Tickets for Live Entertainment Events

Each year, millions of Americans purchase tickets for live entertainment events, such as concerts, theatrical performances, and sporting events. Tickets for live events initially are sold in the primary market, in which firms that provide ticketing services (i.e., ticketers) work directly with venues, promoters, producers, sports teams, and other entities to sell tickets to consumers. Tickets for some live events also are available in the secondary market, in which individuals who purchased tickets in the primary market can resell their tickets instead of using them. Individuals selling tickets in the secondary market can include consumers who cannot or no longer wish to attend the event, as well as ticket brokers who purchase tickets in the primary market with the intention of reselling them in the secondary market for a profit. Tickets in the primary market are often priced to maximize revenue based on supply and anticipated demand, but tickets for some events are purposefully set below this price, which can result in individuals reselling tickets with a significant markup.

For some events, ticketers might provide the ticket price, without fees and taxes, at the beginning of the transaction and in advertisements, noting that fees and taxes may apply. These ticketers may have a competitive advantage if they are perceived to offer tickets at a lower price than a competitor providing the total ticket price, including fees (i.e., all-in pricing). Some ticketers operate in both the primary and secondary markets, and some are vertically integrated (i.e., operate in multiple components of the supply chain) in other ways, such as operating as a ticketer while providing promotion services. Some ticketers have multiyear exclusive contracts with venues, promoters, sport franchises, and other entities in the supply chain.

The federal government has taken action related to tickets for live events. The Better Online Ticket Sales Act of 2016 (BOTS Act; P.L. 114-274) prohibits individuals from circumventing a ticketer’s system to purchase more tickets than permitted by the ticketer. The BOTS Act is enforced by state attorneys general (AGs) and the Federal Trade Commission (FTC). In 2021, the FTC brought its first cases against three ticket brokers for violating the act. On June 15, 2023, President Biden met with several ticketers, including Live Nation Entertainment and SeatGeek; those that did not provide all-in pricing at the time of that meeting made voluntary commitments to do so. On March 31, 2025, President Trump issued an executive order directing the FTC to “rigorously enforce the [BOTS] Act” and instructing other agencies to enforce laws that affect ticketing services.

Federal agencies enforce legislation that is applicable to various industries including event ticketing. For example, the FTC protects consumers by prohibiting “unfair or deceptive acts or practices in or affecting commerce” for certain sectors, and the FTC and the Antitrust Division of the Department of Justice (DOJ) enforce antitrust laws. The FTC has taken action against ticketers for using unfair or deceptive acts or practices. For example, in September 2025, it filed a lawsuit with AGs from seven states against Live Nation Entertainment and its subsidiary Ticketmaster for using deceptive pricing tactics and violating the BOTS Act. The FTC also issued a trade regulation rule in December 2024 that requires businesses offering, displaying, or advertising live-event tickets and short-term lodging to provide all-in pricing. In May 2024, DOJ and AGs from 30 states and the District of Columbia filed a lawsuit against Live Nation Entertainment and Ticketmaster for allegedly violating federal and state antitrust laws and the consent decree the companies agreed to when they merged in 2010, which was modified in 2020. On March 9, 2026, Live Nation announced that it had reached a settlement with DOJ; some state AGs have stated that they will continue the lawsuit.

Some of the bills introduced in the 118th and 119th Congresses include the following provisions: (1) require all-in pricing; (2) implement requirements related to the supply chain; and (3) implement requirements for tickets, such as prohibiting the sale of speculative tickets (i.e., tickets that the seller has not purchased or obtained), prohibiting the sale of nontransferable tickets, and requiring ticketers to provide a full refund for a cancelled or postponed event. In the 119th Congress, the House passed the Transparency in Charges for Key Events Ticketing (TICKET) Act; the Senate Commerce, Science, and Transportation Committee reported an amended Senate version of the TICKET Act. Both the House and Senate versions would require ticketers to provide all-in pricing, certain disclosures, and refunds for some canceled or postponed events; ban the sale of speculative tickets; and require the FTC to provide a report on its enforcement of the BOTS Act.

Each of the provisions in the bills mentioned above might have different effects on event ticketing. As Congress considers whether to pursue legislation related to event ticketing, it might consider whether legislation is needed, whether actions by federal agencies would address some congressional concerns, and what changes Congress might implement in event ticketing—which could range from increasing transparency to implementing broader structural changes to the industry (e.g., requiring tickets to be refundable)—and the potential effects.

Author Information.....	16
-------------------------	----

Each year, millions of Americans purchase tickets for live entertainment events, such as concerts, theatrical performances, and sporting events. In 2024, concerts in the United States had about 122 million attendees, according to the consulting firm Activate.¹ IBISWorld, a market research firm, estimated that revenue from online ticket sales in the United States in 2025 was \$12.5 billion, with \$4.1 billion (32.9%) spent on sporting events; \$3.8 billion (30.2%) on music concerts; and \$1.6 billion (12.8%) on dance, opera, and theatrical performances.²

Congress has held hearings,³ debated bills, and passed legislation related to tickets for live events.⁴ Some Members of Congress have called attention to event ticketing issues, such as rising ticket prices (potentially due to higher ticketing service fees), and efforts to increase consumer protection (e.g., by requiring full price disclosure for tickets from the beginning of a transaction).⁵ Some states have enacted legislation related to event ticketing, including legislation that seeks to address these same or related concerns.⁶

This report provides an overview of event ticketing and actions taken by the federal government related to event ticketing. It also discusses some potential legislative options.

Overview of Event Ticketing and Selected Issues

Tickets for live events initially are sold in the primary market. In the primary market, firms that provide ticketing services (i.e., ticketers) work directly with venues, promoters, producers, sports teams, and other entities to sell tickets to consumers (see **Figure 1**). Most tickets in the primary market are sold online, although some tickets may be available through other outlets, such as a local box office or call center.⁷ Events typically have one primary ticketer selling tickets online. A portion of tickets might be sold through presales (e.g., an artist’s fan club or season tickets), bundled together as a package (e.g., group tickets), or held for certain individuals (e.g., sponsors, media, high-profile guests).⁸ Some live event tickets might be nontransferable—consumers might be required to show the credit or debit card that was used to make the purchase and a matching photo ID to enter the event.⁹

¹ The estimate is based on a survey conducted by Activate from 2023 to 2024 that had 4,004 respondents. Activate, “Number of Concert Attendees in the United States in 2023 and 2024,” Statista, October 2024, <https://www.statista.com/statistics/1624353/number-concert-attendees-united-states/>.

² IBISWorld, *Online Event Ticket Sales in the U.S.*, September 2025, p. 3 (hereinafter IBISWorld, *Online Event Ticket Sales in the U.S.*).

³ For example, see U.S. Congress, Senate Committee on the Judiciary, *That’s the Ticket: Promoting Competition and Protecting Consumers in Live Entertainment*, hearing, 118th Cong., 1st sess., January 24, 2023, S.Hrg. 118-31 (Washington, DC: GPO, 2023), <https://www.govinfo.gov/content/pkg/CHRG-118shrg52250/pdf/CHRG-118shrg52250.pdf> (hereinafter Senate Judiciary hearing, *That’s the Ticket*).

⁴ The 114th Congress passed the Better Online Ticket Sales Act of 2016 (BOTS Act; P.L. 114-274). For more information about the BOTS Act, see “Federal Oversight of Event Ticketing.”

⁵ Senate Judiciary hearing, *That’s the Ticket*.

⁶ For example, some states require the total price of a ticket, including any taxes and fees, to be provided when the price is initially displayed (e.g., Connecticut General Statute §53-289a, Georgia Code Annotated §43-4B-28(a)(3), and New York Arts and Cultural Affairs Law §25.23).

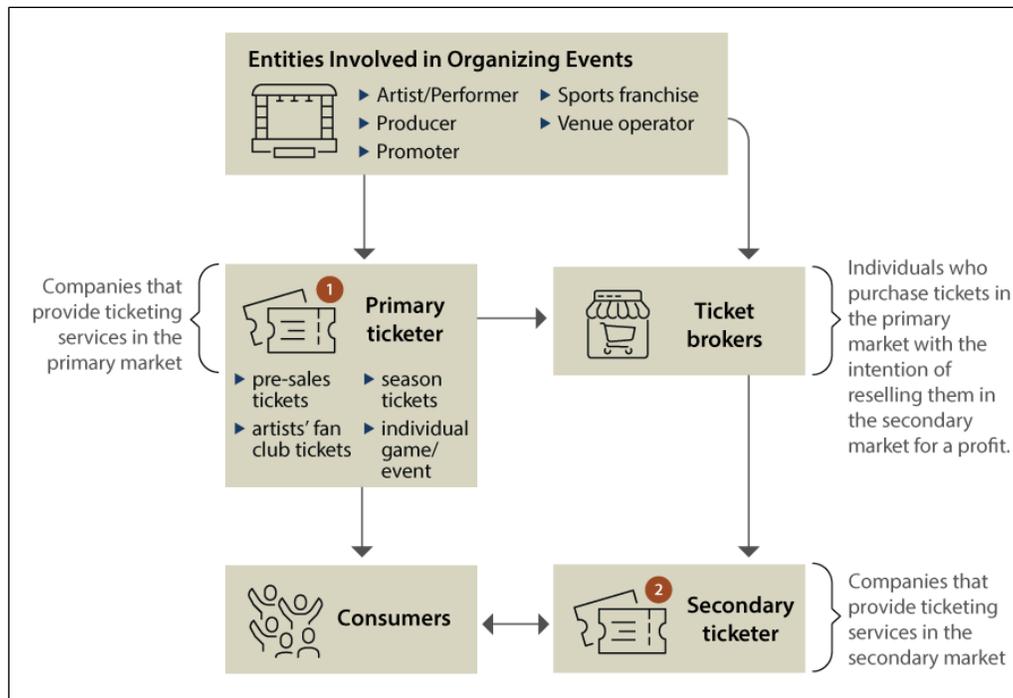

⁷ IBISWorld, *Online Event Ticket Sales in the U.S.*, p. 19; and U.S. Government Accountability Office (GAO), *Event Ticket Sales: Market Characteristics and Consumer Protection Issues*, April 2018, pp. 4-5, <https://www.gao.gov/assets/700/691247.pdf> (hereinafter GAO, *Event Ticket Sales*).

⁸ GAO, *Event Ticket Sales*, pp. 6-11.

⁹ GAO, *Event Ticket Sales*, pp. 37-40.

Tickets for some live events also are available in the secondary market. In the secondary market, individuals who purchased tickets in the primary market can resell their tickets, typically using ticketers that operate in the secondary market. Individuals selling tickets in the secondary market can include consumers who cannot or no longer wish to attend the event, as well as ticket brokers who purchase tickets in the primary market with the intention of reselling them in the secondary market for a profit. Some event organizers provide tickets directly to ticket brokers.¹⁰ Thus, an event can have multiple individuals selling tickets through different secondary ticketers.

Figure I. Ticket Sales for Live Events

Source: CRS using information from U.S. Government Accountability Office (GAO), *Event Ticket Sales: Market Characteristics and Consumer Protection Issues*, April 2018, and other sources.

Ticketers in the primary and secondary markets obtain revenue from fees that are paid by consumers. For example, in 2025, Ticketmaster averaged about \$8.91 in revenue for each fee-bearing ticket sold.¹¹ These fees are often labelled as “service,” “order processing,” “delivery,” or “convenience” fees.¹² The fees are typically a fixed amount or a percentage of the ticket price. In the primary market, some of the revenue obtained from these fees is shared with other entities, such as venues; some fees listed on a ticket provide revenue only for other entities (e.g., venues typically receive the entire “facility” fee).

¹⁰ GAO, *Event Ticket Sales*, p. 11.

¹¹ CRS calculated the average revenue for each fee-bearing ticket sold by dividing the ticketing revenue (\$3,081,166) by the number of fee-bearing tickets sold (345,987); both estimates are reported in thousands. Live Nation Entertainment, Inc., *Form 10-K for the Fiscal Year Ended December 31, 2025*, filed with the U.S. Securities and Exchange Commission (SEC), February 19, 2026, pp. 35, 37 (hereinafter Live Nation, Form 10-K for FY ended December 31, 2025).

¹² For more information about the fees charged, see Ticketmaster, “How Are Ticket Prices and Fees Determined?” Ticketmaster Help Center, <https://help.ticketmaster.com/hc/en-us/articles/9663528775313-How-are-ticket-prices-and-fees-determined>, and AXS, “What Fees Are There When Buying Tickets?,” AXS Help Center, <https://support.axs.com/hc/en-us/articles/201083104-What-fees-are-there-when-buying-tickets>.

Fees can represent a significant portion of the final ticket price. A 2018 study found that the fees for 31 events across five primary ticketers ranged from 13% to 58% of the base ticket price, with an average of 27%, and that fees for 11 secondary ticketers ranged from 20% to 56% of the ticket price, with an average of 31%.¹³ A 2016 study found that Ticketmaster, TicketWeb,¹⁴ and Tickets.com set fees that, on average, were about 21% of the base ticket price (or almost \$8) at 150 New York venues.¹⁵

Policymakers and commentators have raised concerns about the transparency of the total ticket price, among other topics.¹⁶ For some events, ticketers provide the ticket price without fees and taxes at the beginning of the transaction and in advertisements, noting that fees and taxes may apply. These ticketers may have a competitive advantage if they are perceived to offer tickets at a lower price than a competitor providing the total ticket price, including fees and taxes (i.e., all-in pricing).¹⁷ Some ticketers allow consumers to adjust settings to view all-in pricing from the beginning of the transaction for certain events,¹⁸ potentially in response to state laws and federal actions, including the Federal Trade Commission's (FTC's) trade regulation rule requiring ticketers to provide all-in pricing (discussed under "Federal Oversight of Event Ticketing"). No federal law currently requires ticketers to provide all-in pricing.

Ticket Pricing

In the primary market, tickets are often priced to maximize revenue based on supply and anticipated demand. Tickets for some events, however, are purposefully underpriced (i.e., set below the market-clearing price).¹⁹ Event organizers might underprice tickets for various reasons, such as to avoid harming the reputation of the artist, to attract fans across income levels, to ensure the event is sold out (to enhance the audience's experience), and to increase revenue from merchandise and concession sales.²⁰ When tickets are underpriced or demand for an event is higher than anticipated, individuals who purchased tickets in the primary market can resell them, at times with a significant markup, for a profit in the secondary market. If demand for an event is lower than anticipated, individuals might resell the tickets at a price lower than the amount they paid in the primary market or might be unable to resell the tickets.

¹³ GAO, *Event Ticket Sales*, pp.16-17.

¹⁴ Ticketmaster acquired TicketWeb in 2000 (see Bruce Orwall, "Ticketmaster Buys TicketWeb in Bid to Diversify Offerings," *Wall Street Journal*, May 30, 2000, <https://www.wsj.com/articles/SB959636314630051866>).

¹⁵ Office of New York State Attorney General Eric T. Schneiderman, *Obstructed View: What's Blocking New Yorkers from Getting Tickets*, January 2016, p. 29, https://ag.ny.gov/sites/default/files/reports/Ticket_Sales_Report.pdf (hereinafter NY State AG, *Obstructed View*).

¹⁶ For example, see Senate Judiciary hearing, *That's the Ticket*, and Committee on Investigations and Government Operations, New York State Senate, *Final Investigative Report: Live Event Ticketing Practices*, May 18, 2021 (hereinafter NY State Senate, *Final Investigative Report*).

¹⁷ GAO, *Event Ticket Sales*, pp. 42-45, and Hannah Karp, "StubHub Sings the Blues After Shifting Fees," *Wall Street Journal*, updated March 26, 2014, <https://www.wsj.com/articles/SB10001424052702303949704579459902559659002>. Some definitions of *all-in pricing* include taxes, while others do not. In this report, references to all-in pricing do not include taxes, unless noted otherwise.

¹⁸ For example, see Editorial Staff, "We're All In: How All In Prices Make Buying Tickets Easier," Ticketmaster, May 8, 2025, <https://blog.ticketmaster.com/all-in-pricing-explained/>; and SeatGeek, "Other FAQs: Does SeatGeek Charge a Fee to Buy Tickets?," <https://support.seatgeek.com/hc/en-us/articles/360036685293-Does-SeatGeek-charge-a-fee-to-buy-tickets>.

¹⁹ The *market-clearing price* is the price at which the number of tickets available for sale equals the number of tickets consumers are willing to buy.

²⁰ GAO, *Event Ticket Sales*, p. 8.

Some ticketers offer pricing tools that enable tickets for certain events to be sold using *dynamic pricing*, the adjustment of prices based on real-time changes in supply and demand. For example, SeatGeek allows individuals in the secondary market to resell tickets for certain events using a Smart Pricing feature that actively reprices tickets up to once every five minutes.²¹ Studies have found that when ticket prices are set closer to the market-clearing price in the primary market, the price differential between the primary and the secondary market is smaller.²² The use of dynamic pricing, particularly in the primary market, can result in criticism from consumers. For example, FIFA faced criticism for reportedly using dynamic pricing for the 2026 World Cup.²³

The range of prices may be more constrained in the primary market than in the secondary market, even when dynamic pricing is used. Similar to the motivation for underpricing tickets, an artist, sports team, or performer might be concerned about longer-term reputational harms if the ticket is priced too high in the primary market, even if that price is the market-clearing level.²⁴ These concerns can discourage the use of dynamic pricing.²⁵ There also may be an incentive to maintain ticket prices above a certain threshold in the primary market. For example, sports teams might want to ensure that the ticket price for an individual game remains above the season ticket price per game.²⁶ Additionally, consumers might see more variation in prices in the secondary market because of differences across secondary ticketers, such as the fees they charge and pricing tools they offer.

Vertical Integration and Contracts

Some ticketers operate in both the primary and secondary markets, such as Ticketmaster, SeatGeek, and AXS, a subsidiary of Anschutz Entertainment Group (AEG). Some companies are vertically integrated (i.e., operate in multiple components of the supply chain) in other ways, such as operating as a ticketer while providing promotion services for artists or owning a sports franchise. These ticketers may be able to rely on multiple sources of revenue. For example,

²¹ SeatGeek, “Other FAQs: What Is Smart Pricing?,” Seat Geek Help Center, <https://support.seatgeek.com/hc/en-us/articles/23259561610515-What-is-Smart-Pricing>.

²² For example, see Eric Budish and Aditya Bhawe, “Primary-Market Auctions for Event Tickets: Eliminating the Rents of ‘Bob the Broker?’,” *American Economic Journal: Microeconomics*, vol. 15, no. 1 (2023), pp. 142-170, <https://doi.org/10.1257/mic.20180230> (hereinafter Budish and Bhawe, “Primary-Market Auctions for Event Tickets”).

²³ For example, see ESPN News Services, “FIFA Slashes Some 2026 World Cup Ticket Prices After Backlash,” ESPN, December 16, 2025, https://www.espn.com/soccer/story/_/id/47325927/fifa-2026-world-cup-ticket-prices-supporter-tier. FIFA states that it applied variable pricing for the 2026 World Cup and did not implement dynamic pricing, as prices were not automatically modified (see FIFA, “How Does FIFA Determine Ticket Prices for the FIFA World Cup 2026?,” updated December 2025, <https://gpcustomersupportfwc2026.tickets.fifa.com/hc/en-gb/articles/30201776314397-10-How-does-FIFA-determine-ticket-prices-for-the-FIFA-World-Cup-2026>). The term *variable pricing* can be used when prices are adjusted in response to changes in supply and demand, but these adjustments do not occur in real-time. As these price adjustments become more frequent, however, the distinction between variable pricing and dynamic pricing can become less clear; some commentators use the terms variable pricing and dynamic pricing interchangeably.

²⁴ John Drea and Andrew Nahlik, “Dynamic Pricing in Major League Baseball Tickets: Issues and Challenges,” *Atlantic Marketing Journal*, vol. 5, no. 3 (2016), pp. 59-70 (hereinafter Drea and Nahlik, “Dynamic Pricing in Major League Baseball Tickets”).

²⁵ For example, see Marco della Cava, “Springsteen Tickets for \$4,000? How Dynamic Pricing Works and How You Can Beat the System,” *USA Today*, August 17, 2022, <https://www.usatoday.com/story/entertainment/music/2022/08/17/springsteen-ticketmaster-dynamic-pricing-infuriates-music-fans/10310415002/>, and Steve Knopper, “Taylor Swift’s Ticket Strategy: Brilliant Business or Slowing Demand?,” *Rolling Stone Magazine*, April 9, 2018, <https://www.rollingstone.com/music/music-news/taylor-swifts-ticket-strategy-brilliant-business-or-slowing-demand-630218/>. A similar argument has been raised for why auction pricing is no longer used (see Budish and Bhawe, “Primary-Market Auctions for Event Tickets”).

²⁶ Drea and Nahlik, “Dynamic Pricing in Major League Baseball Tickets.”

Tickets.com may be able to rely on revenue from other components of MLB Advanced Media, such as advertising revenue from MLB.com and MLB.tv.

Vertically integrated ticketers might have a competitive advantage. A ticketer that operates in both the primary and secondary markets, for example, typically allows consumers who purchase tickets using its platform in the primary market to resell them using the same platform. This might be more convenient for consumers and might decrease the likelihood that consumers will use other secondary ticketers. Similarly, ticketers that own venues or offer promotion services might bundle their services or encourage event organizers that use one of their services to use their other services as well.

Some ticketers have multiyear, exclusive contracts with venues, promoters, sport franchises, and other entities in the supply chain. These contracts often involve a “revenue-sharing agreement,” under which a ticketer provides a percentage of the ticketing fees for an event or a fixed amount for a specified period. Ticketmaster, for example, reported that it generally enters written agreements to provide primary ticketing services, typically for three to five years.²⁷ SeatGeek testified that Ticketmaster has moved to longer exclusive agreements with venues, sometimes as long as 10 years.²⁸ SeatGeek is the official secondary ticketer for MLB,²⁹ reportedly through a revenue-sharing agreement that would provide MLB about \$100 million per year for the next five years; the article states that SeatGeek’s agreements with sports teams usually last five to seven years.³⁰ These agreements might make it difficult for new ticketers to enter the market.

Federal Oversight of Event Ticketing

The federal government has taken action related to tickets for live events. The 114th Congress passed a law that specifically addresses event ticket sales—the Better Online Ticket Sales Act of 2016 (BOTS Act; P.L. 114-274). The act prohibits individuals from circumventing the ticketer’s “security measure, access control system, or other technological control or measure” to purchase more tickets than the amount permitted by the ticketer.³¹ It also prohibits the sale of any tickets obtained in this manner. The act applies to events open to the public in a venue with an attendance capacity exceeding 200 individuals. The BOTS Act is enforced by state attorneys general (AGs) and the FTC. In January 2021, the FTC brought its first cases against three ticket brokers for violating the act; the settlements the FTC reached with each of the defendants include permanent injunctions and civil penalties.³²

On June 15, 2023, President Biden met with several ticketers, including Live Nation Entertainment, SeatGeek, xBk, Pablo Center at the Confluence, TickPick, DICE, and Newport

³¹ P.L. 114-274; 15 U.S.C. §45c. The law allows the circumvention of technological controls or measures to be used to investigate an alleged violation or engage in research to identify flaws and vulnerabilities.

³² Federal Trade Commission (FTC), “Just in Time Tickets, Inc.,” cases and proceedings, last updated January 22, 2021, <https://www.ftc.gov/legal-library/browse/cases-proceedings/1823115-just-time-tickets-inc>; FTC, “Concert Specials, Inc.,” cases and proceedings, last updated January 22, 2021, <https://www.ftc.gov/legal-library/browse/cases-proceedings/1923196-concert-specials-inc>; and FTC, “Cartisim Corporation,” cases and proceedings, last updated January 22, 2021, <https://www.ftc.gov/legal-library/browse/cases-proceedings/1923195-cartisim-corporation>.

Festivals Foundation. At the meeting, the companies that did not provide all-in pricing announced a new voluntary commitment to do so.³³

On March 31, 2025, President Trump issued Executive Order (E.O.) 14254, titled “Combating Unfair Practices in the Live Entertainment Market.”³⁴ The E.O. directs the FTC to “rigorously enforce the [BOTS] Act,” to “take appropriate action ... to ensure price transparency at all stages of the ticket-purchase process,” and to evaluate and take action “to prevent unfair, deceptive, and anti-competitive conduct in the secondary ticketing market.” The E.O. also directs the U.S. Attorney General and the FTC to “ensure that competition laws are appropriately enforced in the concert and entertainment industry” and the Secretary of the Treasury and the U.S. Attorney General to ensure that ticket scalpers are operating in compliance with the Internal Revenue Code and other applicable laws. Finally, the E.O. directs the Secretary of the Treasury, U.S. Attorney General, and Chairman of the FTC to prepare a report describing the actions they have taken to implement the E.O. and submit it to the Assistant to the President for Economic Policy and the Director of the Office and Management and Budget.

Federal agencies enforce laws that are applicable to event ticketing and to other industries, as indicated in President Trump’s E.O. 14254. For example, the FTC and the Antitrust Division of the Department of Justice (DOJ) enforce antitrust laws, which prohibit certain conduct to protect competition;³⁵ the agencies split enforcement depending on the industry or market.³⁶ The FTC also prohibits unfair methods of competition and protects consumers by prohibiting “unfair or deceptive acts or practices in or affecting commerce” for certain sectors.³⁷

The following subsections discuss selected actions taken by the FTC and DOJ related to event ticketing. Other laws and regulations enforced by other federal agencies also can affect event ticketing. For example, the American Rescue Plan Act of 2021 (P.L. 117-2) amended certain third-party settlements that must be reported to the Internal Revenue Service (IRS)—individuals earning more than \$600 annually from ticket sales in the secondary market must report their earnings to the IRS.³⁸

³⁵ For an overview of antitrust laws, see CRS In Focus IF11234, *Antitrust Law: An Introduction*, by Jay B. Sykes.

³⁶ The Department of Justice (DOJ) has sole antitrust jurisdiction in certain industries, such as telecommunications, banks, railroads, and airlines. The FTC typically reviews cases that involve industries in which consumer spending is high, such as health care, pharmaceuticals, professional services, food, energy, and certain high-tech industries. For more information, see FTC, “The Enforcers,” <https://www.ftc.gov/advice-guidance/competition-guidance/guide-antitrust-laws/enforcers>.

³⁷ 15 U.S.C. §45(a).

³⁸ Individuals who resell their tickets for a profit are generally required to pay taxes on the gains. Tickets that are resold at cost or at a loss may need to be reported but are not taxed; tickets resold at a loss cannot be deducted as a loss from the individual’s income. For more information, see Internal Revenue Service (IRS), “IRS Provides Transition Relief for Third-Party Settlement Organizations; Form 1099-K Threshold is \$5,000 for Calendar Year 2024,” news release, November 26, 2024, <https://www.irs.gov/newsroom/irs-provides-transition-relief-for-third-party-settlement-organizations-form-1099-k-threshold-is-5000-for-calendar-year-2024>; and Andrew Lautz, “Navigating Tax Rules for Reselling Taylor Swift Tickets (and Other Tickets),” National Taxpayers Union Foundation, December 22, 2022, <https://www.ntu.org/foundation/detail/navigating-tax-rules-for-reselling-taylor-swift-tickets-and-other-tickets>.

Selected Actions by the Federal Trade Commission

On December 17, 2024, the FTC issued a trade regulation rule (i.e., a rule adopted under §18 of the FTC Act³⁹) on unfair or deceptive fees that affect event ticketing and short-term lodging.⁴⁰ The rule “specifies that it is an unfair and deceptive practice for businesses to offer, display, or advertise any price of live-event tickets or short-term lodging without clearly, conspicuously and prominently disclosing the total price.”⁴¹ It also prohibits misrepresentations about fees or charges in any offer, display, or advertisement.⁴²

In addition to taking the aforementioned legal action against three ticket brokers for violating the BOTS Act, the FTC has taken legal action on other event ticketers, including the following:

- In 2010, the FTC reached a settlement with Ticketmaster addressing allegations that Ticketmaster used its primary ticketing service to steer consumers to its secondary ticketing service, TicketsNow, by misleading consumers that primary tickets were sold out when tickets were, in fact, still available.⁴³
- In 2014, the FTC reached a settlement with TicketNetwork, Inc.—a secondary ticketer—and its marketing partners Ryadd, Inc. and SecureBoxOffice, LLC. The settlement addressed allegations that the companies used deceptive advertisements and websites to mislead consumers into thinking they were buying tickets from the original venue at face value.⁴⁴
- In 2025, the FTC and seven state AGs filed a complaint against Live Nation Entertainment and its subsidiary Ticketmaster. The complaint alleges that the companies violated the BOTS Act and the FTC Act by engaging in deceptive pricing tactics, such as displaying a deceptively low ticket price and subsequently charging much more.⁴⁵

³⁹ 15 U.S.C. §57a. For more information about the FTC’s authority to enact trade regulation rules, see FTC, “A Brief Overview of the Federal Trade Commission’s Investigative, Law Enforcement, and Rulemaking Authority,” revised May 2021, <https://www.ftc.gov/about-ftc/mission/enforcement-authority>; and CRS Legal Sidebar LSB10839, *FTC Considers Adopting Commercial Surveillance and Data Security Rules*, by Chris D. Linebaugh.

Department of Justice Lawsuits: Live Nation and Ticketmaster

In 2010, Live Nation and Ticketmaster merged to become Live Nation Entertainment. After reviewing the proposed merger,⁴⁶ DOJ and 17 state AGs simultaneously filed a complaint and a proposed agreement with the merging parties to resolve competition concerns raised in the complaint. According to the complaint, Ticketmaster was the largest primary ticketer and Live Nation was the world's largest promoter of live concerts, owning or operating over 75 live entertainment venues and having launched its own primary ticketing services in 2008 by licensing software from CTS Eventim AG.⁴⁷ DOJ estimated that Live Nation had obtained 16.5% of the market share in primary ticketing services, reducing Ticketmaster's market share from 82.9% to 66.4%.⁴⁸ Thus, DOJ alleged that the merger would substantially lessen competition in primary ticketing services for major concert venues, violating Section 7 of the Clayton Act, which prohibits mergers and acquisitions that would substantially lessen competition or tend to create a monopoly.⁴⁹

To address the competition concerns raised by the proposed merger, Live Nation and Ticketmaster, in a consent decree, agreed to do the following:⁵⁰

- Provide AEG, the second largest promoter in the United States at the time, the option of obtaining a fully paid license to Ticketmaster Host Platform, the software used by Ticketmaster to sell primary tickets, including the source code. If AEG chose to exercise this option, Ticketmaster would be required to also provide ticketing services on a website designed and branded for AEG on which AEG would determine the final ticketing fees charged to consumers or clients, beginning six months after the merger and for no more than five years.⁵¹ AEG chose not to exercise this option; it partnered with Outbox Technology to create its own ticketing service, AXS, in 2011.⁵²

⁴⁶ Live Nation Entertainment, "Live Nation and Ticketmaster Entertainment to Combine in Merger of Equals to Create World's Premier Live Entertainment Company," February 10, 2009, <https://www.livenationentertainment.com/2009/02/live-nation-and-ticketmaster-entertainment-to-combine-in-merger-of-equals-to-create-worlds-premier-live-entertainment-company/>.

⁴⁷ Complaint, United States of America et al. v. Ticketmaster Entertainment, Inc., and Live Nation, Inc., no. 1:10-cv-00139, January 25, 2010, pp. 7-8, <https://www.justice.gov/atr/case-document/file/513381/dl> (hereinafter United States v. Ticketmaster (2010) complaint). In 2008, Ticketmaster also acquired a controlling interest in Front Line Management Group Inc., an artist management group. While this is mentioned in the complaint and the competitive impact statement, it is not addressed in the consent decree. Live Nation Entertainment subsequently purchased the remaining equity stake of Front Line Management group (see PR Newswire, "Live Nation Entertainment Acquires Remaining Equity Stake in Front Line Management Group," February 7, 2011, <https://www.prnewswire.com/news-releases/live-nation-entertainment-acquires-remaining-equity-stake-in-front-line-management-group-115474169.html>).

⁴⁸ United States v. Ticketmaster (2010) complaint, pp. 10, 13.

⁴⁹ The term *major concert venues* is defined as the top 500 revenue generating venues in the United States reported by Pollstar, a third-party service that collects information on ticket sales. See United States v. Ticketmaster (2010) complaint, p. 10.

⁵⁰ For a discussion of how these consent decree provisions would address competition concerns raised by the merger, see Competitive Impact Statement, United States of America et al. v. Ticketmaster Entertainment, Inc., and Live Nation, Inc., no. 1:10-cv-00139, January 25, 2010, pp. 13-18, <https://www.justice.gov/atr/case-document/file/513376/dl> (hereinafter United States v. Ticketmaster (2010) competitive impact statement).

⁵¹ Final Judgment, United States of America et al. v. Ticketmaster Entertainment, Inc. and Live Nation, Inc., no. 1:10-cv-00139, July 30, 2010, pp. 8-10, <https://www.justice.gov/atr/case-document/file/513321/dl> (hereinafter United States v. Ticketmaster (2010) consent decree).

⁵² John Kwoka, "Case 2: Ticketmaster-Live Nation," in *The Antitrust Revolution: Economics, Competition, and Policy*, ed. John Kwoka and Lawrence White (Oxford University Press, 2014), pp. 88-89. AEG became the sole owner of AXS (continued...)

- Divest Paciolan—a ticketing platform that Ticketmaster licensed to venues to sell tickets through the venues’ own websites—to Comcast-Spectacor within 60 days of closing the merger.⁵³ Comcast-Spectacor was licensing Paciolan to provide primary ticketing services to venues, owned two major U.S. concert venues, and managed 15 other concert venues.⁵⁴
- Not retaliate against venues for contracting with another company for ticketing services and not condition or threaten to condition the use of Ticketmaster’s ticketing services for events promoted by Live Nation and vice versa. The consent decree specifies that these requirements do not prevent the companies from bundling their services or products or from competing in any part of the supply chain for live events.⁵⁵

DOJ filed a motion to modify the consent decree in 2020. DOJ alleged that Live Nation and Ticketmaster had violated the consent decree by “repeatedly condition[ing] and threaten[ing] to condition Live Nation’s provision of live concerts on a venue’s purchase of Ticketmaster ticketing services, and ... retaliat[ing] against venues that opted to use competing ticketing services.”⁵⁶ The companies denied DOJ’s allegations but agreed to a revised agreement that includes an extension of certain provisions of the consent decree until December 31, 2025, independent monitoring provisions, and clarifications on prohibited conduct.⁵⁷

On May 23, 2024, DOJ and AGs from 30 states and the District of Columbia filed a separate lawsuit against Live Nation Entertainment and Ticketmaster for violating federal and state antitrust laws.⁵⁸ The complaint was amended on August 30, 2024, with nine additional AGs joining the lawsuit.⁵⁹ Some changes made in the amended complaint include providing additional information on Live Nation’s relationship with Oak View Group, which manages venues,⁶⁰ and adding a section specifying the continued violations that the companies allegedly have engaged in since at least 2020.⁶¹

Both the initial and amended complaint allege that Live Nation Entertainment has engaged in anticompetitive conduct that violates the 2020 revised consent decree (e.g., retaliating against potential entrants, threatening and retaliating against venues that work with rivals) and anticompetitive conduct unrelated to the consent decree (e.g., acquiring competitors and competitive threats, locking out competition with exclusionary contracts, blocking venues from

using multiple ticketers, restricting artists' access to venues).⁶² The complaints propose ordering the divestiture of Ticketmaster and enjoining Live Nation from continuing to engage in the anticompetitive practices discussed in the suit, in addition to other remedies.⁶³

On March 9, 2026, Live Nation Entertainment announced that it had reached a settlement with DOJ without any admission of wrongdoing.⁶⁴ In the announcement, Live Nation stated it had agreed to open its amphitheaters to all promoters, allow promoters to decide how to distribute up to 50% of the tickets, cap ticketing service fees at 15%, divest 13 exclusive booking agreements with amphitheaters, provide both exclusive and nonexclusive ticketing proposals to all major concert venues, allow concert venues to distribute a portion of their tickets through other primary ticketers, and extend the 2020 modified consent decree for eight years. Live Nation also created a \$280 million settlement fund to address the states' damages claims. At least 26 states and the District of Columbia plan to continue the lawsuit, according to press releases from some state AGs.⁶⁵

Selected Legislative Options

Some Members of the 118th and 119th Congresses have introduced bills related to ticketing services for live events. The provisions in some of these bills aimed to increase protections for consumers by, for example, increasing transparency about the ticket price and the ticketer; other bills might have had broader effects on market dynamics. As of September 2024, multiple state legislatures have introduced or enacted legislation related to ticketing services, some of which require ticketers to implement provisions in proposed federal bills.⁶⁶

In the 119th Congress, the House passed H.R. 1402, the Transparency in Charges for Key Events Ticketing (TICKET) Act, and the Senate Commerce, Science, and Transportation Committee reported, as amended, S. 281, the Senate version of the TICKET Act. These two versions of the TICKET Act are nearly identical. They would (1) require ticketers to provide all-in pricing, certain disclosures, and refunds for canceled or postponed events, with some exceptions; (2) ban the sale of speculative tickets; and (3) require the FTC to provide a report on its enforcement of the BOTS Act.

All-In Pricing

All-in pricing can help consumers determine whether they wish to purchase the ticket before they have invested time going through the checkout process. Some studies have found that disclosing

⁶⁶ For a list of state legislation related to the ticketing industry, see "Event Ticket Sales 2024 Legislation," National Conference of State Legislatures, updated September 20, 2024, <https://www.ncsl.org/financial-services/event-ticket-sales-2024-legislation>.

fees separately may interfere with consumers' decisionmaking process and often results in consumers underestimating the total price.⁶⁷ All-in pricing also can make it easier for consumers to compare ticket prices between a primary and secondary ticketer and across secondary ticketers, when applicable.

Some ticketers and venue managers have stated that knowing fees up front would not affect consumers' purchasing decisions in the primary market and that it is only important that the fees are disclosed before the consumer completes the purchase.⁶⁸ Additionally, according to a 2018 GAO report, one manager, one promoter, and two artist advocacy groups raised concern that all-in pricing might give fans the incorrect impression that the artist is receiving all of the revenue from ticket sales, particularly if a breakdown of the price is not separately disclosed.⁶⁹

Requiring ticketers to provide all-in pricing would increase consumer transparency but might not affect ticket prices. Consumers typically do not have multiple ticketers to choose from in the primary market, and the ticketer determines the price with event organizers, venues, sports franchises, and other entities. All-in pricing might make it easier for consumers to compare prices, potentially influencing their purchasing behavior, which might affect ticketers' pricing behavior. One study found that disclosing fees at the end of the transaction increased the likelihood that a consumer would purchase the ticket.⁷⁰ The study also found that sellers in the secondary market were more likely to advertise higher-quality tickets (i.e., tickets for better seats) when fees were disclosed at the end of the transaction.⁷¹ Other factors, such as the reputation of the ticketer, may also affect consumers' purchasing behavior.

In the 119th Congress, the TICKET Act (H.R. 1402, as passed by the House; S. 281, as reported amended; and S. 430, as introduced), Lower Costs for Everyday Americans Act (H.R. 1768), and Junk Fee Prevention Act (H.R. 6430, S. 3367) would require ticketers to increase transparency about the total price of a ticket. These bills would require the total ticket price, including any fees, to be provided when the price is initially displayed—such as on any advertisement, promotion, and price list—and throughout the purchasing process.⁷²

The trade regulation rule on unfair or deceptive fees finalized by the FTC on December 17, 2024, requires ticketers to provide all-in pricing.⁷³ Some ticketers provided consumers the option to view all-in pricing from the beginning of a transaction for some events prior to the FTC's release of the final rule, potentially because of state laws requiring ticketers to provide all-in pricing and

⁶⁷ For example, see Alexander Rasch et al., "Drip Pricing and Its Regulation: Experimental Evidence," *Journal of Economic Behavior & Organization*, vol. 176 (August 2020), pp. 353-370, <https://doi.org/10.1016/j.jebo.2020.04.007>; and Glenn Ellison and Sara Ellison, "Search and Obfuscation in a Technologically Changing Retail Environment: Some Thoughts on Implications and Policy," in *Innovation Policy and the Economy*, ed. Josh Lerner and Scott Sterns (University of Chicago Press, 2018), pp. 1-25.

⁶⁸ GAO, *Event Ticket Sales*, p. 44.

⁶⁹ GAO, *Event Ticket Sales*, p. 45.

⁷⁰ Tom Blake et al., "Product Salience and Product Choice," *Marketing Science*, vol 40, no. 4 (July-August 2021), pp. 619-636, <https://doi.org/10.1287/mksc.2020.1261> (hereinafter Blake et al., "Product Salience and Product Choice").

⁷¹ Blake et al., "Product Salience and Product Choice."

⁷² The TICKET Act and Lower Costs for Everyday Americans Act list "tax" in the definition of *event ticket fee*, which means the total event ticket price would need to include taxes. The Junk Fee Prevention Act does not specify whether taxes would need to be included.

⁷³ FTC, "Trade Regulation Rule on Unfair or Deceptive Fees," December 17, 2024, <https://www.ftc.gov/legal-library/browse/federal-register-notice/trade-regulation-rule-unfair-or-deceptive-fees>; and FTC, "Trade Regulation Rule on Unfair or Deceptive Fees," 90 *Federal Register* 2066, January 10, 2025, <https://www.federalregister.gov/documents/2025/01/10/2024-30293/trade-regulation-rule-on-unfair-or-deceptive-fees>. For more information about the trade regulation rule, see "Selected Actions by the Federal Trade Commission."

the commitments made in the June 2023 meeting with President Biden.⁷⁴ Some associations, including the National Association of Ticket Brokers, reportedly support the final rule.⁷⁵

Requirements Related to Supply Chain

Requiring vertically integrated ticketers to provide a separate disclosure about the different components of the supply chain in which they operate might increase transparency for consumers. Some ticketers provide this information in terms of service or other legal documentation. Providing a separate disclosure might increase the likelihood that consumers would be aware that a ticketer is vertically integrated.

Knowing that a ticketer is vertically integrated might not affect a consumer's decision to purchase a ticket from the ticketer. Consumers might not have other options; a vertically integrated ticketer might be the only entity selling tickets to an event, particularly in the primary market. Additionally, consumers might find it more convenient to use a vertically integrated ticketer that provides both primary and secondary ticketing services, allowing consumers who purchased tickets in the primary market to resell them in the secondary market on the same platform.

It is unclear how implementing structural requirements, such as restrictions on long-term contracts between ticketers and venues, could affect ticketers. On the one hand, restrictions on long-term contracts could increase opportunities for ticketers to bid for contracts with venues, which might increase competition among ticketers. On the other hand, long-term contracts might provide ticketers assurance that they would likely obtain revenue from future events, which might help mitigate risks (e.g., event cancellations), particularly for ticketers that are unable to rely on other sources of revenue.

Regardless of the effect on competition among ticketers, it is unclear how structural requirements might affect consumers. Ticketers would be competing for bids from venues, promoters, sports franchises, or other entities involved with the event. Ticketers might, for example, offer these entities a greater share of the revenue from fees or a larger fixed payment, which ticketers might pass on to consumers through higher ticket fees. Ticketers also might offer to decrease fees for consumers, lowering the total ticket price.

Some bills in the 118th Congress would have created requirements related to the supply chain for event ticketing. For example, the BOSS and SWIFT Act (H.R. 3660, S. 2957) would have required a ticketer to provide a clear and conspicuous disclosure to consumers if it operates in both the primary and secondary markets. The Unlock Ticketing Markets Act of 2023 (S. 1321) would have prohibited a primary ticketer from entering an exclusive contract with a venue for an "excessive duration," which would be determined by the FTC. CRS is not aware of a bill introduced in the 119th Congress that contains a similar provision.

⁷⁴ Examples of state laws include Connecticut General Statute §53-289a, Georgia Code Annotated §43-4B-28(a)(3), and New York Arts and Cultural Affairs Law §25.23. For more information about the meeting with President Biden, see "Federal Oversight of Event Ticketing."

⁷⁵ Evan Weinberger, "Biden Junk Fee Rule Holds Staying Power Under Trump Populism," *Bloomberg Law*, December 18, 2024, <https://news.bloomberglaw.com/banking-law/ftc-junk-fee-rules-survival-hinges-on-trumps-promised-populism>.

Requirements for Tickets

Speculative Tickets

Some states require ticketers to inform consumers when they are purchasing a speculative ticket (i.e., a ticket that the seller has not purchased or obtained) and provide a full refund if they are unable to provide the ticket.⁷⁶ Some secondary ticketers state in their policies that they do not allow speculative tickets to be sold on their platforms.⁷⁷ It is unclear whether secondary ticketers can easily determine that a ticket is speculative and the extent to which this prohibition is enforced.⁷⁸

Disclosure and refund requirements for the sale of speculative tickets could allow consumers to determine whether they are willing to take the risk of purchasing a speculative ticket. In addition, a refund requirement could help mitigate some of that risk. Even with disclosure and refund requirements, however, the sale of speculative tickets might harm consumers. Some participants of an FTC workshop on the online event ticket marketplace asserted that state legislation requiring disclosure when selling a speculative ticket has been ineffective; venues continue to receive consumer complaints about cancelled speculative ticket orders that consumers thought were for actual tickets.⁷⁹ Some reports have also noted that speculative tickets can drive up prices in the secondary market, mislead consumers about when tickets are available, and result in additional financial losses for consumers (e.g., travel expenses for the event), among other potential harms.⁸⁰ Allowing the sale of speculative tickets might help individuals in the secondary market better assess potential demand for tickets, which might influence the number of tickets that ticket brokers try to obtain and resell.

In the 119th Congress, the TICKET Act (H.R. 1402, as passed the House; S. 281, as reported amended) and Lower Costs for Everyday Americans Act (H.R. 1768) would prohibit a ticketer from selling, offering to sell, or advertising a ticket if the ticketer does not already have the ticket. The bills would allow secondary ticketers to offer a service to obtain tickets on behalf of consumers if certain requirements were met, such as maintaining a clear separation between the service and event tickets and clearly disclosing that the service is not an event ticket and does not guarantee an event ticket. The Junk Fee Prevention Act (H.R. 6430, S. 3367) would also require ticketers to provide a clear and conspicuous notice if they do not possess the ticket and provide a full refund if they cannot provide the ticket advertised in a timely manner prior to the event.

Nontransferable Tickets

Nontransferable ticket policies that prevent tickets from being transferred to another individual can limit competition in the secondary market or effectively dismantle it, depending on the share of tickets that are nontransferable. Nontransferable tickets might benefit consumers by restricting

⁷⁶ For example, see Maryland Commercial Law Code §13-310.1 and New York Arts and Cultural Affairs Law §25.10.

⁷⁷ For example, see SeatGeek, “Terms of Use,” last updated May 2, 2024, <https://seatgeek.com/terms>, and StubHub, “Seller Policies,” <https://www.stubhub.com/legal?section=sp>.

⁷⁸ GAO, *Event Ticket Sales*, pp. 31-33.

⁷⁹ FTC, “*That’s the Ticket*” Workshop, staff perspective, May 2020, pp. 5-6, https://www.ftc.gov/system/files/documents/reports/thats-ticket-workshop-staff-perspective/staffperspective_tickets_final-508.pdf (hereinafter FTC, “*That’s the Ticket*” Workshop).

⁸⁰ NY State Senate, *Final Investigative Report*, pp. 24-26; NY State AG, *Obstructed View*, p. 26; and GAO, *Event Ticket Sales*, pp. 31-33.

the ability for ticket brokers to resell tickets for a profit in the secondary market.⁸¹ Consumers might be more likely to obtain tickets in the primary market because they would no longer be competing with ticket brokers, particularly for high-demand events. Consumers might be harmed if, for example, they could no longer attend an event and if the tickets were nonrefundable; consumers would be unable to recoup at least some of their money by selling the ticket in the secondary market. Some consumer advocacy groups argue that nontransferable tickets impinge on consumers' property rights, arguing that consumers should be able to do whatever they would like with a ticket after purchasing it.⁸² Additionally, limiting transferability could impose artificial price floors for events that are less popular than anticipated; it would prevent tickets from being resold at a price lower than the price in the primary market.⁸³

In the 118th Congress, the BOSS and SWIFT Act (H.R. 3660, S. 2957) would have prohibited primary ticketers from restricting or hindering the ability of a consumer to resell a ticket using a secondary ticketer. CRS is not aware of a bill introduced in the 119th Congress that contains a similar provision. Some states have enacted legislation prohibiting ticketers from selling nontransferable tickets.⁸⁴

Refundable Tickets

Some states require tickets to be refundable in certain situations, such as cancelled events or if the ticket does not conform to the description provided by the seller.⁸⁵ Some ticketers provide refunds for events that are cancelled or postponed, subject to policies set by the event organizer, while others provide refunds only for cancelled events.⁸⁶ Refunds issued by ticketers might include some fees but not others. For example, Ticketmaster issues a refund for the ticket price paid, any services fees, and any additional add-ons (e.g., parking); it does not refund expedited shipping charges, merchandise purchases, or other charges.⁸⁷ Ticketers for some events did not provide refunds when numerous cancellations and indefinite postponements of live events occurred because of the Coronavirus Disease 2019 (COVID-19), raising consumer protection concerns;⁸⁸ ticketers also faced unexpected revenue losses during that time.⁸⁹

A consideration may be whether ticketers should be solely responsible for providing refunds for a cancelled or postponed event. Some ticketers have made statements that suggest other entities, such as event organizers, determine the refund policy, particularly the amount of the refund that

⁸¹ NY State AG, *Obstructed View*, p. 36, and GAO, *Event Ticket Sales*, p. 37.

⁸² GAO, *Event Ticket Sales*, p. 39.

⁸³ FTC, *"That's the Ticket" Workshop*, p. 3.

⁸⁴ For example, see New York Arts and Cultural Affairs Law §25.30(1)(c), 2017 Connecticut Acts 17-28 (Reg. Sess.), and Virginia Code Annotated §§59.1-466.5 to 59.1-466.7.

⁸⁵ For example, Connecticut General Statute §53-289b, Florida Statute §817.36, Georgia Code §43-4B-28, New York Arts and Cultural Affairs Law §§25.01–25.35, and North Carolina General Statutes §14-344.1.

⁸⁶ Ticketmaster, "Standard Purchase Policy," Ticketmaster Help Center, <https://help.ticketmaster.com/hc/en-us/articles/10465798887953-Purchase-Policy>, and StubHub, "Postponed, Rescheduled, or Canceled Events," StubHub Support, <https://support.stubhub.com/articles/61000276300-postponed-rescheduled-or-canceled-events>.

⁸⁷ Ticketmaster, "Standard Purchase Policy," Ticketmaster Help Center, <https://help.ticketmaster.com/hc/en-us/articles/10465798887953-Purchase-Policy>.

⁸⁸ For example, see NY State Senate, *Final Investigative Report*, pp. 23-24, and Ben Sisario and Graham Bowley, "Angry Fans Say First the Concerts Were Canceled, Then the Refunds," *New York Times*, April 8, 2020, <https://www.nytimes.com/2020/04/08/arts/music/ticketmaster-refunds-coronavirus.html>.

⁸⁹ For example, Live Nation Entertainment estimates that in 2020, it had a \$1.7 billion operating loss, with a \$612 million operating loss in its ticketing services (Live Nation Entertainment, Inc., *Form 10-K for the Fiscal Year Ended December 31, 2020*, filed with SEC, March 1, 2021, pp. 2, 36, 39).

will be covered by other entities.⁹⁰ Determining how the costs associated with a cancelled or postponed event are to be distributed may be part of negotiations between ticketers and other entities in the supply chain. If ticketers are required to provide full refunds for a cancelled or postponed event, and other entities in the supply chain are unwilling to share the costs that are incurred regardless of whether the event occurs, ticketers may face greater risks and costs. This might incentivize ticketers to increase ticket fees to try to offset the costs associated with cancelled and postponed events.

In the 119th Congress, the TICKET Act (H.R. 1402, as passed the House; S. 281, as reported amended) and the Lower Costs for Everyday Americans Act (H.R. 1768) would require ticketers to provide a full refund, including any fees, if an event is cancelled or postponed, except when it is beyond the reasonable control of a ticketer, such as a natural disaster, civil disturbance, or otherwise unforeseeable impediment. They also would allow the ticketer to provide a replacement ticket in the same or comparable location, subject to the consumer's approval if the event has been postponed for more than six months.

Legislative Considerations

As Congress considers whether to pursue legislation related to event ticketing, some general considerations might include the following:

- **Whether legislation is needed.** Some ticketers might implement changes or undo previous actions in response to various factors, such as public scrutiny, market pressure, state laws, and actions taken by the federal government.
- **Whether actions by federal agencies would address some congressional concerns.** For example, the FTC's trade regulation rule on unfair or deceptive fees that affect event ticketing and short-term lodging may address certain congressional concerns about all-in pricing.
- **What changes Congress might implement in event ticketing and the potential effects.** Congress might consider whether to increase consumer transparency, incentivize ticketers to implement changes, or implement broader structural changes to the industry, among other potential legislative options. The effect of each option on event ticketing could differ and, depending on the specifics of the legislation, might have unintended effects. For example, requiring all tickets to be nontransferable and refundable might prevent ticket brokers from selling tickets in the secondary market with a significant markup, potentially lowering ticket prices for consumers. However, it might also result in an underground secondary market, which might have less federal oversight and potentially harm consumers. It might also be more difficult for event organizers to produce sold-out shows if numerous consumers ask for last-minute refunds.

⁹⁰ For example, see Vivid Seats, Inc., *Form 10-K for the Fiscal Year Ended December 31, 2023*, filed with SEC, March 8, 2024, p. 72, and Live Nation, *Form 10-K for FY ended December 31, 2020*, p. 3.
