Summary

The Patient Protection and Affordable Care Act (ACA; P.L. 111-148, as amended) had numerous provisions affecting private health insurance and public health coverage programs. This report provides resources to help congressional staff respond to constituents' frequently asked questions (FAQs) about the ACA. It lists selected resources regarding consumers, employers, and other stakeholders, with a focus on federal sources. It also lists Congressional Research Service (CRS) reports that summarize the ACA's provisions.

This report begins with links to contacts for constituents' specific questions on insurance coverage (such as state insurance departments and the U.S. Department of Labor's consumer hotline for questions on employer-based coverage) and contacts for questions about HealthCare.gov and ACA tax provisions. It also lists sources for congressional staff to contact federal agencies with ACA questions.

The report then provides basic consumer sources, including a glossary of health coverage terms and sources for obtaining the law's full text. The next sections focus on the individual mandate, private health insurance, exchanges, and employer-sponsored coverage. These are followed by information on public health care programs, such as Medicaid, the State Children's Health Insurance Program (CHIP), and Medicare. The report also provides sources on the ACA's provisions on specific populations: women's health care, Indian health care, veterans' and military health care, and the treatment of noncitizens under the ACA. These are followed by sources on behavioral health (mental health and substance use disorders); public health, workforce, and quality; and state innovation waivers. Finally, the report lists sources on taxes, congressional efforts to repeal or amend the ACA, ACA agency audits and investigations, cost estimates and spending, insurance coverage statistics, and legal and regulatory issues.

This list is not a comprehensive directory of all resources on the ACA but rather is intended to address some questions that may arise frequently.

<https://aspe.hhs.gov/health-coverage-research>

ACA-related research published during President Trump's Administration (that is, since January 20, 2017), including the following analysis of premiums:

- *Health Plan Choice and Premiums in the 2018 Federal Health Insurance Exchange* (October 30, 2017), <https://aspe.hhs.gov/pdf-report/health-plan-choice-and-premiums-2018-federal-health-insurance-exchange>.

<https://aspe.hhs.gov/health-insurance-marketplace-cost-sharing-reduction-subsidies-zip-code-and-county-2016>

Spreadsheet with county and zip code (but not state) data on the number of consumers with cost-sharing reduction (CSR) subsidies, and the average advanced CSR payment by CSR actuarial value (“AV”). Actuarial value is a measure of a plan’s generosity, the estimated insurer’s share of medical expenses for a standard population and a set of allowed charges. For example, consumers with CSR AV 94% would expect to pay, on average, an estimated 6% of their medical expenses out-of-pocket. Consumers may qualify for particular CSR AV levels depending on their income. Some spreadsheet data are suppressed for privacy. For background on CSRs and actuarial value, see CRS Report R44425, *Health Insurance Premium Tax Credits and Cost-Sharing Subsidies*.
