

Inflation Reduction Act of 2022: U.S. Environmental Protection Agency and Selected Other Environmental Provisions

August 12, 2022

On August 7, 2022, the Senate passed H.R. 5376, a budget reconciliation measure commonly referred to as the "Inflation Reduction Act of 2022" (IRA). This Insight identifies IRA provisions that would be implemented by the U.S. Environmental Protection Agency (EPA) and selected other environmental policy-related provisions. These provisions, which are found in IRA Title VI–Committee on Environment and Public Works and a Superfund tax provision in Title I, Subtitle D, span a range of EPA program areas and environmental and climate change topics, including air quality, enforcement, greenhouse gas emissions, environmental reviews, environmental justice, environmental data, among others. In addition, the IRA includes a provision related to environmental data collection for the Council on Environmental Quality (CEQ).

Table 1 lists these EPA and CEQ provisions and provides the proposed FY2022 appropriations in the Senate-passed bill. The table does not reflect other IRA provisions related to environment, natural resources, or climate policy issues that would be implemented by other federal departments or agencies, such as the U.S. Department of Energy, U.S. Department of the Interior, U.S. Department of Agriculture, National Oceanic and Atmospheric Administration, or others.

Table 2 lists the IRA provision on reinstatement of the Superfund petroleum excise tax, which is a revenue provision.
