## Summary

The Antideficiency Act (31 U.S.C. 1341-1342, 1511-1519) generally bars the obligation of funds in the absence of appropriations. Exceptions are made under the act, including for activities involving “the safety of human life or the protection of property.” The interval during the fiscal year when appropriations for a particular project or activity are not enacted into law, either in the form of a regular appropriations act or a continuing resolution (CR), is referred to as a *funding gap*. Although funding gaps may occur at the start of the fiscal year, they may also occur any time a CR expires and another CR (or the regular appropriations bill) is not enacted immediately thereafter. Multiple funding gaps may occur within a fiscal year.

When a funding gap occurs, federal agencies are generally required to begin a *shutdown* of the affected projects and activities, which includes the prompt furlough of non-excepted personnel. The general practice of the federal government after the shutdown has ended has been to retroactively pay furloughed employees for the time they missed, as well as employees who were required to come to work.

Although a shutdown may be the result of a funding gap, the two events should be distinguished. This is because a funding gap may result in a total shutdown of all affected projects or activities in some instances but not others. For example, when funding gaps are of a short duration, agencies may not have enough time to complete a shutdown of affected projects and activities before funding is restored. In addition, the Office of Management and Budget has previously indicated that a shutdown of agency operations within the first day of the funding gap may be postponed if a resolution appears to be imminent.

Since FY1977, 19 funding gaps occurred, ranging in duration from 1 day to 21 full days. These funding gaps are listed in **Table 1**. About half of these funding gaps were brief (i.e., three days or less in duration). Notably, many of the funding gaps that occurred during this period do not appear to have resulted in a “shutdown.” Prior to the issuance of the opinions in 1980 and early 1981 by then-Attorney General Benjamin Civiletti, while agencies tended to curtail some operations in response to a funding gap, they often “continued to operate during periods of expired funding.” In addition, some of the funding gaps after the Civiletti opinions did not result in a completion of shutdown operations due to both the funding gap’s short duration and an expectation that appropriations would soon be enacted. Some of the funding gaps during this period, however, did have a broader impact on affected government operations, even if only for a matter of hours.

Two of the most recent funding gaps occurred in FY1996, amounting to 5 days and 21 days. The chronology of regular and continuing appropriations enacted during FY1996 is illustrated in **Figure 1**.

At the beginning of FY2014 (October 1, 2013), none of the regular appropriations bills had been enacted, so a government-wide funding gap occurred. It concluded on October 17, 2013, after lasting 16 days.

The most recent funding gap occurred during FY2018, when a CR covering all of the regular appropriations bills expired on January 19, 2018. It concluded on January 22, 2018, after lasting two days.

For a general discussion of federal government shutdowns, see CRS Report RL34680, *Shutdown of the Federal Government: Causes, Processes, and Effects*, coordinated by (name redacted).

----------------------------------	---

## Background

The routine activities of most federal agencies are funded annually by one or more of the regular appropriations acts. When action on the regular appropriations acts is delayed, a continuing appropriations act, also sometimes referred to as a *continuing resolution* or CR, may be used to provide interim budget authority.<sup>1</sup>

Since FY1952, all of the regular appropriations acts have been enacted by the beginning of the fiscal year in only four instances (FY1977, FY1989, FY1995, and FY1997), and CRs were not needed for interim funding in only for three of these fiscal years. CRs were enacted for FY1977 to fund certain unauthorized programs whose funding had been dropped from the regular appropriations acts.<sup>2</sup> Further, no CRs were enacted for FY1953, even though all but one of the regular appropriations was enacted after the start of the fiscal year.<sup>3</sup>

The Antideficiency Act (31 U.S.C. 1341-1342, 1511-1519) generally bars the obligation or expenditure of federal funds in the absence of appropriations.<sup>4</sup> Exceptions under the act include activities involving “the safety of human life or the protection of property.”<sup>5</sup> The interval during the fiscal year when appropriations for a particular project or activity are not enacted into law, either in the form of a regular appropriations act or a CR, is referred to as a *funding gap*.<sup>6</sup> Although funding gaps may occur at the start of the fiscal year, they may also occur any time a CR expires and another CR (or the relevant regular appropriations bill) is not enacted immediately thereafter. Multiple funding gaps may occur within a fiscal year.

In 1980 and early 1981, then-Attorney General Benjamin Civiletti issued opinions clarifying the need for the federal government to begin terminating regular activities upon the occurrence of a funding gap.<sup>7</sup> As a consequence of these more strict guidelines, when a funding gap occurs, executive agencies begin a *shutdown* of the affected projects and activities, which includes the prompt furlough of non-excepted personnel. The general practice of the federal government after the shutdown has ended has been to retroactively pay furloughed employees for the time they missed, as well as employees who were required to come to work.<sup>8</sup>

<sup>1</sup> For a discussion of CRs generally, see CRS Report R42647, *Continuing Resolutions: Overview of Components and Recent Practices*, by (name redacted) .

<sup>2</sup> P.L. 94-473 made continuing appropriations through March 31, 1977. P.L. 95-16 extended the date of the budget authority provided in P.L. 94-473 through April 30, 1977.

<sup>3</sup> Section 1414 of P.L. 82-547 (66 Stat. 661), which was enacted on July 15, 1952, made regular appropriations retroactively available as of July 1 (the first day of FY1953) and ratified any obligations incurred prior to the law’s enactment.

<sup>4</sup> The Antideficiency Act is discussed in CRS Report RL30795, *General Management Laws: A Compendium*, by (name redacted) et al. In addition, the Government Accountability Office (GAO) provides information about the act online at <http://www.gao.gov/ada/antideficiency.htm>.

<sup>5</sup> See 31 U.S.C. §1342. During a funding gap, personnel and related activities that are determined to be necessary for the “the safety of human life or the protection of property,” or fall under other allowable exceptions, are referred to as “excepted.” Under Department of Justice guidance (discussed later in this report), agencies may incur obligations ahead of appropriations for these “excepted” purposes.

<sup>6</sup> In most cases, funding provided in regular appropriations acts is available to be obligated only in a single fiscal year, so that in the event that no subsequent budget authority is provided, agencies may not enter into further obligations. In these instances, budget authority that had previously been enacted and available for obligation for longer periods (e.g., multi-year or “no-year” appropriations) would generally remain available.

<sup>7</sup> The text of the opinions is included in Appendices IV and VIII to the GAO report *Funding Gaps Jeopardize Federal Government Operations*, PAD-81-31, March 3, 1981.

<sup>8</sup> For a discussion of federal government shutdowns, see CRS Report RL34680, *Shutdown of the Federal Government: (continued...)*

Under current practice, although a shutdown may be the result of a funding gap, the two events should be distinguished. This is because a funding gap may result in a shutdown of all affected projects or activities in some instances but not in others. For example, when a funding gap is of a short duration, agencies may not have enough time to complete a shutdown of affected projects and activities before funding is restored. In addition, the Office of Management and Budget has previously indicated that a shutdown of agency operations within the first day of a funding gap may be postponed if it appears that an additional CR or regular appropriations act is likely to be enacted that same day.<sup>9</sup>

To avoid funding gaps, proposals have previously been offered to establish an “automatic continuing resolution” (ACR) that would provide a fallback source of funding authority for activities, at a specified formula or level, in the event that timely enactment of appropriations is disrupted. The funding would become available automatically and remain available as long as needed so that a funding gap would not occur. Although the House and Senate have considered ACR proposals in the past, none has been enacted into law on a permanent basis.

## Funding Gaps Since FY1977

As illustrated in **Table 1**, there have been 19 funding gaps since FY1977.<sup>10</sup> The enactment of a CR on the day after the budget authority in the previous CR expired, which has occurred often, is not counted in this report as involving a funding gap. For example, between FY2000 and FY2018, “next-day” CRs were enacted on 21 occasions.

Almost all of the funding gaps occurred between FY1977 and FY1995. During this period of 19 fiscal years, 15 funding gaps occurred.

Multiple funding gaps occurred during a single fiscal year in four instances: (1) three gaps covering a total of 28 days in FY1978, (2) two gaps covering a total of 4 days in FY1983, (3) two gaps covering a total of 3 days in FY1985, and (4) two gaps covering a total of 26 days in FY1996.

Seven of the funding gaps commenced with the beginning of the fiscal year on October 1. The remaining 11 funding gaps occurred at least more than one day after the fiscal year had begun. Ten of the funding gaps ended in October, four ended in November, three ended in December, and one ended in January.

Funding gaps have ranged in duration from 1 to 21 full days. Six of the eight lengthiest funding gaps, lasting between 8 days and 17 days, occurred between FY1977 and FY1980—before the Civiletti opinions were issued in 1980 and early 1981. After the issuance of these opinions, the duration of funding gaps in general shortened considerably, typically ranging from one day to three days. Of these, most occurred over a weekend.

**Source:** Compiled by CRS with data from the Legislative Information System of the U.S. Congress.

**Notes:**

- Budget authority expired at the end of the date indicated. For example, for the first FY1996 funding gap, budget authority expired at the end of the day on Monday, November 13, 1995, and the funding gap of five full days commenced on Tuesday, November 14, 1995. The enactment of a CR on the day after the previous CR expired, which has occurred often, is not counted as involving a funding gap.
- Full days are counted as beginning after the final day on which budget authority was available and ending the day before the gap terminated. For example, for the first FY1996 funding gap, the full days of the gap were from November 14, 1995, through November 18, 1995, for a total of five full days.
- Gap terminated due to the enactment of a continuing resolution or one or more regular appropriations acts.

Notably, many of the funding gaps that occurred since FY1977 do not appear to have resulted in a “shutdown.” Prior to the issuance of the Civiletti opinions, while agencies tended to curtail some operations in response to a funding gap, they often “continued to operate during periods of expired funding.”<sup>11</sup> In addition, some of the funding gaps after the Civiletti opinions did not result

<sup>11</sup> GAO, *Funding Gaps Jeopardize Federal Government Operations*, PAD-81-31, March 3, 1981, p. 2. GAO further stated, “Short of telling employees not to show up for work, Federal officials have responded to gaps by cutting or postponing all non-essential obligations—particular personnel actions, travel, and the award of new contracts—in an attempt to continue the operations of programs for which they are responsible.” Media reports related to funding gaps prior to FY1982 also suggest that little or no shutdown occurred. See, for example, *Congressional Quarterly Almanac*, “Continued Funding, 1977,” vol. XXXII, pp. 789-790; *Washington Post*, “Payroll Crisis Is Staved Off and HEW, (continued...)”

in a completion of shutdown operations due to both a funding gap's short duration and an expectation that appropriations would soon be enacted. For example, during the three-day FY1984 funding gap, "no disruption to government services" reportedly occurred, due to both the three-day holiday weekend and the expectation that the President would soon sign into law appropriations passed by the House and Senate during that weekend.<sup>12</sup>

Some of the funding gaps during this period, however, did have a broader impact on affected government operations, even if only for a matter of hours. For example, in response to the one-day funding gap that occurred on October 4, 1984, a furlough of non-excepted personnel for part of that day was reportedly implemented.<sup>13</sup> It should be noted that when most of these funding gaps occurred, one or more regular appropriations measures had been enacted, so any effects were not felt government-wide. For example, the three funding gaps in FY1978 were limited to activities funded in the Departments of Labor and Health, Education, and Welfare Appropriations Act. Similarly, 8 of 13 regular appropriations acts had been enacted prior to the three-day funding gap in FY1984.

The most recent funding gaps—two in FY1996, one in FY2014, and one in FY2018—all resulted in a widespread cessation of non-excepted activities and furlough of associated personnel. The legislative history and the impact of these funding gaps are summarized below.

## FY1996

The two FY1996 funding gaps occurred between November 13 and 19, 1995, and December 15, 1995, through January 6, 1996. The chronology of regular and continuing appropriations enacted during that fiscal year is illustrated in **Figure 1**. In the lead-up to the first funding gap, only 3 out of the 13 regular appropriations acts had been signed into law,<sup>14</sup> and budget authority, which had been provided by a CR<sup>15</sup> since the start of the fiscal year, expired at the end of the day on

<sup>13</sup> For further information, see *Congressional Quarterly Almanac*, "Last-Minute Money Bill Was Largest Ever," vol. XXXX pp. 444-447; Robert Pear, "Senate Works Past Deadline on Catchall Government Spending Bill," *New York Times*, October 4, 1984, p. A29; and Monica Borkowski, "Looking Back; Previous Government Shutdowns," *New York Times*, November 11, 1995.

<sup>14</sup> The Military Construction Appropriations Act, H.R. 1817 (P.L. 104-32), was enacted on October 3, 1995. The Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, H.R. 1976 (P.L. 104-37), was enacted on October 21, 1995. The Energy and Water Development Appropriations Act, H.R. 1905 (P.L. 104-46), was enacted on November 13, 1995. The Legislative Branch Appropriations Act, H.R. 1854 (104<sup>th</sup> Cong.), was vetoed on October 12, 1995. As of the end of the day on November 13, 1995, the 10 regular appropriations bills that had yet to be enacted were the (1) Department of Transportation and Related Agencies Appropriations Act; (2) Treasury, Postal Service, and General Government Appropriations Act; (3) Legislative Branch Appropriations Act; (4) Department of Defense Appropriations Act; (5) Department of Interior and Related Agencies Appropriations Act; (6) Department of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act; (7) Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act; (8) Foreign Operations, Export Financing, and Related Programs Appropriations Act; (9) Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act; and (10) District of Columbia Appropriations Act.

<sup>15</sup> H.J.Res. 108 (P.L. 104-31).

November 13. On this same day, President Clinton vetoed a CR<sup>16</sup> that would have extended budget authority through December 1, 1995, because of the Medicare premium increases contained within the measure.<sup>17</sup> The ensuing funding gap reportedly resulted in the furlough of an estimated 800,000 federal workers.<sup>18</sup> After five days, a deal was reached to end the shutdown and extend funding through December 15.<sup>19</sup> Agencies that had been zeroed out in pending appropriations bills were funded at a rate of 75% of FY1995 budget authority. All other agencies were funded at the lower of the House- or Senate-passed level of funding contained in the FY1996 full-year appropriations bills. The CR also included an agreement between President Clinton and Congress regarding future negotiations to lower the budget deficit within seven years.<sup>20</sup>

(1995), vol. LI, pp. 11-3 through 11-6; *CQ Weekly*, "Special Report—Budget Showdown: Day by Day," November 18, 1995.

**Figure I. Chronology of FY1996 Appropriations**

**Source:** CRS Report R42647, *Continuing Resolutions: Overview of Components and Recent Practices*, by (name redacted) and (name redacted) , and CRS analysis of public laws available through the Legislative Information System (LIS, lis.gov).

**Notes:**

- (1) In FY1996, the annual appropriations process anticipated the enactment of 13 “regular appropriations” bills.
- (2) Interim funding was provided through 13 continuing resolutions (CRs) of varying coverage and duration. For a list of these CRs and their enactment dates, see Table 4 in CRS Report R42647, *Continuing Resolutions: Overview of Components and Recent Practices*, by (name redacted) and (name redacted) .
- (3) Full-year funding was provided through eight regular appropriations acts (P.L. 104-32, P.L. 104-37, P.L. 104-46, P.L. 104-50, P.L. 104-52, P.L. 104-53, P.L. 104-61, and P.L. 104-107), two full-year CRs (P.L. 104-92 and P.L. 104-99), and an omnibus appropriations act (P.L. 104-134). For Foreign Operations and District of Columbia, although full-year funding was initially provided in CRs, final action on annual appropriations (P.L. 104-107 and P.L. 104-134) superseded that funding.
- (4) The “coverage” of the funding gap refers to those regular appropriations bills that had not been enacted during all or some of the days during which the funding gap occurred. The “duration” of the funding gap is calculated here as the number of full days affected by the lapse in funding. Full days are counted as beginning after the final day on which budget authority was available and ending the day before funding resumed.
- (5) Interim funding was enacted late in the day on November 19, 1995 (P.L. 104-54). As a consequence, in many instances agency operations may not have restarted until the following day.
- (6) Three interim funding measures included full-year funding for certain activities (P.L. 104-69, P.L. 104-91, and P.L. 104-92). However, this provision of agency- or program-specific, full-year funding is not reflected in the figure, which focuses on the enactment of entire regular appropriations bills.

During the first FY1996 funding gap and prior to the second one, an additional four regular appropriations measures were enacted, and three others were vetoed.<sup>21</sup> The negotiations on the six remaining bills were unsuccessful before the budget authority provided in the CR expired at the end of the day on December 15, 1995.<sup>22</sup> Reportedly, about 280,000 executive branch employees were furloughed during the funding gap between December 15, 1995, and January 6, 1996.<sup>23</sup> A CR to provide benefits for veterans and welfare recipients and to keep the District of Columbia government operating was passed and signed into law on December 22, 1995.<sup>24</sup> The shutdown officially ended on January 6, 1996, when the first of a series of CRs to reopen affected agencies and provide budget authority through January 26, 1996,<sup>25</sup> was enacted.<sup>26</sup>

## FY2014

This funding gap commenced at the beginning of FY2014 on October 1, 2013. None of the 12 regular appropriations bills for FY2014 was enacted prior to the beginning of the funding gap. In addition, as of the beginning of the fiscal year, an interim CR to provide budget authority for the projects and activities covered by those 12 bills was also not enacted. On September 30, however, an ACR was enacted to cover FY2014 pay and allowances for (1) certain members of the Armed Forces, (2) certain Department of Defense (DOD) civilian personnel, and (3) other specified DOD and Department of Homeland Security contractors (H.R. 3210; P.L. 113-39, 113<sup>th</sup> Congress).

At the beginning of this 16-day funding gap, more than 800,000 executive branch employees were reportedly furloughed.<sup>27</sup> This number was reduced during the course of the funding gap due to the implementation of P.L. 113-39 and other redeterminations of whether certain employees

<sup>21</sup> The Department of Transportation and Related Agencies Appropriations Act, H.R. 2002 (P.L. 104-50), was enacted on November 15, 1995. The Treasury, Postal Service, and General Government Appropriations Act, H.R. 2020 (P.L. 104-52), was enacted on November 19, 1995. The Legislative Branch Appropriations Act, H.R. 2492 (P.L. 104-53), was enacted on November 19, 1995. The Department of Defense Appropriations Act, H.R. 2126 (P.L. 104-61), was enacted on December 1, 1995. The Department of Interior and Related Agencies Appropriations Act, H.R. 1977 (104<sup>th</sup> Cong.), was vetoed on December 18, 1995. The Department of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, H.R. 2099 (104<sup>th</sup> Cong.), was vetoed on December 18, 1995. The Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, H.R. 2076 (104<sup>th</sup> Cong.), was vetoed on December 19, 1995.

<sup>22</sup> As of the end of the day on December 15, 1995, the six regular appropriations bills that had yet to be enacted were the (1) Department of Interior and Related Agencies Appropriations Act; (2) Department of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act; (3) Departments of Commerce, Justice, State, the Judiciary, and Related Agencies Appropriations Act; (4) Foreign Operations, Export Financing, and Related Programs Appropriations Act; (5) Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act; and (6) District of Columbia Appropriations Act.

<sup>23</sup> For further information on the effects of the second FY1996 funding gap, see Dan Moran and Stephen Barr, "When Shutdown Hit Home Ports, GOP Cutters Trimmed Their Sails," *Washington Post*, January 8, 1996.

<sup>24</sup> H.J.Res. 136 (P.L. 104-69).

<sup>25</sup> H.J.Res. 134 (P.L. 104-94). H.R. 1358 (P.L. 104-91) and H.R. 1643 (P.L. 104-92) were also enacted on January 6. These two CRs provided budget authority for some federal government activities until the end of FY1996.

<sup>26</sup> For a summary of the second FY1996 funding gap and government shutdown, see *Congressional Quarterly Almanac*, "Overview: Government Shuts down Twice Due to Lack of Funding," 104<sup>th</sup> Cong., 1<sup>st</sup> sess. (1995), vol. LI, pp. 11-3 through 11-6; *CQ Weekly*, "Funding Expires Again in Budget Stalemate," December 23, 1995; *CQ Today*, "Congress Clears Bills to Reopen Government," January 8, 1996.

<sup>27</sup> See, for example, *Wall Street Journal*, "More Than 800,000 Federal Workers Are Furloughed," October 1, 2013. Estimates in this and other media reports were based upon the totals provided by agencies in their contingency plans, which are available at <http://www.whitehouse.gov/omb/contingency-plans>. These totals do not include legislative or judicial branch employees.

were excepted from furlough.<sup>28</sup> Prior to the resolution of the funding gap, congressional action on appropriations was generally limited to a number of narrow CRs to provide funding for certain programs or classes of individuals.<sup>29</sup> Of these, only the Department of Defense Survivor Benefits Continuing Appropriations Resolution of 2014 (H.J.Res. 91; P.L. 113-44) was enacted into law.

On October 16, 2013, the Senate passed H.R. 2775, which had been previously passed by the House on September 12, with an amendment. This amendment, in part, provided interim continuing appropriations for the previous year's programs and activities through January 15, 2014. Later that same day, the House agreed to the Senate amendment to H.R. 2775. The CR was signed into law on October 17, 2013 (P.L. 113-46), thus ending the funding gap.

## FY2018

At the beginning of FY2018, none of the 12 regular appropriations bills had been enacted, so the federal government operated under a series of CRs. The first, P.L. 115-56, provided government-wide funding through December 8, 2017. The second, P.L. 115-90, extended funding through December 22, and the third, P.L. 115-96, extended it through January 19, 2018. In the absence of agreement on legislation that would further extend the period of these CRs, however, a funding gap began with the expiration of P.L. 115-96 at midnight on January 19. A furlough of federal personnel began over the weekend and continued through Monday of the next week, ending with enactment of a fourth CR, P.L. 115-120, on January 22.

The Congressional Research Service (CRS) is a federal legislative branch agency, housed inside the Library of Congress, charged with providing the United States Congress non-partisan advice on issues that may come before Congress.

EveryCRSReport.com republishes CRS reports that are available to all Congressional staff. The reports are not classified, and Members of Congress routinely make individual reports available to the public.

Prior to our republication, we redacted names, phone numbers and email addresses of analysts who produced the reports. We also added this page to the report. We have not intentionally made any other changes to any report published on EveryCRSReport.com.

CRS reports, as a work of the United States government, are not subject to copyright protection in the United States. Any CRS report may be reproduced and distributed in its entirety without permission from CRS. However, as a CRS report may include copyrighted images or material from a third party, you may need to obtain permission of the copyright holder if you wish to copy or otherwise use copyrighted material.

Information in a CRS report should not be relied upon for purposes other than public understanding of information that has been provided by CRS to members of Congress in connection with CRS' institutional role.

EveryCRSReport.com is not a government website and is not affiliated with CRS. We do not claim copyright on any CRS report we have republished.
