

# FEMA's Building Resilient Infrastructure and Communities (BRIC): Recent Developments

September 17, 2025

On April 4, 2025, a Federal Emergency Management Agency (FEMA) press release indicated that FEMA would be ending a pre-disaster mitigation grant program known as [Building Resilient Infrastructure and Communities](#) (BRIC), generating substantial interest from policymakers and the public. This Insight provides an overview of the BRIC program and a brief summary of developments related to BRIC.

## Overview of BRIC

Pre-disaster mitigation funding is authorized in [Section 203](#) of the [Stafford Act](#). Funding for pre-disaster mitigation changed significantly in the first Trump Administration with the passage of the [Disaster Recovery Reform Act of 2018](#) (DRRA); for each [major disaster declaration](#), the President may set aside from the [Disaster Relief Fund](#) (DRF) an amount equal to 6% of the estimated aggregate amount of funding awarded under [seven sections](#) of the Stafford Act. The large amount of assistance associated with the [COVID-19 major disaster declarations](#) resulted in significant funding to this set-aside. In 2020, FEMA introduced a new program, [BRIC](#), to award the funding set aside under DRRA. The [Infrastructure Investment and Jobs Act](#) (IIJA) [appropriated an additional \\$1 billion for BRIC](#), adding \$200 million for each of FY2022 through FY2026, [in addition to the 6% set-aside](#).

Any state, territory, or tribe (STT) that had a major disaster declaration in the seven years prior to the application start date was eligible to apply for BRIC funding, with all STTs eligible at least through FY2026 due to the [COVID-19 major disaster declarations](#). BRIC funding was available FY2020-FY2023.

Since its creation, BRIC was the largest competitively-awarded pre-disaster mitigation funding source in the country, making over \$4.6 billion available (see **Error! Reference source not found.**) to reduce to reduce future damage before a natural disaster occurs.

**Table I. National BRIC Obligations as of August 29, 2025**

Fiscal Year	Number of Applications Selected for Funding	Number and Percentage of Applications Obligated	Amount Available in NOFO	Amount Requested and Percentage Over-Subscribed	Amount Selected for Funding	Amount Obligated and Percentage of Amount Selected
FY2020	380	354 (93.2%)	\$500 million	\$3.1 billion (620%)	\$487.4 million	\$250.7 million (51.4%)
FY2021	350	327 (93.4%)	\$1 billion	\$3.5 billion (350%)	\$987.2 million	\$364 million (35.9%)
FY2022	496	377 (76.0%)	\$2.295 billion	\$3.6 billion (157%)	\$2.2 billion	\$359.4 million (16.3%)
FY2023	717	186 (25.9%)	\$1 billion	\$5.4 billion (540%)	\$990.6 million	\$38.7 million (3.9%)
<i>FY2020-2024 Total</i>	<i>1,943</i>	<i>1,244 (64.0%)</i>	<i>\$4.795 billion</i>	<i>\$15.665 billion (325%)</i>	<i>\$4.665 billion</i>	<i>\$1 billion (21.5%)</i>

**Note:** It is not possible to tell which projects have started construction.

## BRIC Developments in 2025

On January 6, 2025, FEMA issued a [Notice of Funding Opportunity \(NOFO\) for BRIC FY2024](#) with \$750 million available. The [NOFO was retracted](#) in mid-February.

On April 4, 2025, FEMA issued a press release indicating it was ending the BRIC program, stating that “approximately \$882 million of funding appropriated by Congress in the IIJA will be returned to the Treasury or reappropriated by Congress in the next fiscal year. If grant funds have not been distributed to states, territories, or tribes, funds will immediately be returned to the DRF or Treasury.”

FEMA issued an [advisory update on April 16](#) saying that the BRIC FY2024 NOFO was cancelled and that FEMA will cancel all of the BRIC projects across fiscal years 2020 to 2023 if funds have not been distributed to SLTs, with these guidelines for obligated projects:

- “Recipients will be able to complete fully obligated projects that have started construction and will be able to expend all associated funds. FEMA will also obligate management costs associated with partially or fully obligated projects.
- Fully obligated projects that have not started construction will not be approved and will end.
- For phased projects, FEMA will work with applicants on already obligated projects to determine the best path forward, which may include ending the project after the completion of Phase 1 or at another appropriate stopping point.”

FEMA’s testimony in a [hearing before the House Appropriations Committee](#) on May 7, 2025 stated that FEMA had made available within the DRF funds that were previously set aside for BRIC. The most recent [DRF monthly report](#) shows that the balance for pre-disaster mitigation was \$4.864 billion on March 31, 2025 and \$784 million on July 31, 2025.

There is a factual dispute about whether the cancellation has actually taken place. In mid-July, [19 state Attorneys General and one Governor filed a lawsuit against FEMA](#). On July 25, 2025, the

[declaration of David Richardson](#), Senior Official Performing the Duties of (SOPDO) the Administrator of FEMA, stated that “FEMA has not ended the BRIC program, contrary to publicity otherwise.” On the same day, the Justice Department’s [Opposition to Plaintiff’s Motion](#) stated that “despite Plaintiffs’ allegations to the contrary, Defendants have not terminated BRIC, ... [or] terminated any grant awards, ... [nor] repurposed funds for BRIC or PDM programs.”

On August 5, 2025, a judge [granted the motion for a preliminary injunction](#), “enjoin[ing] [the government] from spending the funds allocated to BRIC for non-BRIC purposes until the court is able to render a final judgment on the merits.”

On September 3, 2025, 19 state Attorneys General and two Governors [filed an amended complaint](#).

## Responses to Developments

Many [Members of Congress](#) and [stakeholders](#) have requested that FEMA reinstate BRIC. The [Save BRIC Act](#), introduced April 14, 2025, would require the President to provide assistance for pre-disaster mitigation. Some House appropriators [expressed disappointment that FEMA unilaterally decided to cancel BRIC](#) rather than implementing reforms, and [adopted an amendment](#) to their [FY2026 Homeland Security bill](#) that would turn BRIC into a mandatory program and place new guardrails on the kinds of projects eligible to receive BRIC grants. The Government Accountability Office (GAO) noted in a [decision published September 15, 2025](#), that it will issue other decisions on FEMA appropriations, including amounts appropriated and set aside for BRIC.
