R46293

Introduction

Earth Day is an annual event to raise awareness about environmental issues. First held on April 22, 1970, it is celebrated each year on April 22.

This fact sheet assists congressional offices with work related to Earth Day. It contains historical information, links to legislation, sample speeches and remarks from the *Congressional Record*, presidential proclamations and statements, and web resources.

History

The first Earth Day was observed on April 22, 1970, after Senator Gaylord Nelson of Wisconsin called for teach-ins on college campuses nationwide to raise awareness of environmental issues. “I am convinced that the same concern the youth of this nation took in changing this country’s priorities on the war in Vietnam and on civil rights can be shown for the problems of the environment,” he told an audience in Seattle, WA, on September 20, 1969.¹

Planning began in Senator Nelson’s office and was handed off to a nonprofit organization, Environmental Teach-In, Inc., staffed by “a group of twentysomething activists.”² Organizers selected April 22, a weekday after the end of winter weather but before the start of final exams, to maximize students’ participation.³ Millions of Americans participated in rallies, teach-ins, speeches, and other locally organized events across the country on Earth Day, attracting significant news coverage.⁴

Senator Nelson initially intended Earth Day to be a one-time event. “I did not plan another Earth Day because it could not be duplicated and there would be no special purpose in attempting it. The objective of Earth Day was fully accomplished,” he wrote in 1971.⁵ Over time, April 22 became an annual celebration of the environment and the environmental movement marked by volunteer work, educational programs, and other events.

Washington, DC, hosted anniversary rallies in 1990, 1995, and 2000. Due to the COVID-19 pandemic, a number of online events marked Earth Day’s 50th anniversary in 2020.⁶

Earth Day is not a federal holiday, though public laws designated Earth Day on March 21, 1975 (P.L. 94-8); April 22, 1990 (P.L. 101-186); and April 22, 1991 (P.L. 102-34). Resolutions introduced in the 92nd Congress (1971-1972) and 93rd Congress (1973-1974) would have designated either April 22, the third Wednesday of April, or March 21 (the vernal equinox) as Earth Day on an annual basis, but no further action was taken.⁷ Legislation introduced in the 106th

⁷ H.Res. 93, H.J.Res. 112, H.J.Res. 134, H.J.Res. 406, and H.J.Res. 418 of the 92nd Cong. and H.Con.Res. 106 of the 93rd Cong.

Congress (1999-2000) would have designated April 22 as Earth Day, but no further action was taken.⁸

The United Nations designated April 22 as International Mother Earth Day in 2009. The United Nations also has designated June 5 as World Environment Day since 1974.

Recent Commemorative Legislation

H.Res. 1166 (2024)—Expressing support for honoring Earth Day, and for other purposes.

H.Res. 315 (2023)—Expressing support for honoring Earth Day, and for other purposes.

H.Res. 1075 (2022)—Expressing support for honoring Earth Day, and for other purposes.

H.Res. 346 (2021)—Expressing support for honoring Earth Day, and for other purposes.

S.Res. 593 (2020)—Recognizing the 50th anniversary of Earth Day and the leadership of its founder, Senator Gaylord Nelson.

H.Res. 932 (2020)—Expressing support for honoring the 50th anniversary of Earth Day, and for other purposes.

H.Res. 330 (2019)—Expressing support for honoring Earth Day, and for other purposes.
