DOE Energy Efficiency and Renewable Energy (EERE) Appropriations, FY2026

The U.S. Department of Energy's (DOE's) Office of Energy Efficiency and Renewable Energy (EERE) is responsible for renewable energy and end-use energy efficiency technology development. Other activities include issuing grants for home energy efficiency and state energy planning, establishing minimum energy conservation standards for appliances and equipment, and providing technical support.

EERE collaborates with industry, academia, national laboratories, and others to conduct and support research, development, demonstration, and deployment activities. EERE also manages programs that support state and local governments, tribes, and schools. EERE oversees and supports the research and infrastructure of the National Laboratory of the Rockies (formerly National Renewable Energy Laboratory), including its research and development of technologies for renewable energy and energy efficiency.

EERE Appropriations

EERE generally receives funding through the annual Energy and Water Development and Related Agencies (EWD) appropriations bill. The Full-Year Continuing Appropriations and Extensions Act, 2025 (P.L. 119-4) was signed by President Trump on March 15, 2025, providing annual appropriations for FY2025 at the FY2024 level for nearly all accounts, or \$3.460 billion for EERE (Division D of the Consolidated Appropriations Act, 2024; P.L. 118-42).

In addition, EERE received funding through the Infrastructure Investment and Jobs Act (IIJA; P.L. 117-58). IIJA provided a total of \$16.264 billion in additional emergency appropriations for EERE, of which \$1.945 billion is for FY2026 (see **Table 1**).

EERE also received \$17.962 billion in additional funding through P.L. 117-169 (known as the Inflation Reduction Act of 2022, or IRA) in FY2022, expiring at the end of FY2026, FY2027, FY2029, or FY2031, depending on the provision. (Prior year funding; not shown in **Table 1**.)

Executive Branch Actions

For FY2026, the Trump Administration requested \$888 million for EERE, a 74.3% decrease versus FY2025 enacted of \$3.460 billion. The FY2026 request also proposed the creation of a new account of \$15 million, additional to the EERE money, corresponding to activities managed by the Under Secretary for Infrastructure (designated as "S3" in the DOE organization)—a position DOE created in FY2023. The proposed account is the Office of Manufacturing and Energy Supply Chains

(MESOC), whose activities have been funded within the EERE account. The total request for FY2026, including the proposed MESOC account, was \$903 million. Program direction for the EERE and MESOC accounts in the FY2026 budget request comprised 20.4% of the total request.

Overall, DOE's stated goal for EERE funding is to "advance energy dominance." The President's budget request states that EERE will support work to repeal energy efficiency standards. The request includes goals for domestic supply chains of critical materials and components, modernization of the electric grid, promoting affordability and consumer choice in home appliances, research focused on key outcomes related to energy affordability, and other purposes.

The President's budget request for FY2026 proposes appropriation bill language to enact rescissions of \$2.315 billion of the IIJA-appropriated funds allocated to EERE. On November 20, 2025, DOE reorganized EERE's function into a new Office of Critical Minerals and Energy Innovation.

Legislative Actions

The House passed H.R. 4553 (119th Congress), the Energy and Water Development and Related Agencies Appropriations Act, 2026, on September 4, 2025. The bill would fund EERE at \$1.83 billion, keeping MESOC activities within EERE. H.Rept. 119-213 would, per Section 102 of H.R. 4553, allocate monies to the accounts and subaccounts as shown in **Table 1**. Neither the House bill nor the House report acted on the President's request to rescind monies from IIJA. Section 313 of H.R. 4553 would require that \$672.7 million of certain unobligated amounts appropriated in IIJA—Sections 40208, 40314 (not all of which was appropriated to EERE), 40511(a), and 40541—be transferred to nuclear energy programs. The bill does not specify how the transfer is to be apportioned from the IIJA sections.

In the Senate, Title III of S. 3293, the Energy and Water Development and Related Agencies Appropriations Act, 2026, referred to the Committee on Appropriations on December 1, 2025, specifies \$3.287 billion in the EERE account, \$1.059 billion of which is a transfer of amounts previously appropriated in IIJA to carry out Section 40308, Regional Direct Air Capture Hubs.

Section 50402 of the FY2025 budget reconciliation measure (P.L. 119-21) rescinds unobligated balances for State-Based Home Energy Efficiency Contractor Training Grants (IRA §50123, \$200 million).

Table I. Appropriations: EERE Account and DOE-Proposed Accounts, FY2025 and FY2026

(in millions of dollars)

Account (in <i>italics</i>) and Program Activity^a	FY2025 IIJA Enacted^b	FY2025 Annual Enacted	FY2026 IIJA Enacted^b	FY2026 Request	FY2026 House Passed Bill	FY2026 Senate Introduced Bill
<i>EERE, Total</i>	<i>1,945.0</i>	<i>3,460.0</i>	<i>1,945.0</i>	<i>888.0</i>	<i>1,830.0</i>	<i>3,287.0^c</i>

Notes: Columns may not sum due to rounding. EERE = Energy Efficiency and Renewable Energy; SCEP = Office of State and Community Energy Programs; MESC = Office of Manufacturing and Energy Supply Chains; and FEMP = Federal Energy Management Program. See text regarding rescissions of IIJA funding proposed in the President's Budget Request FY2026.

- Subaccount names in bold are as given in H.Rept. 119-213.
- The placement of IIJA funding in the various rows follows DOE's FY2023 Congressional Budget Request, DOE/CF-0184, vol. 4. The total IIJA funding for EERE was not implemented by EERE in every case. See other notes to this table.
- Includes \$1,059 million transferred from amounts previously appropriated in IIJA Division J Title III.
- Of this amount, \$1,200 million of funding is being executed in MESC: Battery Material Processing Grants (IIJA §40207(b)) and Battery Manufacturing and Recycling Grants (IIJA §40207(c)).
- Of this amount, \$100 million is for IIJA §40314 activities, which DOE calls the Clean Hydrogen Manufacturing Recycling RD&D Program, and \$150 million is being executed within MESC in the Advanced Energy Manufacturing and Recycling Grant Program (IIJA §40209).
- Equals the sum of two lines in H.Rept. 119-213: Advanced Materials and Manufacturing Technologies (recommendation of \$117 million) and Industrial Technologies Program (recommendation of \$105 million).
- Equals the sum of two lines in the draft report of the Energy and Water Development Act, 2026: Advanced Materials and Manufacturing Technologies (recommendation of \$220 million) and Industrial Technologies Program (recommendation of \$233 million).
- Of this amount, \$100 million is being executed in SCEP as Energy Efficiency Improvements and Renewable Improvements at Public School Facilities (some of which H.R. 4553 would transfer out of EERE), and a further \$110 million in MESC as (1) Industrial Research and Assessment Centers (IRACs), authorized in Section 457(b)-(h) of the Energy Independence and Security Act of 2007 (EISA; P.L. 110-140); and (2) Implementation Grants for IRACs, authorized in Section 457(i) of EISA—both as amended by IIJA §40521.
- Equals the sum of two lines in the Senate Appropriations Committee draft report for the Energy and Water Development Act, 2026: State Energy Program (recommendation of \$75 million) and Program Direction – State and Community Energy Programs (recommendation of \$15 million).
