Federal Grants-in-Aid Administration: A Primer*, by (name redacted).

Sources of data include USAspending.gov, the Bureau of Economic Analysis, the Office of Personnel Management, and the Department of Defense; see Appendix Methodology at http://www.pewtrusts.org/~media/Assets/2014/12/Federal_Spending_in_the_States_methodology_web_final.pdf.

For nearly three decades, through FY2010, the Census Bureau produced the CFFR, an annual look at the geographic distribution of federal spending (see discussion below). When the CFFR was discontinued, the Pew Charitable Trust Fiscal Federalism Initiative provided analysis to fill the gap. Data are divided into the five major categories used by the CFFR: (1) retirement benefits, (2) nonretirement benefits, (3) grants, (4) contracts, and (5) salaries and wages for federal employees.

- National Priorities Project, *State Smart: Federal Funds in 50 States*
<https://www.nationalpriorities.org/smart/constructor/#>

Sources of data include USAspending.gov, the Census Bureau, the Bureau of Economic Analysis, and the Bureau of Labor Statistics. For notes on methodology, see <https://www.nationalpriorities.org/smart/resources/notes-and-sources/>.

Through this project's interactive website, users can follow a representation of the flow of federal dollars to each state and the District of Columbia through spending on government personnel, contracts, aid to individuals (such as food stamps and Medicare), and public assistance programs. It also provides information on how much individuals and businesses in each state pay in federal taxes. Available data can be used to inform consideration of questions such as

- What percentage of a state's budget comes from the federal government?
- How much, on average, do residents in a state receive in federal benefits, and how does that compare with other states?
- How much do individuals and businesses in a state pay in federal taxes?

Federal Aid to States and the Consolidated Federal Funds Report

These Census Bureau reports, published from FY1983 to FY2010 and available at <https://www.census.gov/govs/pubs/title.html>, were the federal government's primary documents summarizing the geographic distribution of federal monies to states and counties, whether grants, contracts, or appropriations. The FY2010 Federal Aid to States (FAS) and Consolidated Federal Funds Report (CFFR) were the last reports issued due to the termination of the Census Bureau's Federal Financial Statistics program. Federal obligations data continue to be posted on USAspending.gov, now the official source collecting federal awards data.

- FAS covered federal government expenditures to state and local governments and presented figures to the state level by program area and agency.
- CFFR included payments to state and local governments as well as to nongovernmental recipients. Dollar amounts reported represented either actual expenditures or obligations (see CFFR introduction and source notes for each table or graph).
- CFFR provided data to the state and county level for grants, salaries and wages, procurement contracts, direct payments for individuals, other direct payments, direct loans, guaranteed or insured loans, and insurance.

- Although CFFR indicated congressional districts (one or more) for each county, it did not give separate data by CD.

Selected Agency Grant Awards Databases and Information

USAspending.gov collects brief data on all federal grants and contracts awarded. However, some agencies, in particular those awarding research grants, also continue to post information on their own websites.

Department of Agriculture (USDA)

- Current Research Information System
<http://cris.csrees.usda.gov/>
Ongoing agricultural, food science, human nutrition, and forestry research, education and extension activities, with a focus on the National Institute of Food and Agriculture (NIFA) grant programs. Projects are conducted or sponsored by USDA research agencies, state agricultural experiment stations, land-grant universities, other cooperating state institutions, and participants in NIFA-administered grant programs, including Small Business Innovation Research and the Agriculture and Food Research Initiative.

Department of Defense (DOD)

- Awards databases for the DOD's Congressionally Directed Medical Research Programs
<http://cdmrp.army.mil/search.aspx>
- DOD Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs
<https://sbir.defensebusiness.org/awards>

Department of Education (ED)

- Institute of Education Sciences, Funded Research Grants and Contracts
<http://ies.ed.gov/funding/grantsearch/index.asp>

Department of Health and Human Services (HHS)

- Tracking Accountability in Government Grants System (TAGGS)
<http://taggs.hhs.gov/AdvancedSearch.cfm>
Database of awards from HHS and its subsidiaries.
- National Institutes of Health (NIH) Research Portfolio Online Reporting Tools RePORTER
<http://projectreporter.nih.gov/reporter.cfm>
Includes projects funded by the NIH, Administration for Children and Families, Agency for Health Care Research and Quality, Centers for Disease Control and Prevention, Food and Drug Administration, and the U.S. Department of Veterans Affairs.

Department of Homeland Security (DHS)

- Federal Emergency Management Agency (FEMA), Public Assistance Grant Awards Activity
2013-2016: <https://www.fema.gov/media-library/assets/documents/30731>
2017-2019: <https://www.fema.gov/media-library/assets/documents/128200>

Daily activity of Public Assistance Grant Awards, including FEMA region, state, disaster declaration number, event description, mission assigned agency, assistance requested, obligated federal dollars, and date of obligation.

Department of Justice (DOJ)

- Office of Justice Programs (OJP), OJP Grant Award Data
<http://ojp.gov/funding/Explore/OJPAwardData.htm>

Department of Labor (DOL)

- Employment and Training Administration (ETA), Grants Awarded
http://www.doleta.gov/grants/grants_awarded.cfm

Environmental Protection Agency (EPA)

- Integrated Grants Management System (IGMS)
<https://www3.epa.gov/enviro/facts/multisystem.html#>
IGMS awards, administers, and monitors EPA grants regularly awarded to federal, state, or local government agencies, universities, and other institutions that support EPA's environmental programs.

Institute of Museum and Library Services (IMLS)

- IMLS Awarded Grants
<http://www.imls.gov/recipients/grantsearch.aspx>

National Endowment for the Arts (NEA)

- Grant Search
<https://apps.nea.gov/grantsearch/>
NEA grants awarded since 1998.

National Endowment for the Humanities (NEH)

- Funded Projects
