www.crs.gov

R44027

Summary

USAspending.gov, available at <http://www.USAspending.gov>, is a government source for data on federal awards by state, congressional district (CD), county, city, and zip code. The awards data in USAspending.gov are provided by federal agencies and represent contracts, grants, loans, and other forms of financial assistance. USAspending.gov also provides tools for examining the broader picture of federal spending obligations within the categories of budget function, agency, and object class.

Using USAspending.gov to locate and compile accurate data on federal awards can be challenging due, in part, to continuing data quality issues that have been identified by the U.S. Government Accountability Office (GAO). Users of USAspending.gov need to be aware that while search results may be useful for informing consideration of certain questions, these results may be incomplete or contain inaccuracies.

USAspending.gov was created under P.L. 109-282, the Federal Funding Accountability and Transparency Act of 2006 (FFATA), and is being enhanced under requirements in P.L. 113-101, the Digital Accountability and Transparency Act of 2014 (DATA Act).

Other federal awards data sources reviewed in this report include the following:

- Federal Procurement Data System (FPDS);
- Census Federal Audit Clearinghouse;
- U.S. Budget: Aid to State and Local Governments;
- Census Federal Aid to States (FAS) and Consolidated Federal Funds Report (CFFR); and
- Additional federal grant awards databases, including sources tracking medical, scientific, and technical research.

----------------------------------	----

Introduction

USAspending.gov, available to the public at <http://www.usaspending.gov>, is a government source for data on federal grants, contracts, loans, and other financial assistance. The website enables searching of federal awards from FY2008 to the present by state, congressional district (CD), county, city, and zip code. Grant awards include money the federal government commits for projects in states, local jurisdictions, regions, territories, and tribal reservations, as well as payments for eligible needs to help individuals and families. Contract awards refer to bids and agreements the federal government makes for specific goods and services.

USAspending.gov also provides tools for examining the broader picture of federal spending obligations within the categories of budget function, agency, and object class. *Budget function* refers to the major purpose that the spending serves, such as Social Security, Medicare, and national defense. *Object class* refers to the type of item or service purchased by the federal government, such as grants, contracts, and personnel compensation and benefits.

For Congress, the ability to more accurately track these federal awards is necessary to better inform oversight of federal spending. In recent years, Congress has passed laws to create and improve systems used by government departments and agencies to report and input data on federal awards for contracts, grants, and other financial assistance:

- P.L. 109-282, the Federal Funding Accountability and Transparency Act of 2006 (FFATA), called for the creation of a database that became USAspending.gov. The publicly available database replaced data collection and annual reports issued for more than 30 years in the Census Bureau's Federal Aid to States (FAS) report and Consolidated Federal Funds Report (CFFR).¹
- P.L. 111-5, the American Recovery and Reinvestment Act of 2009 (ARRA), required federal agencies awarding stimulus funding and state and local recipients of such funding to report spending back to the ARRA Recovery Board; this reporting also became a part of USAspending.gov.
- P.L. 113-101, the Digital Accountability and Transparency Act of 2014 (DATA Act), transferred responsibility for USAspending.gov from the Office of Management and Budget (OMB) to the Department of the Treasury and required that expenditures data be added to the federal agency obligations data already included in the USAspending.gov database. The DATA Act also required Treasury and OMB to develop government-wide data standardization to facilitate consolidating, automating, and simplifying reports on grant awards and contracts and to improve USAspending.gov underreporting and inconsistencies.

However, finding accurate and complete data on federal funds received by states and congressional districts continues to be challenging due to ongoing data quality issues originally identified by the Government Accountability Office (GAO) in June 2014.² A subsequent GAO report released in November 2019 assessed the quality of data reported by 96 agencies for quarter

¹ Congress subsequently defunded the Census office that issued these reports in FY2012, with FY2010 Federal Aid to States (FAS) report and Consolidated Federal Funds Report (CFFR) being the last reports issued.

² The U.S. Government Accountability Office (GAO) "estimates with 95 percent confidence that between 2 percent and 7 percent of the awards contained information that was fully consistent with agencies' records for all 21 data elements examined." See GAO Highlights, *Data Transparency: Oversight Needed to Address Underreporting and Inconsistencies on Federal Award Website*, GAO-14-476, June 2014, at <http://www.gao.gov/products/GAO-14-476>.

four of FY2018 and compared these data with those submitted for quarter two of FY2017. GAO identified improvements in overall data quality, but challenges remain for completeness, accuracy, use of data standards, disclosure of data limitations, and overall data governance.³ Users of USAspending.gov should be aware that although search results may be useful for informing consideration of certain questions, these results may also be incomplete or contain inaccuracies.

USAspending.gov Background

Origins

FFATA required OMB to create a public database of all federal funds awarded to the final recipient level. The DATA Act followed eight years later and required the Department of the Treasury and OMB to develop government-wide data standardization to consolidate, automate, and simplify reports on grant awards and contracts to improve underreporting and inconsistencies as identified by GAO.⁴ These requirements in the DATA Act were intended to expand on the transparency efforts originally mandated by FFATA, specifically by

- disclosing direct agency expenditures and linking federal contract, loan, and grant spending information to federal agency programs;
- establishing government-wide data standards for financial data and providing consistent, reliable, and searchable data that are displayed accurately;
- simplifying reporting, streamlining reporting requirements, and reducing compliance costs, while improving transparency; and
- improving the quality of data submitted to USAspending.gov by holding agencies accountable.⁵

In addition, no later than four years after enactment (by spring 2018), Treasury and OMB must ensure that all information published on USAspending.gov conforms to government-wide data standards. OMB is also required to issue guidance so that all agencies can follow government-wide data standards when reporting on grantee and contractor awards.

Types and Timing of Data

The data in USAspending.gov are submitted by federal agencies and represent awards, including grants, contracts, loans, and other financial assistance (e.g., Medicare benefits, food stamps, unemployment benefits). USAspending.gov does not include data on actual spending by recipients. Federal agencies are required to submit reports on awards transactions within 30 days after transactions are implemented. There may be a longer lag-time with data from the Department of Defense, generally 90 days.

³ “GAO found that data accuracy for Q4 FY2018—measured as consistency between reported data and agency source records or other authoritative sources and applicable laws and reporting standards—improved for both budgetary and award transactions. GAO estimates with 95 percent confidence that between 84 and 96 percent of the budgetary transactions and between 24 and 34 percent of the award transactions were fully consistent for all applicable data elements. In Q2 FY2017, GAO estimated that 56 to 75 percent of budget transactions and 0 to 1 percent of award transactions were fully consistent.” See GAO Highlights, *DATA Act: Quality of Data Submissions Has Improved but Further Action Is Needed to Disclose Known Data Limitations*, GAO-20-75, November 8, 2019, at <https://www.gao.gov/products/GAO-20-75>.

⁴ GAO-14-476 (2014).

⁵ USAspending.gov “About” page at <https://www.usaspending.gov/#/about>.

Site Features

USAspending.gov enables congressional staff and the public to search back to FY2008 for prime and subaward data by state, congressional district, and other jurisdictions. The site includes the following features:

- **Advanced Award Search** of prime and subaward data back to FY2008 allows filtering by award type, awarding agency, recipient, country, state, zip, county, city, CD, and other criteria. To identify where money is being spent, search on *Place of Performance* versus *Recipient Location*. Search results include awards that are active during the selected fiscal year, regardless of when the award initially started. Details on an individual award, including transaction history and subawards, may be viewed by clicking on the *Award ID*. The results list displayed can be downloaded at either the award or transaction level, along with additional details about each award, into a spreadsheet. The advanced search is continually being developed and improved, so new features may have become available since the publication of this report.
- **Spending Explorer** enables “big picture” browsing of federal spending obligations and offers interactive data visualization by budget function, agency, and object class. With this tool, users can see the budget function breakdown by categories, such as Social Security, Medicare, and national defense; obligated amounts by agency; and obligations by object class categories, such as grants, contracts, and personnel compensation and benefits.
- **Profiles Tab** includes the following subtabs:
 - **Agencies** features data on each agency’s total budgetary resources, a dollar amount that has been obligated (or committed to be spent) against those budgetary resources, the breakdown of these obligations by object class, and the federal accounts through which the obligations are administered.
 - **Federal Accounts** features a list of nearly 2,000 federal accounts through which users can track spending obligations. Data in this section are presented visually through graphs and other infographics.
 - **States** provides tables, interactive maps, and graphs showing a breakdown of a total awarded amount to each state back to FY2008. Breakdowns include totals by award type, county, and CD. Profiles also include top five rankings in various categories, such as awarding agencies and recipients.
 - **Recipients** contains profiles of entities that have received federal awards in the form of contracts, grants, loans, or other financial assistance back to FY2008. Profiles include data on award trends over time and top five rankings in various categories.
- **Download Center** allows bulk exporting of large, pregenerated award data sets by agency, award type, and fiscal year through the *Award Data Archive*. The custom download pages—*Custom Award Data* and *Custom Account Data* (which covers all spending data, including nonaward spending)—also allow downloading of large data sets but provide additional filtering options.

Issues with Tracking Awards

In addition to the data quality problems in USAspending.gov mentioned earlier,⁶ the following issues should be taken into consideration.

Recipient Location Versus Place of Performance

As recipients of federal grant funding, state and local governments may provide services directly to beneficiaries. Alternatively, a state may act as a pass-through, redistributing federal grant funding to localities using a formula or a competitive process⁷ through subgrants or subcontracts. Both federal grant and procurement awards thus may have a *where awarded* vs. *where spent* component that is not fully identified in grant or procurement records.

For example, most federal grant funding is awarded to states, which then subaward or subcontract to eligible recipients elsewhere in the state (see **Figure 1**). So, a project's place of performance (where the award is spent) may therefore differ from the initial recipient location (where the funding is awarded).

Figure 1. Examples of Federal Spending Streams

Recipients at Multiple Levels

Sources: Jerry Brito, George Washington University, 2009; and the Congressional Research Service, 2016.

In addition, a funding award may pass through multiple different jurisdictions (in different CDs) before reaching the final place of performance. For example

- Federal grants may go first to the state (the state capital, in one CD), then be distributed to a city or county government (in one or more additional CDs), which then may pass the funds to an organization that spends the money in other CDs. A CD in which a state capital is located may appear to receive more federal funds than other CDs in the state, but searching USAspending.gov data by place

⁶ For examples of the data quality problems GAO has identified in USAspending.gov, see the GAO website at <http://www.gao.gov>, particularly the search term *USAspending.gov* and the header *Data Transparency*.

⁷ See CRS Report R42769, *Federal Grants-in-Aid Administration: A Primer*, by Natalie Keegan.

of performance rather than recipient location would identify data by the project location.

- Procurement awards may be given to a corporation headquartered in one state (and one CD), but the company may spend the money manufacturing the purchased product at one or more of its manufacturing facilities in one or more additional states (and CDs).

Congressional District Data

The USAspending.gov advanced award search enables filtering by state and congressional district. When searching for CD data, note the following:

- For CD data, search USAspending.gov by place of performance rather than recipient location to identify awards by project location (see “Recipient Location Versus Place of Performance,” above).
- Use caution when comparing CD data over time. During decennial redistricting, CD borders and numbers may change, but past data are not revised to account for redistricting. For example, comparing data from the 115th or 114th Congress with earlier data must take into account new district borders created by the 2010 decennial redistricting. Other geographic search options, such as by zip code or county, could be used to track funds within a CD, although borders may not exactly align.
- CDs that include state capitals will appear to receive more federal funds because states are prime recipients of federal block and formula grants. State Administering Agencies (SAAs) then pass through or subaward federal funding for projects throughout the state.

Other Data Sources

Federal Procurement Data System

The General Services Administration (GSA) maintains the Federal Procurement Data System–Next Generation (FPDS–NG) at https://www.fpds.gov/fpdsng_cms/index.php/en/, which contains statistical information on federal contracts. The FPDS–NG

- serves as the source of USAspending.gov contracts data;
- makes available Federal Procurement Reports from FY2000 forward on its website;
- includes data on contracts of more than \$25,000 and summary data of procurements less than \$25,000; and
- provides selected search capabilities by state (including aggregate county statistics), contractor name, and product or service category.

For more refined searching, such as by CD, the FPDS Help Desk can guide congressional staff and the public through filtering for data needed (called *ad hoc reports*).

Federal Audit Clearinghouse

States, local governments, and nonprofits (including universities) spending \$750,000 or more⁸ in federal grants during a fiscal year are required to submit an audit detailing expenditures. Data from the audits are posted on the Census Bureau’s Federal Audit Clearinghouse site, at <https://harvester.census.gov/facweb/Default.aspx>. No printed documents are produced.

- Because the audit data are for the fiscal year of the filing agency or organization (which may differ from the federal fiscal year), they are not comparable with data from any other federal source.
- Searches may be conducted by organization or institution, *Catalog of Federal Domestic Assistance* (CFDA) program number, and geographic location (by city or state but not by congressional district). See search options at <https://harvester.census.gov/facdissem/Main.aspx>.

U.S. Budget: Aid to State and Local Governments

The *Analytical Perspectives* volume of the President’s budget covers various topics, including “Aid to State and Local Governments” (Chapter 17 in the FY2020 report).⁹ Federal grants-in-aid to state and local governments, U.S. territories, and American Indian tribal governments are intended to support government operations or the provision of services to the public. Grants are most often awarded as direct cash assistance, but federal grants-in-aid also can include payments for grants-in-kind—nonmonetary aid such as commodities purchased for the National School Lunch Program. Federal revenues shared with state and local governments also are considered grants-in-aid.¹⁰

The FY2020 budget proposes \$751 billion in outlays for aid to state and local governments, an increase of less than one percent from FY2019.¹¹ Individual program tables with state-by-state obligation data for grants-in-aid programs to state and local governments may be found on the OMB website. Tables 17-3 through 17-39 show state-by-state obligations for 35 federal grants-in-aid programs.¹²

Federal grants generally fall into one of two broad categories—categorical grants or block grants, depending on the requirements of the grant program. In addition, grants may be characterized by how the funding is awarded, such as by formula, by project, or by matching state and local funds. As recipients of federal grant funding, state and local governments may provide services directly to beneficiaries or states may act as a pass-through, disbursing grant funding to localities using a formula or a competitive process.¹³ As discussed above, this pass-through, or subawarding, at the state level makes tracking federally originated funds to the final recipient a challenge.

⁸ For fiscal years prior to December 26, 2014, the threshold was \$500,000 (<https://harvester.census.gov/facweb/FAQs.aspx>).

⁹ OMB, “Chapter 17: Aid to State and Local Governments,” *Analytical Perspectives: Budget of the U.S. Government, Fiscal Year 2020*, at <https://www.whitehouse.gov/omb/analytical-perspectives/>. Note that Chapter 17 is variously numbered in earlier budgets.

¹⁰ *Ibid.*, p. 231.

¹¹ *Ibid.*, p. 231.

¹³ See CRS Report R42769, *Federal Grants-in-Aid Administration: A Primer*, by Natalie Keegan.

Federal Aid to States and the Consolidated Federal Funds Report

These Census Bureau reports, published from FY1983 to FY2010 and available at <https://www.census.gov/govs/pubs/title.html>, were the federal government's primary documents summarizing the geographic distribution of federal monies to states and counties, whether grants, contracts, or appropriations. The FY2010 Federal Aid to States (FAS) and Consolidated Federal Funds Report (CFFR) were the last reports issued due to the termination of the Census Bureau's Federal Financial Statistics program. Federal obligations data continue to be posted on USAspending.gov, now the official source collecting federal awards data.

- FAS covered federal government expenditures to state and local governments and presented figures to the state level by program area and agency.
- CFFR included payments to state and local governments as well as to nongovernmental recipients. Dollar amounts reported represented either actual expenditures or obligations (see CFFR introduction and source notes for each table or graph).
- CFFR provided data to the state and county level for grants, salaries and wages, procurement contracts, direct payments for individuals, other direct payments, direct loans, guaranteed or insured loans, and insurance.
- Although CFFR indicated congressional districts (one or more) for each county, it did not give separate data by CD.

Selected Agency Grant Awards Databases and Information

USAspending.gov collects brief data on all federal grants and contracts awarded. However, some agencies, in particular those awarding research grants, also continue to post information on their own websites.

Department of Agriculture (USDA)

- Current Research Information System
<https://cris.nifa.usda.gov/>
Ongoing agricultural, food science, human nutrition, and forestry research, education and extension activities, with a focus on the National Institute of Food and Agriculture (NIFA) grant programs. Projects are conducted or sponsored by USDA research agencies, state agricultural experiment stations, land-grant universities, other cooperating state institutions, and participants in NIFA-administered grant programs, including Small Business Innovation Research and the Agriculture and Food Research Initiative.

Department of Education (ED)

- Institute of Education Sciences, Funded Research Grants and Contracts
<http://ies.ed.gov/funding/grantsearch/index.asp>

Department of Health and Human Services (HHS)

- Tracking Accountability in Government Grants System (TAGGS)
<http://taggs.hhs.gov/AdvancedSearch.cfm>
Database of awards from HHS and its subsidiaries.
- National Institutes of Health (NIH) Research Portfolio Online Reporting Tools RePORTER

<http://projectreporter.nih.gov/reporter.cfm>

Includes projects funded by the NIH, Administration for Children and Families, Agency for Health Care Research and Quality, Centers for Disease Control and Prevention, Food and Drug Administration, and the U.S. Department of Veterans Affairs.

- National Library of Medicine (NLM)
<https://hsrproject.nlm.nih.gov/>
Database of ongoing health services research and public health projects, whether government, corporate, or private.

Department of Homeland Security (DHS)

- Federal Emergency Management Agency (FEMA), Public Assistance Grant Awards Activity
2013-2016: <https://www.fema.gov/media-library/assets/documents/30731>
2017-2019: <https://www.fema.gov/media-library/assets/documents/128200>
Daily activity of Public Assistance Grant Awards, including FEMA region, state, disaster declaration number, event description, mission assigned agency, assistance requested, obligated federal dollars, and date of obligation.

Department of Justice (DOJ)

- Office of Justice Programs (OJP), OJP Grant Award Data
<http://ojp.gov/funding/Explore/OJPAwardData.htm>

Department of Labor (DOL)

- Employment and Training Administration (ETA), Grants Awarded
http://www.doleta.gov/grants/grants_awarded.cfm

Environmental Protection Agency (EPA)

- Grant Awards Database
https://yosemite.epa.gov/oarm/igms_egf.nsf/HomePage?ReadForm
Contains a summary record for all nonconstruction EPA grants awarded in the last 10 years plus grants that were awarded before that time that are still open.
- EPA Active Contracts Listing
<https://www.epa.gov/contracts/epa-active-contracts-listing>
Lists of all currently active EPA Contracts. The listing is available by Contract Number and by Vendor Name.

Institute of Museum and Library Services (IMLS)

- IMLS Awarded Grants
<http://www.imls.gov/recipients/grantsearch.aspx>

National Endowment for the Arts (NEA)

- Grant Search
<https://apps.nea.gov/grantsearch/>
NEA grants awarded since 1998.

National Endowment for the Humanities (NEH)

- Funded Projects
<https://securegrants.neh.gov/publicquery/main.aspx>

National Science Foundation (NSF)

- NSF Awards
<http://www.nsf.gov/awardsearch/>
Includes data from 1989 to the present.
- Research.gov is a partnership of federal research-oriented grant-making agencies led by the NSF
http://www.research.gov/research-portal/appmanager/base/desktop?_nfpb=true&_eventName=viewQuickSearchFormEvent_so_rsr&wtlink=RSR_Search_homepage.

Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR)

- SBIR and STTR Awards
<https://www.sbir.gov/sbirsearch/award/all>
The SBIR/STTR program’s mission is to stimulate technology innovation by strengthening the role of innovative small business in federal research and development. Currently, 11 federal agencies participate in the program: the Departments of Agriculture, Commerce (National Institute of Standards and Technology and the National Oceanic and Atmospheric Administration), Defense, Education, Energy, Health and Human Services, Homeland Security, and Transportation, and the Environmental Protection Agency, National Aeronautics and Space Administration, and National Science Foundation.

Transportation Research Board (TRB)

- Research in Progress
<http://rip.trb.org/>
View projects by subject, individuals, or organizations.
